Bibliographical Abbreviations

All bibliographical abbreviations used in this dictionary are listed below, following the typography used in the text of the dictionary. Broadly, *italic* type is used for periodicals and for reference works; roman type is used for anthologies, series etc. (titles of individual volumes are italicized).

Full bibliographical information is not normally supplied in the list below if it is available elsewhere in the dictionary. Its availability is indicated as follows: D – in the list of 'Dictionaries and encyclopedias of music'; E – in the list of 'Editions, historical'; and P – in the list of 'Periodicals'; these lists are located in vol.28. For other items, in particular national (non-musical) biographical dictionaries, basic bibliographical information is given here; and in some cases extra information is supplied to clarify the abbreviation used.

Festschriften and congress reports are not generally covered in this list. Although Festschrift titles are sometimes shortened in the dictionary, sufficient information is always given for unambiguous identification (dedicatee; occasion, if the same person is dedicatee of more than one Festschrift; place and date of publication; and name(s) of editor(s) if known). For fuller information on musical Festschriften up to 1967 see W. Gerboth: *An Index to Musical Festschriften and Similar Publications* (New York, 1969). The published titles of congress reports are generally reduced to their essentials, but sufficient information is always given for purposes of identification (society or topic; place and date of occurrence; journal issue if published in a periodical; editor(s) and publication details in unfamiliar cases). A comprehensive list of musical and music-related 'Congress reports' appears in vol.28. Further information can be found in J. Tyrrell and R. Wise: *A Guide to International Congress Reports in Music, 1900–1975* (London, 1979).

Library Sigla

The system of library sigla in this dictionary follows that used by Répertoire International des Sources Musicales, Kassel, as listed in its publication *RISM-Bibliothekssigel* (Kassel, 1999). Below are listed the sigla to be found; a few of them are additional to those published in the RISM list, but have been established in consultation with the RISM organization. Some original RISM sigla that have now been changed are retained here.

More information on individual libraries is available in the libraries list in volume 28.

In the dictionary, sigla are always printed in *italic*. In any listing of sources a national sigillum applies without repetition until it is contradicted.

Within each national list, entries are alphabetized by sigillum, first by capital letters (showing the city or town) and then by lower-case ones (showing the institution or collection).

A: AUSTRIA

Siglum	Library
A	Admont, Benediktinerstift, Archiv und Bibliothek
DO	Dorfbeuren, Pfarramt
Ed	Eisenstadt, Domarchiv, Musikarchiv
Ee	——, Esterházy-Archiv

A Note on the Use of the Dictionary

This note is intended as a short guide to the basic procedures and organization of the dictionary. A fuller account will be found in the Introduction, vol. l, pp.xix–xxix.

Abbreviations in general use in the dictionary are listed on pp.vii–xi; bibliographical ones (periodicals, reference works, editions etc.) are listed on pp.xiii–xviii and discographical abbrevations on pp.xix–xx.

Alphabetization of headings is based on the principle that words are read continuously, ignoring spaces, hyphens, accents, bracketed matter etc., up to the first comma; the same principle applies thereafter. 'Mc' and 'M'' are listed as 'Mac', 'St' as 'Saint'.

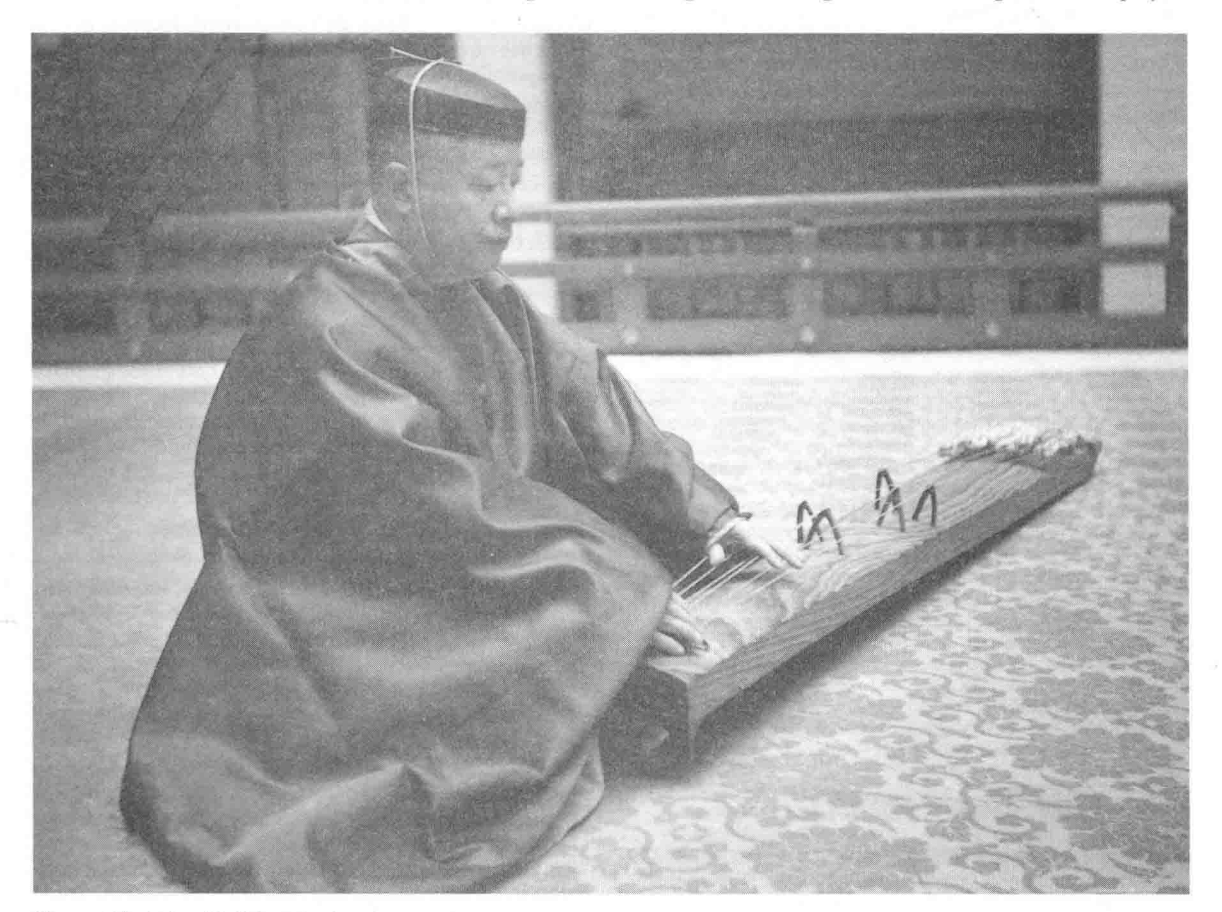
Bibliographies are arranged chronologically (within section, where divided), in order of year of first publication, and alphabetically by author within years.

Cross-references are shown in small capitals, with a large capital at the beginning of the first word of the entry referred to. Thus 'The instrument is related to the BASS TUBA' would mean that the entry referred to is not 'Bass tuba' but 'Tuba, bass'.

Signatures where the article was compiled by the editors or in the few cases where an author has wished to remain anonymous are indicated by a square box (□).

Work-lists are normally arranged chronologically (within section, where divided). Italic symbols used in them (like *D-Dl* or *GB-Lbl*) refer to the libraries holding sources, and are explained on pp.xxi–xxxvii; each national sigillum stands until contradicted.

Contents



W

[continued]

Wagon [yamato-goto]. Six-string long zither of Japan. Its name (*wa/yamato*, 'Japan'; *gon/goto*, 'zither') reflects its accepted status as Japan's only indigenous stringed instrument. Prior to the importation of the KOTO from China around the 7th century, the word *koto* designated this instrument. (For its uses and early history, *see* JAPAN, §§II, 2, IV, 2 and V, 3.)

The instrument has changed little since the 8th century. Made of paulownia wood, it resembles the *koto* in general shape but narrows gradually from the player's left to right (from about 24 to 15 cm); its length ranges from 188 to 197 cm and its thickness from 4 to 8 cm. The strings too converge towards the right, rather than remaining parallel as on the *koto*. Like the *koto*, the *wagon* has a movable tuning bridge for each string, is slightly convex laterally and is generally made of a hollowed-out upper part closed by a flat soundboard underneath. The *koto*-type bridges are made from the unpeeled forks of maple twigs, although now actual *koto* bridges are sometimes used. Setting it apart from all other Asian long zithers is the row of six projecting 'teeth' at the left end, which serve as attachment points for the strings (see illustration).

The tuning is non-consecutive (re-entrant): one typical tuning is d′–a–d–b–g–e from the string nearest the player.

Wagon (zither) played in Shintō ritual music

Two main playing techniques are combined, both unlike any traditional *koto* genre. In one, all six strings are strummed with an oval plectrum in the right hand, and the left hand then damps all but one string. In the other, the left-hand fingers also pluck strings. A string is never pressed to the left of the tuning bridge to raise its pitch.

The Shōsōin, Japan's 8th-century imperial treasure-house, contains eight *wagon*, basically like the modern instrument in all essentials. Several had feet, as on the *koto*, indicating that they were placed on the floor as is usual today; this contrasts with evidence from 5th- to 6th-century *haniwa* funerary sculptures and 8th-century poetic references, which indicate that the instrument was placed on the lap.

DAVID W. HUGHES

Wągrowicensis, Adam. *See* ADAM WĄGROWICENSIS.

Wahren, Karl Heinz (*b* Bonn, 28 April 1933). German composer. He studied the piano and double bass in Gera, Saxony (1951–3) before teaching the piano, composition and film music at the Berlin Conservatory (1953–61). He later studied composition with Josef Rufer at the Hochschule für Musik, Berlin (1961–5) and privately with Karl Amadeus Hartmann (1961–3). Wahren, whose primary compositional interests were timbre and orchestration, regarded the emotional quality of Hartmann's style as a productive contrast to Rufer's rationality. Other influences included Stravinsky, Messiaen, Schoenberg and jazz, particularly the music of Stan Kenton. In 1965 he founded the Gruppe Neue Musik Berlin. His honours include a fellowship from the Villa Massimo, Rome (1969–70), the sponsorship prize of the [West] Berlin Akademie der Künste (1978) and the Order of the Federal German Republic (1994).

WORKS
(*selective list*)

Stage: Fettklösschen (comic op, C. Henneberg, Wahren, after G. de Maupassant), 1975–6; The Pitcher (grotesque, P. Stripp), 1977; Der Unterhaltungskünstler (grotesque, Stripp), 1978; Der Cassernover, 1980; Goldelse (satirical op), 1987; Galathee, die Schöne (comic op, F. von Suppé, T. Höft), 1995

Orch: Pf Conc., 1966; Conc., fl, 12 insts, 1967; Wechselspiele, fl, pf, str, 1967; Pf Conc. [no.2], 1968; Du sollst nicht töten, 2 spkrs, chorus, orch, jazz ens, tape, 1969; Reversible, chbr orch, tape, 1969; Die Wirbelsäulenflöte, fl, chbr orch, 1972; Zum Selbstmord des Genossen Sergej Jessenin (V.V. Mayakovsky), spkr, chbr, orch, 1972; At This Moment, 1974–5; Ciculus virtuosus, wind qt, orch, 1976; Auf der Suche nach dem verlorenen Tango, 1979; Strawinsky lässt grüssen, vc, orch, 1980; Brandenburgische Revue, 1981; Theatermusik, chbr orch, 1981; Romantische Suite, vc, orch, 1985; Entführung aus dem Köchelverzeichnis, 1990; Les fleurs du mal et les fleurs de l'innocence, fl, b cl, str, perc, 1990; Ecce homo, 1993; Metropolis, 1994; Poéme de la mélancholie et de l'extasie, a sax, orch, 1997

Vocal: Passioni (G. Bruno), S, chorus, 3 insts, 1973; Weltunglück geistert durch den Nachmittag (Klabund, F. Wedekind, K. Schwitters, T. Brasch), vv, orch, 1977; Schon ist die Zukunft da (M. Koeppel), spkr, ens, 1978; Der Wettlauf (J. Ringelnatz), A, fl, 1979; Fernsehhymne (Koeppel), chorus, 1982; Der Tierbändiger (F. Kempner), sprk, pf, 1983; Magnificat mundus pacem, S, A, T, B, chorus, orch/str, 1984

Chbr: Pas de deux, fl, cl, bn, vn, 1961; Frétillement, fl, pf, 1965; Sequenzen, fl, pf, 1965; Conc., fl, 10 insts, 1968; L'art pour l'art, fl, vc, pf, tape, 1968; Permutation, 3 fl, 1968; Dionysos meets Apollo, str qt, 1970; Pas des deux, 2 fl, 1974; Soundscreen – Klangraster, fl, perc, 1975; Entrevue, fl, org, 1976; Hofmusik: Raumkomposition, 4 ens, elec, 1976; Circulus octo virtuosis, ens, 1977; En trois couleurs, ob, cl, bn, 1977; Tango appassionato, str qt, 1977; Messingklänge, 4 trbn, org, 1978; Tango noir, fl, cl, perc, vn, va, vc, db, 1978; Klangmeile: Raumkomposition, 40 perc, 1979; Nächtliche Tänze toscanischer Jungfrauen in florentinischen Gärten zur Blütezeit der Inquisition, vc, db, 1983 [arr. str qt, jazz ens, 1984]; Klangstrahlen, cl, trbn, perc, db, 1995; Sieben auf einen Streich, trbn, perc, pf, 1995; Verweilt im Augenblick, fl, xyl, vc, 1995; Five O'Clock Tea, brass ens, 1996; Gegenwärtig und vergangen, fl, perc, vc, 1996; Tango Bavaria, fl, cl, gui, vc, perc, 1996; Tango virtuoso, fl, cl, vib, str qt, 1996

Kbd (pf, unless otherwise stated): Sonatine, 1959; Kinder-Suite, 1967; Applikation, org, 1968; Tango Rag, 1978; Tango Rag, 1980; Bye-Bye Bayreuth, 1984, orchd 1985; Szenen einer Ehe (Tango desolato), 1997

Waigel. *See* WEIGEL family.

Wainert, Antoni. *See* WEINERT, ANTONI.

Wainwright. English family of musicians. Items in collections are often identified only as by 'Wainwright', making it impossible to make firm ascriptions. Except for hymn tunes, which include (in addition to those cited for (1) John Wainwright) 'Wainwright', 'St Gregory', 'Manchester' and 'Liverpool', the church music of the Wainwrights has long been out of use.

(1) **John Wainwright** (*b* Stockport, bap. 14 April 1723; bur. Stockport, 28 Jan 1768). Church musician and composer. About 1766 he published *A Collection of Psalm Tunes, Anthems, Hymns and Chants* which included the celebrated Christmas hymn *Christians Awake, Salute the Happy Morn*, based on a text by Dr Byrom of Manchester. This hymn, composed perhaps about 1750, had previously been printed in Caleb Ashworth's *A Collection of Tunes* (London, 1761). He also wrote the hymn tunes 'Stockport' and 'Yorkshire'. On 12 May 1767 he was named organist and singer of the Manchester Collegiate Church (later the Cathedral), where he had previously been deputy organist.

(2) **Robert Wainwright** (*b* Stockport, bap. 17 Sept 1748; *d* Liverpool, 15 July 1782). Organist and composer, son of (1) John Wainwright. In 1768, on his father's death, he was appointed organist of the Collegiate Church in Manchester. He took the BMus and DMus degrees at Oxford on 29 April 1774; for the occasion he composed a *Te Deum*. He moved to Liverpool, where he was organist at St Peter's from 1 March 1775. Besides church music and the oratorio *The Fall of Egypt*, performed in Liverpool in 1780 and revived in 1801, Wainwright produced instrumental music in the fashionable genres of the day: sonatas for keyboard with violin accompaniment, string duos and quintets. The quintets have a concertante cello in addition to the bass part; the parts are disposed much as in English keyboard concertos of the period,

alternating tutti and solo with all essential material doubled in the keyboard. Although competent and occasionally engaging, Wainwright's music is of little consequence.

WORKS

Sacred: The Lord is Risen, A Favourite Anthem, or Hymn, for Easter Day (London, *c*1770); TeD, 29 April 1774, *GB-Ob*; chants, *Lbl* Add.35024; The Fall of Egypt (orat), Liverpool, 1780, lost [incl. in sale catalogue for the library of 'a professor of music' (1813), *GB-Lbl*]

Other vocal: The Favourite Songs and Cantata sung by Mrs Weichsell at Vaux-Hall-Gardens, 1v, bc (London, *c*1778)

Inst: 6 Sonatas, hpd/pf, vn, op.1 (London, 1774); 6 Duetts, vn, vc, op.2 (London, *c*1775); 6 Quintettos, hpd/pf, 2 vn, vc, b (London, 1778)

(3) **Richard Wainwright** (bap. Stockport, 8 July 1757; *d* Liverpool, 20 Aug 1825). Organist and composer, son of (1) John Wainwright. He was organist at St Ann's, Manchester; in 1775 he succeeded his brother (2) Robert Wainwright at the Collegiate Church, and in September 1782 he again succeeded him at St Peter's, Liverpool. He subsequently spent about a decade at Preston, then went to St James in Toxteth Park, Liverpool, and finally resumed his position at St Peter's in 1813, remaining there until his death. In addition to a collection of hymns, he published several individual songs; the glee *Life's a bumper* was extremely popular.

WORKS

New Britania (song), 1v, bc (London, *c*1790); Our Topsails Atrip (song), 1v, bc (Liverpool, *c*1790), also for fl

Life's a bumper (glee), 3vv, in *The Harmonist* (London, *c*1805)

A Collection of Hymns, as originally composed for the children of Liverpool Blue Coat Hospital (Liverpool, 1809)

Other works in *GB-LVu*, *Mp*

(4) **William Wainwright** (*b* Stockport; *d* Manchester, 2 July 1797). Singer and instrumentalist, son of (1) John Wainwright. He was a singer at the Collegiate Church, Manchester, and a double bass player. For a time he had a music shop with Sidlow in Manchester.

RONALD R. KIDD

Waissel [Waisselius], **Matthäus** (*b* Bartenstein, East Prussia [now Bartoszyce, Poland], *c*1535–40; *d* ?Königsberg [now Kaliningrad], 1602). German lutenist and composer. He may have been the 'Matthaeus Waiszel Borussus' who matriculated at the University of Frankfurt an der Oder in the summer of 1553. On 1 February 1561 he matriculated at the University of Königsberg. Between 1565 and 1570 he made an extended journey through Germany and Italy, during which he received instruction in lute playing from leading exponents of the instrument. In 1573 he was appointed Rektor of the school at Schippenbeil (now Sępopol), East Prussia. From 1574 to 1587 he was the parish priest at Langheim, near Rastenburg (now Ketrzyn). In 1591 and 1592 he was at Frankfurt an der Oder supervising the printing of lute tablatures. He is believed to have lived finally at Königsberg, where he published a doctrinal *Summa* in 1596 and a Prussian chronicle in 1599. His son Matthäus became an instrumentalist at Riga in 1598 and was a member of the Hofkapelle at Königsberg from 1616 to 1619.

Waissel wrote for the six-course lute. His books of 1591 and 1592, which are the last publications in German lute tablature, include preludes, fantasias (including two from Benedict de Drusina's *Tabulatura* of 1556), German and Polish dances, passamezzos, saltarellos, galliards, pavans, paduanas, branles, Latin and German songs, madrigals, *napolitane* and chansons. In the 1573 book Waissel named Gallus Dressler, Christian Hollander, Lassus and Verdelot as composers of the vocal originals. He wrote in the 1591 book that many of the pieces in it were by renowned lutenists and that he had transcribed some of them from staff notation and others from French and Italian tablature. It cannot be determined which of the pieces in his tablatures are by Waissel himself. It may be supposed that he made the arrangements of the German and Polish dances, which are entirely homophonic. The suites of three or four dance movements are a notable feature of his tablatures. That of 1573 contains four in which a paduana in quick triple time is flanked by a passamezzo and a saltarello; the paduana and the saltarello are both derived, by rhythmic transformation, from the passamezzo. In the four four-movement suites the saltarello is followed by an independent *ripresa*. Two suites in the 1591 *Tabulatura* and two in the 1592 *Lautenbuch* contain a *ripresa* for the passamezzo as well as for the saltarello. The German dances in the 1592 *Tabulatura* can also be performed on two lutes tuned a 4th apart. The *Lautenbuch* contains instructions on tablature and performance which, according to Waissel, he based on the teaching of eminent lutenists with whom he had studied in Germany and Italy. He first illustrated numerous fingerings of chords of varying degrees of difficulty and then proceeded to demonstrate fingerings in runs and embellishments; he concluded by discussing right-hand technique.

WORKS

published in Frankfurt an der Oder

Tabulatura continens insignes et selectissmas quasque cantiones, testitudini aptatas, lute (1573[27]); ed. D. Benkő (Budapest, 1980)

Tabulatura allerley künstlicher Preambulen, auserlesener deudtscher und polnischer Tentze, lute (1591); 5 ed. W. Pudelko (Augsburg, 1925)

Lautenbuch darinn von der Tabulatur und Application der Lauten gründlicher und voller Unterricht, lute (1592); ed. D. Benkő (Budapest, 1984)

Tabulatura guter gemeiner deudtscher Tentze, 1, 2 lutes (1592)

Chorea, 2 fantasias, 3 preludes, intabulation of madrigal, *CH-Bu*, *D-DEl*, *LEm*

HANS RADKE/WOLFGANG BOETTICHER/CHRISTIAN MEYER

Waisvisz, Michel (*b* Leiden, 1949). Dutch composer, inventor of instruments and performer. He is self-taught. He became acquainted with electronics at the age of 16, when his father built a theremin. Since 1981 he has been director of the Studio voor Elektronische Muziek in the Netherlands.

In the mid-1970s he invented the *kraakdoos* (cracklebox), which is based on the instability of electronic circuits, usually considered undesirable. In 1981 he composed *De Slungels*, the first theatrical piece to be performed entirely by robots. Using these theatrical robots, Waisvisz studied both the relationship between man and machine and ways of improving the operation of electronic systems. An important step in this respect was the development of *De Handen* (hands), a sensitive instrument with which material stored in the computer can be played in real time. Variants on this same principle are *De MIDI-Conductor* (1985) and *Het Web* (1990). Waisvisz has also appeared with 'Lisa', a software instrument which is a live sampling system, controlled by *De Handen*.

The idea underlying these interactive instruments or 'gestural controllers' is that, just as with acoustic instruments, the physical action of making music must be visible to the public. Waisvisz has elaborated this theatrical side in appearances with diverse musicians and artists and in numerous music theatre pieces. In view of the great importance he attaches to interaction with the public and to a refined and dynamic quality of sound, he has on principle never published any work on CD.

JACQUELINE OSKAMP

Wait [wayt, wayte] (from old Fr. *gaite*, a watchman). The various meanings of the English forms refer only to England. (1) In the 13th and 14th centuries, a watchman at the gate of a town or castle. A horn was used to signal the approach of people requiring admittance, but the watchman was not a musician.

(2) A household watchman (*vigilis; vigilator* after the mid-14th century), perhaps named by analogy with (1). (A 'household' in this context was the group of people attending a king or noble.) By the late 13th century, at least in the royal households, the *vigilis* played a shawm – see (3). The royal *vigiles* were often minstrels, though not invariably so. Their watchman's duties are recorded in the *Black Book of the Exchequer*, from Edward IV's reign (1461–83): to pipe the watch each night, to check for fire and other dangers at every chamber door, and to attend new Knights of the Bath during their vigils in the chapel. In Tudor times and later, the *vigilatores* were apparently not musicians.

(3) An instrument of the shawm family; sometimes called 'wayte-pipe', it probably derived its name from the household wait (2) who played it. The seal of Edward III's *vigilator* John Harding (fig.1) clearly shows crossed shawms, but their size is not ascertainable. The wait is almost certainly the treble shawm, perhaps to be identified with the 'small pipes' of the *Black Book of the Exchequer*.

(4) Any player of the instrument (3), of whom the household *vigiles* were in the majority. In the 14th century the name is found attached to minstrels who were not *vigiles*, and also to huntsmen and other household servants; but from the early 15th century 'wait' was used only for household *vigilatores* and civic minstrels – see (5).

(5) A civic minstrel, permanently employed by a town. Town waits were equivalent to the German *Stadtpfeifer* and the civic pipers of Italy and elsewhere. At first they formed the standard loud band (fig.2) of two or three shawms and a slide trumpet (later, a sackbut); it was probably their use of the shawm that led to the name 'waits' being attached to them. They were not watchmen, and had no direct connection with (1) and (2); but at the time of their institution at Beverley (1405) and Norwich (1408) the term 'wait' was still applied to any player of the wayte-pipe (3).

1. Seal of Edward III's vigilator John Harding, showing crossed shawms, mid-14th century (GB-Lpro E101.385.4)

2. *Town waits in the 17th century: wash drawing attributed to Marcellus Lauron the elder, from 'London and Westminster: Prints and Drawings', late 17th century (Pepys Collection, GB-Cmc)*

By the late 15th century many towns employed waits, and those of the major cities were among the finest minstrels in the country. Their main function was to attend the mayor on ceremonial occasions, but in some towns they were allowed to play in the streets at night – apparently a lucrative occupation. During the 16th century their talents became more diverse: the London waits soon included singers and players of soft instruments such as viols, recorders and cornetti; several other corporations bought such instruments early in the following century.

During the 17th and 18th centuries the waits in some towns adopted particular melodies as their 'signature' tunes. By then minstrelsy had otherwise virtually died out, and the waits remained as something of an anachronism. Many were disbanded by their corporations for financial reasons during the Napoleonic wars, and few survived the Municipal Reform Act of 1835. In some places the name of 'waits', and even the players themselves, continued in the church bands of recorders, clarinets and bassoons.

(6) Christmas singers: their name is probably derived from (5), who sang and played Christmas songs during their nightly perambulations at that season. Christmas waits may sometimes have been professionals (the church bands), but were more usually amateurs.

RICHARD RASTALL

Waite, John James (*b* Gloucester, 1807; *d* Hereford, 29 Oct 1868). English teacher of sight-singing. A Congregationalist minister, Waite devoted his life to the improvement of psalmody in churches and chapels, a cause which led him, though totally blind from early manhood, to organize free classes and lectures attended by tens of thousands of working folk throughout the kingdom. His first efforts were made among his own congregation at Ilminster, Somerset; but at the invitation of the Rev. John Burder he instituted several classes in the neighbourhood of Stroud, Gloucestershire, well before John Hullah's more celebrated Singing School was opened at Exeter Hall, London, in 1841. By 1849 Waite claimed to have taught in 16 counties of England and to have travelled some 20,000 miles for the purpose.

Waite's system of teaching sight-singing was a development of Jean-Jacques Rousseau's cipher notation in which the degrees of the major scale are represented by the numerals 1 to 7; but, unlike Rousseau and his disciples, Waite always employed numerals in conjunction with ordinary notation, his supplementary figures appearing below the stave only to assist the beginner to calculate melodic intervals. Note values and differences of octave were indicated by the ordinary notation alone, and Waite's pupils were thus made familiar with standard notes from the outset. There was consequently less risk of their finding themselves incompetent when reading from standard notation at a later stage.

The textbook from which Waite's later classes were conducted was *The Hallelujah*, a hymnal with tunes marked in cipher notation, compiled jointly by Waite and H.J. Gauntlett, and published in 1852. (B. Rainbow: *The Land without Music: Musical Education in England, 1800–1860, and its Continental Antecedents* (London, 1967))

BERNARR RAINBOW

Waite, William G(ilman) (*b* Southbridge, MA, 3 July 1917; *d* New Haven, CT, 28 Feb 1980). American musicologist. At Yale he took the BA (1939), MusB (1940) and PhD (1951). He taught at Yale from 1947; in 1968 he was appointed Henry L. and Lucy G. Moses Professor of Music. He was director of graduate studies in music from 1959 to 1967 and served as chairman of the department from 1964. He specialized in the medieval period, particularly music of the 12th and 13th centuries. His dissertation *The Rhythm of Twelfth-Century Polyphony*, was the first extensive study of two-voice Notre Dame organa. Limiting his research to the Notre Dame school, Waite devoted the first half of his monograph to the rhythmic modes and their notation and then dealt specifically with the notation of Léonin's organum duplum; the second half of the book is a transcription of the *Magnus liber organi* from the manuscript *D-W* 677. Waite presented both provocative theories on rhythmic transcription and a modern edition of an important body of music. He is also a co-author of *The Art of Music* (1960), a history for students of the development of musical styles.

PAULA MORGAN

Waiteata Music Press. New Zealand music publisher. It was established in 1967 by Douglas Lilburn at the School of Music, Victoria University of Wellington. Lilburn's aim was to make inexpensive editions of New Zealand music available to conductors, performers, students and libraries worldwide. Preference was given to works which had recordings commercially available from Kiwi Pacific Records. Most publications are facsimile reproductions of composers' original manuscripts but since 1990 many new editions have been computer typeset. Jack Body was appointed editor in 1981, and by 1996 he had extended the catalogue to list more than 170 scores. More than 50 New Zealand composers are represented, including established figures such as Jack Body, Edwin Carr, Lyell Cresswell, David Farquhar, Douglas Lilburn, Annea Lockwood, Jennifer McLeod, Larry Pruden, John Rimmer, William Southgate, Anthony Watson and Gillian Whitehead, and younger composers such as Ross Carey, Gareth Farr and John Psathas.

ALISTAIR GILKISON

Wajnert, Antoni. *See* WEINERT, ANTONI.

Waka. Yoruba percussive and vocal genre. *Waka* has its origins in south-west Nigeria, where extensive Islamic conversion during the 19th century produced a variety of musical genres performed during key periods in the Muslim calendar. *Waka* (Hausa term for song or poem) was originally sung by women, accompanied by handclaps and beaten *seli* or *pereseke* (tin discs with metal rings attached), and remains one of the earliest of these genres. With the addition of drums in the Ijebu area, *waka* increasingly parted company with Islam by the 1920s, and with the involvement of professional musicians it became a more commercial and recreational music, devoid of religious purpose. The style continued to flourish informally over the next 40 years, until it assumed a new significance in the 1970s through the recordings of leading purveyors such as Madam Comfort Omoge and Salawa Abeni, the queen of *waka*.

With men confined to instrumental ensembles, the modern *waka* chorus is dominated by women under the direction of a female leader and supported financially by female patrons. The ensemble typically comprises five or six singers plus assorted Yoruba drums (*adamo* and *akuba*), the *sekere* (gourd) and occasionally the *agidigbo* (lamellophone). The style peaked in the 1980s, when Kubarat Alaragbo poached Abenis chorus and added the modern trap drum set to produce a hard, driven version of *waka* against which few other performers could compete. *Waka* remains a staple of modern Yoruba recreational music and survives as an African retention, played on three drums, as the *waka waka* music of Guadeloupe.

RONNIE GRAHAM

Wakabe, Michio. *See* MIYAGI, MICHIO.

Wakasugi, Hiroshi (*b* Tokyo, 31 May 1935). Japanese conductor. He studied singing and conducting at the Tōkyō Geijutsu Daigaku, 1956–63, and also received private instruction from Hideo Saito and Jean Fournet. While still a student he made his début with the Niki Kai production of *Le nozze di Figaro* in 1959, and quickly became recognized as an opera conductor, undertaking the Japanese premières of *Parsifal* (1967) and *Das Rheingold* (1969). In 1969 Wakasugi co-founded the Tokyo Chamber Opera Theatre, conducting Orff's *Die Kluge* and the medieval *Play of Daniel.* Meanwhile he also worked as a concert conductor, and in 1965 began an association with the Yomiuri Nippon SO, taking the orchestra on a European tour in 1971. Since then he has worked with many orchestras and opera companies in Japan, Europe and the USA, and served as principal conductor of the Yomiuri Nippon SO, 1972–5, the Cologne RSO, 1977–83, the Tonhalle Orchestra, Zürich, 1987–91, and the Tokyo Metropolitan SO, 1987–95. He was musical director of the Deutsche Oper am Rhein, Düsseldorf, 1981–6, and was appointed musical director of the Dresden Staatsoper in 1991 and of the Tokyo Chamber Opera Theatre in 1995. His broad repertory ranges from the early Baroque to contemporary music, and he has given the premières of many works, including Takemitsu's *Winter* (1971) and *Spirit Garden* (1994).

MASAKATA KANAZAWA

Walaciński, Adam (*b* Kraków, 18 Sept 1928). Polish composer and critic. He studied the violin with Eugenia Umińska at the State Higher School of Music in Kraków (1947–51) and took private composition lessons with Kisielewski (1952–5). Until 1956 he was a violinist with the Polish radio orchestra in Kraków. Thereafter he divided his time between composing and writing articles and criticism for the Polish musical press, in particular *Ruch muzyczny*, *Forum musicum*, *Studio* and *Dziennik polski.* From 1971 to 1987 he was chairman of the Kraków section of the Polish Composers' Union. He is a contributor to the *Encyklopedia muzyczna*, of which he became an editor in 1984, and in 1979 he was appointed lecturer in theory at the Kraków Academy (formerly the State Higher School of Music); he was made full professor in 1992. His music to the film *Faraon* was awarded the State Prize in 1966.

□

Walcha, Helmut (*b* Leipzig, 27 Oct 1907; *d* Frankfurt, 11 Aug 1991). German organist. He studied with Ramin at

the Leipzig Conservatory (1922–7), specializing in the organ, and worked as Ramin's assistant at the Thomaskirche in Leipzig (making his début in the city in 1924), before moving to Frankfurt in 1929. There he was organist at the Friedenskirche and, from 1946, at the Dreikönigskirche. His fame as a player quickly spread through international recitals (including those at the Royal Festival Hall, London, in the late 1960s), broadcasts and recordings. His blindness, far from being a handicap, enabled him to penetrate an inner world of sound to which Bach is the key, and he was one of the greatest European interpreters of Bach. Walcha's extraordinary technical powers were matched by a prodigious memory; his interpretations, marked by their objectivity and contrapuntal clarity, had absolute fidelity to the spirit as well as the letter of the composer's design (a quality for which they were criticized). He also adopted the maxims of the *Orgelbewegung* (Organ Revival) and rejected the overly mechanized Romantic organ. Yet his insistence on organs with mechanically controlled *Schleifladen* (slider chests) did not preclude a virtuoso element in his playing. He recorded all Bach's organ music: the toccatas, preludes and fugues, fantasias and trio sonatas partly at the St Laurenskerk, Alkmaar (organ by Schnitger), and partly at St Pierre-le-Jeune, Strasbourg (restored organ originally by J.A. Silbermann); and all the liturgically based works (chorale preludes and chorale variations) on the Strasbourg organ. He also recorded Bach's six sonatas for violin and harpsichord (with Henryk Szeryng), composed three volumes of chorale preludes, published organ versions of the *Art of Fugue* (including his own completion of the quadruple fugue) and the ricercare from the *Musical Offering* and edited Handel's 12 organ concertos. Walcha was a professor at the Musikhochschule in Frankfurt from 1938 to 1972, leading the church music department and conducting the Frankfurter Bach-Stunden.

STANLEY WEBB/GERHARD WIENKE

Walcker. German family of organ builders. The firm was founded in 1780 in Cannstadt by Johann Eberhard Walcker (1756–1843). His son Eberhard Friedrich Walcker (*b* Cannstadt, 3 July 1794; *d* Ludwigsburg, 2 Oct 1872) moved the business to Ludwigsburg (Württemberg) in 1820; he built a large new organ for the Paulskirche in Frankfurt (1829–33); and he gave the organ of the Stiftskirche in Stuttgart two pedal-boards, as part of his rebuilding of that instrument in 1834–45. He also built instruments for Ulm Minster (1841–56), the Music Hall, Boston (1863), and St Etienne, Mulhouse, Alsace (1865; highly esteemed by Albert Schweitzer). He introduced the *Kegellade* in 1842 (*see* ORGAN, §II, 8). After Eberhard Friedrich's death, the firm was run by his sons Heinrich, Fritz, Paul and Karl Walcker, and organs were built for the Saalbau, Frankfurt (1873), Riga Cathedral (from 1881), the Petrikirche, Hamburg (1884), the Neues Gewandhaus, Leipzig (1884), and the Stephansdom, Vienna (1886). The firm began using pneumatic action in 1889 and electro-pneumatic in 1899. In 1910 Paul Walcker took over the firm of Wilhelm Sauer in Frankfurt an der Oder; his most notable organ, made in 1913 for the Jahrhunderthalle, Breslau (now Wrocław), is now in Wrocław Cathedral.

Oscar Walcker (*b* Ludwigsburg, 1 Jan 1869; *d* Ludwigsburg, 4 Sept 1948), a grandson of Eberhard Friedrich, though interested in architectonic aspects of the organ, devoted himself primarily to representing the firm's business interests. Organs built under his direction include those at Reinoldikirche, Dortmund (1907–9), Michaeliskirche, Hamburg (1909–12), the musicology institute of the University of Freiburg (the 'Praetorius' organ, 1921, with Willibald Gurlitt), City Hall, Stockholm (1924–5), the Exposición Internacional Barcelona (1929), and the Kongresshalle, Nuremberg (1936). In 1916 Oscar succeeded Paul as manager of Wilhelm Sauer. He took an eager interest in the Alsatian *Orgelbewegung*, which advocated mixtures and mutations on all keyboards, and Spanish–French–English Swell boxes in preference to Venetian. He was made honorary DPhil for his work on the 'Praetorius' organ.

In 1948 Oscar's grandson Werner Walcker-Mayer (*b* Ludwigsburg, 1 Feb 1923) began running the firm. Under his management about 3200 organs had been built by the early 1980s, among them those for Ulm Minster; Zagreb Concert Hall; the Mozarteum, Salzburg; the concert hall for the Gesellschaft der Musikfreunde, Vienna; the Stiftskirche, Stuttgart; the Liszt Academy of Music, Budapest; the Bogotá concert hall; Trinitatiskirche, Berlin; Göttweig Abbey; Zagreb Cathedral; Methodist Temple, Evansville, Kentucky; First Baptist Church, Toccoa, Georgia; and the Chopin Academy of Music, Warsaw.

In 1965 Walcker-Mayer founded the Walcker-Stiftung für Orgelwissenschaftliche Forschung. He received the honorary doctorate from the Albert-Ludwigs University, Freiburg, in 1980. The firm moved from Ludwigsburg to Murrhardt in 1974 and again in 1986 to Hanweiler, Saarland. Large organ-building projects are carried out in collaboration with an independent sister-company based in Guntramsdorf, near Vienna. The Wilhelm Sauer Orgelbau was nationalized in 1972, but was returned to the Walcker firm in 1990, and a new workshop built in Müllrose. Four sons of Werner Walcker-Mayer, Klaus, Gerhard, Michael and Helmut, are working in the company.

HANS KLOTZ/T. WOHNHAAS

Walckiers, Eugène (*b* Avesnes-sur-Helpe, 22 July 1793; *d* Paris, 1 Sept 1866). French flautist and composer. He studied with Jean-Louis Tulou in Paris, where he met Henri Brod, Rossini and Reicha; the last mentioned is believed to have taught him harmony and composition. Walckiers's first compositions were for flute ensembles, and after 1820 he also wrote piano works, probably under the influence of Kalkbrenner, Thalberg and Heinrich Wilhelm Marchand, with each of whom he collaborated on a work for flute and piano. His works, the vast majority for flute (often with alternative settings) include 19 solos, 113 duos, 19 trios and 13 quartets. He also

made arrangements of themes from popular operas of the day. Some works specify flute with either piano or orchestra, but no orchestral parts survive. In his final years Walckiers also wrote string quintets and piano quintets (with cello and double bass, or two cellos), and some choral works. Walckiers also wrote a *Méthode de flûte* and a textbook *Principes élémentaires de musique*. 'His music', Richard Rockstro believed, 'abounds in such delightful freshness and such impulsive variety of sentiment that in its own peculiar style it is absolutely unrivalled'. All Walckiers's known works were published during his lifetime, and some first editions are housed in the Bibliothéque Nationale in Paris.

Waldensians. *See* REFORMED AND PRESBYTERIAN CHURCH MUSIC, §I, 4(i).

Walden String Quartet. American string quartet. Founded in 1934, its original members were the violinists Homer C. Schmitt (1911–80) and Bernard M. Goodman (*b* 1914), the cellist Robert H. Swenson (*b* 1910) and the viola player LeRoy Collins, who was replaced by five more players in the first 14 years of the group's existence before John C. Garvey (*b* 1921) became the viola player in 1948. All of the original members played in the Cleveland Orchestra, and the quartet was based initially in Cleveland, then at Cornell University (1946–7), and from 1947 at the University of Illinois. The quartet established itself as a leading promoter of new string music in the USA, while not neglecting the classical repertory. It gave premières of more than 100 works by American composers, including Ives, Bergsma, Creston, Quincy Porter, Piston, Imbrie and Elliott Carter (his String Quartet no.1, 1950–51, was dedicated to the group), performed the works of modern European masters including Hindemith, Bartók, Schoenberg, Kodály, Szymanowski and Martinů, and received critical acclaim for its technical prowess and unanimity of expression. William Magers replaced Garvey for a season in 1971 before Guillermo Perich (*b* 1924) took over the viola position in 1972; the violinist Maria Lloyd (*b* 1922) replaced Goodman in 1974. The quartet disbanded in 1979 after the retirement of the remaining founding members.

DAVID HUNTER

Walder, Johann Jakob (*b* Unterwetzikon, 11 Jan 1750; *d* Zürich, 18 March 1817). Swiss composer. He received instruction in music from Johannes Schmidlin and by at least 1774 was a keyboard teacher in Zürich, where he was also a cellist in the collegium musicum. In 1785 he went to Grüningen as a government official, and from about 1790 became ever more involved in political duties, serving as a member of the government (from 1799), president of a district tribunal (1807–14) and chief justice of the canton (from 1814). A composer of local importance, Walder was a follower of the Berlin lied school together with Johann Heinrich Egli (with whom he published several lied collections), but he also fostered choral singing. His *Anleitung zur Singkunst* (1788), containing over 50 songs with continuo, was important in the development of school music and was the most successful singing method in German-speaking Switzerland well into the 19th century.

WORKS

all published in Zürich

Der lezte Mensch (cant., L. Meister), vs (*c*1777)

Songs: [21] Gesänge zum Clavier (1780); Sammlung [78] christlicher Gesänge, 4vv (1791); [23] Lieder zum gesellschaftlichen Vergnügen (1804); [4] Schweizerlieder (Meister), pubd serially in Neujahrsgeschenke für die Zürchersche Jugend der Musikgesellschaft auf der deutschen Schule (1780–83); collab. J.H. Egli and others in contemporary anthologies

Pedagogical: Anleitung zur Singkunst (1788, 6/1828)

Waldis, Burkhard [Burchard, Burckart, Burkard] (*b* Allendorf an der Werra, *c*1490; *d* Abterode, *c*1557). German theologian, Protestant poet and hymn writer. Born of a 'comfortably and honorably ancient family' (Sessions, 129), he entered the Franciscan monastery in Riga by 1522. He was sent to Rome in 1523–4 with a delegation from the monastery to elicit support against the rising Reformation in Latvia; while passing through Nuremberg on his return he was imprisoned with fellow monks for several weeks. This experience, together with an unfavourable impression of the church and the secular behaviour of the priests received during his stay in Rome, led him to leave the order and become a Lutheran. He married and became a tinsmith, which led to extensive travel. From 1536 to 1540 he was imprisoned and tortured by the Teutonic Knights for his active part in promoting the Reformation and released on the intervention of Philipp of Hesse. On 23 October 1541 Waldis matriculated at Wittenberg University and in 1544 he was ordained pastor and provost at Abterode, a post he held until 1556 when illness forced his resignation.

Waldis was widely recognized as a poet. Particularly well known were his *De Parabell vam vorlorn Zsohn* (Riga, 1527; ed. G. Milchsack, Halle, 1881), a spiritual *Festnachtspiel* in Low German for Shrove Tuesday, launching a polemic against the papacy, which has been considered one of the most significant works of 16th-century dramatic literature; *Der Esopus* (Frankfurt, 1548), a collection of 400 animal fables dealing perceptively with contemporary or social conditions that continued to be included in books of fables into the 18th century; a contrafactum of *Ich stund an einem Morgen*; and a translation into German (1554) of Naogeorg's *Regnum papisticum*. In 1542 he wrote satirical poetry for Philipp of Hesse against antagonists of the Reformation.

Waldis provided many hymns for the new church. In *De Parabell vam vorlorn Zsohn* he included Luther's *Nun bitten wir den Heiligen Geist, Jesus Christus, unser Heiland* and *Aus tiefer Not* as integral parts of the play (sung by all), and he provided rhymed versions of various

psalms and translations of several Latin hymns for use at the end of the prologue, at the end of the second act, and near the close of the final act. In 1537 he assisted Andreas Knöpken with a second edition of a hymnbook for Riga. His most extensive and significant contribution, however, was *Der Psalter, in newe Gesangsweise und künstliche Reimen gebracht* (Frankfurt, 1553), a translation of the entire Psalter into metrical verse made during his imprisonment at Riga. Waldis used Minnesang verse structures and provided them with original melodies. In 1523 he had met Hans Sachs, who was very much impressed with the quality of Waldis's work and borrowed one of Waldis's hymns to use in a work of his own. Five of the psalms appeared in two versions, and three of them shared melodies with others, making a total of 155 hymns and 152 melodies. Both the texts and the melodies are of a high standard, yet the hymns rarely appeared in contemporary hymnbooks. They were, however, influential on the hymn writing of Vulpius, and Heugel set the melodies in 156 compositions for four and five voices in 1555–70.

VICTOR H. MATTFELD

Waldkirch, Henrik (*d* Copenhagen, 1629). Danish music printer. He was the first Danish music printer of any importance and probably a member of a Danish printing family in Schaffhausen, where he may have been born. In 1586 he was granted a privilege to print a Danish Bible, and in 1598 he established with Mads Vingard a printing business at Copenhagen University, continuing on his own when Vingard died in 1623. Waldkirch visited the Frankfurt book fairs and took publications from Nuremberg houses to Denmark. The bulk of the 25 musical titles that can be assigned to Waldkirch (listed in Davidsson) is made up of psalm books and other liturgical volumes in Danish. He also published music by Borchgrevinck, Brachrogge and Pedersøn, who were working in Venice at that time, and Hans Kraft's treatise, *Musicae practicae rudimenta* (1607).

STANLEY BOORMAN

Waldstein, Ferdinand Ernst Joseph Gabriel, Count von Waldstein und Wartenberg zu Dux (*b* Dux [now Duchcov], 24 March 1762; *d* Vienna, 29 Aug 1823). German musical patron of Bohemian birth. He was the youngest of four sons of the 11 children of Count Philibert Waldstein und Wartenberg zu Dux and Maria Anna Theresias, born Princess von Liechtenstein. In 1787 at Ellingen he began his novitiate in the Teutonic Order, transferring in early 1788 to the court of Elector Max Franz in Bonn and receiving his order there in June. He served on diplomatic missions between 1788 and 1792 (Mann).

Waldstein became acquainted with Beethoven through the circle of the von Breuning family and was an invaluable supporter of the composer until the early 1790s; Beethoven's childhood friend Franz Wegeler called him 'Beethoven's first and in every respect most important patron, his Maecenas'. Waldstein was a gifted improviser on the piano and was credited by Wegeler with developing Beethoven's ability to improvise variations. About 1792 Beethoven composed a set of piano variations for four hands on a theme of Waldstein (WoO67), and in 1791 his *Ritterballett* WoO1 was performed with an attribution to Waldstein. When Beethoven left for Vienna in 1792, his close friends gave him an autograph album; and Waldstein's inscription ends: 'With the help of assiduous labour you shall receive: *Mozart's spirit from Haydn's hands*'. This close friendship was most valuable to Beethoven in establishing himself in Vienna.

From 1795 to 1807 Waldstein served in the British army as a field marshal, in 1809 he returned to Vienna, but did not resume his friendship with Beethoven. In 1812 he resigned from the Teutonic Order and married Countess Isabella Rzewuska. He was erudite, a gifted linguist, and at ease at court, but he was reckless, mercurial and financially imprudent. He went bankrupt in 1816, and died a pauper. Waldstein's extant compositions (most in *D-BNba*) include a Symphony in D (ed. in Denkmäler rheinischer Musik, i, Düsseldorf, 1951), three solo cantatas and two songs.

ELLIOT FORBES/WILLIAM MEREDITH

Waldteufel. A type of friction drum. *See* STRING DRUM.

Waldteufel [Lévy], **(Charles-)Emile** (*b* Strasbourg, 9 Dec 1837; *d* Paris, 12 Feb 1915). French composer, pianist and conductor. His father Louis (1801–84) and brother Léon (1832–84) were violinists and dance composers, and his Bavarian mother was a pianist. In 1842 the family moved to Paris, where his father's dance orchestra gained prominence in Society circles. Emile studied the piano with his mother and Joseph Heyberger, and in December 1853 he was formally admitted to the Conservatoire in Adolphe Laurent's piano class, where his fellow students included Massenet. For a time he earned a living testing pianos for the manufacturer Scholtus, besides giving piano lessons and playing at soirées. He was appointed court pianist to Napoléon III in 1865 and conductor of the state

balls the following year, directing the music in the Tuileries, at Biarritz and at Compiègne. He took part in the war of 1870–71 as a volunteer and in 1871 he married the singer Célestine Dufau. After the war his recognition remained restricted to French society, until in October 1874 he was introduced to the Prince of Wales (later Edward VII). This led to the hugely successful launch of his waltz *Manolo* in London and to long-term publishing contracts (1875–88) with the London firm of Hopwood & Crew. From this time dated a succession of internationally acclaimed dances, including the waltz *Les patineurs* (1882). He declined an invitation to New York in 1882 but in November 1885 conducted at Rivière's Promenade Concerts in London and in 1889 appeared in Berlin. He conducted at the Opéra Balls in Paris in 1890–91 and was in charge of the music at presidential balls at the Palais de l'Elysée until his retirement in 1899. Waldteufel remains the most widely popular waltz composer after the Strauss family; though his works lack the Strausses' rhythmic and melodic variety, they possess a distinctive poetic grace and charm.

WORKS

Selective list from *c*300 dances published in Paris and/or London for pf; most also appeared in orch versions. Dates indicate publication or (in a few cases where publication was delayed) preparation of plates. The standard opus numbering, begun retrospectively in 1883 by Litolff, is incomplete and chronologically misleading.

Over 180 waltzes, incl. Joies et peines (1859); Mello (1866); Vergissmeinnicht (Myosotis) (1867); Manolo (1873); Bien aimés (1876); Violettes (1876); Mon rêve (1877); Pomone (1877); Toujours ou jamais (1877); Les sirènes (1878); Très jolie (1878); Pluie de diamants (Pluie d'or) (1879); Amour et printemps (1880); Dolorès (1880); Je t'aime (1882); La barcarolle (1882); Les patineurs (1882); Sur la plage (1883); Estudiantina (1883) [after P. Lacome]; The Grenadiers, valse militaire (1886); España (1886) [after Chabrier]; Acclamations (1888); Tout Paris (1889); Fleurs et baisers (1904)

Over 70 polkas, mazurkas, galops, gavottes and marches, incl. Prestissimo, galop (1877); Bella bocca (Bonne bouche), polka (1879); Minuit, polka (1880)

Babiole, pizzicati [for strings] (1907)

*c*20 songs, chamber and pf pieces

ANDREW LAMB

Walenn, Herbert (*b* London, 25 June 1870; *d* London, 10 Feb 1953). English cellist and teacher. He studied at the RCM, at the RAM with Edward Howell and at the Hochschule für Musik in Frankfurt with Hugo Becker, and subsequently toured Germany as a soloist. He made his London début in 1902, and played frequently at the Saturday Concerts at St James's Hall. He was a distinguished chamber music player and was for four years a member of the Kruse Quartet; he later formed his own quartet with his brother Gerald as leader. In 1919 he founded the London School of Violoncello, where his pupils included Boris Hambourg, Zara Nelsova, William Pleeth and Barbirolli. Casals wrote his *Sardana* for 16 cellos for a performance at the school in 1927. Walenn later taught at the RAM. Through his teaching he made a very significant contribution to the development of cello playing in Britain. (*CampbellGC*)

MARGARET CAMPBELL

Wales. A principality in the United Kingdom of Great Britain and Northern Ireland. Wales was a separate country from 613 to 1282, when it came under English rule. It is largely a highland area with a traditionally pastoral economy, although in parts of lowland south Wales agriculture is also important, and investment from outside Wales brought new industries to the principality in the late 20th century. The population includes descendants of various pre-Celtic, Celtic and other stocks, and about a quarter are Welsh-speaking. As a result, the Welsh are actively conscious of their Celtic heritage, and this is reflected in their music and in the late survival of archaic forms and instruments. Despite a long history of traditional music, it was not until the 19th century, when the development of coalfields in north-east and south Wales created dense urban centres, that art music, outside the church, began to develop.

I. Art music. II. Traditional music.

I. Art music

1. To *c*1850. 2. From *c*1850 to 1945. 3. Since 1945.

1. TO *c*1850. After the long and slow alignment of the Celtic Church with Rome, the Latin period was fully established by Norman times (11th century) and it continued until the Reformation. Archbishop Peckham (*Injunctions*, 1284) charged the clergy to observe the canonical house as before and to celebrate Mass with fitting reverence *cum cantu*. At St David's, Wales's foremost cathedral, Bishop Adam Houghton ordered (*c*1382) that the master and seven priests 'live together in a collegiate manner and perform the Divine Office according to the Salisbury Missal'. Song scholars and church music flourished until the Reformation, but on coming to the English throne the Tudors, though of Welsh descent, opposed the continuation of a separate Welsh culture and language (in the Act of Unification in 1536). Welsh musicians followed the Welsh nobility to England to live and speak in the English way, and this inevitably weakened the partnership between music and the Welsh language. The names of Welsh minstrels at the English court appear in account books of the late 15th and 16th centuries and Welsh names occur among the Gentlemen of the Chapel Royal, singing men and children. Elway Bevin was a Gentleman Extraordinary of the Chapel Royal in 1605. Composers with Welsh names contributed to the polyphonic tradition in England: they included Sion Gwynedd (*fl* mid-16th century) and Philio ap Rhys (*fl* 16th century) 'off saynt poulls in london', who composed an organ mass. Thomas Tomkins (1572–1656), though of Cornish parentage, was born at St David's.

In Wales itself, church music was virtually destroyed when the monasteries, priories and chantries were dissolved in 1536, 1538 and 1547 respectively. Not even a fragment of musical manuscript remains in the cathedral libraries of Wales. Unlike England, Wales was slow in responding to the Reformation spirit and only in 1621, some 80 years after the metrical psalms were first introduced in England, was the first Welsh translation of the *Book of Common Prayer* published, the work of Edmund Prys: it contained 12 English psalm tunes. In England in the same year Thomas Ravenscroft published

The Whole Booke of Psalmes, which purported to contain a few Welsh tunes. But the poverty of the Church, and the disinclination of the Welsh-speakers to adopt the Reformed faith, kept its music at a low ebb for a long time. Despite the encouragement given to music and organ playing by the Six Articles of 1539, the choir of Llandaff Cathedral was suppressed and its organ destroyed as late as 1691.

In about 1735 a native Methodism arose among Welsh-speaking preachers of the established Church. The movement appealed particularly to the Welsh-speaking peasants and became known as the Methodist Revival; official separation from the Church followed in 1823, and by 1880 four-fifths of the population was nonconformist. Inspired by Wesley and Whitefiled in particular, the revivalists introduced congregational singing in about 1740. In response to appeals to compose hymns, William Williams (Pantecelyn) published his *Aleluja, neu Casgliad o hymnau* ('Alleluia, or Collection of hymns', 1744) and *Selection of Psalm- and Hymn-Tunes* (1787); the music for both consisted mostly of popular English tunes. Welsh folktunes were later adapted and used; this was an important turning-point, for traditional musical values were again finding a place in Welsh religious life. Of some 40 of the more important hymnbooks published between 1816 and 1867, most have both Welsh and foreign tunes. In the 18th century progress in propagating hymns was slow; few could read music, and performance was restricted to unison singing. But during the 19th century better tunes were found, harmonized versions were published and, from about 1862, taught in Sol-fa notation in the chapel schools. Singers at *cymanfa ganu* (hymn-singing festivals) began including oratorio choruses, such as those of Handel and Mendelssohn, in their repertory, and Welsh chapels rapidly became the focus for the musical life of the community.

2. From *c*1850 to 1945. Musical life in Wales flourished during the Victorian era, though mainly at an amateur level. The industrial communities of south Wales in particular supported the formation of large mixed-voice choirs partly fuelled by religious revivalism. The acknowledged pioneer in the field was Ieuan Ddu, who established a fine choir in Merthyr Tydfil about 1840. Choirs were also driven by a competitive spirit which found an outlet in much-prized visits to London's Crystal Palace and in the annual meetings of the National Eisteddfod. The latter fostered competitions in all fields, including composition, and a number of Welsh composers became proficient and quite ambitious. With oratorios of Handel, Haydn and Mendelssohn established as staple fare, 'Tanymarian' wrote the first Welsh oratorio, *Ystorom Tiberias* ('The Storm at Tiberia'), in 1868 and Joseph Parry the first Welsh opera, *Blodwen*, in 1874. Solo singing, both public and domestic, encouraged a huge output of songs, many of which (particularly some by Parry and R.S. Hughes) have remained popular.

There was also in the mid-19th and early 20th centuries a considerable amount of orchestral and instrumental activity (mostly amateur), particularly in south Wales, and by the last decades of the 19th century the anual large-scale oratorio and cantata performances at the National Eisteddfod were usually accompanied by a full symphony orchestra. Welsh composers whose works were performed in these concerts, and at the triennial festivals held in Cardiff from 1892 to 1910, included David Evans, Daniel Protheroe and David Jenkins, as well as Joseph Parry. But even earlier, in the late 1830s, the Crawshaw family had established at Cyfarthfa Castle, near Merthyr Tydfil, the first British brass band. This included among its members some who were acknowledged as Europe's finest instrumentalists, and they performed transcriptions of some of the most recent European works (including Verdi overtures) even before they reached London. New compositions, such as Parry's impressive overture *Tydfil*, were also encouraged.

Parry's death in 1903 marked the end of the Victorian era in Welsh music, and a new generation of composers began looking towards wider horizons and to react healthily against Parry's legacy. The University of Wales started awarding its own music degrees in 1905, and in 1912 conferred a BMus degree on the most interesting of these young composers, Morfydd Owen (1891–1918). The pivotal figure in Welsh musical life in the years immediately following the First World War was Walford Davies (1869–1941). His appointment to the Gregynog chair of music at Aberystwyth in 1919 coincided with the setting-up of the University Council of Music, which he headed and which transformed musical life for thousands of people throughout the principality. A notable innovation was the creation of resident chamber ensembles at the university colleges of Cardiff and Aberystwyth (the first of their kind in Britain). Davies left Aberystwyth in 1926 but continued to be influential in Welsh musical affairs, partly through his connection with a remarkable series of festivals at Gregynog Hall in Montgomeryshire, which flourished until World War II and brought to Wales Elgar, Holst, Vaughan Williams, Adrian Boult and other distinguished musicians.

Davies also attempted, through the University Council of Music, to establish a national orchestra for Wales, and in 1928 a concert by an orchestra of 70 players, conducted by Sir Henry Wood, was given in the City Hall, Cardiff, and broadcast by the BBC. An appeal for financial support from local authorities was unsuccessful, however, and the orchestra was disbanded in 1931. When Wales was granted regional broadcasting status in 1936, the BBC took up the reins and an ensemble was established which set the foundations of the present BBC National Orchestra of Wales. During this period several composers were active in both vocal and instrumental music, notably David de Lloyd (1883–1948), J.R. Heath (1887–1950), Cyril Jenkins (1889–1978), T. Hopkin Evans and Bradwen Jones (1892–1970); David Vaughan Thomas (1873–1934), however, is the only composer of this generation whose music retains a secure place in the repertory. These were also the years when the collecting of Welsh folk-music began to have an impact on the music of Welsh composers.

3. Since 1945. The end of World War II marks a major turning-point in the development of Welsh music. In 1946 the Welsh National Opera was established in Cardiff by Idloes Owen, and the National Youth Orchestra of Wales, under Clarence Raybould, began its work as an invaluable training-ground for generations of instrumentalists and composers. In 1947 the first International Eisteddfod, a brainchild of the scholar and composer W.S. Gwynn Williams, was held at Llangollen, and in the same year the Swansea Festival was inaugurated in the newly-built Brangwyn Hall. Swansea was the home of Daniel Jones (1912–92), one of a number of gifted professional

composers who revitalized Welsh musical life in the 1940s. Another was Grace Williams (1906–77), whose career was assisted by the presence at the BBC of two active composers, Mansel Thomas (1909–86) and Arwel Hughes (1909–91). Best remembered as composers for the vocal miniatures, Thomas and Hughes expended much of their practical efforts on behalf of their contemporaries, most notably Alun Hoddinott (*b* 1929) and William Mathias (1934–92), the only Welsh composers so far to have found international success. Two notable song-writers who recognized that their gifts were best suited to a small canvas were Meirion Williams (1911–76) and Dilys Elwyn-Edwards (*b* 1918), whose best works are likely to endure as long as the Welsh language itself.

In 1954 the Guild for the Promotion of Welsh Music was established by John Edwards to encourage audiences and performers to explore the new repertory; it also published a valuable journal, *Welsh Music*. David Wynn (1900–83) was one of the most prominent composers supported by the Guild; his pupils Robert Smith (1924–99) and Mervyn Burtch (*b* 1929) have also been closely associated with the Guild's activities. In the late 1950s the British Council established a Welsh committee which later became the Welsh Arts Council, eventually gaining autonomy from London and, in 1994, its own royal charter. It has done much to promote Welsh music, notably by commissioning over 1000 new works, issuing recordings and attracting British and foreign orchestras to Wales with a remit to perform works by Welsh composers. It has also supported music festivals at Llandaff, the Vale of Glamorgan, Cardiff, Fishguard, St Aspah and St David's Cathedral, and in 1973 it entered into an agreement with the BBC to expand the BBC Welsh Orchestra to full symphonic strength. This was finally achieved by 1987, and in 1995 the orchestra was renamed the BBC National Orchestra of Wales. From 1974 the WNO, too, was consolidated as a fully professional company with its own full-time chorus and orchestra; it has since achieved wide acclaim as one of the finest British opera companies.

Music education also took enormous strides after World War II. The Cardiff College of Music and Drama, founded in 1949, was later expanded to form a national conservatory. Music departments in the University of Wales at Cardiff and Bangor also entered into a period of expansion and developed a higher profile. The Gregynog Chair at Aberystwyth, filled by the composer Ian Parrott from 1950 to 1983 and then by David Wulstan, was left unoccupied in 1987 when the department closed for full-time study, but musical life in the college has continued to flourish. In 1976 a Welsh Music Information Centre was established jointly by University College, Cardiff, and the Welsh Arts Council to assemble an archive of Welsh music which could then be promoted effectively. The centre was suspended in 1997, but the intention was formed to re-open it in 2002 as part of a more comprehensive Ty Cerdd (Music House) to be developed in conjunction with the Welsh Amateur Music Federation at a new Wales Millennium Centre. Most of the centre's manuscript archives were transferred to the National Library of Wales in Aberystwyth.

Composers of a new generation, including many taught by Hoddinott or Mathias, were able to profit from study abroad, from a greater awareness of the international avant garde and from well-developed institutions. Of several who made some initial impact, including Jeffrey Lewis (*b* 1942), Richard Elfyn Jones (*b* 1944), Howard Rees (*b* 1945) and John Hopkins, only John Metcalf (*b* 1946) has gone on to fulfil early expectations with a mature style of some individuality based on white-note harmony and intense lyricism. Two of Metcalf's contemporaries who have worked a good deal in the USA are Hilary Tann and Rhian Samuel, both of whom are also active as academics. Composers who have settled and worked in Wales include Charles Barber, whose work is deeply influenced by African and gamelan music (alongside other 'world' musics), while John Cale and Richard Barrett have enjoyed most of their success, in popular and avant-garde music respectively, outside Wales. Composers such as Gareth Glyn, Lyn Davies (*b* 1955), John Hardy and Dalwyn Henshall (*b* 1957) have been more acutely conscious of their indigenous heritage, but it perhaps remains for those of a younger generation, including Pwyll ap Sion, Guto Puw, Paul Mealor, Huw Watkins and Ceiri Torjussen, to explore fully the interaction of Welsh classical and popular cultures within the full range of international developments.

Among Wales's most prominent musical ambassadors during the 20th century were singers who achieved international success in opera, including Geraint Evans, Stuart Burrows, Gwyneth Jones, Margaret Price, Robert Tear, Dennis O'Neil, Bryn Terfel, Gwyn Hughes Jones and Rebecca Evans – an impressive list for a relatively small country. Many of these made their operatic débuts with the WNO but found it impossible to return to the company at the height of their careers because of the inadequate resources of Cardiff's cramped New Theatre. Plans for a new opera house in Cardiff Bay were abandoned in 1997, but the Millennium Centre is intended by 2002 to house the WNO alongside other performing companies in conditions of unprecedented splendour for Wales. The launch of National Youth Arts Wales early in 2000 consolidated the achievements of the Welsh National Youth Orchestra, Brass Band, Choir and Chamber Ensemble and laid foundations for future progress.

II. Traditional music

1. Early period. 2. Calendar customs. 3. Notated sources of the 18th century: (i) Secular and instrumental (ii) Sacred song (iii) Carols and ballads. 4. The Eisteddfod. 5. The 19th century. 6. Modern trends: (i) Influence of immigrants (ii) Institutions (iii) Fusions and revivals. 7. Musical characteristics. 8. Song forms and types. 9. Musical instruments.

1. EARLY PERIOD. No manuscripts of Welsh secular music exist prior to the early 17th century. Although music was an important part of Welsh life, the secular tradition was an oral one. Music of the court was sophisticated, complex, bound by strict rules and passed on orally from teacher to pupil. The songs and dances of rural harpers, ploughmen or maidservants were not noted down before the 18th century, and knowledge of music from the period before 1600 depends mainly on literary references, passages from the Welsh Laws and comparison with other Celtic societies, especially Ireland.

An early reference to music in Wales describes praise-singing in Welsh courts. In *De excidio et conquestu Britanniae* (mid-6th century) the monk Gildas chastised the ruler of north-west Wales for disregarding God's praises, sung with sweet rhythm in tuneful church melody, and listening instead to court bards yelling forth his own praises like bacchanalian revellers. This, the earliest reference to bards in Wales (*see* BARD, §2), gives a picture of contrasting singing styles: the ecclesiastical, pleasing and harmonious; the bardic, strongly declamatory. About half a century later, in a famous couplet, the churchman Venantius Fortunatus noted that the instrument used by the Britons to sing God's praises was the *crotta*, the vernacular name for the type of lyre which later developed into the bowed CRWTH.

The earliest substantial knowledge of the position of music in Wales comes from the sections dealing with bards in the Welsh Laws which tradition says were formulated in the 10th century although the earliest copies date from the 12th and 13th centuries. Music and poetry were closely connected in Wales; in Welsh terminology a *cerdd* can be either poem or song and *caniad* refers to either poetry or music. The *pencerdd* (chief bard) was an important court official and usually had a *datgeiniad* (declaimer) to declaim his songs. Lesser bards might declaim their songs to their own harp accompaniment. The Laws mention three instruments in the court, harp, crwth and pipes. The high status of the harp is indicated by the fact that the king presented the *pencerdd* with a harp on his appointment.

Music and poetry as described in the Laws were essentially aristocratic. It is the Norman-Welsh ecclesiastic GIRALDUS CAMBRENSIS who gives the first significant account in the 12th century of the music of other classes of society, describing a saint's day festival with men and women sometimes dancing and sometimes singing unpolished peasant songs, *Itinerarium Cambriae* (Dimock, 1868). In this connection Giraldus mentions oxen songs, a type which continued in use in Glamorganshire until the end of the last century. He also corroborates references in the Laws that state that the Welsh play three instruments and confirms the predominance of the harp. When he writes of musical instruments in Wales, he repeats what he had written about Irish instrumental performers in *The Topography of Ireland*, showing how close the two cultures were. Here Giraldus is not discussing the songs of ordinary people but professional instrumentalists performing elaborate music for an aristocratic audience. He seems to be describing music that differs from the general trend of European music of that period, but the words are open to more than one interpretation.

In a later chapter Giraldus describes Welsh singing:

> They do not sing in unison like other nations, but in many voices and in many rhythms and intervals. In a company of singers, as is usual with this nation, there are as many tunes and varieties of voice as there are heads, all uniting finally in harmonious concord with the smooth sweetness of B flat, in one integrated melody. (*Descriptio Cambriae*, I, Dimock, 1868, 189–90).

This description has caused considerable dissension. As an educated 12th-century ecclesiastic who had travelled abroad, Giraldus would have been familiar with the church music and polyphony of his day. It is possible that what he heard was heterophony, which is still performed by the Gaelic hymn-singers of the Hebrides. There is some evidence that Welsh congregations used to sing in the same way. The 19th-century hymn writer John Roberts (Ieuan Gwyllt) (1822–77), chastised singers for singing something they had made up themselves instead of being true to the melody, some rushing ahead, some lingering on the notes, some overloading each note with three, four or even half a dozen grace-notes (Roberts, 1863). This 19th-century description may be a distant echo of what Giraldus heard in the 12th century, although it can also be argued that he was describing the rondellus.

Lack of evidence makes it difficult to know what kind of music was used in the Celtic church before the Normans took control, but two Welsh church music manuscripts exist from a later period: a Bangor Pontifical and the 14th-century Penpont Antiphonal (Edwards, 1990) which includes matins, lauds and vespers for St David's Day and is the earliest existing manuscript of music-making in Wales by Welshmen. Poetry of the period is rich with terms relating to church music.

Political and economic developments helped to end the hierarchical bardic system which was already in decline by the 16th century. The accession of a Welsh dynasty to the English throne in the late 15th century saw many bardic patrons leaving Wales in hope of preferment in England, and the increasing anglicization of these patrons

Ex.1 *Mwynen Mai*, voice (*GB-AB* 1940); instrument (*GB-AB* 171E)

['Listen, gentle family, give us permission to sing. The leaves on the trees are becoming green and are springing on every hill; this is the special time for glorious flowers, the birds kindly offer sweet music.']

doomed the bardic order. Efforts were made to preserve their art through writing down what had previously been passed on orally. The earliest surviving collection of secular music in Wales is the 'Musica neu Beroriaeth' (*GB-Lbl* Add.14905), a manuscript compiled by the poet and professional harpist, Robert ap Huw (*c*1580–1665). This source may represent the work of poets and musicians from the 13th to the 16th centuries; the compositions, which are for a horsehair- or gut-strung harp played with the fingernail, are probably the oldest surviving European harp music. The works have a range of 24 notes ('measures') and utilize five basic tuning patterns; the notation itself is a form of tablature, based upon letters of the alphabet. The decipherment of the Robert ap Huw manuscript was long the cause of debate and conjecture; only recently has scholarship clarified the likely meaning of the source (see in particular Taylor, 1998). For a more detailed discussion of the source and its significance *see* ROBERT AP HUW.

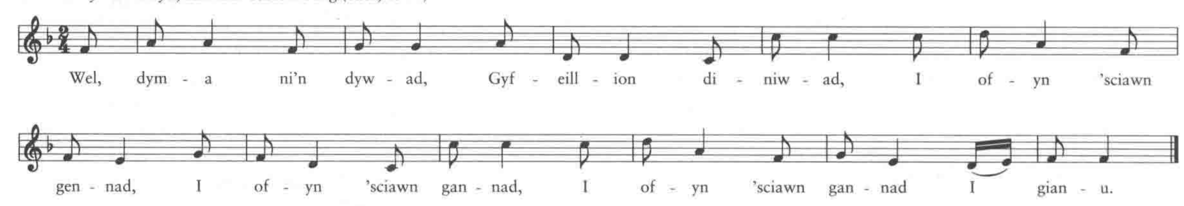
There are numerous references to the learned music of the bardic order but very few to traditional music before the 17th century. Apart from Giraldus's mention of oxen songs, there is a 16th-century poem that alludes to singing verses with the harp in a tavern and a description of entertainment at a 16th-century saint's day festival where professional bards declaimed their poetry and young women sang popular songs. Verses to be sung to ballad tunes such as *Adew my pretie pusie* and *About the bank of Helicon* were noted in 16th-century manuscripts. By the 17th century there was considerable change in Welsh music. Foreign tunes brought in by drovers, students or seasonal workers contended with traditional culture: the verses of one Welsh ballad intermingle titles of popular English tunes such as *Greensleeves* and *Queen Dido* with Welsh terms from the bardic tradition. As tunes with a distinct rhythm and regular metre became more popular, improvisation tended to die out and much poetry was now written to specific airs, some of them foreign. This is borne out by tune-names in Welsh books and manuscripts where Welsh poetry is written to be sung on such tunes as *Crimson Velvet* or *Spanish Pavan*.

2. CALENDAR CUSTOMS. In spite of the decline of the bardic order, poetry continued to be predominant among the Welsh, and many acknowledged poets produced verse for folk celebrations such as Christmas and May Day. A pre-Reformation Christmas service was gradually adapted into a Protestant carol service called the *plygain*, the chief purpose of the carols being to propagate basic Christian beliefs. They were serious and doctrinal in nature and tended to be longwinded, some depicting man's history from Creation to Armageddon, others outlining the life and acts of Christ. There were very few stories from the New Testament *Apocrypha*, no lullaby carols and no

Nativity, Annunciation or Epiphany carols corresponding to English folk carols of the period. The poetry was complex, retaining some of the features of bardic poetry such as consonance, alliteration and internal rhyme but using regularly accented metres. Some of the most popular *plygain* tunes were native Welsh ones, such as *Ffarwel Ned Puw*, but others were written to be sung to popular English ballad tunes, e.g. *See the Building* or *Let Mary Live Long*.

Traditions in south Wales were different; the poetry was less complex and the words could be read or sung. *Cwndidau* (from the Latin conductus) in 15th- and 16th-century Gwent and Morgannwg were moral or religious songs in traditional metres, and the homely carols of Vicar Prichard (?1579–1644) in the 17th century delighted generations of the faithful; some of the carols have come down in oral tradition to the 20th century. Another type of traditional religious song was the *halsing* of south-west Wales. It was often performed at home or at religious festivals, but when sung in church the custom was for eight or ten people to divide into two groups and chant the carol alternately, finishing together with a chorus. The 18th-century antiquarian Edward Williams (Iolo Morganwg) (1747–1826) described the north Wales carol as 'adapted to a particular or set Tune . . . in a very artificial and complex kind of stanza' and the south Wales style as 'a loose recitative kind of verse sung with a Cathedral-like Chant'.

Christmas carols were also sung from door to door, as were May carols, which were simpler and more joyous in nature though still moral in tone. There is evidence that these were accompanied: a Christmas carol in 1736 was to be sung by two men and two boys with harp and fiddle, and some music manuscripts of May carols include phrases for the harp. The most interesting is a carol noted by the 18th-century antiquarian William Jones of Llangadfan (1726–95), who set down the music with the directions 'So' (solo voice) and 'Sy' (symphony/instrument) above the notes, indicating that the singer enters at certain points while at others the instrument plays alone (*GB-AB* 171E). There are at least three versions extant of the tune played by the harp but none of these indicates the vocal part which may well have been improvised. However in a 19th-century manuscript (*GB-AB* 1940) there is an unaccompanied May carol which fits the harmony of the instrumental tune and may have been sung with it (ex.1).



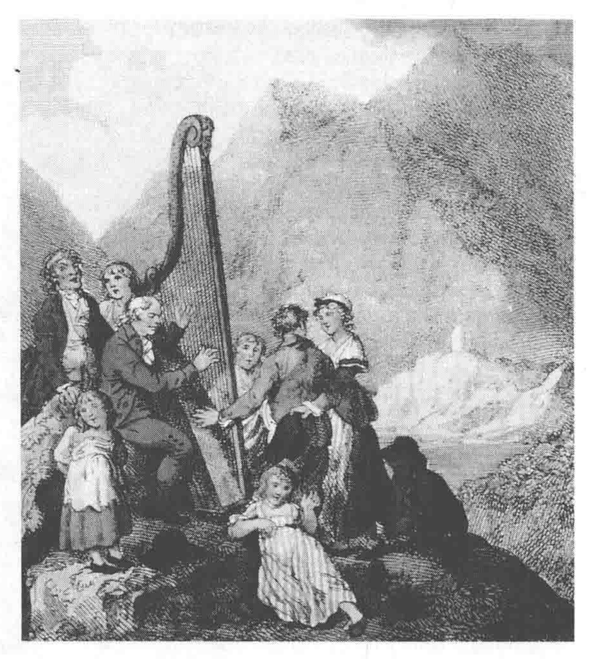
The custom of going from house to house at holiday seasons was not confined to religious carols. Some calendar customs may be related to pre-Christian rituals at the winter solstice. In south Wales the *Mari Lwyd* ('Grey Mare') party processed from door to door during the Christmas season (fig.1). The *Mari Lwyd* was a horse's skull with a pole inserted into it and draped in a white sheet decorated with coloured ribbons. The pole that moved the horse's jaws was carried by one of the party hidden under the sheet. He was escorted by a leader and other members of the party, all male, sometimes including, a fiddler or a harper. This custom differs from other pre-Christian horse ceremonies in the poetic competition that took place before the singers were allowed in the house. The *Mari Lwyd* party would sing extempore verses outside the house but could not enter as long as the party inside could match them. Once inside, wassailing took place. More than one *Mari Lwyd* tune exists but that found most often is an angular tune with a pentatonic basis and much repetition (ex.2).

Gwyl Fair y Canhwyllau or Candlemas (held on 2 February) was another occasion when a party of male singers gathered outside a house and a ritual poetic contest followed. After the singers gained the right to enter, the wassail bowl was passed in order to pledge the health of the Virgin Mary and Child, represented during the ritual by a young girl seated in the centre of the room. This was followed by entertainment with riddles and feat songs, which included singing tongue-twisting words, remembering the greatest number of verses or performing cumulative songs. The ritual appears to have died out after the 18th century but some feat songs have remained popular, such as *Cyfri'r geifi* ('Counting the Goats').

1. Llangynwyd 'Mari Lwyd' Wassail group, c1908, singing outside the house and hoping to gain entry

Ex.2 *Cân y Fari Lwyd*, calendar custom song (Saer, 1974)

['Well, here we come, kind friends, to ask permission to sing.']



Other Welsh calendar customs involving singing were New Year and Shrove Tuesday *quête* songs and *Hunting the Wren*, part of Twelfth Night activities. After a wren was caught it was taken in procession by the young men of the neighbourhood. Two kinds of song were connected with the ceremony: one in question-and-answer form setting out the pattern of the hunt, the other describing the wren's capture.

3. Notated sources of the 18th century.

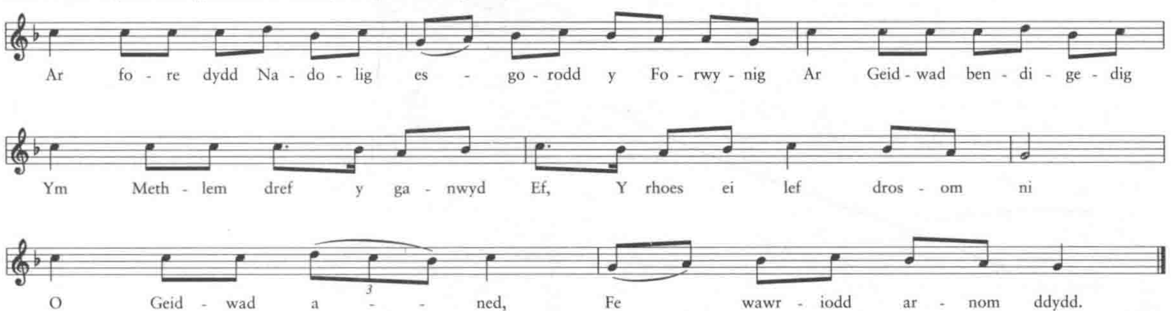
(i) Secular and instrumental. During the 17th century, publishers catered for an increasingly literate public. Although moral or religious themes pervaded most Welsh books of this period, lighter ballads and verses in almanacs were written to be sung on popular tunes of the day. But no Welsh music was published until the early 18th century when *Aria di Camera* (*c*1730) 'a choice collection of Scotch, Irish and Welsh airs' printed five Welsh tunes without words, all dance tunes. In 1742 the most famous Welsh harper of the day, blind John Parry (?1710–82), and his amanuensis, fellow harper Evan Williams (*b* 1706–), brought out *Antient British Music*, which claimed to be 'tunes never before published' and 'supposed . . . to be the remains of the music of the Antient Druids'. Neither claim was correct: three of the tunes had appeared previously in *Aria di Camera* and the connection with the druids has long since been discounted. The volume contains 24 untitled airs, about half of which appear to be Welsh, while some are derived from 16th-century dance tunes formerly popular in England but retained in the repertory of Welsh musicians and passed on orally. The arrangements have Baroque features and represent a cultivated urban style designed to appeal to wealthy patrons. Though the melodies were instrumental in style and no words were included in the printed collection, manuscript references indicate that poetry could be sung to at least two-thirds of them.

A recent discovery throws some light on this singing. It was known that Parry and Williams had intended to bring out a second volume 'which will show the Nature of singing with the Harp, Violin, etc., at this time by the Welsh at their Musical Meetings'. A specimen copy was prepared in 1745 but nothing came of the plan (*GB-Lbl* Add.14927, f.130). When the manuscript was rediscovered more than two centuries later at the Royal College of Music in London bound in with a copy of *Antient British Music*, it was found to contain six songs in which symphonies for the harp alternate with the voice, occasionally in a regular pattern but more often irregular. In spite of musical arrangements that owe more to art song than traditional music, this manuscript is invaluable in showing for the first time how voice and instrument are fitted together, a craft known in Wales as *canu penillion* (singing verses) or *canu gyda'r tannau* (singing with the strings; fig.2).

Other manuscripts containing Welsh traditional music begin to appear in the second half of the 18th century. One of the most important is the tunebook of John Thomas (*GB-AB* J. Lloyd Williams MS 39), a professional fiddler whose manuscript dated 1752 contains about 470 tunes, some copied from printed sources as diverse as *Antient British Music* and country dance collections. From Thomas's repertory, it is possible to deduce where he performed and who were his audience. He undoubtedly played for dances attended by the gentry; the manuscript contains numerous minuets, hornpipes and rigadoons as well as country dances. It would have been the gentry, too, who called for *Lully's Minuet*, selections from Handel operas, parlour songs and theatre pieces. Other tunes in his collection, often noted without key signatures, accidentals or barlines, came from oral tradition. His manuscript is valuable for the earliest notation of many tunes popular in 18th-century Wales which were used interchangeably for ballads, *plygain* carols and the music of the *anterliwt*. This was a rustic drama with dialogue, songs and dances, usually accompanied by the fiddle. It included phallic dances for the Fool, and it is probable that Thomas played the fiddle in this entertainment since a tune to one of the phallic dances is to be found in his manuscript along with almost 50 tunes used in the *anterliwtiau* of the period (ex.3).

2. Penillion singing to the harp in the mountains of Snowdonia: engraving from 'The Bardic Museum' (London, 1802)

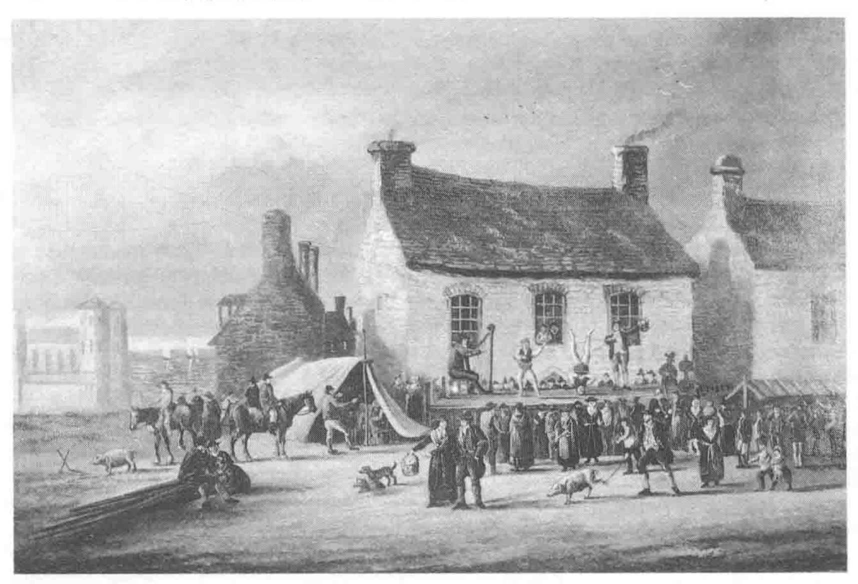
Ex.3 *Sbonc Bogel,* phallic dance (*GB-AB* J. Lloyd Williams 39)



A different light is shed on traditional Welsh music by a fiddle manuscript dated 1778 (*Archive of the University of Wales*, Bangor, 2294). Morris Edwards was also a professional fiddler but although he and Thomas played some of the same repertory, the differences between the manuscripts are great. Edwards's collection is much smaller, about 150 tunes, but more carefully written with time and key signatures and bar lines. Like Thomas he includes pieces copied from printed books but most come from Welsh publications rather than country dance books. This collection gives the impression of being more conservative than Thomas's and more traditionally Welsh; several tunes carry suggestions of earlier music. In 1761 John Parry (of Ruabon) brought out *A Collection of Welsh, English and Scotch Airs* containing 21 harmonized airs with elaborate variations for harp and 12 unharmonized airs for guitar. Only a dozen of these were Welsh and five had been published previously. Parry's most important contribution to traditional music came out in 1781, the year before his death. He makes no attempt to connect this publication with the druids or with antiquity, calling it simply *British Harmony*. The collection contains 42 airs, many with variations and all without words. The arrangements are simpler, the traditional element includes a tune associated with May carolling and another connected with New Year *quête* singing, and there are fewer purely instrumental tunes.

The influence of the 18th-century antiquarian movement was strong on EDWARD JONES (ii) (1752–1824), the most important collector and editor of traditional Welsh music, a harper and the first to print tunes with Welsh words, including the earliest appearance of *Ar hyd y nos* ('All through the Night') and *Nos Galan* ('Deck the Halls'). Jones's interest in druidism and the urge to connect tune names with ancient legends make his antiquarian notes to the tunes almost worthless, but there is much of interest in the introductions to *Musical and Poetical Relicks of the Welsh Bards* (1794) and *The Bardic Museum* (1802). Although many pieces are no earlier than the 18th century, some have an older pedigree; these include an interpretation of the tablature of *Caingc Dafydd Brophwyd* in the Robert ap Huw manuscript as well as other tunes mentioned in 16th-century music treatises. By the early 19th century, Jones's collections had become a quarry for publishers and editors.

(ii) Sacred song. Side by side with secular music for the harp there developed a strong tradition in religious song. Two examples have come down in oral tradition from the period when Wales was Roman Catholic: a Christmas carol with a pentachordal melody in plainchant style (ex.4) and a prayer for the release of a soul in purgatory. With the rise of Protestantism, Welsh church goers sang metrical psalms as well as *halsingod* and *plygain* carols, but the remoteness and relative poverty of Welsh churches meant that there were very few choirs. The greatest outpouring of religious music in Wales came in the 18th century with the evangelical hymn. During the period 1816–59 over 50 hymnbooks had been published with tunes taken from Welsh folksongs, English hymns and secular tunes, adaptations of classical pieces, or compositions by local musicians, many of whom had learnt the basic principles of music from the introductions to some of these books.



Their harmonies were often crude and monotonous, their melodies full of slurs, melismas and repetitions, and the music badly barred, causing misaccentuation. By the middle of the century John Roberts, a Presbyterian minister strongly influenced by his admiration for the German chorale, had revised this collection of hymns, omitting some, correcting others and establishing a corpus of Welsh hymns that has remained the backbone of the tradition. His endeavour was aided by the development of Tonic Sol-fa which made music-reading easy and inexpensive for Welsh congregations, and the Cymanfa Ganu (hymn-singing festival) which taught them to sing in a disciplined fashion.

(iii) Carols and ballads. Other music for voice included carols and ballads. Their words were published in almanacs which appeared at irregular intervals for over 150 years from the mid-17th century, as well as in books

Ex.4 *Ar Fore Dydd Nadolig,* Christmas carol (Kinney and Evans, 1987)

['On Christmas morning the Virgin gave birth to a blessed Saviour; in the town of Bethlehem he was born and raised his cry for us. O Saviour born, for us day has dawned.']

3. Entertainment at Aberystwyth Fair with harp, singer, juggler and acrobat, 1797 (Museum of Welsh Life, Cardiff)

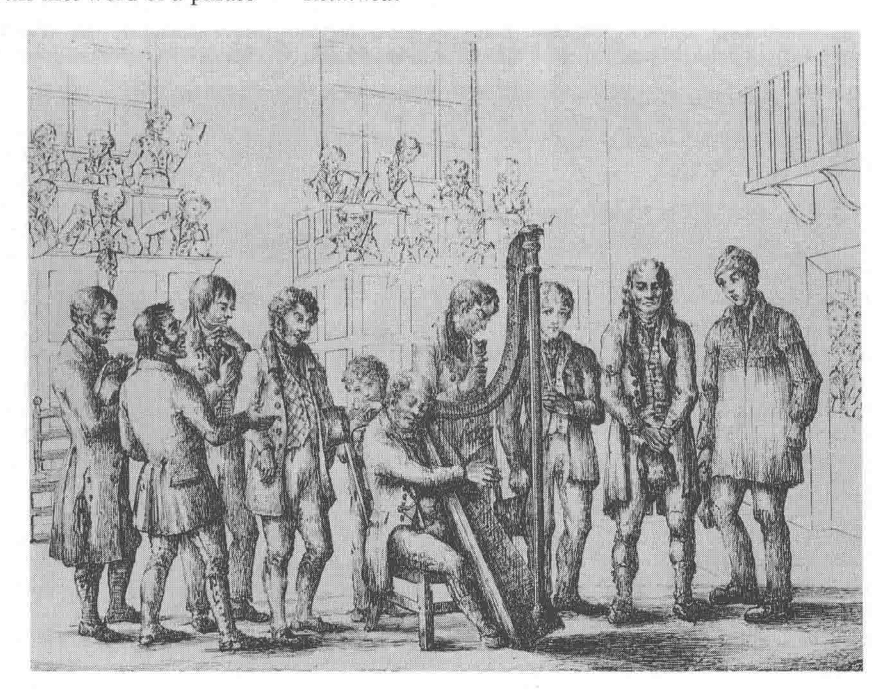
and ballad sheets until the end of the 19th. Much of this poetry was moralistic in tone and no music was printed, although tune names were given.

4. The Eisteddfod. Revival of the Eisteddfod, a competitive meeting of bards and musicians which had fallen into decay after 1567, was instigated by publishers of almanacs, who advertised eisteddfod sessions in their publications. These were small affairs where poets and musicians met in taverns and competed for ale but they led to the revival of the eisteddfod as a cultural institution. By the end of the 18th century, the eisteddfod was patronized by a society of London Welshmen who set standards with regard to poetry and music. Welsh gentry and literary clerics began to take an interest, hoping to inspire their compatriots to catalogue ancient Welsh manuscripts and collect traditional tunes. The earliest collector of this kind of tune in Wales and one of the earliest in Europe was Edward Williams (Iolo Morganwg) whose collection, frequently noted on the backs of envelopes or scribbled on bits of paper, is still largely unpublished. He noted Welsh dances, songs with words and at least half a dozen tunes to which the ancient Welsh metre *cywydd deuair fyrion* were sung. In an eisteddfod held in 1837 the prize for a collection of native Welsh folksongs was awarded to a young south Wales gentlewoman, Maria Jane Williams (1795–1873), and in 1844 her collection of 43 songs with Welsh words and accompaniment for harp or pianoforte was published. Although there are clear indications that she edited both words and music of *Ancient National Airs of Gwent and Morganwg* (Williams, 1844), the volume is valuable as the first publication in Wales to print the songs of the people, including wassail songs, feat songs, ballads, dance tunes, a May carol, a nursery song, a dialogue song and an archaic dream/vision ballad. The wide compass and highly ornamented melodies include several modal tunes in sharp contrast to the harp tunes of north Wales. The following year John Thomas (1795–1871), the second-prize winner in the same eisteddfod, published *The Cambrian Minstrel*, a book of 148 unaccompanied tunes including folk airs noted from south Wales singers, popular ballads, harp tunes and many of his own compositions. The value of this interesting collection is impaired by numerous printing errors, by his inability to deal with modal tunes and by his discarding the original words in favour of his own verses.

Among the literary clerics who promoted traditional Welsh culture in the eisteddfod was the vicar of Kerry, John Jenkins (Ifor Ceri) (1770–1829). During the period 1815–25, and probably earlier, he collected 212 tunes from Welsh oral tradition (*GB-AB* 1940; J. Lloyd Williams 36). Unlike the 18th-century collectors, Jenkins looked for airs connected with words and meant to be sung. He noted tunes familiar to him, collected others from musical friends and preferred to obtain them from singers rather than instrumentalists, sometimes naming the informant or place beside the title of the song. Jenkins was from south Wales but his parish was in mid-Wales and there are abundant examples from both parts of the country. His three manuscript volumes form the most important systematic collection of Welsh traditional music made before the 20th century, but any analysis of musical styles based on it must take account of the fact that there are no modal tunes in his collection: all are major or minor and it is probable that Jenkins, who played the cello and had had musical training, 'corrected' some modal tunes by setting them down in the minor.

The eisteddfod continued to grow in importance and concerts began to be held in the evenings to attract anglicized members of the audience. During the day, in addition to poetic contention, there were competitions in harp playing and in *canu gyda'r tannau*. A drawing of such a competition in 1824 shows a group of men gathered around a single harp with an audience in the background. Adjudicator and harper chose a tune and the contestants drew straws to determine the order of competition. The contest began after the harper had played the air once through. The first singer could choose any metre he wished; he could not begin with the harp but had to strike into the tune with an improvised descant at least a bar after it had started, being careful to choose a metre that would allow him to finish exactly with the harp. The remaining contestants had to follow the same metre but without repeating the same verses. At the end of the round, those who had made mistakes were

eliminated and the next round began with a different air on the harp as well as a change in the order of performance. The competition continued until all but one had been eliminated; in the 1824 eisteddfod it took the best part of a day.



5. THE 19TH CENTURY. By the 19th century, the finest performers had discarded the single harp in favour of the triple harp introduced into Britain from Italy in the 17th century. This became so popular in Wales that it was known as the Welsh harp. The single harp, usually used for dancing, had about 30 strings and stood about four feet high; transposition was effected by the dextrous use of the fingers. The triple harp, with a compass of about five octaves, had about 95 strings in three rows (the outer diatonic strings being tuned in unison and the middle row providing the chromatic tones) and was used to display technical brilliance in harp competitions.

Harpers had special significance as tradition bearers and as the 19th century progressed their status rose. It was probably the harp's importance in the eisteddfod tradition that saved it from the zeal of the Methodists. The religious revivals of the 18th and 19th centuries 'put an end to all the merry meetings for dancing, singing with the harp, and every kind of sinful mirth', according to one preacher. One man buried his harp after a religious experience and other harps were burnt. Dancing was hit even harder with the abandonment of the *twmpath* (dancing on the green) and maypole dancing. Old calendar customs fell into disuse. Preaching festivals took the place of patronal celebrations and wakes became prayer meetings. In south Wales, one vicar transformed an excessively violent annual football match between two villages into a religious festival, *Canu'r pwnc* ('Singing the text') (Jenkins, 1971). This custom has survived in churches and chapels in south-west Wales. The participants gather in the meeting-house and declaim passages from the Bible in a distinctive stylized chant; the tempo is regular and the delivery somewhat staccato with punctuation marked by a fermata on the first word of a phrase and a strong snap with a dip in pitch on commas or full stops. The chanting may be in unison or in parts, usually on the octave, the fifth or the fourth, but sometimes on the major second and there is at least one example of chanting on the augmented fourth.

The later 19th century saw increased publication of traditional airs; many were arrangements of published harp music with words in English or in Welsh commissioned from contemporary poets. Some collections were published without words. Most of the tunes in the first volume of John Parry's *The Welsh Harper* (1839) were taken from Edward Jones's collections, and airs from Jenkins's manuscript collections formed a large part of the second (1848). Parry edited the tunes ruthlessly, including words to only a few and almost all of those in English. Numerous manuscripts, including one which won the prize for the best collection of Welsh traditional tunes at the 1858 eisteddfod (*GB-AB* Add.331), provided the tunes for Bennett's two-volume collection *Alawon fy Ngwlad* (1896), again without words and with much editing of the airs.

6. MODERN TRENDS.

(i) Influence of immigrants. Industrialization and the growth of cities and towns brought rapid and far-reaching changes. The popularity of Irish songs sung by immigrants, English parlour songs, music-hall tunes and American minstrel songs had a profound influence. There are almost two dozen Welsh versions of *St Patrick's Day in the Morning* used as a dance tune, blacksmith's song, immigrant ballad, macaronic love song, nursery rhyme and hymn. *Home Sweet Home* was often sung with carol words and *The King of the Cannibal Islands* was a favourite. Over half a century after minstrel parties toured Wales, a Cardiganshire schoolteacher noted a number of Welsh folksongs in his rural area; eight of the tunes were American including *Wait for the Wagon*, *Oh Susannah*, *Ring the Bell, Watchman* and *The Ship that Never Returned*.

4. Penillion-singing competition at Powys Eisteddford, 1824

(ii) Institutions. As Wales began to acquire cultural institutions such as the University of Wales, a National Museum and a National Library, the conservation of the cultural heritage became increasingly important and in 1908 the Welsh Folk-Song Society was formally established. The editor and guiding genius was Dr J. Lloyd Williams (1854–1945), a botany lecturer and musician who encouraged his students to collect folksongs in their native areas. Lloyd Williams was indefatigable in the work of the young society, collecting a substantial number of songs himself, researching old manuscripts, promoting the use of folksongs in schools, giving lectures on their importance in the Welsh cultural tradition and editing the *Journal of the Welsh Folk-Song Society* from 1909 until his death. Most important of all, he established a scientific basis for the collection and analysis of Welsh songs, emphasizing the necessity of detailed information about performer, area and background, and demonstrating the division of tunes into families by comparative study.

The Welsh Folk-Song Society was followed in 1935 by *Cymdeithas Cerdd Dant Cymru* (The *Cerdd Dant* Society of Wales), established to revive the art of singing with the harp. The term *cerdd dant* ('the craft of the string') links it with the long history of the art in Wales. The impromptu oral tradition of singing to the harp was in serious decline by the early 20th century and, rather than see it die out, a society was formed to standardize rules and formalize competitions. In its new form, the art became a popular element of the eisteddfod and, as trained musicians took an interest it, became more sophisticated. The impromptu element has disappeared; vocal descant is written rather than improvised and small groups and choirs take part. There is a *cerdd dant* festival in a different part of Wales each year with hundreds of performers heard by large audiences.

The Welsh Folk Dance Society, established in 1949, had a much harder task. Traditional dancing in connection with ancient customs or for social purposes had been almost entirely wiped out by cultural changes and nonconformist disapproval. The only traditional dancers left were step- and clog-dancers, many of them Welsh gypsies, who contributed much to Welsh traditional music through their talented harpers and fiddlers. Traditional social dances have had to be reconstructed from manuscripts and from the memories of people who, when young, had seen them danced. The revival has been extremely successful and there are numerous folkdance parties throughout Wales as well as athletic young male dancers performing traditional steps. Because dance does not demand language fluency, it attracts large numbers of both Welsh and English speakers.

The eisteddfod was central to the development and social acceptance of these traditional activities. In addition to numerous local eisteddfods, there are two main festivals: the National Eisteddfod and the Welsh League of Youth Eisteddfod, concerned with both Welsh traditional and European classical culture. The National Eisteddfod stages the main ceremonies and competitions which include folksong, folkdance and *cerdd dant* as well as classical music and recitation. Other events are dedicated to literature, arts and crafts, popular music or public lectures. The language of the festival is Welsh. The Welsh League of Youth holds a similar, smaller eisteddfod.

(iii) Fusions and revivals. Traditional activities are also flourishing outside the formality of the eisteddfod. Some Welsh pop groups specialize in traditional vocal and instrumental music, and some use traditional instruments such as harp and *crwth* in combination with bouzoukis, fiddles, mandolins, pipes or *bodhrán*. Their treatment of the music is lively and less reverential than the rather careful singing in the eisteddfod. Dancing is also thriving and the *twmpath* has been revived in modern form. The harp is blossoming, particularly after the formation of the Welsh Harp Society in 1961. Even the triple harp, which nearly disappeared with the inauguration of the pedal harp, is being revived and interest in early Welsh music and performing traditions has led to a revival of instrument making and research. Folkdance groups have revived the *Mari Lwyd*, though without the poetic contention formerly central to the ritual, and *plygain* carol services are increasing (fig.7). The Museum of Welsh Life (formerly the Welsh Folk Museum) at St Fagans, Cardiff, has contributed greatly to research in traditional

5. Folksong collecting trip to Carmarthenshire, 1913

6. Three Welsh gypsy musicians, David, Cornelius and Adolphus Wood, playing harp and fiddles of their own construction, before 1914

Welsh music and has issued two volumes of songs transcribed from its tape archives as well as several records. In 1981 a department of ethnomusicology was established at the University of Wales, Bangor, to promote research into traditional music with particular attention to Wales. There has been less interest in the traditional music of non-Welsh-speaking areas.

7. MUSICAL CHARACTERISTICS. The first systematic investigation of the tonal basis of Welsh folksong was made by Peter Crossley-Holland in a pioneering study of a controlled sample of 400 tunes taken from the first four volumes of the *Journal of the Welsh Folk-Song Society* (Crossley-Holland, 1968). The results indicated that diatonic scale patterns are the most common, frequently in seven-, six- or five-note scales. Most are in some form of major or minor scale; about 14% are in the D-Dorian mode but there are few examples of other modes and the pentatonic scale also seems to be uncharacteristic of Welsh folksong. The tonic is placed low more often than centrally, and tonic and final are almost always identical except for eight circular airs. None of these scales is exclusively Welsh and all have parallels in other European countries, but most appear to be nearer to English than to either Irish or Scottish modes.

The compass of these melodies ranges between 5 and 13 tones, with most in a medium compass of 8 or 9. Some wide-compass tunes have come from sources outside Wales. More than one 18th-century Welsh ballad or carol

7. Parti Llanhaeadr singing in a 'plygain' carol service, Denbighshire, 1965

8. Folk group 'Ar Log', performing at Corwen Pavilion, c1983

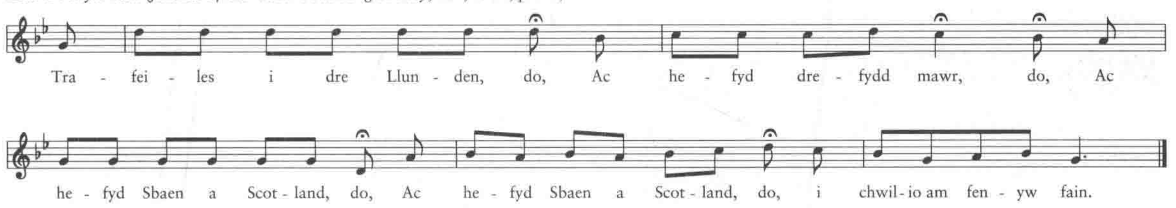
was written to be sung on English broadside ballad tunes such as *See the Building* or *Let Mary Live Long* and wide-compass Irish tunes were also popular. A surprising number of Welsh tunes are pentachords, a type rare in English folksong (Kinney, 1986). These pentachordal tunes occur in many diverse categories (ex.5); they are found in almost every part of Wales and printed in collections since 1794. Most are unornamented and many were sung to words in traditional Welsh poetic metres. Descants to *canu gyda'r tannau* in the mid-19th century (Jones, 1885) show some of the same characteristics of narrow compass and lack of ornamentation and it is possible that the folksong style may have been influenced by the tradition of declamation associated with Welsh poetry.

Declamation in the folk tradition is found in *canu'r pwnc* and in the *hwyl* (a heightened form of speech used by preachers in the 19th and early 20th centuries), and there are also traces of declamation in Welsh folksongs. About 30 songs open with the singer chanting on a single note, usually the fifth of the key (ex.6); in one song each of the first three phrases opens with chanting on the fifth and in another the first three phrases open with chanting on the tonic, the third and the fifth respectively.

Ornamentation of Welsh folksongs tends to be simple and consists largely of passing notes or slurs with almost no melismas. About 40% have no ornamentation; this includes not only the more archaic type of song such as calendar customs and cumulative songs but also ballads and love songs. By contrast only 18% are highly ornamented; this includes many older ballads and carols as well as tunes from the English or Irish tradition but none of the archaic tunes. There is some evidence that ornamentation was at one time more widespread and perhaps more prevalent in the south than in the north. The south Wales tunes published by M.J. Williams (1844) are notable for the high degree of ornamentation in the airs, though the graces, appoggiaturas, trills and melismas found there may be more closely related to art music of the period than to Welsh tradition (ex.7).

Conjunct melodic movement is frequently found in Welsh traditional music; the most popular cadence pattern is a three-note descent by step, ending on an accented syllable; next in popularity is a cadence pattern that finishes with a double tonic on an unaccented syllable. In Welsh, which is markedly polysyllabic, the strong accent usually falls on the penultimate syllable and this results in a large number of musical phrases that finish on an unaccented syllable. In traditional singing there is a tendency to 'snap' these unaccented syllables giving the effect of syncopation or of an appoggiatura.

8. Song forms and types. The majority of Welsh folksongs are strophic, with four equal phrases; the most popular formal patterns are *AABA* and *ABCD*. Songs in the older categories tend to have irregular phrase lengths, as do the older ballad and carol tunes. The latter are frequently long with seven or more phrases and these are sometimes made more irregular by the style of the singers who extend anacruses and cadences. By contrast, songs performed with the harp tend to be regularized by the instrumental accompaniment.



Refrains are common in Welsh folksong between lines of verse and/or as a burden at the end of a verse or

Ex.5 *Y Cap o Las Fawr* (Saer, 1974)

['I have a sister Mary who has a cap of broad lace; the lace turns up and it turns down.']

Ex.6 *Y Fenyw Fain* (*Journal of the Welsh Folk-Song Society*, iv/4, 1954, p.105)

['I travelled through London town, yes, And also great towns, yes, And also Spain and Scotland, yes, To search for a slender lass.']

couplet. There is evidence that some instrumental symphonies later became sung refrains. The 18th-century tune *Triban Morganwg* appeared in manuscript with symphonies for the harp interpolated in the vocal line (*GB-AB* 171E). When a variant of the tune was later printed in *Ancient National Airs of Gwent and Morganwg*, the symphonies for the harp had become 'fa la la' refrains for the voice, and later variants replaced the 'fa la la's with vocables (Kinney, 1984) (ex.8).

Songs associated with Welsh calendar customs are many and varied. In addition to the May and *plygain* carols discussed above, there were three peripatetic customs around the winter solstice which involved singing. Several different tunes have been noted in connection with the *Mari Lwyd* ceremony, one melodic type with a pentatonic basis contrasts with another type in which step-wise motion is prominent. All contain considerable repetition, which may be due in part to the improvisatory nature of the verses. Repetition is also a feature of the processional songs used in *Hunting the Wren* where each question and answer is repeated four times. Several of the processional tunes are extant, showing some diversity: one major key version is a variant of the tune called *Dargason* in Playford's *English Dancing Master*; another is a minor key pentachordal tune (ex.9). The third of these customs featured *quête* songs connected with the New Year and called *calennig*. The custom was for young men and children to sing at the doors of the neighbourhood, wishing the family a happy New Year and asking for *calennig*, which might be money or a gift of food. Songs connected with this custom also vary: some are in a dancing rhythm with four regular phrases, others are chanted with considerable repetition in a limited compass. Feat songs, which played a notable part in *Gŵyl Fair* festivities, included the singing of cumulative songs in which the feat was to sing the verses in correct order and in one breath as quickly as possible. In one case at least the singer danced at the same time, accelerating the dance with the increasing pace of the refrain.

Probably the largest category of Welsh folksongs comprises those connected with love, including praise of the loved one and sorrow over parting. There are numerous night-visit songs, happy, sad or humorous, and some of these courtship songs deal with an old Welsh

Ex.7 *Pan O'wn y Gwanwyn* (Williams, 1844)

['When I was on a hilltop in springtime watching the sheep with their lambs, I heard my sweetheart's clear voice ringing merrily through the grove; the joyous dawn was on her cheeks, O how fair her face and form, and I gazed and delighted in the fine bearing of my beloved'.]

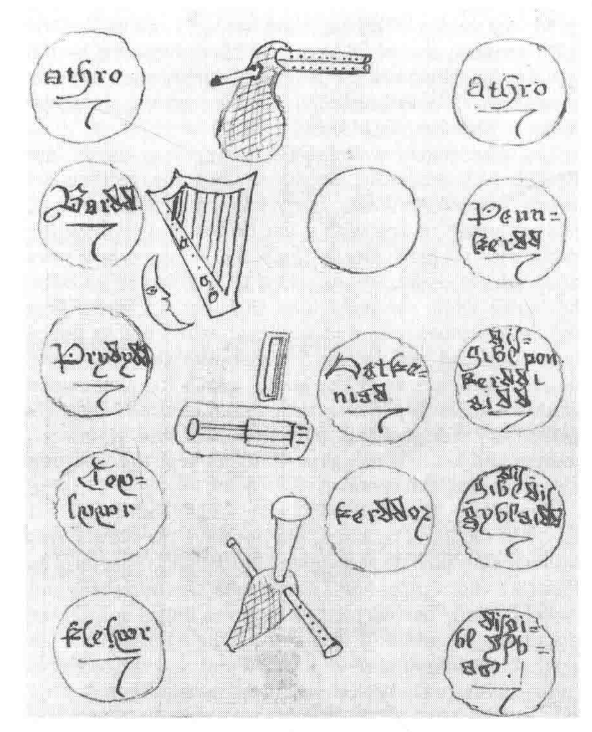
custom known as *caru yn y gwely* (courting in bed), similar to bundling in the USA. When the songs were published early in the 20th century, references to this custom were deleted. This also applied to erotic songs which were not published, apart from ballad sheets, until the 1970s. The imagery is usually that of mowing the grass or milling the grain, but there is one example based on the collier's trade. All these song types are found in other parts of the British Isles but the device of sending a bird as love messenger seems to be popular only in Wales. This was called *llatai* in classical poetry but folk poets also used it. In folksong, the love messenger is usually a blackbird and some of the poetry is macaronic, mixing Welsh and English (ex.10).

Welsh broadside ballads follow love songs in popularity. Some ballads are narratives, although child ballads are rare in Wales and only two have been collected from oral tradition. Many of the rest have comic, moralistic and even doctrinal themes. In the 17th and 18th centuries, countless ballads were written in simple folk metres and sung to familiar folk melodies. At the same time, other more ambitious poets were writing ballads and carols in

Ex.9 *Cân Hela'r Dryw* (Hunting the wren; Kinney and Evans, 1984)

['Where are you going? says Dibin to Dobin; Where are you going? says Richard to Robin, Where are you going? says John; Where are you going? Says everyone.']

Ex.10 *Ei di'r Deryn Du* (*Journal of the Welsh Folk-Song Society*, iii/4, 1941, p.215)

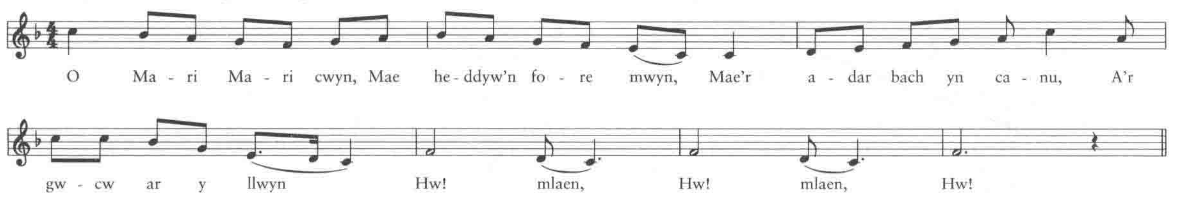


['Go blackbird, to my dearest love, O seek my fair one, for I'm so deep in love.']

cynghanedd (a complex system of assonance, alliteration and internal rhyme) set to English tunes of the day such as *Gerard's Mistress* or *Heart of Oak*. In the 19th century, ballads continued to be produced in great volume, but taste had changed. Poetry in *cynghanedd* was discarded and simpler metres were sung to popular Welsh tunes or others from abroad such as *The Girl I Left behind Me* and *Just before the Battle, Mother*.

Many traditional Welsh songs deal with the natural world. This category includes songs about birds and animals, both wild and domesticated, with words that are sometimes humorous or satirical. Birds are sought out not only as love messengers but also as love counsellors, taking part in dialogues with humans. There are songs praising the holly tree as the finest tree in the wood, and others where flowers and herbs play a symbolic role. Perhaps those songs that display love of place are the most characteristically Welsh. Some praise a favourite spot, others enumerate the stops on a journey, and sailors' farewell songs list the places passed on the way out to sea.

These farewell songs are very different from sea shanties. There is only one Welsh-language shanty extant, used as a capstan or rope shanty, though others in English have recently been discovered in Barry, south Wales. In general, most Welsh songs of occupation are about the work of fishing, shepherding, milling or farming, rather than songs used to lighten the burden. There is one example of a Welsh folksong used in the smithy when striking the anvil, and in the 18th century Iolo Morganwg noted a milkmaid's song used to call the cattle, but the most important category is that of oxen songs, which were used in the Vale of Glamorgan until the end of the 19th century. The chore of ploughing was accomplished by two people, a man to guide the plough and another, usually a young lad, to walk backward facing the oxen, holding a goad and singing throughout the day 'to keep the oxen in good heart'. The singer was expected to know literally hundreds of verses on any subject, satirical or serious. These quatrains were distinguished from other songs by the 'call' to the oxen at the end of each verse. At least 21 oxen song tunes are extant, the last being



9. Crwth-trithant (three-string crwth, centre) and two bagpipes, one (top) with bag, double chanter and blowpipe without bell, the other with bag, single chanter and blowpipe with bell: drawing from a copy by Hugh Maurice of a Welsh MS, 16th century (GB-Lbl Add.15036, f.66r)

recovered in oral tradition as recently as 1978, and about half of these belong to one melodic family (Kinney and Evans, 1986) (ex.11).

Humour can be found in all the above categories as well as in songs of exaggeration and satire, and in some macaronic songs. Much of the satire is directed at lazy neighbours, clumsy lovers, miserly employers and wives, although there are also songs where women have revenge. There are only a few specifically women's songs, and none among the peripatetic calendar customs which were male rituals. Some songs give the woman's view of courtship and marriage, including arranged marriages and mother-in-law troubles. A very few, mostly still unpublished, deal with the problems of pregnancy outside marriage.

9. Musical instruments. Early references to the *telyn* (harp) are to be found in medieval manuscripts but its origins are obscure and no native instrument has survived from before about 1700. The small 30-string medieval/Renaissance harp was succeeded by increasingly larger single-string harps (see §5 above) which in their turn

Ex.11 *Cân yr Ychen*, oxen song (*Red Dragon*, 1882)

['O Mary, get up, it's a lovely morning, the little birds are singing and the cuckoo's in the grove. . .']

gave way to the 95-string triple harp. By the end of the 19th century, the triple harp had been displaced by the pedal harp, which still survives and flourishes as a popular instrument in Wales, although there is a revival of interest in the triple harp (*see* HARP, §V, 5(i)).

The lyre which accompanied early Celtic bards (*see* ROTTE (ii)) gradually developed into the rectangular crwth (crowd) in Wales. Early forms had three strings, later enlarged to six, with a flat bridge that enabled the performer to play chords (fig.9). In time, a bow was adopted and drone strings added to be plucked with the left hand while the right used the bow. Its status was officially acknowledged in medieval courts but its popularity declined and by the 18th century the crwth was discarded in favour of the fiddle, which for a time also acquired its name in Wales though not its status. Fiddlers played an indispensable part in wakes and weddings, dances and fairs; Welsh gypsy fiddlers kept the tradition alive into the 20th century.

The *pibau* (pipes), though mentioned with *telyn* and crwth in medieval treatises, did not have the same status because they did not accompany bardic declamation. The PIBGORN (horn pipe) had a single reed, cowhorn bells and wood or bone barrels pierced by seven finger-holes. Like the crwth, its use had declined by the 18th century. A related instrument used in south Wales was the *cornicyll* (pipe) with a concealed reed and a mouthpiece that screwed on and off. Unlike the *pibgorn*, the *pibau cod* (bagpipe) continued in popularity into the 19th century, playing an important part in country 'horseback weddings'. A 17th-century manuscript shows two sets of bagpipes: one a single-chanter and the other a double-chanter bagpipe (*GB-Lbl* Add.15036, f.66*r*).

An engraving illustrating instruments considered to be traditionally Welsh includes a large single-string harp, a six-string crwth with two drone strings and a bow, a three-string crwth, a *pibgorn*, a semicircular bugle horn called *corn buelin*, and a *tabwrdd* (tabor) (Jones, 1794).

Among instruments popular in the tavern or in the stable-loft where farmhands were housed were the *biwbaw* or *sturmant* (jew's harp), made of wood or metal, which was held between the teeth and struck with the finger, as well as the mouth-organ which superseded it and the concertina.

GERAINT LEWIS (I), LYN DAVIES (I, bibliography), P. KINNEY (II)

Walkeley, Anthony (*b* ?Wells, 1672; *d* Salisbury, 16 Jan 1718). English cathedral musician. He appears to have come from Wells where he was probably a chorister, and where two older generations of men by this name had served in the choir. He was admitted organist, *informator choristarum* and lay vicar at Salisbury Cathedral on 1 August 1700, remaining as such until his death 'aged 45'. Three services and 13 anthems by him are known. The morning services in E♭ and A survive in score (*GB-Lbl* and *Ob*), and the service in F in parts. These works, along with the anthem *O Lord, thou hast searched me out*, which also survives complete, exhibit modest competence.

WORKS

SERVICES

Morning Service, A (TeD, Jub), 4vv, *GB-Ob*; Morning Service, E♭ (TeD, Jub; To Mr Wise's Evening Service), 4vv, *Lbl*, *Y*; Whole Service, F (TeD, Jub, San, Ky, Cr, Mag, Nunc), 4vv, *DRc* (inc.), *Ob*, *Och*

ANTHEMS

If the Lord himself, verse, *GB-EXcl* (inc.), *Lcm* (inc.); In the trouble, *Lcm* (inc.); O Lord thou hast searched me out, verse, 4vv, *IRL-Dcc*, *GB-Cu*, *EXcl* (inc.), *H* (inc.), *LF* (inc.), *Ob*, *WB* (inc.); O sing to the Lord, *Lcm* (inc.); Unto thee will I cry, O Lord my strength, verse, *Ob*

Lost: Arise, shine, for thy light is come, verse; I said in the cutting off, verse; Lord I will praise thee, verse; Lord thou art become gracious, verse; O God the heathen are come, full; O how amiable are thy dwellings, verse; O praise God in his holiness, verse; Save me, O God, for thy name's sake, full

SONGS

To the loud trumpets martiall breath (London, *c*1700)

IAN SPINK

Walker. English firm of organ builders. Joseph William Walker (*b* London, 17 Jan 1803; *d* London, 1 Feb 1870) was reputedly 'parlour apprentice' to G.P. England (*see* ENGLAND (ii)) in London; he worked with W.A.A. Nicholls (England's successor) and then set up business as a pipe maker. He built his first organ in 1827. Joseph Walker's instruments are notable for their full-toned diapasons and bright upperwork; most had one or two manuals but he built larger organs for the Exeter Hall (1839), Highfield Chapel, Huddersfield (1854), and the International Exhibition of 1862. Under his son, James John Walker (*b* 21 Aug 1846; *d* 19 Sept 1922), the firm secured a series of prestigious contracts including Holy Trinity, Sloane Square, London (1891), St Margaret's, Westminster (1898), and York Minster (1903). All these instruments were characterized by a restrained opulence in which fully developed flue choruses co-existed with strings, orchestral reeds and bright flutes.

The firm played a significant part in the reform of English organ-building after 1945. Influenced by collaborations with Ralph Downes at Buckfast Abbey, Devon (1952), and Brompton Oratory (1954), the typical Walker organ of the period had a neo-classical tonal scheme and electro-pneumatic action. Examples include the Italian Church, Hatton Garden, London (1959), Corpus Christi, Osmondthorpe (1962), Ampleforth Abbey (1963), Liverpool Metropolitan Cathedral (1967) and Blackburn Cathedral (1969).

In 1975 the firm, reconstituted, moved its premises from Ruislip, Middlesex, to Brandon, Suffolk, since when it has increasingly concentrated on the building of new mechanical-action instruments (Albert Hall, Bolton, 1985; St Martin-in-the-Fields, London, 1990; St Chad's Cathedral, Birmingham, 1993).

Surviving organs from the earlier phase of the firm's history include those at St Mary's, Bermondsey (1853), Romsey Abbey (1857 and 1888), St Cross Hospital, Winchester (1863 and 1907), St Mary's, Portsea (1891), Bristol Cathedral (1907) and the Church of the Sacred Heart, Wimbledon (1912 and 1935).

NICHOLAS THISTLETHWAITE

Walker, Aaron Thibeaux. See WALKER, T-BONE.

Walker, Alan (*b* Scunthorpe, 6 April 1930). English musicologist, active in Canada. He studied at the GSM (ARCM 1949), at Durham University (BMus 1956, DMus 1965) and privately with Hans Keller (1958–60). After teaching as professor of harmony and counterpoint at the GSM (1958–61) he was a producer for the BBC music division (1961–71) and produced a complete Liszt cycle for Radio 3. He subsequently became chairman and professor in the music department at McMaster University, Hamilton, Ontario (1971–95). His chief areas of research are Romantic music, musical aesthetics, and criticism. He has edited useful anthologies on the life and works of Schumann, Chopin and Liszt, and produced two books on the creation and perception of music (*A Study in Musical Analysis* and *An Anatomy of Musical Criticism*). In both he argued that the underlying unity of a work is unconsciously formulated by the composer and is apprehended intuitively by the listener, ideas which are closely related to those of Hans Keller, to whom *A Study in Musical Analysis* is dedicated. His major achievement, however, is the magnificent three-volume biography of Liszt (1983–96), which dominated his work for a quarter of a century and which is the first mongraph to comprehend the scope and complexity of Liszt's own life and work. With its critical approach to the many Liszt sources, its wide cultural grasp and its accessible style it set new standards for Liszt scholarship. Walker's personal archive of several thousand letters to musicians was placed in the library of McMaster University in 1997. He is the recipient of a Festschrift in honour of his 65th birthday (*New Light on Liszt and his Music: Essays in Honor of Alan Walker*, ed. M. Saffle and J. Deaville, Stuyvesant, NY, 1997).

JOHN TYRRELL

Walker, Don(ald John) (*b* Lambertville, 28 Oct 1907; *d* Trenton, NJ, 12 Sept 1989). American orchestrator and composer. After early experience playing various instruments and arranging, he pursued studies in business at Rider College (Trenton) and then the University of Pennsylvania. He arranged a hit record for Fred Waring before graduation (1927) and afterwards joined his staff. His work for Waring, Fred Culley, and Al Goodman in radio, live shows and recordings led to orchestration for Sigmund Romberg's radio series, a success which added credentials as a 'legitimate' orchestrator to his already-established jazz expertise; it also began an association with Romberg that included Walker's first full Broadway assignment, *May Wine*, and the development of material left at Romberg's death into the score for *The Girl in Pink Tights*. The arrangers under contract to Chappell Music (Bennett, Spialek and later Royal were the others besides Walker) would assist each other as needed; for instance, Walker took over *Carousel* after Bennett had orchestrated only two numbers (suspending work on his own *Memphis Bound* to do so), and he provided orchestrations without credit for *Kiss Me, Kate*, *South Pacific*, and *The King and I*. After ending his Chappell contract around 1950, Walker eventually worked with most of the great names in musical theatre.

Walker's work stands out in several respects. Coming from the world of radio and recordings, he was a pioneer in eliminating the automatic doubling of the vocal line in the orchestra, the previous Broadway norm. Exceptional stylistic versatility is obvious when one juxtaposes the large-scale operatic lyricism of *Carousel* and *The Most Happy Fella*, the unpretentious liveliness of *Damn Yankees* and *The Music Man*, the delicate romance of *She Loves Me*, and the specific milieux of *Fiddler on the Roof* and *Cabaret*. Related to this is his inclination to create a unique instrumental complement for every show rather than relying on some standard layout. This may involve the omission of violins and violas altogether (*Anyone Can Whistle*), the use of instruments reminiscent of the *klezmer* ensemble (*Fiddler on the Roof*) or Berlin cabaret (*Cabaret*), or displaying specific solo timbres (cimbalom in *The Gay Life*, harmonica in *Shenandoah*). In all cases, Walker's choices instantly evoke and create the world of the particular work to an extent that knows no superiors.

WORKS
(*selective list*)

Musicals: Allah Be Praised! (with B. Bergersen) 1944; Memphis Bound (after A.S. Sullivan) 1945; Courtin' Time 1951; The Inn People 1973

Theatre orchs (composer in parentheses): Leave It to Me (C. Porter), 1938; Stars in Your Eyes (A. Schwartz) collab., 1939; Panama Hattie (Porter), 1940; Let's Face It (Porter), collab., 1941; By Jupiter (R. Rodgers), 1942; A Connecticut Yankee (Rodgers), rev. 1943; Something for the Boys (Porter), collab., 1943; On the Town (L. Bernstein), collab., 1944; Carousel (Rodgers), 1945; Up in Central Park (S. Romberg), 1945; Park Avenue (Schwartz), 1946; Finian's Rainbow (B. Lane), collab., 1947; Gentlemen Prefer Blondes (J. Styne), 1949; Miss Liberty (I. Berlin), 1949; Call Me Madam (Berlin), 1950; Pal Joey (Rodgers), rev. 1952; Wish You Were Here (H. Rome), 1952; Carnival in Flanders (J. Van Heusen), 1953; Me and Juliet (Rodgers), 1953; Wonderful Town (Bernstein), 1953; The Girl in Pink Tights (Romberg), 1954 [also developed]

The Pajama Game (R. Adler and A. Ross), 1954; Damn Yankees (Adler and Ross), 1955; Silk Stockings (Porter), 1955; The Most Happy Fella (F. Loesser), 1956; The Music Man (M. Willson), 1957; Greenwillow (Loesser), 1960; The Unsinkable Molly Brown (Willson), 1960; The Gay Life (Schwartz), 1961; She Loves Me (J. Bock), 1963; Anyone Can Whistle (S. Sondheim), 1964; Fiddler on the Roof (Bock), 1964; Flora, the Red Menace (J. Kander), 1965; Cabaret (Kander), 1966; Zorbá (Kander), 1968; The Rothschilds (Bock), 1970; Shenandoah (G. Geld), 1975

JON ALAN CONRAD

Walker, D(aniel) P(ickering) (*b* London, 30 June 1914; *d* London, 10 March 1985). English historical scholar. He read French at Oxford University (BA 1935); he was also a classicist and studied composition and chamber music. This combination of skills provided the context for his doctoral dissertation on French verse in 16th-century music (1940) and his later research. In 1945 he was appointed lecturer and reader in French at University College, London, and in 1961 reader in Renaissance Studies at the Warburg Institute, University of London. He remained at the Warburg until his death, having been elected Fellow of the British Academy in 1974. His interdisciplinary scholarship continues to influence musicologists and cultural historians working in quite different fields. His pioneering work on *musique mesurée* remains a source of stimulus to students of both French music and Renaissance humanism. More recently, his innovative study of Ficino's astrological music and the associated concept of *spiritus* (a vital substance mediating between the heavens and earth, and between soul and body), has become the starting-point for new research into the Renaissance magical tradition and its influence on musical ideas in the 16th and 17th centuries.

PENELOPE GOUK

Walker, Edyth (*b* Hopewell, NY, 27 March 1867; *d* New York, 19 Feb 1950). American soprano and mezzo-soprano. She studied with Aglaia Orgeni in Dresden, made her first appearance at a Gewandhaus concert in Leipzig and her operatic début as Fidès in *Le prophète* at the Berlin Hofoper on 11 November 1894. She was a member of the Vienna Hofoper from 1895 to 1903. On 16 May 1900 she made her Covent Garden début as Amneris and sang Ortrud, Fricka, Erda and Waltraute in the same season. From 1903 (début on 30 November as Amneris) until 1906 she was a member of the Metropolitan Opera. There she began to add soprano roles, including Brünnhilde in *Die Walküre*, to her repertory and at the Hamburg Opera (1903–12) she appeared regularly both as soprano and mezzo. In 1908 she sang Ortrud and Kundry at Bayreuth and returned, as Isolde, to Covent Garden, where she was accounted one of the greatest Wagnerian artists to have sung there. Under Beecham, in 1910, she was the first London Electra, winning high praise for both singing and acting; she also appeared as Thirza in Ethel Smyth's *The Wreckers*. From 1912 until 1917 she sang in the Munich Festivals. After her retirement from the stage she taught singing, chiefly privately but also, from 1933 to 1936, at the American Conservatory in Fontainebleau and subsequently in New York. The few published recordings of her voice were made between 1902 and 1908.

ERIC BLOM/HAROLD BARNES

Walker, Ernest (*b* Bombay, 15 July 1870; *d* Oxford, 21 Feb 1949). English teacher, writer on music, composer and pianist. His boyhood was marked by omnivorous self-instruction which was intensified when in 1887 he entered Balliol College, Oxford, and was befriended by its master, Benjamin Jowett. Taught by R.L. Nettleship, who profoundly influenced Walker's philosophical interests, and W.R. Hardie, he took the BA in classics (1891), after which followed the BMus (1893) and DMus (1898). In 1891 Balliol appointed him assistant organist to John Farmer, who had established there the series of Sunday concerts to whose fame and scope Walker signally contributed, particularly from 1901 when he succeeded Farmer as director of music. Walker's concerts brought to Oxford such artists as Plunket Greene, Steuart Wilson, Fanny Davies and Adolf Busch, and helped to create the climate for the acceptance of music as a serious discipline, a process which culminated in 1944 with the establishment of an independent faculty of music. At the Balliol Concerts Walker gave the first performances in England of Brahms's op.117 and of the Rhapsody op.119. He resigned the post of organist in 1913 and as director of music in 1925. He was made an honorary Fellow of Balliol in 1926.

Walker's passion for integrity of craftsmanship and his aversion to theatricality show in his music. Outstanding in his word settings are the *Five Songs from England's Helicon* and the solemn anthem *Lord, Thou hast been our refuge*. The Cello Sonata (1914) combines passion and harmonic adventure.

WORKS
(*selective list*)

Secular vocal: 5 Songs from England's Helicon, op. 10, SATB, pf, 1900; Hymn to Dionysus (Euripides, trans. G. Murray), op.13, chorus, orch, 1906; Ode to a Nightingale (J. Keats), op.14, Bar, chorus, orch, 1908; Soft Music (R. Herrick), op.48, SSATBB, 1931; Dirge in Woods (G. Meredith), op.65, SATB, 1939; many other songs and partsongs

Sacred vocal: 2 Anthems, op.16, 1899, rev. 1947: I will lift up mine eyes, male chorus/SSA, org, Lord, Thou hast been our refuge, male chorus/SATB, org; One generation passeth away, op.56, SATB, 1934; hymn tunes and canticles for Lady Margaret Hall etc.

Inst: Fantasia, D, op.32, str qt, 1905; Sonata, f, op.41, vc, pf, 1914 (1928); Variations on a Theme of Joachim, op.40, vn, pf, 1918 (1927); Fantasia-Variations on a Norfolk Folksong, op.45, small orch, 1930, arr. pf duet; 3 Fughettas, op.49, pf, 1932; 10 Preludes on the Lady Margaret Hall Hymntunes, op.50, org, 1932; Rhapsody and Fugue, pf duet, 1932 (1934); sonatas for vn and va, etc.

IVOR KEYS/DUNCAN J. BARKER

Walker, Frank (*b* Gosport, 10 June 1907; *d* Tring, *c*25 Feb 1962). English musicologist. From Portsmouth Grammar School, he entered the GPO cable and wireless service, and remained in it until his death. During the war he was attached to the Royal Corps of Signals in Italy. Walker devoted all his leisure to musical research. He was self-taught in musicology and acquired a fluent command of German and Italian. His interests were limited to Wolf, Verdi and certain aspects of earlier Italian music, but within these limits he achieved the highest possible standard of critical and literary excellence.

His book on Wolf was originally planned, in 1936, in collaboration with Walter Legge, but Walker ultimately wrote it himself. When he visited Austria at the end of the war, he met some of Wolf's descendants with whom (and with others who had known the composer) he had already corresponded. They made available to him new letters and documents, some of which did not appear in print, however, until the second edition of the book. His long research bore fruit in a critical biography which is one of the classics of English musical literature. An elegant, lively style is linked to apparently effortless control of a mass of material, which, in the hands of a lesser writer, could have become oppressive. Walker showed keen judgment in sifting the conflicting evidence which surrounded various parts of Wolf's life. Indeed, his devotion to the truth was surpassed only by the compassion he showed for the composer's frailties. The criticism of the music, though selective, shows a sensitive understanding of Wolf's genius for melody and rhythm, but says little about his astonishing harmonic audacities.

The same qualities and methods are found in the masterly book on Verdi, which subjects the growth of the composer's character to a brilliantly illuminating scrutiny, enhanced by Walker's own vivid translation of numerous letters and other documents. Again he proved his genius for handling a huge mass of material, much of it new, without producing a dull page. He showed marvellous insight into the subtleties of Verdi's mind and the richness of his human relationships.

Walker's very lively, valuable essays on Italian and, especially, Neapolitan subjects exhibit his gifts within a smaller framework – ironic ridicule of pretentious, inaccurate writing, and penetrating assessments based on meticulous research, some of which he began during his war service. The research for his later articles, as for much of his book on Verdi, was undertaken during his holidays in Italy. Walker's death, by suicide, was a great loss to English musical scholarship.

ALEC HYATT KING

Walker, George (Theophilus) (*b* Washington DC, 27 June 1922). American composer and pianist. He studied the piano as a child and later attended the Oberlin College Conservatory (BMus), the Eastman School of Music (DMA), the Curtis Institute of Music and the American Conservatory, Fontainebleau; his teachers included Nadia Boulanger, Robert Casadesus, Clifford Curzon and Rudolf Serkin. An accomplished pianist, he toured extensively both in the USA and abroad. His teaching appointments have included positions at Dillard University, the New School of Social Research, Smith College, the University of Colorado, Boulder and Rutgers University (1969–92). Among his honours are Fulbright, Whitney, Guggenheim, Rockefeller and MacDowell fellowships, an award from the American Academy and Institute of Arts and Letters (1982), a Pulitzer Prize (1996, for *Lilacs*), and commissions from orchestras such as the Boston SO and the New York PO.

Walker completed his first major composition, the String Quartet no.1, in 1946. His mature style reflects the influence of serialism, but is also characterized by neoclassical forms and textures, engaging melodies, dramatic instrumental colouring, rhythmic complexity and frequent references to black folk idioms. Other influences include the music of Stravinsky, Schoenberg, Debussy and Ravel. Several of his works have been recorded.

WORKS

GUTHRIE P. RAMSEY JR

Walker, Joseph Cooper (*b* Dublin, 1761; *d* Dublin, 1810). Irish antiquary. He was influenced by contemporary European interest in exotic music, and wrote the first book on Irish music *Historical Memoirs of the Irish Bards* (Dublin, 1786, enlarged 2/1818) when he was 24 and a treasury clerk in Dublin Castle. Romantic in sensibility, prolix in style and largely derived from printed sources in English (Walker knew no Irish), the work nonetheless preserves original information researched by him, particularly in relation to the harper Turlough Carolan, and has served as a model for later writers. It also contains some of the earliest translations into English of Gaelic heroic lays. The appendixes include contributions from fellow antiquaries and an interesting group of 15 melodies which range from bagpipe laments and a plough tune to Gaelic song airs and harp tunes. An extra 28 melodies in the posthumous second edition are all from contemporary printed sources.

NICHOLAS CAROLAN

Walker, Luise (*b* Vienna, 9 Sept 1916; *d* Vienna, 30 Jan 1998). Austrian guitarist and composer. She studied the guitar with Josef Zuth, then with Jakob Ortner at the Vienna Music Academy (where she later became professor of guitar) and finally with Heinrich Albert and Llobet Soles. She began her international concert career in 1940. Her many recordings (which include excerpts from Paganini's guitar quartets, Schubert's G major Trio and guitar concertos by Torelli and Giuliani) testify to her fine musicianship and astonishing technique. Together with Presti and Anido she is considered one of the 20th-century *grandes dames* of the guitar, and one of those who were unfortunate in dwelling in the shadow of Segovia. She has been notably active in chamber music. Walker's love affair with the guitar, described in her autobiography, *Ein Leben mit der Gitarre* (Frankfurt, 1989), lasted over 70 years; she continued to teach and perform until shortly before her death.

JOHN W. DUARTE

Walker, Robert (Ernest) (*b* Northampton, 18 March 1946). English composer. He was a chorister at St Matthew's, the remarkable Northampton church that commissioned work from Graham Sutherland, Henry Moore and Britten. After studying at Cambridge (1965–8), five years as Director of Music at Grimsby Parish Church (1968–73), and five years working at Novello (1973–8), Walker made the decision to become a full-time composer in 1978. For many years his base was Brinkwells, the Sussex cottage where Elgar wrote his Cello Concerto. He founded the festival in the nearby town of Petworth. From 1982 to 1991 he was a professor of composition at the London College of Music. His style is well described by his own note on his Piano Quintet: 'Vernacular materials are strongly evident, and there's no attempt to be stylistically pure. Old forms, shapes and tonalities rub shoulders with more contemporary devices'. In this, Walker was years ahead of fashion, and suffered official neglect as a result, much to the bewilderment of his enthusiastic audiences.

De profundis (1990), a choral setting of Oscar Wilde, signified a deep spiritual and professional dissatisfaction. In 1992 Walker left Britain to live in Bali. The return to a self-sufficient artistic society like those of his early career brought about a new serenity, and a style influenced by a hands-on knowledge of the gamelan.

WORKS
(*selective list*)

DAVID OWEN NORRIS

Walker, Sarah (*b* Cheltenham, 11 March 1943). English mezzo-soprano. After studying in London she appeared with the Ambrosian Singers, then made her solo début in 1970 as Octavia with Kent Opera, adding Poppea, Penelope and Andromache (*King Priam*) for that company. Dido in *Les Troyens* for Scottish Opera followed in 1972, and a variety of roles for the ENO, among them Dorabella, Fricka, an eloquent Mary Stuart, a compelling Countess (*Queen of Spades*), a moving Cornelia (*Giulio Cesare*) and an imperious Elizabeth I (*Gloriana*), all of which displayed her as a singing-actress of significant presence. Among her most vivid Covent Garden parts, following her 1979 début as Charlotte, were Baba the Turk and Mrs Sedley, both of which she has recorded. Walker's other roles have included Madame Larina and Filipyevna (*Yevgeny Onegin*) and Mistress Quickly. Her appreciable career in recital has encompassed lieder, *mélodies* and British song, to each of which she has brought her gift for deft characterization, based on verbal acuity and dramatic immediacy, qualities that have informed her operatic appearances and her many recordings. She was made a CBE in 1991.

ALAN BLYTH

Walker, T-Bone [Aaron Thibeaux] (*b* Linden, TX, 28 May 1910; *d* Los Angeles, 17 March 1975). American blues singer and guitarist. As a youth he accompanied the blues singer Ida Cox, and at the age of 19, under the name of Oak Cliff T-Bone, made his first recording, *Wichita Falls Blues* (1929, Col.) which showed an indebtedness to Blind Lemon Jefferson. In the early 1930s he travelled widely working in medicine shows, and in 1934 moved to California. He appeared with great success in Les Hite's orchestra in 1939–40, and with Hite made his second recording, as a singer, the well-known *T-Bone Blues* (1940, BN). Between 1940 and the late 1960s he toured frequently as a soloist; he began recording regularly from 1945, making a large number of recordings of rhythm and blues.

A self-taught instrumentalist, he took up the amplified guitar after hearing Les Paul on that instrument, and developed electric guitar techniques in blues contemporaneously with Charlie Christian in jazz. His *Call it Stormy Monday* (1947, Cap.) was a seminal modern blues to small-group accompaniment. Walker was generally supported by a band, which compensated for his thin voice and allowed him to extemporize on the guitar. *Too Much Trouble Blues* (1947, Cap.) and *Alimony Blues* (1951, Imper.) are characteristic of his style, with their witty lyrics and vibrant, rapid guitar phrases. The strength of his orchestras sometimes threatened to dominate him, but re-recordings of his best-known blues, *Stormy Monday* and *Mean Old World* (both 1956, Atl.), show his work to advantage. His deft execution greatly influenced the transition from folk to virtuoso blues playing. The arpeggio style of Jefferson, Rambling Thomas and other Texas acoustic guitarists was elaborated in Walker's single-string work on the amplified instrument. The electric guitar enabled him to make clearly defined, elaborate improvisations even at fast tempos, as can be heard on his outstanding *Strollin' with Bones* (1950, Imper.). Walker thus linked the Texas folk tradition with modern blues as exemplified by the work of B.B. King, who was much influenced by him.

PAUL OLIVER

Walker, William (*b* nr Cross Keys, SC, 6 May 1809; *d* Spartanburg, SC, 24 Sept 1875). American composer and tune book compiler. His first and most famous tune book *Southern Harmony* (New Haven, CT, 1835, 5/1854*R*) was published in four-shape notation (*see* SHAPE-NOTE HYMNODY, fig.1). A tune book rich in folk hymnody, *Southern Harmony* was the first collection to publish several well-known folk hymns, including *Amazing Grace* with its now-familiar tune 'New Britain', and was perhaps the most popular tune book in the South before the Civil War. Walker's second tune book, intended as a supplement to *Southern Harmony*, was the *Southern and Western Pocket Harmonist* (Philadelphia, 1846); it included a greater number of revival spirituals. Following the Civil War, Walker, under the influence of Lowell Mason and others, changed to a seven-shape note system of his own invention for his *Christian Harmony* (Philadelphia, 1867, 2/1872/*R*); it included more European music and more pieces by Mason and his followers. Walker's last collection, *Fruits and Flowers* (Philadelphia, 1873), was designed for children. *Southern Harmony* and *Christian Harmony* remain in use in singing conventions in the South.

HARRY ESKEW

Walker Brothers, the. American pop vocal group. Its members were Gary Leeds (*b* Glendale, CA, 3 Sept 1944), John Walker (John Maus; *b* New York City, 12 Nov 1943) and Scott Walker (Noel Scott Engel; *b* Hamilton, OH, 9 Jan 1944). The trio was formed in Hollywood before moving to London in 1964, and over the following three years they performed extensively throughout Britain and continental Europe. They recorded a series of hit singles which generally featured the smooth baritone of Scott Walker and lush string arrangements by Johnny Franz which recalled those of Phil Spector. Their hit songs

– all composed by American writers – included *Love her* (1965, by Barry Mann and Cynthia Weil), *Make it easy on yourself* and *Another tear falls* (1965 and 1966, by Burt Bacharach and Hal David), *My ship is coming in* (1966, Joey Brooks) and *The sun ain't gonna shine anymore* (1965, Bob Crewe and Bob Gaudio). The group split up in 1967 but reunited in 1975 when they recorded a further hit, *No Regrets* by Tom Rush. Scott Walker made a number of critically acclaimed solo recordings including versions of songs by Jacques Brel as well as albums of his own compositions.

DAVE LAING

Walking bass (i). In Baroque music, especially early Italian, a term used informally for a bass line that moves steadily and continuously in contrasting (usually longer) note values to those in the upper part or parts; it is a particularly common feature of STROPHIC VARIATIONS and was also used by Alessandro Grandi (i) in some of his motets. *See also* CANTATA, §I, 1.

□

Walking bass (ii). In boogie-woogie piano style, a repeating left-hand pattern of broken octaves. *See* BOOGIE-WOOGIE, ex.2.

GUNTHER SCHULLER

Walking bass (iii). In jazz, a line played pizzicato on a double bass in regular crotchets in 4/4 metre, the notes usually moving stepwise or in intervallic patterns not restricted to the main pitches of the harmony. The style arose as the use of STRIDE piano patterns declined, and its first master was Walter Page in the late 1920s and early 1930s; it has since become *lingua franca* for jazz bass players, allowing them to contribute pulse, harmony and counter-melody simultaneously.

GUNTHER SCHULLER

Wallace, John (Williamson) (*b* Methihill, Fife, 14 April 1949). Scottish trumpeter. He attended King's College, Cambridge (1967–70), and subsequently studied with Alan Bush at the RAM (1970–72) and with David Blake at York University (1972–4). His début was in 1965 in Estoril with Haydn's Trumpet Concerto. Wallace was principal trumpeter with the Philharmonia Orchestra (1976–95), and in 1988 joined the London Sinfonietta. He is also artistic director of the brass department at the RAM. In 1986 he founded the Wallace Collection, a brass ensemble of flexible instrumentation, with which he has toured and recorded extensively. In 1988 he gave the first performances of concertos by Tim Souster and Peter Maxwell Davies, both dedicated to him; his other first performances include Souster's *The Transistor Radio of St Narcissus* for flugelhorn and live electronics (1983), concertos by Malcolm Arnold (1982) and Dominic Muldowney (1993), Robert Saxton's *Psalm of Ascents* (1993), James Macmillan's *Epiclesis* (1993) and Turnage's *Dispelling the Fears* (1995). Wallace has edited the *Companion to Brass Instruments* (Cambridge, 1997) with Trevor Herbert, as well as a series of brass music and educational collections, and has made many recordings. He was made an OBE in 1995.

EDWARD H. TARR

Wallace, Lucille (*b* Chicago, 22 Feb 1898; *d* London, 21 March 1977). British pianist and harpsichordist of American birth. She was educated at the Bush Conservatory, Chicago, where she took the BMus degree, then went to Vassar College, where in 1923 she was awarded a fellowship which enabled her to go to Vienna to study music history under Adler and Alfons Dopsch. The following year she moved to Paris, and studied at the Sorbonne under Nadia Boulanger and Landowska. She also took piano lessons in Berlin from Schnabel, but her interest in earlier music led her to concentrate on the harpsichord and on such composers as Bach, Couperin and Scarlatti. Following Landowska's example, she used a Pleyel instrument and, like her, devoted much thought to questions of fingering and touch. In 1931 she married the pianist Clifford Curzon. An extremely serious-minded musician, she became increasingly self-critical; about 1952 she gave up her public career to look after the two orphaned sons of the singer Maria Cebotari.

LIONEL SALTER

Wallace, (William) Vincent (*b* Waterford, 11 March 1812; *d* Château de Haget, Vieuzos, Hautes-Pyrénées, 12 Oct 1865). Irish composer. His early reputation was made as a pianist and violinist in many parts of the world; the production of *Maritana* in 1845 established his position as a composer of operas for the London stage.

1. LIFE. Wallace's father was Sergeant William Wallace of Ballina, Co. Mayo, bandmaster of the 29th or Worcestershire Regiment. Little is known of his mother. They had three children: William, Wellington (*b* 1813) and Eliza (1814–79), who married the Australian singer John Bushelle and was herself a singer of some note. William took the additional name Vincent when he was received into the Roman Catholic Church in 1830, and thereafter used Vincent as his principal name.

His father, who taught him how to play a great many different instruments, was discharged from the army in 1825, and shortly afterwards the family moved from Waterford to Dublin. William became second violinist at the Theatre Royal, and on occasion deputized for the

2. Scene from Wallace's opera 'Maritana', Act 2 scene i, Drury Lane Theatre, London 1845: engraving from the 'Illustrated London News' (22 November 1845)

leader, James Barton. He studied the piano with W.S. Conran, and the organ with Haydn Corri. In January 1830 he was appointed organist of Thurles Cathedral (Roman Catholic) and professor of music at the Ursuline convent there. He fell in love with one of the pupils, Isabella Kelly, but her father objected to the marriage on the grounds that Wallace was a Protestant. He was therefore baptized in the Catholic Church in the autumn of 1830, and married Isabella the following year. In August 1831 he returned to Dublin and again joined the band of the Theatre Royal, where he was much stimulated by the visits of Paganini. At the age of 22 he made his début as a composer, playing a violin concerto of his own at the Dublin Anacreontic Society.

In 1835 Wallace emigrated to Tasmania with his wife and his sister-in-law Anna Kelly, on a ship that left Liverpool on 9 July and arrived at Hobart on 31 October. He gave a number of concerts there, then moved in January 1836 to Sydney, where he led an active musical life. He appeared at a concert at the Royal Hotel under the patronage of the governor of New South Wales, Sir Richard Bourke, on 12 February, where he played a piano concerto by Herz and a violin concerto by Mayseder: this dual role was typical of his concert-giving years, but it was usually as a violinist that he received the most applause. The Australian press treated him as a wonder, an 'Australian Paganini', and he is still regarded as 'the first outstanding instrumentalist to visit Australia'. He soon became, in Beedell's words, 'Sydney's undisputed musical emperor'. On 4 April 1836 Wallace and his wife, with his sister Eliza, a soprano who also lived in Sydney, opened an academy of music in Bridge Street, under the governor's patronage, for the instruction of young ladies. He may also have engaged in sheep farming, though it is difficult to find any hard evidence for this. At any rate he left Sydney on 11 February 1838, leaving behind him debts of nearly £2000 and also his wife and small son William, who probably returned to Ireland soon afterwards. In later life he told stories about his activities at this time, some of which were reported by Berlioz: he is said to have taken part in a punitive expedition against the Maoris in New Zealand, and to have visited India, where he was received by the Begum of Oudh; but these are mere tales. His actual destination was Valparaiso, Chile, where he joined an 'active and progressive British colony, very influential in the development of Chilean music', in the words of Eugenio Pereira Salas (quoted in Graves). He played the piano and the violin at a concert in Valparaiso on 3 June 1838, and later at Santiago de Chile. In the next few years he made expeditions to Buenos Aires, Lima, Jamaica and Cuba, eventually reaching Mexico City, where he conducted the Italian opera season in 1841, and composed a mass for performance at the cathedral. He proceeded to New Orleans (1841), Philadelphia (1842) and Boston (1843), at last reaching New York, where he made his début at the Apollo Saloon on 6 June. His reputation had gone before him, and he was lionized by New York society, and regarded as 'decidedly the first violinist and pianist in this country'. His *pièce de résistance* was his own Introduction and Variations entitled *Cracovienne*, which he played on either the violin or the piano.

Wallace probably left New York in 1844, and made a tour of Germany and the Netherlands before he at last appeared in London, at a concert in the Hanover Square Rooms on 8 May 1845. On this occasion he played the piano only, including the famous *Cracovienne*. The long years of travel leading up to this event can be seen as the indulgence of a restless spirit, but they also prepared the way for a successful career; for the romantic tales that preceded Wallace's arrival certainly helped to attract audiences. Soon afterwards Wallace was introduced to the librettist Edward Fitzball, who was looking for a fresh musical talent and had been much impressed by Wallace's playing. Together the two men worked on *Maritana*, which was performed under Bunn's direction at Drury Lane on 15 November, with Emma Romer as Maritana and William Harrison as Don César (fig.2). It is probable

that Wallace used for this opera a good deal of music that he had composed earlier: 'The Harp in the Air' is said to date from his days at the convent of Thurles, while the story that he composed much of the music at the Bush Inn, Hobart, in 1835 has never been either proved or disproved. At any rate *Maritana* had an immediate success excelled only by that of Balfe's *Bohemian Girl* (1843). It ran for over 50 nights, and the *Illustrated London News* correctly prophesied that the song 'Scenes that are brightest' would be heard everywhere, 'in the gilded drawing-room, and under the blue canopy of the skies with the barrel-organ'. *Maritana* was staged at Dublin in 1846, at Vienna in 1848 (with Staudigl) where Wallace enjoyed another triumph, at Philadelphia also in 1848, and in most major centres of opera before long. Yet from the first, some critics received it with reservations: Chorley said Wallace was 'in search of a style, since there are half-a-dozen different manners tried in as many portions of the opera'.

He was never able to repeat his success. His next two works were more ambitious, aspiring to the manner of grand opera; but *Matilda of Hungary*, performed in 1847, was a failure, and *Lurline*, commissioned for the Paris Opéra in August 1848 and also announced for performance at Covent Garden the same year, was not given at either theatre. It is said to have been staged as *Loreley* in Germany in 1854, but Wallace had to wait until 1860 for a London production, by the Pyne–Harrison company. Meanwhile he had contracted serious eye trouble, and in 1849 he returned to South America, ostensibly for the 'change of scene' which was widely regarded as a cure for all ailments. Another long series of journeyings followed, including several years in New York, where in about 1850 he 'married' Hélène Stoepel, a pianist who had made her début on 16 June 1850. In 1859 Wallace wrote to his sister-in-law, the former Anna Kelly, that he believed his marriage to Isabella had never been legal, but whether this was recognized by the New York authorities is not known. No record of the New York marriage has been found, and on 1 February 1883 Hélène Stoepel (using her maiden name) married one Henry John Miller in New York. At any rate Hélène appeared in programmes from January 1851 onwards as 'Mrs Wallace'. She played with Wallace in New York concerts for several years, and remained with him for the rest of his life. His movements in the next few years are uncertain. He was in Germany from September 1858 to January 1859. With the production of *Lurline* at Covent Garden on 23 February 1860 begins the last phase of his career. It was a success, though hardly on the scale of *Maritana*. But Wallace made no money out of it, having assigned the copyright to the Pyne–Harrison partnership on 18 March 1859. In the following three operas Wallace made a last effort to establish an English grand opera tradition: they were far more elaborate than other English operas of the time, but none of them caught the popular imagination. He did not give up, and was working on an opera *Estrella* in 1864 when he became very ill (he had been suffering from heart attacks for years); he crossed the Channel and retired to Passy, where he was visited by Rossini and other musical celebrities. In September 1865 he moved to the Château de Haget, where Hélène nursed him through his last illness. His body was returned to London, and he was buried in Kensal Green Cemetery on 23 October. Of his two wives, Hélène was the first to die, at New York in 1885; Isabella lived on in Dublin until 25 July 1900.

2. Works. Wallace wrote a great many piano pieces, most of them based on vocal music already in existence. Some are concert pieces of enormous difficulty, similar to Liszt's works of the same kind; others, for home use, are more reminiscent of Chopin. His mastery of piano technique is evident. Very little of the violin music has survived. Of his songs, duets and partsongs, the best and most popular ones generally turn out to have come from one of the operas; an exception is *The Bell Ringer* (Oxenford), which was often sung by Santley and became well known.

The chief interest lies in his operas, and more particularly in *Maritana*, in which he achieved at one blow a degree of popular success, at home and abroad, which had eluded British composers (with the exception of Balfe) for generations. As Forsyth put it, 'If we judge Wallace's best work by the standards of his English predecessors we shall be forced to allow it a certain elemental vigour and spontaneity which were unknown till his day'. This quality derived from the many foreign influences which had acted on Wallace, and which set him apart from Loder, Barnett or Macfarren. He had picked up the ability to write a 'big tune' in the style of Meyerbeer, which swept his audience through an extended choral scene in a way that no English ballad could ever do; a typical example from *Maritana* is 'Angels that around us hover' (ex.1), but an even more powerful tune closes the second

Ex.1

Andante religioso

An - gels that a - round us ho-ver, Guard us till the close of day, close of day.

act of *Lurline* (Wallace, like Meyerbeer, took care to introduce the tune first in a previous act, so that it would be familiar when it came back). He could also write a sustained dramatic finale on almost Mozartian lines (*Maritana*, Act 2), or a rollicking 6/8 melody like Donizetti or early Verdi ('Turn on old time'). But the most striking innovation in *Maritana* was his use of exotic colouring to illustrate Spanish and gypsy elements. With knowledge of *Carmen* and later imitations, the beginning of 'It was a knight of princely mien' (ex.2), with its flat supertonic and bolero rhythm, strikes one as an orthodox and even hackneyed symbol of Spain. But Chorley's comment on this very passage shows how little any such convention existed in 1845: 'Maritana's first *romanza* has a far-fetched turn in the second bar, which might pass in a French melody, where improbability is the law, not the exception, but among more smoothly written music sounds like affectation'. The spirit of *Carmen* is even more strongly present in the charming fortune-telling song and chorus 'Pretty Gitana, tell us' (ex.3), and in several other numbers. These colourings were new, not only in English opera, but in any well-known opera; previous operas such as *La favorita* (1840), *Don Pasquale* (1843) and *Ernani* (1844), had contained fandangos and boleros, but with orthodox harmonies. Even Chopin's Bolero (1834) did not use the flattened supertonic in this

Ex.2

way. It is hardly fanciful to infer that Wallace absorbed this idiom from the popular music of Spanish America, where he had spent several years; nor is it far-fetched to point to a direct influence on Bizet, when one remembers that *Maritana* was one of the most successful operas of its generation throughout Europe.

In *Lurline*, composed in 1847 but perhaps greatly revised for the 1860 production, there is a considerable change of style – a much more ambitious use of the chorus, soloists and orchestra to produce grand scenes. To judge from critical reactions these failed not because they were ineffective but because they were felt to be un-English – as indeed they were. The drinking-chorus 'Drain the cup of pleasure' has the force of a Verdi chorus; the trio 'Ah! dare I hope' has as much action and characterization as an entire opera of Balfe's. A new element can be observed in the style of Wallace's later operas – the influence of Mendelssohn; three melodies of the 'song without words' type can be found in *Lurline* – 'When the night winds sweep the wave', 'Go from this heart' and the F♯ minor tune in the overture. Though inferior to Loder's, Wallace's orchestration was coarsely effective. He would still insert an occasional ballad for those that liked it – in this form he had never been a match for Balfe – but he could also write an erotic song of surprising passion, such as 'Sweet form that on my dreamy gaze'. Bernard Shaw wrote after hearing a revival of *Lurline*: 'There are several moments in the opera in which the string of hackneyed

Ex.3

and trivial shop ballad stuff rises into melody that surges with genuine emotion'.

In many ways *The Amber Witch* represents Wallace's full maturity, achieving at last 'an effective structural scheme and a decent level of musical characterization' (Burton, *GroveO*). The audience is drawn into sympathy with the heroine's plight to an extent rarely found in Victorian opera; the overture, also, is a vast advance on the typical potpourri of earlier years.

NICHOLAS TEMPERLEY

Wallace, William (*b* Greenock, 3 July 1860; *d* Malmesbury, 16 Dec 1940). Scottish composer and writer on music. The son of an eminent Scottish surgeon, he was educated at Fettes College and took medicine at Edinburgh and Glasgow universities. He then studied ophthalmology in Vienna and Paris, practising briefly in London. In 1889 he turned from medicine to music, entering the RAM for

a year, his only formal musical training. His compositions began to be performed at the Crystal Palace and Queen's Hall, notably the symphonic poem *The Passing of Beatrice* in 1892. Wallace wrote widely in journals, editing the *New Quarterly Musical Review* for a few years. He examined the physiological and psychological aspects of music in his books *The Threshold of Music* and *The Musical Faculty*, two of the best contributions to the subject area. He was honorary secretary of both the Philharmonic Society (1911–13) and the Society of British Composers. During the war years Wallace worked again as a doctor and in later life became librarian and professor of harmony and composition at the RAM.

Wallace's series of symphonic poems made him the first British exponent of the genre, modelling them on those of his idol Liszt both formally and stylistically; *Villon* (1909) was his most successful essay. He also drew on Scottish idiom in *A Scots Fantasy* and the *Jacobite Songs*, coupled with Wagnerian influences in *The Massacre of the Macpherson* (*c*1910). In *Wallace AD 1305–1905* he used the traditional melody 'Scots wha hae wi' Wallace bled'. He was stylistically more advanced and less conservative than his compatriots MacCunn and Mackenzie, but his music is primarily that of a thinker, although in his first book, *The Threshold of Music* (London, 1908), he gave the view 'there is no mental process which in any respect resembles music'.

DUNCAN J. BARKER

Wallaschek, Richard (*b* Brno, 16 Nov 1860; *d* Vienna, 24 April 1917). Austrian writer on music. He studied law and philosophy in Vienna, Heidelberg and Tübingen (1878–85), and graduated in philosophy at Tübingen in 1885 and law at Berne in 1886. After the publication in 1886 of his *Ästhetik der Tonkunst* he became a lecturer in philosophy in Freiburg. From 1890 to 1895 he studied in London, and in 1896 he went to the University of Vienna to lecture on the psychology and aesthetics of music. In 1908 he was made an extraordinary (unsalaried) professor, and in 1911 a salaried university professor. He taught the aesthetics of music in the conservatory of the Gesellschaft der Musikfreunde (1900–02) and also wrote music articles and reviews for *Die Zeit* (1896–1904).

According to Graf (1974), Wallaschek's appointment in 1896 to the University of Vienna marks the beginning of the field of comparative musicology. Noted for his positivistic and empirical approach to musicological study, in *Primitive Music* (1893) he made a detailed examination of the musical instruments of ethnic groups and developed Wagner's theory that the origin of music lies in rhythm and the dance; he opposed Herbert Spencer's idea that music is an outgrowth of speech. His article 'On the Difference of Time and Rhythm in Music' (1895) discusses rhythm as 'the form of the objective movement' and time-sense (*Takt*) as 'the form of the perceiving subjective mind'. His theory of feeling was developed from Schopenhauer and Wagner, but he himself was a pioneer in his work on musical psychology. His most important ideas are consolidated in the posthumous *Psychologische Ästhetik* (1930), which includes an assessment by his friend and disciple Robert Lach.

J.A. FULLER MAITLAND/DAVID CHARLTON/SUZANNE M. LODATO

Wallberg, Heinz (*b* Herringen, nr Hamm, 16 March 1923). German conductor. He studied at the Dortmund and Cologne conservatories and began his career as a violinist and trumpeter in Cologne and Darmstadt. He made his conducting début in *Le nozze di Figaro* at Münster in 1947 and worked in several German cities, serving as music director at the Augsburg Städtische Bühnen in 1954 and at Bremen, 1955–60. He was music director at Wiesbaden, 1960–74, and at the same time appeared regularly at the Vienna Staatsoper. He made his Covent Garden début in 1963 with *Der Rosenkavalier*. As music director at Essen (1975–91) he opened the new Aalto-Theater there (1988). He was also chief conductor of the Bavarian RSO (1975–82), with which he recorded more than a dozen operas and operettas, including Humperdinck's *Königskinder*, Leoncavallo's *La bohème*, Lortzing's *Zar und Zimmermann*, Flotow's *Martha*, Egk's *Peer Gynt* and a much-praised version of Weinberger's *Švanda the Bagpiper*. Other recordings include orchestral works by the Czech composer Jindřich Feld, and choral ballads by Schumann. His work in Australasia included the first production in New Zealand of *Die Meistersinger*, at Wellington in 1990, and in 1991 he made a belated American début with the National SO, Washington, DC.

NOËL GOODWIN

Wallek-Walewski, Bolesław (*b* Lwów, 23 Jan 1885; *d* Kraków, 9 April 1944). Polish composer, conductor and teacher. He studied in Lwów with Sołtys, Niewiadomski (theory and composition) and Maliszowa and Zelinger (piano), at the Kraków Conservatory with Żeleński and Szopski, and in Leipzig with Riemann (musicology) and Prüfer. In 1910 he was appointed professor at the Kraków Conservatory, where he was made director in 1913. Founder, artistic director and conductor of the choral society Echo Krakowskie, he also conducted opera and orchestral concerts. As a composer, employing a traditional Romantic style, he excelled particularly in choral music. His opera *Pomsta Jontkowa* was planned as a sequel to Moniuszko's *Halka*.

MIECZYSŁAWA HANUSZEWSKA

Wallen, Errollyn (*b* Belize City, Belize, 10 April 1958). British composer, pianist and singer of Belizean birth. Educated in the British Isles from the age of two, she trained as a dancer at the Maureen Lyons School of Dancing and the Urdang Academy before taking dance classes at the Dance Theater of Harlem (1976–8). She studied music at Goldsmiths College, London (BMus 1981) and composition with LeFanu and Lumsdaine at King's College, London (MMus 1983). After working with the cabaret band Pulse, she co-established the Wallen Parr recording studio and music production company in 1986. As well as composing for film and television, she wrote many of her early works for Nanquidno (four players on two pianos) and her own Ensemble X. Her tribute to Nelson Mandela, *In Our Lifetime* for baritone and tape (1990), was later choreographed for the London Contemporary Dance Company. In 1993 her chamber opera *Four Figures with Harlequin* was first performed by the Garden Venture of Covent Garden. Other works have been commissioned by a wide range of groups and performers including the Hallé, Birmingham Contemporary Music Group, the Royal Ballet, the BBC, the baritone Thomas Buckner and the jazz saxophonist Courtney Pine.

Wallen draws inspiration from a great diversity of sources in her music. It is above all characterized by a deeply expressive lyricism, as in the Christine de Pisan setting *Dark Heart* (1991), and a delight in vibrant dance rhythms, as in the last movement of the Concerto for Percussion and Orchestra (1994), commissioned and broadcast by the BBC. She has also produced an album on which she performs her own songs, *Meet me at Harold Moores* (1998).

SOPHIE FULLER

Wallenstein, Alfred (*b* Chicago, 7 Oct 1898; *d* New York, 8 Feb 1983). American conductor and cellist. Educated in Los Angeles, he played in various theatre orchestras before joining the cello section of the San Francisco SO at the age of 17. After moving to the Los Angeles PO (1919), he studied medicine in Leipzig as well as the cello with Julius Klengel. He was principal cellist with the Chicago SO (1922–9) and the New York PO under Toscanini (1929–36). He conducted his first orchestral concert for a New York broadcast in 1931, and formed the Wallenstein Sinfonietta two years later. Returning to Los Angeles in 1943, he became musical director of the Los Angeles PO, a post he held with authority and distinction until 1956. He was active in numerous educational projects, and served as musical director for the radio station WOR in New York. He joined the faculty of the Juilliard School of Music in New York in 1968, becoming head of the orchestral department in 1971.

MARTIN BERNHEIMER

Waller, Fats [Thomas Wright] (*b* New York, 21 May 1904; *d* Kansas City, MO, 15 Dec 1943). American jazz and popular pianist, organist, singer, bandleader and composer.

1. Life. 2. Works and style.

1. LIFE. His father Edward Waller, a Baptist lay preacher, conducted open air religious services in Harlem, at which as a child Fats Waller played the reed organ. He played the piano at his public school and at the age of 15 became organist at the Lincoln Theatre on 135th Street. His father hoped that Waller would follow a religious calling rather than a career in jazz, but after the death of his mother, Adeline Waller, in 1920 he moved in with the family of the fellow African American pianist Russell Brooks. Through Brooks, Waller met James P. Johnson, under whose tutelage he developed as a pianist, and through whose influence he came to make piano rolls, starting in 1922 with *Got to cool my doggies now* (QRS).

In October 1922 Waller made his recording début as a soloist for Okeh with *Muscle Shoals Blues* and *Birmingham Blues* and the same year began a series of recordings as an accompanist for several blues singers. A collaboration with Clarence Williams in 1923 led to the publication of Waller's *Wild Cat Blues*, which Williams recorded with his Blue Five, including Sidney Bechet (July 1923). Another composition, *Squeeze me*, was published the same year, and these began to establish Waller's reputation as a composer of material performed and recorded by other artists. 1923 also saw his broadcasting début for a local station in Newark, followed by regular appearances on WHN, New York. Waller continued to broadcast as a singer and soloist throughout his life, including, from 1932 to 1934, 'Fats Waller's Rhythm Club' and 'Moon River' (on which he played the organ). During the early 1920s he continued as organist at the Lincoln and Lafayette theatres, New York.

In 1927 Waller recorded his own composition *Whiteman Stomp* with Fletcher Henderson's orchestra (Col.); Henderson also made use of further pieces by Waller, including *I'm crazy 'bout my baby* and *Stealin' Apples*. Waller also worked as a composer with the lyricists Edgar Dowell, J.C. Johnson, Andy Razaf and Spencer Williams. With Razaf he worked on much of the music for the all-black Broadway musical *Keep Shufflin'* (1928). Their later collaborations for the stage included the show *Connie's Hot Chocolates* (which opened in May 1929 and incorporated the songs *Black and Blue* and *Ain't Misbehavin'*) and the revue *Load of Coal* (which included *Honeysuckle Rose*). Waller's Carnegie Hall début was on 27 April 1928, when he was the piano soloist in a version of James P. Johnson's rhapsody *Yamekraw* for piano and orchestra.

Waller began his recording association with Victor in 1926. Although he recorded with various groups, including Fats Waller's Buddies (1929, one of the earliest interracial groups to record), his most important contribution was a series of solo recordings of his own Harlem stride piano compositions: *Handful of Keys*, *Smashing Thirds*, *Numb Fumblin'* and *Valentine Stomp*. After sessions with Jack Teagarden (1931) and Billy Banks's Rhythmakers (1932), he began in May 1934 the voluminous series of recordings with a small band known as Fats Waller and his Rhythm.

In the mid-1930s Waller worked on the West Coast with Les Hite's band at Frank Sebastian's New Cotton Club. He also appeared in two films while in Hollywood in 1935: *Hooray for Love!* and *King of Burlesque*. For tours and recordings Waller often led his own big band. The group's version of *I got rhythm* includes a 'cutting contest' of alternating piano solos by Waller and Hank Duncan (1935, HMV).

In 1938 Waller undertook a European tour and recorded in London with his Continental Rhythm as well as making solo pipe-organ recordings for HMV. His second European tour the following year was terminated by the outbreak of war, but while in Britain he recorded (also for HMV) his *London Suite*, an extended series of six related pieces for solo piano: 'Piccadilly', 'Chelsea', 'Soho', 'Bond Street', 'Limehouse' and 'Whitechapel'. It is Waller's longest composition and represents something of his aspirations to be a serious composer rather than just the author of a string of hit songs.

The last few years of Waller's life involved frequent recordings and extensive tours of the USA. In early 1943 he returned to Hollywood to make the film *Stormy Weather* with Lena Horne and Bill Robinson, in which he led an all-star band which included Benny Carter and Zutty Singleton. He undertook an exceptionally heavy touring load in that year, as well as collaborating with the lyricist George Marion for the stage show *Early to Bed*. The touring, constant abuse of his system through overeating and overdrinking and the nervous strain of many years of legal trouble over alimony payments all took their toll and his health began to break down. He was taken ill during a return visit to the West Coast as solo pianist at the Zanzibar Room, Hollywood, and died of pneumonia while travelling back to New York by train with his manager, Ed Kirkeby.

2. Works and style. Waller's greatest importance lies in his several contributions to jazz piano. His original stride pieces in the Johnson tradition, including *Handful of Keys*, *Smashing Thirds*, *Numb Fumblin'*, *Valentine Stomp*, *Viper's Drag*, *Alligator Crawl* and *Clothes Line Ballet* (all Vic.), clearly illustrate his imaginative and broadly expressive style. The fullness and variety of his tone are still unsurpassed, and he used a wide dynamic range to great expressive and dramatic effect. Harmonically, he sometimes added inner pitches to the customary octaves or 10ths in the left hand, producing richly voiced three-note chords; his chromatic alterations and passing notes undoubtedly influenced Art Tatum. His improvised melodies were perhaps even more tuneful and less formulaic than those of his mentor Johnson, though in this he was not as consistently inventive as Earl Hines. Waller's use of rhythm was in the classic stride tradition, and its characteristics included occasional three-beat cross-rhythms in the left hand. All of these features were present in his playing by 1929, as is made clear by *My feelin's are hurt* (ex.1), which was recorded in that year. With his group Fats Waller and his Rhythm he produced many musically rewarding sessions for Victor during the 1930s. Performances such as *Swingin' them Jingle Bells* (1936) reveal a remarkably tight ensemble and memorable solos by his sidemen.

Waller was the first significant jazz organist. During the mid-1930s he was one of the first musicians to employ the celesta in jazz and frequently played the instrument in combination with the piano.

Waller's successful popular songs *Ain't Misbehavin'* and *Honeysuckle Rose* are typical of a long series of such works that were responsible for his fame as a satirical entertainer and songwriter and brought him a following rivalling that of Louis Armstrong. Because of this the serious side of his musical personality was little appreciated during his lifetime and remained largely underdeveloped. As a singer he could give creditable jazz renditions of songs which he considered to have real musical merit. His vocal style, clearly in the tradition established by Armstrong, showed a tasteful and highly personal use of vibrato. On his own novelty songs, such as *Your feet's too big* (1939, B♭), his use of comic effects and spoken or shouted asides showed at times a genuine sense of comedy; more often, however, he used his wit to draw subtle but unmistakable attention to the vapidity of the material he was expected to record. Unfortunately, Waller's public often demanded more of his exaggerated stage personality than of his unique creative gifts.

Ex.1 *My feelin's are hurt* (1929, Vic), transcr. B. Dobbins

medium slow blues (♩ = 112)

WORKS
(*selective list*)

ALYN SHIPTON (1), BILL DOBBINS (2)

Wallerstein. *See* OETTINGEN.

Wallerstein, Anton (*b* Dresden, 28 Sept 1813; *d* Geneva, 26 March 1892). German violinist and composer. He began his career at the age of nine, playing in taverns and in private houses, but also making a sensational appearance in Berlin in 1827. In 1829 he joined the court orchestra in Dresden, then moved to Hanover as Konzertmeister in 1832. He undertook several concert tours, finally giving up regular employment in 1841 to devote himself to performing and composition. He began to compose in 1830, becoming famous for his large number of light salon pieces, mostly for violin and piano, and especially for his dance music – polkas, quadrilles and galops. The best-known included *La coquette, Rédova parisienne* (1846), *Studentengalopp* and *Erste und letzte Liebe*. He also wrote some songs. His last published work was also one of his more ambitious, a *Souvenir du pensionnat* op.275 (Leipzig, ?1877), a suite of five contrasted dance pieces.

JOHN WARRACK

Walleshauser, Johann Evangelist. *See* VALESI, GIOVANNI.

Wallfisch [née Hunt], **Elizabeth (Tamara)** (*b* Melbourne, 28 Jan 1952). Australian violinist. She took lessons from Jack Glickman and made her début in 1969 playing the Mendelssohn Violin Concerto with the Melbourne SO. In 1971 she came to the RAM in London, where she studied with Frederick Grinke; two years later she won the Bach prize in the Flesch competition. She took up the Baroque violin in 1979 and since 1982 has led the Raglan Baroque Players, with whom she has recorded an award-winning disc of Locatelli's op.3 violin concertos. In 1989 she became leader of the Orchestra of the Age of Enlightenment (with whom she has recorded the Bach and Haydn violin concertos) and in 1993 was appointed leader of the Carmel Bach Festival Orchestra in the USA. Wallfisch's repertory extends well into the 19th century: she has performed Brahms's Violin Concerto and Double Concerto (with her husband Raphael), as well as works by Joachim. Between 1985 and 1991 she played with the Purcell Quartet and from 1985 has performed with the Locatelli Trio, with whom she has recorded sonatas by, among others, Biber, Locatelli, Tartini and Schubert. Her richly colourful playing can also be heard on a disc of Bach's unaccompanied sonatas and partitas. Wallfisch has taught both the Baroque and modern violin at the RAM, and since 1996 has taught the Baroque violin at the conservatory in The Hague.

LUCY ROBINSON

Wallfisch, Raphael (Steven) (*b* London, 15 June 1953). English cellist. He studied with Amaryllis Fleming in London, 1967–9, Amadeo Baldovino in Rome, 1969, Derek Simpson at the RAM, 1970–73, and with Piatigorsky at the University of Southern California. He made his début in 1974 with the English Chamber Orchestra at the Queen Elizabeth Hall, and in 1977 won the first prize in the Gaspar Cassadó International Competition in Florence. He has appeared with many leading orchestras, and first appeared at the Proms in 1989. From 1980 to 1992 he played in a duo with his father, the pianist Peter Wallfisch, with whom he made notable recordings of Brahms's cello sonatas. Several works have been dedicated to him including Kenneth Leighton's *Alleluia Pascha Nostrum* (1982) and concertos by Christopher Steele (1990) and Robert Simpson (1992). Wallfisch has specialized in music by British composers of the late Romantic period, and has recorded the concertos of Bliss, Moeran, Finzi, Bax, Delius and Leighton; he has also recorded the original version of Tchaikovsky's Variations on a Rococo Theme. In 1980 he was appointed professor at the GSMD in London.

MARGARET CAMPBELL

Wallin, Rolf (*b* Oslo, 7 Sept 1957). Norwegian composer. He studied composition with Finn Mortensen and Olav Anton Thommessen at the Norwegian State Academy of Music (1980–82) and with Roger Reynolds, Vinko Globokar and Joji Juasa at the University of California, San Diego (1985–6). He is an exceptionally versatile musician, having distinguished himself not only as one of the leading Scandinavian composers of his generation, but also as a performance artist and as a trumpeter within ensembles whose repertory extends from early music to avant-garde rock. Wallin has received a number of awards for his compositions: the Norwegian Society of Composers' 'Composition of the Year' award for *. . . though what made it has gone* (1988) and the Clarinet Concerto (1996), the Bang & Olufsen Music Award in 1989 and, for *Stonewave*, the Best Work award at the 1992 World Music Days in Warsaw. Wallin freely combines computer-generated systems and mathematical formulae (e.g. fractals) with intuitive approaches to composition, and the complex yet very plastic textures of his music are reminiscent of composers such as Xenakis and Ligeti. Many of Wallin's works play on contrasts between the liquid and solid states or, applied to the medium of time, between movement and stasis.

WORKS

HALLGJERD AKSNES

Wallis, John (*b* Ashford, Kent, 23 Nov 1616; *d* Oxford, 28 Oct 1703). English mathematician, experimental philosopher and music theorist. He entered Emmanuel College, Cambridge, in 1632, graduated BA in 1637 and MA in 1640, the same year he was ordained. In recognition of his services to parliament during the Civil War (e.g. decoding ciphers used by the royalist army), Cromwell appointed Wallis to the Savilian Chair of Geometry at Oxford in 1649. He lectured on harmonics as a branch of mathematics and over the next half century established himself as the foremost English authority on musical science. He was also one of the experimental philosophers active in London and Oxford during the Interregnum who became founder members of the early Royal Society of London. His dual interest in mathematics and experimental philosophy is reflected in his music theory, which was written entirely from the perspective of a scholar rather than a practising musician.

Wallis's outstanding contribution to music theory was his Greek edition with Latin translation (1682) of Ptolemy's *Harmonika* (mid-2nd century) and the commentaries on it by Porphyry and Bryennius (1699). His edition of Ptolemy, one of the most important sources on ancient Greek music theory, remained a standard authority until the 20th century. He had been appointed as Keeper of the University Archives in 1658 and had had access to Greek manuscripts collated and studied by Peter Turner (a former Savilian Professor of Geometry) and Edmund Chilmead before the latter's ejection from Christ Church in the late 1640s. In an appendix to Ptolemy, Wallis identified the chief differences between ancient and modern music, and an English summary of his conclusions was published in the *Philosophical Transactions of the Royal Society* (1698).

It was also via the *Philosophical Transactions* in 1677 that he alerted readers to the discovery of the existence of nodes, made by two Oxford scholars, William Noble and Thomas Pigot, in about 1674. This curious property of vibrating strings had already been described in an essay by Narcissus Marsh in Robert Plot's *Natural History of Oxfordshire* (Oxford, 1677), and the physics of musical strings (studied by Mersenne and Galileo Galilei in the 1620s and 30s) had been investigated by Wallis and other Royal Society members in 1664–5. Wallis was also interested in the organs of speech and hearing, and wrote extensively on the structure and origins of language, as well as participating with William Holder in a debate on teaching the deaf and dumb.

Wallis's knowledge of ancient harmonic doctrine clearly informed his contribution to modern debates on tuning and temperament. It was in response to John Birchensha's theories presented to the Royal Society in 1664 that he first began to articulate his theory of tonality based on Ptolemy's authority in a series of letters to the society's secretary, Henry Oldenburg. Only by the third letter did Wallis acknowledge the contribution of more recent authors such as Kepler and Mersenne to this subject. In the 1670s and 80s he gave public support to Thomas Salmon's scheme for improving the tuning of fretted instruments described in the latter's *A Proposal to Perform Musick; Perfect and Mathematical Proportions* (London, 1688). By means of an adjustable fingerboard it would be possible to play the intervals of Ptolemy's syntonic diatonic scale (i.e. just intonation). The same Ptolemaic ideal underpins Wallis's 1698 article in which he describes the system of equal temperament used by the organ builder Renatus Harris. While accepting the need for some system of temperament in instruments, he seems to have shared Salmon's conviction that if music could be played using just intonation this might produce the kind of ethical effects described by ancient authors. In his letter to Andrew Fletcher 'Concerning the Strange Effects reported of Musick in Former Times' (1698), Wallis attributed most of these effects either to exaggeration by the authors themselves, or to the simplicity of ancient people. Yet having noted that the aim of modern music is to please the ear, he observed that musicians probably would still be able to excite the passions of their listeners if this was their intention.

The brief articles Wallis published in the *Philosophical Transactions* seem to have had a far greater influence on later readers than his more original Latin writings. Like other areas of his work, however, his musical scholarship relied considerably on other people's ideas, and he tended to pass them off as his own. As Anthony Wood observed, he could 'at any time, make black white and white black, for his own ends, and hath a ready knack of sophistical evasion'.

PENELOPE GOUK

Walliser [Waliser, Walleser, Wallisser], **Christoph Thomas** (*b* Strasbourg, 17 April 1568; *d* Strasbourg, 26 April 1648). Alsatian teacher, composer and choral director. His father, also named Christoph Thomas (1542–92), left Nuremberg around 1566 and settled in Strasbourg, taking up a teaching post at the parish school of Jung St Peter. His mother, Margarethe Offner, was the daughter of the pastor there. Walliser attended the Schola Argentinensis where he followed the methods of Jean Sturm in his classical and humanist studies, until his father moved to Heilbronn in 1584. From that time he studied music, science and the liberal arts while travelling in Bohemia, Hungary, Italy, Switzerland and several places in Germany. Melchior Vulpius of Speyer and Tobias Kindler of Zittau were among his teachers. In 1595 he was awarded a scholarship by the authorities in Strasbourg which enabled him to travel to Italy, where, in Bologna, he became a student and assistant of Aldrovandus, a natural scientist.

Walliser returned to Strasbourg in 1598 to become a teacher and subsequently *musicus ordinarius* at the Gymnasium, where all students were required to attend five music classes each week. He wrote and directed the choral music accompanying theatrical performances, celebrations and convocations, in addition to fulfilling his duties as a *figural cantor* at the cathedral. In 1600 he was appointed *vicarius altarius* at the Thomaskirche, and was promoted to the post of *magister artium* on 24 March 1601. His marriage on 21 July 1601 to Margareta Kieffer, daughter of the publisher Karl Kieffer, resulted in many children, all of whom died before their father. In 1605 he assumed directorship of the *publicum exercitium musicum*, a group of students from various schools in Strasbourg and interested townspeople who met weekly at the Predigerkirche to perform music. A year later he took charge of the music for Sunday Vespers at the cathedral but faced serious opposition in this post from a group of radical Protestants who wanted to ban instrumental music and vocal polyphony from the church. To avoid such a restriction, in some of his compositions at that time he assigned alternate stanzas of the chorale to the congregation in unison, interspersed with vocal polyphony, instrumental interludes or organ solos.

In 1634, a year after the death of his first wife, Walliser married Margarethe Seuppel. Because of diminishing enrolment at the school due to the Thirty Years War, he was dismissed from his post in that year. He made his last public appearance in 1638 on the occasion of the centenary celebration of the founding of the Protestant Gymnasium, when he directed his work for double choir, *Fons Israelis*. His last work, the canon *Christe, tui vivo vulneris auspicio* (Christoph Thomas VValliser Argentoratensis), appeared in 1643. In his last years he was extremely poor and was forced to depend for his living on gifts from friends and on the sale of his library to the Thomaskirche.

Walliser's several musical appointments and his compositions show him to have been the most important musician in Strasbourg during the period 1600–50. In addition, the wide dispersion of his works attests to his reputation elsewhere. His teaching methods followed Sturm's principles, and in his treatise, *Musicae figuralis Praecepta brevia*, he included about a hundred progressive exercises composed on Latin and German texts which aim at teaching and memorising Latin poetry and moral education. In the majority of his motets he made use of Strasbourg chorales, including melodies by Matthias Greiter and Wolfgang Dachstein taken from the *Teutsch Kirchenampt* (Strasbourg, 1525). He followed the traditional 16th-century German practice of stating the entire cantus firmus in one or more voices in such a way that the melody could be clearly heard. Less frequently the accompanying voices are constructed with motifs derived from the cantus firmus. For variety, homophonic passages alternate with imitative sections, and there is frequent rhythmic alteration of the chorale melody. Vestiges of 15th–16th century Franco-Flemish counterpoint, and of the German *tenorlied* technique, can be seen in his work. In his theatrical music and compositions not based on a cantus firmus Walliser included, though never to extremes, some traits of the 'modern' Italian secular style – rapid declamation, sharp rhythmic contrasts, word-painting, concertato effects and symbolism. His madrigals, unfortunately, are lost.

Walliser's father composed a chorale, *Am End hilf mir, Herr Jesu Christ*, and set to music the German drama *Ein schön tröstlich Spyl nemlich die schön History Esther*, inspired by Hans Sachs's *Die gantze historie der Hester*, which was performed in Strasbourg in 1568.

WORKS

published in Strasbourg unless otherwise stated

Teutsche Psalmen (8 motets), 5vv, insts (Nuremberg, 1602)
Hexastichon, 6vv (Liegnitz, 1610)
Catecheticae Cantiones Odaeque spirituales Hymni et cantica praecipuorum totius anni festorum et Madrigalis (1611), lost
Choris musici ... in Andromeda Tragoedia, 3–6vv (1612)
In festum nativitatis Domini (3 motets), 5vv (1613)
Ecclesiodiae (50 motets), 4–6vv, insts (1614) [incl. 6 pieces from Teutsche Psalmen]; ed. D. Guerrier Koegler (Stuttgart, 1997)
Te Deum laudamus, 6vv (1617)
Ecclesiodiae novae (60 motets), 4–7vv, insts (1625)
Herrn Wilhelmus Salusten von Bartas Triumph des Glaubens, 5vv (1627)
Chorus musicus ... D. Leopoldo Austria Archiduci, 3vv, insts (1628)
Fons Israelis, 8vv (1641)

Motets, 5–8vv, 1603^1, 1611^1, 1613^2, 1617^1, 1618^1, 1621^2
2 canons in C. Demantius: *Isagoge artis musicae* (Jena, 1632, 9/1656)
Concertatio modulatoria, 2vv, in L. Erhardt: *Harmonisches Chor- und Figural-Gesangbuch* (Frankfurt, 1659)
1 chorus from Elias (1613), 1672^2
Organ intabulations of chorales from Ecclesiodiae, 1617^{24}, D. Schmidt: *Orgeltabulaturbuch* (MS, *D-Bsb*, 1676)

Honori et amori ... M. Nicolai Ferberi, 5vv (MS, *F-Sm*, 1605)
3 canons (MS, *B-Bc*, 12 Jan 1628)
Hexaphonia, 6vv (MS, *F-Pc*, 30 Nov 1643)

According to *EitnerQ* further MS works in *D-Bsb*, *GMl*, *Rp*, *Z*, *I-Bc*, Biblioteca Rudolfina, Liegnitz
Musicae figuralis praecepta brevia (Strasbourg, 1611)

CLYDE WILLIAM YOUNG/ÉDITH WEBER

Wallmann, Johannes (*b* Leipzig, 23 Feb 1952). German composer. He studied at the Weimar Musikhochschule (1968–73), where his teachers included Günter Lampe, and at the DDR Akademie der Künste, where he attended Friedrich Goldmann's masterclass (1980–81). He also took instruction in the philosophy of art with the Gotha painter Kurt W. Streubel (from 1976). He founded the gruppe neue musik weimar in 1975 and served as its director until 1985. When his experimental works came into conflict with the cultural policies of the DDR, he applied for permission to leave the country. He moved to West Germany in 1988.

Wallmann has applied himself to the acoustic design of human experience and the human environment. From 1976 he created compositions in space and sound, and devised musical combination games. Between 1982 and 1986 he developed an extensive theory of 'Integral Art', an integration of music and sound that provides an alternative to the culture of the concert hall. His first practical realization of the theory came with the Bauhütte KLANGZEIT WUPPERTAL (1990–93), a large-scale working process comprised of project groups, concerts, seminars, installations and festivals. Subsequent compositions have derived from his interest in acoustic space: *GLOCKEN REQUIEM DRESDEN* (1994–5), performed on the 50th anniversary of the destruction of the city by Anglo-American bombers, made use of 129 Dresden church bells; *KLANG FELSEN HELGOLAND* (1996) is scored for soprano, organ, rock acoustics, seagulls' cries and the sound of waves.

GISELA NAUCK

Wallner, Bertha Antonia (*b* Munich, 20 Aug 1876; *d* Munich, 29 Oct 1956). German musicologist. She studied in Munich at the Akademie der Tonkunst and with Sandberger and Kroyer at the university, where she took the doctorate in 1910 with a dissertation on music of the 16th and 17th centuries. Subsequently she worked with Sandberger, preparing inventories for Denkmäler der Tonkunst in Bayern, including a catalogue of Michael Haydn's works in the Bavarian State Library. After holding an appointment at the Salzburg Mozarteum (1942–5), she returned to Munich and continued her research on Bavarian music to the end of her life. She drew attention to many previously neglected sources of music and documents of the 15th, 16th and 17th centuries and did much to define the musical character of Munich and Bavaria in those periods. Her editions include performing editions of Beethoven's piano sonatas (Munich, 1952–3) and piano pieces by Mozart (Munich, 1955).

Wallner, Bo (*b* Lidköping, 15 June 1923). Swedish musicologist. After studying musicology with Moberg at Uppsala University (graduated 1955), he worked as a music critic for *Expressen* (1949–53), and was president of Fylkingen (the Swedish section of the ISCM, 1954–6) and adviser to Swedish Radio (1956–74). He was appointed lecturer in musicology and form at the Stockholm Conservatory in 1962 and became professor in 1970. He is one of the most astute observers of the contemporary musical scene in Scandinavia. His articles on Stenhammar's chamber music, on various aspects of the music of Hilding Rosenberg and on Scandinavian music after World War II led to his monumental *Vår tids musik i Norden* (1968), a comprehensive, well balanced and well documented account. The activities of an interesting group of young musicians in Sweden during the 1940s (Blomdahl, Bäck, Leygraf etc.) are described in *40-tal: en klippbok om Måndagsgruppen* (1971) and he published his great monograph on Wilhelm Stenhammar in 1991. He has also written useful textbooks on musical form and works on music education.

JOHN BERGSAGEL/HENRIK KARLSSON

Walls, Peter (Gerard) (*b* Christchurch, 24 Sept 1947). New Zealand musicologist. After completing degrees in English literature and music at Victoria University of Wellington (1966–71) he took the DPhil in musicology at Oxford (1971–6). In 1976 he became a lecturer in English at Victoria University and transferred to the university's school of music in 1978. He became professor there in 1993. His principal research interests are 17th- and 18th-century performing practice, particularly in relation to stringed instruments, and 17th-century English music, especially the music of the court masque. He has performed as a violinist with several period instrument orchestras and directs New Zealand's Baroque Players and Tudor Consort, as well as regularly conducting opera productions and orchestral concerts. Since 1996 he has been deputy chairman of the New Zealand Symphony Orchestra board.

ADRIENNE SIMPSON

Walmisley, Thomas Attwood (*b* London, 21 Jan 1814; *d* Hastings, 17 Jan 1856). English composer and organist, eldest son of THOMAS FORBES WALMISLEY. His early talent led his father to send him to Thomas Attwood, his godfather, for lessons in composition. He was thus in a line of direct teacher-to-pupil succession from Mozart, who was to be his chief model as a composer. In 1830 he was appointed organist of Croydon Parish Church where

he attracted the notice of Thomas Miller, who encouraged his literary tastes and also introduced him to the study of mathematics. Shortly after this he seems to have been confronted with a choice of musical careers: Monck Mason tried to secure him for English opera, while Miller, a former Fellow of Trinity College, Cambridge, was probably influential in obtaining him the offer of the combined organistships of Trinity and St John's Colleges. He chose Cambridge, and took up his appointment there in 1833, taking the MusB from Trinity on 1 July. His exercise for the degree was the anthem with orchestral accompaniment *Let God arise*. He continued his literary and mathematical studies with distinction, matriculating (as a member of Corpus Christi College) in Michaelmas 1834, and reading for an arts degree. He was soon called on to act as deputy for the aged professor of music, John Clarke-Whitfeld: in 1835 he composed an *Ode for the Installation of the Marquis of Camden as Chancellor of the University of Cambridge*, performed on 7 July under Sir George Smart with Malibran as principal soloist. On Clarke-Whitfeld's death in the following year, Walmisley was appointed to succeed him in the chair of music, while still an undergraduate and only 22 years old. In 1838 he took the BA degree and became a full member of Trinity College. He took the MA in 1841 and in 1848 presented himself for the degree of MusD.

The chair of music, when Walmisley was elected to it, was a virtual sinecure, and was so low in prestige and rank that its occupants were not even allowed to enter the Senate House to present candidates for music degrees unless a special grace had been passed to admit them. By attaining the MA degree (he was the first professor of music to do so) Walmisley at least avoided this humiliating disability; and by his education and personality he raised the standing of the faculty of music in the university. He was the first professor to give regular lectures illustrated by musical examples. Although music degrees had existed at Cambridge for more than 350 years, there had never been enough candidates to require any kind of public instruction. Walmisley's lectures, which he gave without pay and entirely on his own initiative, were designed for the university at large rather than for the few candidates for music degrees. One series was entitled 'The Rise and Progress of the Pianoforte'. In one lecture Walmisley startled his audience by prophesying ultimate recognition of the supremacy of the music of Bach, still at that time unknown to the ordinary English music lover.

As an organist, Walmisley far surpassed any Cambridge musician of recent memory, and his playing made an indelible impression on his audiences. He made innovatory improvements to the Trinity organ, including a 16′ stop on the Great for playing a deep bass and a Choir-to-Pedal coupler for playing tunes on the pedals. He also contributed 'Organs' (of Cambridge chapels) to *The Cambridge Portfolio* (ed. J.J. Smith, London and Cambridge, 1840, i, 194). His ability as a choir trainer was considerable, and in his hands the joint choir of Trinity and St John's became one of the best in England. Dickson described hearing, in 1843, a group of Walmisley's choristers sight-read successfully the difficult and unfamiliar score of Spohr's *Last Judgment*. For this choir Walmisley was able to compose music of some difficulty and to develop the newer style of anthem and service with independent organ accompaniment.

In addition to playing the organ at Trinity and St John's, Walmisley occasionally had to deputize (without remuneration) for the organist of King's and the University Church, John Pratt, who was old and infirm but who was allowed to retain his position until his death in 1855. As the only active professional musician in the university Walmisley naturally played a leading part in most of the festivals, concerts and other musical events in the town, including those of the University Musical Society (founded 1844). He was content with such local activity, although his reputation soon became a national one. He was the leader of a devoted group of musical amateurs centred at Trinity, which turned its attention to more important music than the glees and ballads which had been the normal entertainment at social gatherings: under Walmisley's guidance they even began to perform the music of Bach. He was able to report to the university commissioners in December 1850: 'Music is not cultivated to any great extent by members of the University, but I believe a taste for the art is rapidly increasing among us'. At his death, a void was left in Cambridge musical life which could not be easily filled. The chair of music was for the first time offered for open election; his worthy successor was Sterndale Bennett.

As a composer Walmisley, with S.S. Wesley, was responsible for rousing the tradition of cathedral music from the somnolent condition into which it had sunk during generations of neglect. He brought to it a sense of drama and climax derived from Classical instrumental music, and to a lesser extent from Handel's oratorios, which made his best church music comparable in colour and interest to the concert hall repertory. William Gatens has convincingly argued that *Hear, O thou shepherd of Israel* (1836) was an early example of the tendency, in Victorian times, for the genres of oratorio and cathedral music to draw nearer together. *The Lord shall comfort Zion* (1840) comes even closer to Mendelssohnian oratorio. However, Walmisley lacked that fervent emotional response to biblical texts which gives fire to Wesley's greatest anthems. As an example, the chord of the German 6th (for instance in *From all that dwell* and in the *Magnificat* of the Service in D), though a century old in European music generally, was a bold innovation in Anglican cathedral music; yet Walmisley's use of it, skilful though it is in terms of musical structure, has no relation to anything in the text. Walmisley's masterpiece is generally held to be his Evening Service in D minor (probably 1855), one of the highpoints of English cathedral music. In his maturity he confidently used bold and simple effects that are lacking in some of his more pretentious works of the 1830s; some of the greatest moments of this service are achieved with the choir in simple unison, accompanied by massive organ harmony.

Walmisley's secular music is unknown today, but it is not to be despised. Several of his songs, duets and trios with piano accompaniment are charming, and his madrigals, though not of course in a strict 16th-century style, are equal to some of the best work of Pearsall. In his youth he made several ambitious attempts at orchestral and chamber music, but gave up in discouragement, partly perhaps because of Mendelssohn's well-known rebuff when he showed him his first symphony: 'No.1! Let us first see what no.12 will be!'. His sonatinas for oboe and piano, written for the gifted Cambridge undergraduate Alfred Pollock, would be worth revival.

His three Installation Odes, however, are very much occasional pieces; their texts are trite, their music mostly dull. His compositions for organ were numerous, but are mostly lost; if the published Prelude and Fugue in E minor is representative, they had considerable merit.

Walmisley suffered from an extremely sensitive disposition and fell easily into bouts of depression, from which he sought escape in wine. According to George Garrett he threw the manuscript of the D minor Service into the wastepaper basket, from which it was rescued by his friend, Rev. A.R. Ward of St John's College. His early death was probably due to alcoholism and its attendant effects. Soon after his death, Walmisley's father edited most of his church music and had it published by Ewer & Co.

NICHOLAS TEMPERLEY

Walmisley, Thomas Forbes (*b* London, 22 May 1783; *d* London, 23 July 1866). English composer. He was the third son of William Walmisley, Clerk of the Papers to the House of Lords. Like his four brothers, he was a chorister at Westminster Abbey and was then sent to Westminster School. The others all obtained parliamentary clerkships, but Thomas, because of his exceptional talent, was educated for the musical profession, first under the Hon. John Spencer and then under Thomas Attwood. In 1803 he began his career as a teacher of the piano and singing, and in 1805 as a composer of vocal music. He was successively assistant organist to the Asylum for Female Orphans (1810–14) and organist of St Martin-in-the-Fields (1814–54). He was secretary of the Concentores Sodales from 1817 until its dissolution in 1847, when the society's stock of wine was given to him. As an early member of the Philharmonic Society he proposed an Academy of Music, to be run by the society and hence by the musical profession. But his scheme was, perhaps unfortunately, overtaken by the founding of the RAM under aristocratic direction.

Walmisley was well known as a teacher, his most distinguished pupil being E.J. Hopkins, and as an organist; he also composed songs and some church music. But he is remembered chiefly as a glee writer. According to Baptie he produced 59 glees and other partsongs, four of which were awarded prizes. They are written with masterly skill and elegance, but without great individuality. Walmisley said of his *From Flower to Flower*: 'Its general character is taste rather than energy, level general effect rather than force', a remark which could apply equally to most of his other glees.

Walmisley had 12 children, of whom six sons and four daughters survived infancy. His eldest son was THOMAS ATTWOOD WALMISLEY; Henry (1830–57) was organist of Holy Trinity, Bessborough Gardens; Frederick (1815–75) was an artist. His great-niece, Jessie Walmisley, was the wife of Samuel Coleridge-Taylor.

WORKS

all printed works published in London

10 anthems, listed in Foster; 1 Morning and Evening Service (?1840)
59 glees, trios, rounds and canons, pubd separately and in Six Glees, sets i–iii (1814–30), A Collection of Glees, Trios, Rounds and Canons (1826) and Three Canons (1840)
3 duets, 13 songs, pubd separately (1814–40), listed in *SainsburyD* and *Grove 1–5*
Sacred Songs (E.B. Impey) (1841)

NICHOLAS TEMPERLEY

Walmsley, Peter. *See* WAMSLEY, PETER.

Walond, William (*b* Oxford, bap. 16 July 1719; *d* Oxford, bur. 21 Aug 1768). English composer and organist. In subscription lists of the 1750s and later he is described as 'Organist at Oxford', and in the instrumental parts of William Hayes's *Ode on the Passions* (first performed 2 July 1750) he is named as a viola player; in the Oxford diaries of Parson Woodforde he is referred to as deputy organist of New College where, from 1745 until his death, he was also employed as a music copyist (N.W. Hargreaves-Mawdsley, ed.: *Woodforde at Oxford 1759–1776*, Oxford, 1969). He also worked in a similar capacity at Christ Church, and (as deputy for Richard Church) at St Peter's in the East as well. As a scribe he also copied a good deal of material for Samuel Hellier. On 5 July 1757 he took an Oxford BMus degree, and two years later he published his setting of Pope's *Ode on St Cecilia's Day* – the first setting of the original 1708 version of the poem – which had served as his exercise. He had already published a set of six voluntaries for the organ or harpsichord op.1 (London, *c*1752) and a further set of ten voluntaries op.2 (London, 1758). Only one anthem (*Not unto us, O Lord*) is known; the autograph organ part of an evening service (CanD and DeM) also survives in *GB-Och*.

The first of his fourteen children was baptized on 24 January 1750, from which we may perhaps infer that he was married a year or so earlier. Of three sons variously involved in the world of church music, only the eldest and most obviously gifted of the three, William (bap. 4 Jan 1750; *d* 9 Feb 1836), deserves to be mentioned here. On the death of William Walond the elder, he apparently assumed his father's duties as principal copyist at New College and Christ Church. In February 1775 he left Oxford to become deputy organist of Chichester Cathedral where, in June 1776 he succeeded Thomas Capell as organist. He too is mentioned by Woodforde, who was a member of the same masonic lodge as Walond, and in June 1774 Woodforde began to learn the harpsichord afresh under Walond's instruction. In 1794 Walond the younger apparently gave up teaching the choristers; seven years later he resigned as organist, and in the early editions of this dictionary he is said to have lived the rest of his life in Chichester in extreme poverty. Only one anthem and a number of double chants (*GB-Lbl*, *Ob*) by William Walond the younger are known.

H. DIACK JOHNSTONE, PETER WARD JONES

Walonis (*fl c*1440). Composer of *O Maria stella maris*, perhaps only a fragment (vv.21–4) of a complete three-voice setting of the Marian sequence *Salve mater salvatoris* (AH, liv, 1915/*R*, 383–6), in *D-Mbs* Clm 14274. The treatment of the cantus firmus (Rajeczky, no.II/16) in the tenor and the low range of the contratenor indicate that the piece is later than most other works in this manuscript.

DAVID FALLOWS/IAN RUMBOLD

Walpen. Swiss family of organ builders. The family was active over three generations in the Valais and central

Switzerland, in frequent collaboration, initially, with the CARLEN family. Johannes Martin Walpen (*b* Reckingen, 1723; *d* Reckingen, 1782 or 1787) was a son of the master tanner Andreas Walpen (1698–1739) and of Cäcilia (née Carlen; 1699–1779), a sister of Matthäus Carlen, the founder of the Carlen family business. He worked exclusively in the Valais, frequently in collaboration with Carlen. He had three sons: Joseph Ignatius Walpen (1761–1836) was also an organ builder in Reckingen; Johannes Sylvester Walpen (*b* Reckingen, 1767; *d* Lucerne, 1837) married Katharina Carlen (*b* 1766), daughter of the organ builder Felix Carlen, and moved in 1802 to Lucerne, where he lived until his death; Wendelin Walpen (*b* Reckingen, 1774) settled eventually as an organ builder in Sierre. The families that remained in the Valais died out or gave up organ building as a profession, but the Lucerne branch flourished. Sylvester Walpen (1802–57), son of Johannes Sylvester, enjoyed a high reputation in central Switzerland. His brother Georg Walpen (1810–51) was active only as an assistant.

The Walpens built very traditional, purely mechanical slider-chest organs, and even in the 19th century followed 18th-century principles of construction throughout. A stylistic peculiarity of the cases is the curving cornices over the side panels of the front. There is no systematic study of the life and work of the Walpen family, and the attribution of certain organs – and even their precise differentiation from the Carlen ones – is difficult and often a matter of dispute.

Organs built or rebuilt by the Walpens include those by Johannes Martin at Reckingen (1746), Naters (1761) and Münster (1776–81); by Johannes Sylvester at Meiringen (1789), Frutigen (1809), Beatenberg (1812) and at St Martin, Chur (1816); by Sylvester at Ringgenberg (1827), Grindelwald (1838), Luthern (1839), Walchwil (1845), Habkern (1846), Frauenthal (1851), Risch (1854), Unterseen (1854), Ufhausen, and in St Leodegar und Mauritius, Lucerne (choir organ); and by Wendelin at Raron (1837–8), and Saint Martin, near Sion (1840).

FRIEDRICH JAKOB

Walpurgis, Maria Antonia. *See* MARIA ANTONIA WALPURGIS.

Walsh, John (i) (*b* ?1665 or 1666; *d* London, 13 March 1736). Music seller, engraver, printer, publisher and instrument seller, probably of Irish extraction. He was established in London by about 1690. On 24 June 1692 he was appointed musical instrument-maker-in-ordinary to William III in succession to John Shaw, whose trade sign of 'The Golden Harp and Hoboy' he also adopted; in the same year he married Mary Allen, by whom he had 15 children, of whom only three survived infancy.

In 1695, when he began publishing, Walsh had few rivals in the trade. John Playford was dead, and his son Henry evidently lacked the initiative to maintain the family firm as a flourishing concern. Thomas Cross, while popular for his introduction of the engraved single-sheet song, was concerned more with engraving than publishing. Walsh was quick to take advantage of the situation, and engraved music appeared from his premises on a scale previously unknown in England. In addition to works by English composers he printed much popular continental music (including Corelli's sonatas) which he often copied from Dutch editions. From about 1716, he was acquainted with ESTIENNE ROGER of Amsterdam; Walsh's labels are found pasted over Roger's imprint, and he occasionally used Roger's plates, substituting his own imprint.

About 1700 (not 1710 as Hawkins maintains) Walsh replaced the use of copper plates with less costly pewter ones, and also began using punches. There was no necessary connection between these innovations but they seem to have been conceived in tandem. It is unlikely that Walsh continued to employ both metals extensively, not only because of the differences in working them and the cost advantage of pewter, but also because different inks and alteration of the rolling press were required. Pewter plates, while generally regarded as softer than copper, could produce 2000 or more impressions if handled well. As initial print runs were usually in the range of 50–200 copies, plate stamina was not a concern.

Although Walsh was criticized by Cross for the introduction of punches, he did not entirely dispense with the burin. Only a few musical signs, mainly clefs and note heads, were punched. Stems, rests, slurs and other linear markings were engraved (punches for a wider range of musical signs, letters and numbers were developed only later in the century). Indeed etching, rather than engraving alone, was his probable technique. It required less initial effort to work the plate, and the variations in depth and tone typical of art work, which could only be produced by pure engraving, were not required.

Walsh was the first music printer and publisher to adopt regularly the passe-partout technique of printing title-pages. This involved the creation of title-page plates with a blank area within which title information could be printed from a second, small plate or written in manuscript. Passe-partout title-pages are often elaborate. Walsh obtained two of his plates for these from other publishers. The royal arms title-page (see illustration) was first used, with a different coat of arms, for Gottfried Finger's *VI Sonatas or Solo's* of 1690; the other plate, engraved by James Collins, was first used about 1690, came to Walsh in 1698 and lasted until 1769; it graced nearly 60 editions and issues.

Most of Walsh's imprints up to 1730 also bear the name of John Hare (later John and Joseph Hare) of Cornhill (*see* HARE). Their shop gave Walsh a City outlet for his publications, and the Hares probably provided Walsh with the instruments he sold. In 1706 Walsh also associated himself with Peter Randall, who probably married Walsh's sister (the WILLIAM RANDALL (ii) who ultimately succeeded to the Walsh business was either Randall's son or grandson). Randall entered into partnership with Walsh about October 1708, and remained with him until 1711, having given up his own shop in 1709. Randall became one of the royal musicians in 1712.

Walsh was an excellent businessman, quick to adopt new sales methods and revamp old ones, including subscription issues and free copies, and to imitate the innovations of others (the periodical music collections *The Monthly Mask of Vocal Music* and *Harmonia anglicana* were modelled on Henry Playford's publications). By 1700 his publications covered the whole range of current secular music, including single songs,

Title-page of 'Songs in the Opera Calld Loves Triumph' by Carlo Francesco Cesarini (London: John Walsh, 1709), printed from engraved plates

English operas, instrumental works and tutors and instruction books. Sacred songs such as collections of anthems or books of psalmody never formed as significant a part of his output. Walsh may also have been an investor in newspapers.

In the absence of adequate copyright protection for music, publishers used competitive editions (sometimes termed piracies), misleading advertisements and predatory pricing to sustain their business positions. Texts could be obtained not only from composers but also from theatre copyists, orchestral musicians, and the first editions of competitors such as John Cullen, Luke Pippard, Daniel Wright, Richard Meares, William Smith, John Cluer and Benjamin Cooke (i).

Hawkins charged Walsh with profiteering at Handel's expense, claiming that the publication of *Rinaldo* (1711) earned Walsh £1500. Even though this figure was disproved in 1948, writers have continued to use it to epitomize a view of Handel as publishers' victim. The firm eventually became Handel's regular publisher about 1730, when JOHN WALSH (ii) began to take over the firm.

Walsh strongly opposed the imposition of stamp duty, which was payable on single-sheet items. He was imprisoned for non-payment in 1726, being released in the following year. During the period 1724–6 Walsh tried to disguise his business activity from officials by using the 'Musick Shops' imprint. First levied in 1712, the duty may have led not only to the demise of music periodicals such as the *Monthly Mask of Vocal Music* but also to a decline in the number of single-sheet songs.

Walsh was buried in the vaults of the church of St Mary-le-Strand (he had been a churchwarden at the Savoy Chapel while the church was under construction). The *Gentleman's Magazine* announced that he had left £30,000, and the *London Daily Post and General Advertiser* put the figure at £20,000.

FRANK KIDSON/WILLIAM C. SMITH/PETER WARD JONES/DAVID HUNTER

Walsh, John (ii) (*b* London, 23 Dec 1709; *d* London, 15 Jan 1766). English music seller, printer, publisher and instrument maker. He probably assumed control of the business of his father, JOHN WALSH (i), in about 1730, when the relationship with the HARE family apparently ceased and the numbering of the firm's publications started. On 8 May 1731 Walsh succeeded to the appointment of instrument maker to the king. Although John Johnson and other rivals arose, the business continued to prosper and maintained its excellent engraving and paper. Burney characterized Walsh (ii) as 'purveyor general'. Walsh fully developed the firm's relationship with Handel, publishing almost all his later works and in 1739 being granted a monopoly of his music for 14 years. About half of Walsh's output was of Handel compositions. The firm also sold other publishers' works, and bought up the stock of smaller firms when they ceased trading. Many of Walsh's apprentice engravers later set up on their own, including John Caulfield, Thomas Straight and Thomas Skillern. Walsh, who never married, was elected a governor of the Foundling Hospital in 1748

and may have been responsible for suggesting the performance of *Messiah* to raise funds. On Walsh's death the *Public Advertiser* placed his fortune at £40,000. The business was left, under specific conditions, to his cousin WILLIAM RANDALL (ii) and John Abell (ii), who had presumably both been in his employ.

For bibliography *see* WALSH, JOHN (i).

FRANK KIDSON/WILLIAM C. SMITH/PETER WARD JONES/ DAVID HUNTER

Walsh, (Michael) Stephen (*b* Chipping Norton, 6 June 1942). English writer on music. He was educated at St Paul's School and Gonville and Caius College, Cambridge, where he read music (BA 1963, MA 1966). He became a freelance critic in 1963, writing for *The Times*, the *Daily Telegraph* and other London newspapers, later becoming a regular contributor to *The Listener* and deputy music critic of *The Observer* (1966–85); he later wrote for the *Independent*. In 1976 he was appointed senior lecturer in music at Cardiff University and editor of its journal *Soundings* (1976–86). He was made reader in 1994. A fluent and elegant writer, Walsh has a particular interest in 20th-century music, and has written perceptively in *Tempo*, *Musical Times*, *Music and Musicians* and elsewhere, notably on Stravinsky, British composers (such as Goehr, Maxwell Davies, Maw and Smalley) and on Hungarian music. The first part of his two-voume study of Stravinsky, a substantial, richly researched and perceptively written account of the composer's life (up to 1934) and his relationship to his circumstances and those around him, appeared in 1999.

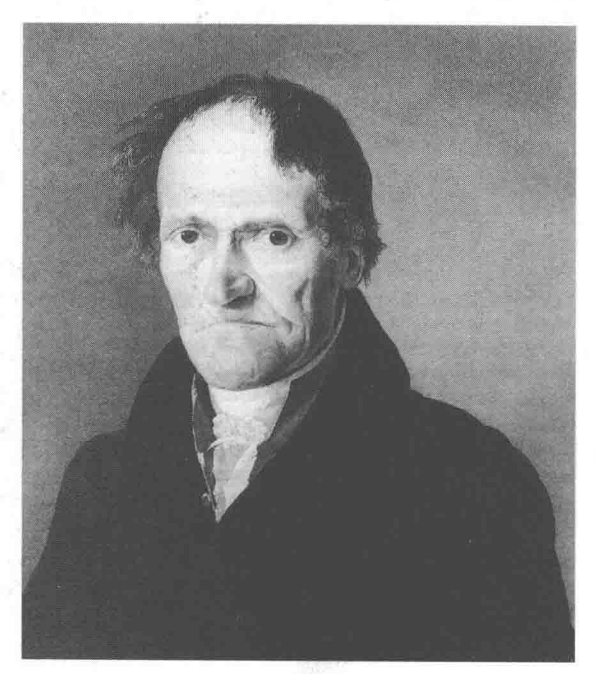
STANLEY SADIE

Walsingham, Thomas (*d* ?*c*1422). English theorist. He was almost certainly the monk and historian of St Albans Abbey, who became precentor and *scriptorarius* there in the 1380s. This information comes from the register of benefactors of the abbey (now in *GB-Ccc*). After becoming prior of Wymundham (now Wymondham), 1394–1409, he returned to St Albans. He is noted for his authorship of *Chronica majora* (before 1388), *Ypogdima Neustrie* (*c*1419) and *Historia anglicana* (ending in 1422), among other works.

He is thought to be the author of the *Regule Magistri Thome Walsingham de figuris compositis et non compositis* (ed. in CSM, xxxi, 1983), a treatise on mensural music found in *GB-Lbl* Lansdowne 763 (compiled by John Wylde). The treatise is a detailed discussion of Ars Nova notation, following the method of Johannes de Muris's *Notitia*. Referring to the *semiminima* as the most recently introduced note value, Walsingham refused to accept such subdivisions of the *minima* – an attitude that was extremely conservative for the time.

ANDREW HUGHES



Walsingham Consort Books. *See* SOURCES OF INSTRUMENTAL ENSEMBLE MUSIC TO 1630, §7.

Walt, Deon van der (*b* Cape Town, 28 July 1958). South African tenor. He studied singing at the University of Stellenbosch, and made his operatic début as Jaquino in 1981 in Cape Town. Since 1982 he has been attached to a number of opera houses in Europe, principally in Stuttgart and Zürich, where he sang Tonio in *La fille du régiment* (1989). He made his début at Covent Garden in 1985 as Almaviva and at the Vienna Staatsoper in 1989 as Tamino, singing Belmonte at Salzburg the same year. The lyric quality of his voice makes him an ideal interpreter of the works of composers such as Donizetti, Mozart and Rossini. Although concentrating at first on lighter roles, he has recently taken on more dramatic roles by Massenet, Verdi, Puccini and others. His most significant recordings include *Così fan tutte* and *Fidelio* (under Harnoncourt), *Meistersinger* (Sawallisch) and many lieder recitals.

JAMES MAY

Walter, (Gabriel) Anton (*b* Neuhausen an der Fildern, nr Stuttgart, 5 Feb 1752; *d* Vienna, 11 April 1826). Austrian piano maker of German birth. He was the most famous Viennese piano maker of his time. He was in Vienna by 1780, when he married the widow Schöffstoss. In 1790 he was granted the title 'Imperial Royal Chamber Organ Builder and Instrument Maker'. In about 1800 his stepson Joseph Schöffstoss joined the firm, by then employing up to 20 workmen. Of the total number of instruments produced, dating from about 1780 to 1825, approximately 3% survives, comprising about 20 pianos built before 1800 and an equal number after that date. The former are usually inscribed 'Anton Walter in Wien' to which is added 'u(nd) Sohn' in the latter.

If Johann Andreas Stein invented the German action (with hammers mounted in wooden pivot forks on the keys, combined with a hammer escapement mechanism

Anton Walter: portrait by Friedrich Gauermann, 1825 (Kunsthistorisches Museum, Vienna)

with upright hoppers), Walter was probably the first to develop it. He thus configured the Viennese action (with brass pivot forks and forward-leaning hoppers), adding a back-check which catches the returning hammers, thereby preventing unwanted rebound. The oldest pianos (*c*1785) by Walter which survive in their original condition have this Viennese action. After about 1790 this action became standard in Walter's pianos and in Viennese pianos generally. In the first decades of the 19th century thousands of pianos were made in Vienna annually, proving the success of Walter's piano action. Contemporary sources, including one of Beethoven's letters attest the mechanical and musical qualities of Walter's pianos.

The firm was highly regarded in musical and aristocratic circles throughout the Hapsburg empire until at least 1810. In modern times Walter's fame has rested on the fact that Mozart acquired a Walter piano in about 1782. This instrument was radically altered by Walter in 1800. As with his other early pianos, it is not known when the instrument first had its present action, or when the sustaining knee levers (for the damping) replaced the original hand stop. For both these reasons Mozart's piano should not be relied upon as source material when discussing the interpretation of his music.

MICHAEL LATCHAM

Walter, Arnold (Maria) (*b* Hannsdorf [now Hanušorice], Moravia, 30 Aug 1902; *d* Toronto, 6 Oct 1973). Canadian music educator, administrator and composer of Czech birth. After studying composition in Brno with Bruno Weigl, a pupil of Bruckner, he obtained the doctorate in law from the University of Prague (1926). At the University of Berlin he studied music with Hermann Abert, Curt Sachs and Johannes Wolf, among others; he undertook further study privately with Franz Schreker, Rudolf Breithaupt and Frederic Lamond. After brief medical studies at Masaryk University, Brno, he returned to Berlin to become a music journalist for *Melos*, *Die Weltbühne* and *Vorwärts*. In 1933, he fled Germany to Mallorca, where he studied folk music and taught. After relocating to England for a short period in 1936, he settled in Toronto where he taught at Upper Canada College (from 1937).

Hired to implement the reorganization of higher musical education in Toronto, Walter founded the Conservatory Opera School in 1946, out of which emerged the Canadian Opera Company. He instituted the first Canadian degree programme for music education, preparing specialists to teach in Canada's elementary and secondary schools, and in 1955 introduced Orff's teaching methods to North America. As director of the Faculty of Music, University of Toronto (1952–68), he inaugurated the first Canadian electronic music studio. Active nationally and internationally, he founded and served organizations such as the Canadian Association of University Schools of Music (1965; now the Canadian University Music Society), the International Society for Music Education (president 1953–5) and the Inter-American Music Council of the Pan-American Union (president 1969–72).

Walter's early compositions, such as the Trio (1940, awarded the Canadian Performing Rights Society Award in 1943), are crafted in a late Romantic style. Later works, including the Sonata for Piano (1950) and the Concerto for Orchestra (1958), feature thematic fragmentation within an atonal idiom.

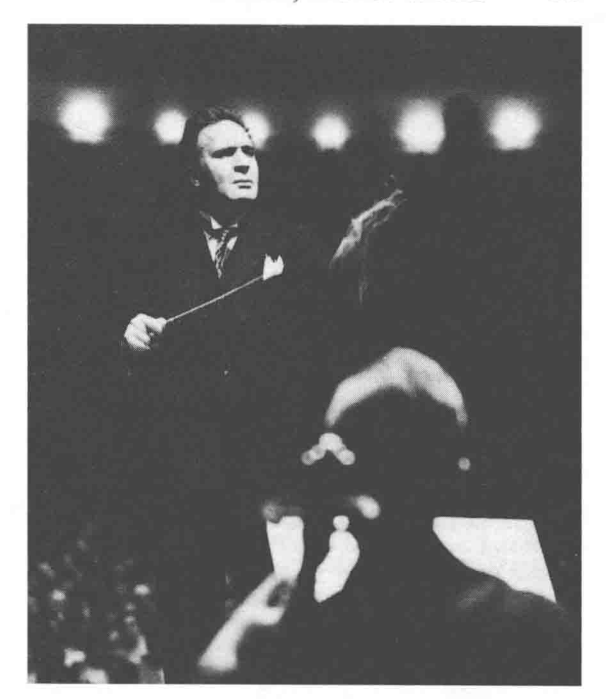
ELAINE KEILLOR

Walter [Schlesinger], **Bruno** (*b* Berlin, 15 Sept 1876; *d* Beverly Hills, CA, 17 Feb 1962). American conductor and composer of German birth. Born into a middle-class Jewish family, Walter attended the Stern Conservatory in Berlin, initially planning to become a concert pianist. Around 1889, however, he resolved to pursue a conducting career after hearing Hans von Bülow direct an orchestra. He obtained a position as vocal coach in Cologne, making his conducting début there in 1894 in a performance of Lortzing's *Der Waffenschmied*. From 1894 to 1896 he worked in Hamburg under Mahler, who profoundly influenced Walter's artistic development. Impressed by his protégé, Mahler found employment for him in Breslau in 1896, though the director there requested that Bruno Schlesinger change his name, ostensibly because Schlesinger was too common a name in Breslau, the capital of Silesia.



After appointments in Pressburg, 1897–8, Riga, 1898–1900 (where he met the soprano Elsa Korneck, his

future wife), and Berlin, 1900–01, Walter accepted an invitation to come to Vienna as Mahler's assistant. From 1901 to 1912 he worked at the Vienna Hofoper, eventually acquiring Austrian citizenship, and made guest appearances in Prague, Rome, Munich and elsewhere. In 1909 he conducted a performance of his own First Symphony in Vienna and enjoyed a successful London concert début, followed in 1910 by performances of *Tristan und Isolde* and Ethel Smyth's *The Wreckers* at Covent Garden. After Mahler's death, Walter gave the première of his mentor's *Das Lied von der Erde* (1911) and Ninth Symphony (1912); as director of the Singakademie (1911–13), he also introduced Mahler's Eighth Symphony to Vienna (1912).

Appointed Royal Bavarian Generalmusikdirektor in 1913, Walter spent nearly a decade in Munich. There he conducted tirelessly in three opera houses and again gave important first performances, among them Korngold's *Violanta* and *Der Ring des Polykrates* (presented together in 1916) and, the following year, Pfitzner's *Palestrina*, which featured the soprano Delia Reinhardt, who became a lifelong friend. He also regularly led the Musikalische Akademie in symphonic concerts. Although Walter considered his years in Munich 'the most important epoch' of his career, for personal reasons he left his position there in 1922. From 1919 to 1932 he appeared yearly as guest conductor of the Berlin PO, once sharing the podium with Ethel Smyth in a concert of her music (1928). His New York début in 1923 initiated a long and cordial relationship with America. In 1925 Walter began conducting at the Salzburg Festival and became Generalmusikdirektor of the Städtische Oper in Berlin; he introduced Puccini's *Turandot* to that city in 1926 and retained his post there until 1929. Parisian audiences enthusiastically received his Mozart opera cycle in 1928. He also worked with several British orchestras, and between 1924 and 1931 scored notable successes at Covent Garden. Walter's last position in Germany was that of Gewandhauskapellmeister in Leipzig (1929–33).

When Germany fell to the Nazis in 1933, Walter returned to Austria. He again travelled widely, performing in New York, Amsterdam, Florence and elsewhere. At Salzburg he accompanied Lotte Lehmann at the piano in annual recitals (1933–7) and won high praise for productions of *Tristan*, *Don Giovanni* (with Pinza), Gluck's *Orfeo ed Euridice* and other operas. From 1936 to 1938 he was artistic director of the Vienna Staatsoper. He also made a number of superb discs with the Vienna PO in the 1930s; those of Mahler's Ninth Symphony and the first act of *Die Walküre* with Melchior and Lehmann rank among his finest recordings. With the Anschluss, however, Walter once more found himself an exile. Although he gratefully accepted the French government's offer of citizenship, from 1939 onwards he made the USA his home, becoming an American citizen in 1946.

During the 1940s and 50s Walter's principal orchestra was the New York PO, for which he served as musical adviser (1947–9); he also conducted other major orchestras throughout the USA, including those in San Francisco, Los Angeles, Chicago and Philadelphia. His programmes with the New York PO offered, in addition to the established symphonic repertory, uncut performances of the *St Matthew Passion* and new works by Barber, Moore and other American composers. His New York PO recordings of the Beethoven and Brahms symphonies

Bruno Walter, c1930

(1941–53) show him at his most forceful and dynamic. A memorable *Fidelio*, with Flagstad and Kipnis, marked his début at the Metropolitan Opera (1941), where he conducted sporadically until 1959. After the war he returned to Europe on several occasions, participating in the early Edinburgh Festivals and taking particular pleasure in his collaborations with Kathleen Ferrier, who sang with Patzak on an acclaimed recording of *Das Lied von der Erde* under Walter. Although a heart attack in 1957 forced him to lighten his conducting schedule, Walter frequently recorded with the Columbia SO in his final years; these recordings offer gentler, broader readings of the standard repertory – notably the last six symphonies of Mozart and the complete symphonies of Beethoven and Brahms – than those preserved on his earlier recordings.

A man of wide reading, Walter counted among his friends Thomas Mann and other prominent authors. After 1947 he developed a keen interest in the ideas of Rudolf Steiner. Celebrated as an outstanding conductor in an era of great conducting, Walter favoured the Austro-German repertory but by no means confined himself to it. While he championed the works of Mahler and actively sought new music for much of his life, he flatly rejected atonality and serialism, and confessed an aversion to jazz. Treating his players as colleagues, he drew a sensuous tone from the orchestra, employing rubato with consummate skill, juxtaposing fierce drama and warm lyricism. His sensitivity to contrapuntal texture and overall structure allowed him to bring out fine details without damaging a work's integrity. He sought to penetrate 'to the core' of a composition and, detesting 'routine' performances, continually endeavoured to present a piece 'as if it were receiving its world première'.

ERIK RYDING, REBECCA PECHEFSKY

Walter, David (*b* Brooklyn, NY, 22 March 1913). American double bass player and teacher. He spent a decade playing in jazz groups, studied at the Juilliard School with Fred Zimmermann, 1936–8, and in 1939 joined the Pittsburgh SO as principal bass. He played in the NBC SO under Toscanini from 1940 to 1954, and in 1956 became a member of the New York City Ballet Orchestra; he also worked with Casals at the Casals Festival in Puerto Rico. One of America's leading double bass teachers, Walter taught at the Manhattan School of Music from 1957 to 1992, and in 1969 was appointed to the Juilliard School; he has also been a guest faculty member at several conservatories throughout the USA, in Europe and in China, and has lectured widely and given masterclasses. He has contributed numerous articles to string journals, and edited many works for double bass, including Sperger's Sonata no.1 and Pichl's Concerto. He was chairman of the board of directors of the Symphony of the Air (as well as principal bass, 1956–62) and president of the International Society of Bassists (1976–84). He plays instruments by Hieronymus Amati II (1710), Paolo Antonio Testore (1735) and by F. Plumerel *l'ainé* (1843), the bass portrayed by Degas in his *Musiciens*.

RODNEY SLATFORD

Walter, George. *See* GOEHR, WALTER.

Walter [Walderth, Walther], **(Johann) Ignaz** [Joseph] (*b* Radonitz [now Radonice], Bohemia, 31 Aug 1755; *d* Regensburg, 22 Feb 1822). German composer and tenor. He first studied under the organist Ignaz Neudörffl. From 1773, while a student at the University of Vienna, he studied singing and composition with Joseph Starzer. His identification with the Joseph Walter who sang for the National-Singspiel from 1780 to 1782 (and who was originally to have figured in Mozart's *Die Entführung aus dem Serail*) seems very doubtful. From 1780 to 1786 Walter earned a considerable reputation as a tenor and composer of comic operas with various German companies in Augsburg, Prague, Riga, Frankfurt and Mainz.

In 1792 Walter joined G.F.W. Grossmann's company in Lower Saxony as its music director. His operas for this troupe show his Viennese training to advantage, displaying a fondness for wind instruments, a cheerful and popular melodic style and a fine sense of musical architecture (his tonal plans seem closely modelled on the practice of Mozart, in whose operas he frequently sang). In 1787 he completed a setting of H.G. Schmieder's *Doktor Faust*, a text cobbled from Goethe's *Faust* fragment of 1790 and other German sources. His music, according to Spitta, shows him 'wholly within Mozart's sphere of influence'. Walter himself took the part of Faust, and the Queen of Aragon was sung by his wife Juliane Browne Roberts (1759–1835), whom he had married while at Riga. In 1804 Walter assumed direction of the Hoftheater at Regensburg, where he died in 1822. His half-brother, Johann (Nepomuk) Walter (*b* Radonitz, 11 Dec 1768; *d* Mannheim, 10 June 1822), was for a while a tenor at Frankfurt, Vienna and Mannheim (1790–96), and became a pharmacist.

THOMAS BAUMAN/R

Walter [Walther], **Johann** [Johannes] **(i)** (*b* Kahla, Thuringia, 1496; *d* Torgau, 25 March 1570). German composer and poet. According to a document dated 12 February 1599 which supplements his will of 1 April 1562, his surname was Blanckenmüller and as a penniless schoolboy he had been adopted by a citizen of Kahla and had pursued his studies under the name 'Johann Walter'. He claimed that he had been educated in music from his youth; he was probably a choirboy during or after his schooldays in Kahla and Rochlitz. Between 1521 and 1525, he was a bass in the Elector of Saxony's Hofkapelle, which was usually centred in Altenburg, Torgau and Weimar. After the death of Elector Friedrich III (5 May 1525) he was threatened with dismissal. In 1525 he spent three weeks in Wittenberg with Luther, who was in favour of continuing the late elector's Kantorei and, with Melanchthon, of Walter's receiving adequate financial support for it. Walter had been in contact with Duke Albrecht of Prussia in Königsberg from 6 February 1526 but did not gain a position there. Relying on an offer of security in his Torgau post, he settled there and married in June 1526. In 1527 he matriculated at Leipzig University.

Walter's transition from the court to service in the town and church seems to have been gradual. He still called himself 'choirmaster to the Elector of Saxony' in editions of his *Geystliches gesangk Buchleyn* from 1534 to 1551. In December 1527 he was awarded a vicarship in Altenburg. In 1529 he was living in the school building and in 1531 the Torgau inspectors decreed that he should instruct the boys in music and organize the singing in the parish church. In 1532 he was given a house in Torgau and citizen's rights. In 1535 the elector authorized an annual grant of 100 thalers for Walter's new Kantorei. The singers were apparently able to perform the demanding repertory of the so-called Torgau Walter Manuscripts and to mount important festivities, such as the dedication of the renovated Schlosskapelle (5 October 1544).

When the electoral title was transferred from one branch of the family to another after the Schmalkaldic War, Walter's allegiances took him away from Torgau to the Dresden Hofkapelle, which he directed from 1548 until he retired in 1554. He remained a strict Lutheran and resisted the Leipzig Interim of 1548 and all theological and liturgical change. His concern for the continuation of the pure Lutheran doctrine is reflected in his letters from Dresden and in some of his late works from Torgau, where he lived in his old age.

Walter's importance for music history rests on his *Geystliches gesangk Buchleyn* (first published in 1524) and on his organization of ecclesiastical music for several towns and residences in Saxony, especially Torgau and Dresden. He organized, revised and even wrote part of the music in the Torgau Walter Manuscripts. By 1524 at the latest he was personally acquainted with Luther, whom he advised (with his colleague Conrad Rupsch, also from Kahla) on the draft of the German Mass in autumn 1525. Luther, for his part, lent authority to Walter's hymnbook, with its early use of the Protestant Tenorlied, by writing the preface, which mentions Walter only incidentally. This first Lutheran collection of choral music appeared in the same year as Luther's famous appeal to German cities to maintain Christian schools: the hymnbook was intended for young people, who were encouraged to use a spiritual repertory instead of secular songs so that they would become practised in the Christian way of life and in its music. The hymnbook's success is confirmed by its many new editions and continuations, and by contemporary reports: as early as 20 June 1526, when it contained 38 German settings and only five Latin ones, Melanchthon wrote that Walter had 'created the hymn which is so much in use today', and on 7 July 1547 he said that Walter's music was the most sung in Wittenberg.

Walter's German hymns were probably sung at first by the Saxon Hofkapelle in Dresden, but soon also in daily school prayers; manuscript and printed music for Latin services, particularly festal Vespers and masses, shows that the principal composers of this type of music were pre-Reformation, or unaffected by the reforms, or were Walter's contemporaries.

Walter was regarded as the master of the music and words of the German hymn. He attempted to overcome this specialization by using a wider range of texts, by a greater technical display in pieces for five to seven voices and by composing the somewhat old-fashioned *Magnificat* settings of 1557. His free use of dissonant suspensions attests his increasing ambition as a composer. But the future of German church music lay in the hymn, and Walter's song settings and simple contrapuntal sections prepared the way. Like all his German contemporaries, Walter was influenced by Josquin, most notably in his seven-voice homage motet of 1544. The timbre of his German settings, with their emphasis on 3rds and 6ths, may be derived from Isaac, while his increasing tendency to use clausulas corresponds to the style of the period. His song motets of 1566, however, show how he paved the way for succeeding generations of German musicians.

WORKS

WERNER BRAUN

Walter [Walther], **Johann** (ii) (*b* Torgau, 8 May 1527; *d* Torgau, 8 Nov 1578). German composer, only son of Johann Walter (i). In 1544 his schoolmasters, Markus Crodel and Melanchthon, recommended that he should attend Wittenberg University. Through Melanchthon's intervention Walter entered the teaching profession and the Church in Schnaitheim bei Heidenheim (Württemberg) in 1547. He became a music teacher at Tübingen Monastery on 29 February 1548, remaining there for six months. According to Eitner, Walter was also a Kantor in Grossenhain. On 30 November 1551 he married Elisabeth, Crodel's daughter. In 1553 he was an alto in the chapel of Elector Moritz of Saxony. Thereafter he lived in Torgau as a householder and granary steward ('Kornschreiber'). It is open to question whether he became the 'feiner gelehrter Mann' that his father-in-law hoped for and it is not certain what role he played as a musician; Melanchthon correctly saw him as being primarily the son of an important composer. Walter's known compositions, all for four voices, are a hymn composed on 4 December 1557, *A solis ortus cardine* (*D-Sl* Cod.mus.fol.I 22), a *Te Deum* (*H-BA* 22) and a motet *Spes mea Christus* (*BA* 22; only one voice).

WERNER BRAUN

Walter [?Walters, ?Water, ?Waters], **John** (*b c*1660; *d* 1708). English organist, music copyist and composer. He may be identified with the John Walter (Water, Waters) who was a chorister of the Chapel Royal under Blow in 1674 and whose voice had broken by 1677. He was organist of Eton College from 1681 to 1705, and as such was the first teacher of John Weldon, whom he sent in 1693 and 1694 to study with Purcell. The Eton accounts seem to show that Walter's teaching of the choristers

there was respected. After leaving his post as organist, he shared with his successor, Benjamin Lamb, a stipend as a clerk of Eton College until 1708, when his name disappears from the accounts.

He made transcriptions, meticulous and reliable if sometimes slavishly literal, of sacred and secular music by English composers of the period, including numerous works by Blow (*GB-Ckc*, *CH* and *Lbl*) and Purcell (*Lbl*). His fair-copy score of Blow's *Venus and Adonis* (*Lbl* Add.22100) is annotated with stage directions, singers' names and so on, and he seems to have been involved in the first performance, for he made another and much rougher copy in short score (*Lbl* Add.31453), presumably for the purpose of drawing out a set of parts; he subsequently overwrote this copy with Blow's revised version of the work. He collaborated with his Eton colleague William Isaack in copying, presumably in haste, two important Purcell scores: the 1693 Queen Mary ode *Celebrate this festival* (*Ob*) and the *Te Deum* and *Jubilate* composed for St Cecilia's Day 1694 (*US-STu*).

Walter's own output was modest; his music is straightforward in construction and generally restrained in style, though not without vigour. Three verse anthems, *Lord, I confess my sin*, *O give thanks* and *O God, thou art my God*, and an Evening Service in A survive in autograph copies (*GB-Lbl*, *WRec*, *WRch*). The second anthem, more flamboyant than the others, is included in a collection compiled by Isaack (*Cfm*), while the third was transcribed by James Hawkins of Ely (*Cu*).

BRUCE WOOD

Walter, Rudolf (*b* Grosswierau, nr Schweidwitz [now Świdnica], 24 Jan 1918). German musicologist and organist. He studied music education at the Pädagogische Hochschule, Beuthen, and church music and musicology at Breslau University (1938–43). After the war he continued at Mainz University (1947–9), where he took the doctorate under Schmitz with a dissertation on Reger's chorale preludes. He was appointed lecturer at Mainz in 1950 and professor and director of the department of church music at the Musikhochschule, Stuttgart, in 1967. His posts included church music director and organist in Breslau (from 1942), Bad Kissingen (from 1948) and Heidelberg (University of Heidelberg, 1961–83). His concerts were frequently broadcast and he made 12 recordings featuring the organ music of Silesia. He retired in 1983.

Walter has written extensively on organ building throughout Europe, particularly in Silesia, and on church music from the 17th to the 20th centuries. He has also published monographs on J.C.F. Fischer, whose works he has edited, and the abbey at Grüssau (now Krzeszów). His scholarly editions include works by Fux and Murschhauser and he has prepared practical editions of Silesian instrumental and church music.

LOTHAR HOFFMANN-ERBRECHT

Walter, Thomas (*b* Roxbury, MA, 13 Dec 1696; *d* Roxbury, 10 Jan 1725). American tune book compiler. He graduated from Harvard College in 1713, and was ordained as a minister at the First Church of Roxbury in 1718. He took an active part in the movement to improve congregational singing in the 1720s, compiling one of the first singing books published in the colonies, *The Grounds and Rules of Musick Explained* (Boston, 1721), and preaching such sermons as 'The Sweet Psalmist of Israel' (1722). In his lengthy theoretical introduction to *The Grounds and Rules* Walter expressed the hope that his book would help enlarge the repertory of congregational psalmody, and replace 'an horrid Medly of confused and disorderly Noises' with 'right and true singing of the Tunes' through such expedients as 'the just and equal *Timeing* of the Notes'. The book was one of the few colonial imprints before the 1760s to contain sacred music, and eight editions were issued by 1764. Many of its three-part, textless tunes were extremely popular in the 18th century, and several are still in use today.

NYM COOKE

Walter of Châtillon [Gautier de Châtillon; Gautier de Lille; Gualterus ab Insula; Gualterus de Castellione Insulis; Walterus ab Insula] (*b* Lille, *c*1135; *d* ?Amiens, *c*1190). French lyric poet and scholar, active not only in France but also in England and Italy. Most of the known details

of his life come from a Latin *vita* of uncertain date and authenticity (*F-Pn* lat.8359) and from biographical information in the manuscripts of his works. After studying in Paris and Reims and acting as the head of a school in Laon and as canon of Reims, he may have entered the service of Henry II of England. Although no mention is made of his service in the *vita*, this may be dated from correspondence between Walter and John of Salisbury in 1166; apparently he did not remain in this position for long but returned to France and to teaching, this time in Châtillon. The reasons for his departure from the court of Henry II are not known, but it has been suggested that the murder of Thomas à Becket in 1170 may have played some role. John of Salisbury's part in this affair is well known, and it may be that Walter was influenced by the older man.

From Châtillon he went to Bologna to study canon law, and may have spent some time in Rome as well. He then returned to Reims (*c*1176) and finally moved to Amiens. In Reims he wrote his epic poem the *Alexandreis* (*c*1180), which he dedicated to his patron, the Archbishop William of the White Hands. His date of death is uncertain, but some of his poems suggest that he had a grave illness, which may have hastened his death; Johannes de Garlandia supports this view ('Magister Gualterus ... cum percuteretur a lepra', *F-Pn* lat.1093, f.31). In addition to the extremely popular *Alexandreis* and a *Tractatus contra Iudeos*, Walter was the author of a substantial number of rhythmic poems. Of those which have been attributed to him with varying degrees of certainty, 13 are known to survive with music. This includes both monophonic and polyphonic conductus settings, nearly all of which are extant in the conductus collections in sources associated with the Notre Dame school. It is uncertain whether he composed the music to any of his poems.

See also CONDUCTUS and GOLIARDS.

ROBERT FALCK/THOMAS B. PAYNE

Waltershausen, Hermann Wolfgang (Sartorius), Freiherr von (*b* Göttingen, 12 Oct 1882; *d* Munich, 13 Aug 1954). German composer, teacher and writer on music. He studied composition in Strasbourg with M.J. Erb, and in Munich with Thuille in 1901. Remaining in the Bavarian capital, he founded the Praktisches Seminar für fortgeschrittene Musikstudierende as a private music school in 1917, and was subsequently invited to be professor and assistant director of the Akademie der Tonkunst in 1920. Two years later he was made director and, together with the Academy's president Siegmund von Hausegger, overhauled the institution's curriculum, adding a drama school, advanced composition classes and lectures (he himself gave those in dramaturgy and aesthetics). He was also active in other spheres, in particular organizing the Münchener Tonkünstlerverein and advising the newly established Bavarian Radio. He was retired from the Academy in 1932, and during the Third Reich founded the Seminar für Privatemusiklehrer which became the state-recognized Waltershausen-Seminar in 1954.

One of the younger members of the Munich School, Waltershausen sprang to international prominence with his second opera *Oberst Chabert* (1912), based on a story by Balzac set in Paris during 1817. Performed in Vienna, Berlin, Munich, London and Budapest, it represents one of the earliest attempts to integrate elements of *verismo* into a post-Wagnerian operatic tradition, and is notable for its harmonic adventurousness. Waltershausen's later operas, however, attracted far less attention. *Richardis* (1915), modelled to a certain extent on Wagner's *Parsifal*, suffered from a lack of dramatic intensity while the

comedy *Die Rauensteiner Hochzeit* (1919) appeared reactionary in its reversion to the dramatic structures of 19th-century *Volksoper*. After the failure of his later operas, Waltershausen concentrated his attention on orchestral music, conducting the first performances of a sequence of works during the 1920s. Yet by this stage, his aspirations as a composer had been overtaken by interests in writing and administration, and in the 1930s he felt less compelled to write music.

ERIK LEVI

Walther, Ignaz. *See* WALTER, IGNAZ.

Walther, Johann. *See* WALTER, JOHANN (i) or (ii).

Walther, Johann Gottfried (*b* Erfurt, 18 Sept 1684; *d* Weimar, 23 March 1748). German organist, composer, theorist and lexicographer. His father was Johann Stephan Walther, an Erfurt fabric maker; his mother, Martha Dorothea, née Lämmerhirt, was a close relative of J.S. Bach's family. Walther's autobiography was published in Mattheson's *Grundlage einer Ehren-Pforte*. His education began at the age of four with private instruction; in 1691 he entered the lower school of Erfurt. Organ lessons were begun with Johann Bernhard Bach, organist of the Kaufmannskirche, and continued with his successor, Johann Andreas Kretschmar. Walther said he learnt in less than a year to sing well enough to become a soloist in church music performances. According to Walther, his teacher was Jakob Adlung, but he probably meant David Adlung, the father of Jakob. The latter, born in 1699, became a friend of Walther in the early 1720s and later a prominent Erfurt organist and theorist.

In 1697 Walther went to the Ratsgymnasium where he received a humanistic education. In summer 1702 he obtained his first position as an organist at the Thomaskirche in Erfurt. He entered the University of Erfurt to attend lectures in philosophy and law, but soon decided to devote himself entirely to music. He began a lifelong study of music theory, reading the treatises of Werckmeister, Fludd and Kircher, and for a brief period he studied composition with Buttstett. In autumn 1703 he started to travel, going first to Frankfurt (probably to the book fair) and Darmstadt. The following autumn he went to Magdeburg and also to Halberstadt, where he met Andreas Werckmeister, one of the most distinguished names in German music at that time, an organist and a writer of major works on music theory. Werckmeister was sympathetic to young Walther, presented him with a gift of Baryphonus's treatise *Pleiades musicae* (Halberstadt, 1615), and subsequently corresponded regularly and sent him music, including the keyboard works of Buxtehude. In Halberstadt Walther also visited his friend Johann Graff, who had been a student of Johann Pachelbel in Erfurt. In 1706 he went to Nuremberg to study with Pachelbel's son Wilhelm Hieronymus, whom he had known during their childhood together in Erfurt.

Walther's years of apprenticeship ended on 29 July 1707 when he was appointed organist at the Stadtkirche (St Peter und St Paul), Weimar, a post he retained until his death. Immediately upon coming to Weimar he was made the music teacher of Prince Johann Ernst, nephew of the reigning Duke Wilhelm Ernst; the former was a gifted musician, and after he had returned from the University of Utrecht in 1713, Walther also taught him composition. Walther dedicated his manuscript treatise *Praecepta der musicalischen Composition* (1708) to Johann Ernst, and the prince's early death in 1715 was a severe loss to Walther.

In 1708 J.S. Bach, Walther's cousin, joined the ducal court Kapelle, and there began a friendship of great mutual benefit for these exceptionally gifted colleagues, who were almost of equal age. In 1712 Bach became godfather to Walther's eldest son. Of Walther's eight children, two daughters and two sons survived him; the younger son, Johann Christoph (1715–71), followed his father's career of organist (he was appointed to the cathedral at Ulm in 1751). The final important professional appointment in Walther's career occurred in 1721 when he was asked to join the ducal orchestra as *Hofmusicus*. Much of Walther's career centred on his duties as organist and his instruction of many private pupils. He wrote sacred vocal music, numerous chorale preludes and other organ music. Particularly valuable for his continuing impact on music history was his energetic pursuit of musical knowledge and his collecting of a remarkable library of music and books on music. His enthusiasm led to the idea of publishing a dictionary of musicians and musical terms, the monumental *Musicalisches Lexicon* (Leipzig, 1732/*R*).

Walther's last years were marked by ever-increasing disillusionment. His private pupils diminished in number. He did not receive, for reasons that are not clear, a position of greater distinction and remuneration, although more than one opportunity arose for him to become Kantor of the church in which he was organist. Similarly, when Bach left the Weimar court to accept a post at Cöthen, Walther was passed over in the search for Bach's successor. His financial position worsened and he was forced to sell much of his extensive library. Finally, in

autumn 1745 his health declined so seriously that he asked his younger son Johann Christoph to return from Jena, where he was a student, in order to substitute for his father as organist. A final blow to Walther's pride came when Duke Ernst August refused his request to make his son his successor as organist in Weimar.

Walther is a notable figure in German Baroque music history. His greatest contribution is the *Musicalisches Lexicon*, the first major music dictionary in German and the first in any language to include both musical terms and biographies of musicians from the past and present (see illustration). To the continuing gratitude of music historians, it serves as a still unexhausted repository of facts about musical conditions, concepts, performing practices, the major composers and writers on music up to the first decades of the 18th century. Walther's gift in codifying musical knowledge was based on a number of earlier musical dictionaries of various kinds, most particularly, as he himself made clear, the work of Sébastien de Brossard (Paris, 1703). However, Walther conceived his work as a comprehensive collection both biographical and bibliographical in nature as well as fully representative of European musical terminology as he knew it. The *Musicalisches Lexicon* includes more than 3000 musical terms; more than 200 authors and 250 sources are drawn upon, first and foremost Mattheson, to whose works more than 200 references are made. Walther's consummate command of the materials of music theory and history are evident in the wide range of these sources, including most of the 17th-century European treatises, and also earlier treatises from the Renaissance as well as works from antiquity quoted from Meibom's *Antiquae musicae* of 1652 (see Eggebrecht's valuable article). Walther continued to work on his dictionary after its publication and hoped to publish a second, revised edition, for which he completed a manuscript (in *A-Wgm*). Many of Walther's revisions and supplementary entries were subsequently incorporated by E.L. Gerber into his *Lexicon der Tonkünstler* (Leipzig, 1790–92).

Page from Walther's 'Musicalisches Lexicon' (Leipzig, 1732)

As a theorist Walther is represented by a treatise written early in his career, probably as a manual of instruction for Prince Johann Ernst. The *Praecepta der musicalischen Composition* is an important compilation of theoretical concepts drawn largely from treatises of the 17th century. It is divided into two large parts, the first discussing the rudiments of music such as notation and scales, and including a brief, alphabetically arranged list of musical terms, an obvious first stage towards the subsequent music dictionary. More important, however, is part ii, entitled *Musicae poëticae*, an instructive record of mid-Baroque German concepts of the art of composing, both in the practical application of the materials of music, such as intervals, consonance and dissonance, chords and contrapuntal procedures, and also in the stress on the techniques appropriate to expressing the affective connotations of words. Walther's work includes an important explanation of the musical-rhetorical figures which played an important part in the compositional practices of German Baroque composers. Walther apparently never intended to publish his treatise, which he frequently drew upon in writing his dictionary (see Benary's edition and his important discussion of the work).

As a composer, Walther reported in his autobiography that he wrote '92 vocal and 119 keyboard works based on chorales' as well as 78 works by other composers that he arranged for keyboard. Only one vocal work survives, *Kyrie, Christe, Kyrie eleison über Wo Gott zum Haus nicht giebt sein Gunst* (in *D-Bsb*). Most of Walther's organ works have been published (DDT, xxvi–xxvii; see Breig for comments regarding works falsely attributed to Walther in this edition). They are mainly chorale preludes – over 100 – that range from brief two-manual, three-part settings to extensive chorale partita arrangements and chorale fugues. These superbly varied pieces display most of the chorale variation techniques developed by German composers beginning with Pachelbel and including Böhm, Buxtehude and, of course, Bach. Walther's chorale variations are uniformly of the highest merit, perhaps the only ones comparable to Bach's examples of the genre (see Seiffert's discussion of Walther's chorale preludes). The close personal friendship with Bach undoubtedly influenced Walther's treatment of the chorale, but his compositions are nevertheless highly personal in style. Walther's sensitivity to the affective connotations of the melodies, his rich harmonic variety, the brilliant keyboard technique rooted in motivic counterpoint, and the strength of the contrapuntal ideas are all worthy of comparison with Bach's organ chorales.

GEORGE J. BUELOW

Walther, Johann Jakob (*b* Witterda, nr Erfurt, *c*1650; *d* Mainz, 2 Nov 1717). German violinist and composer. According to J.G. Walther he learnt the violin from a Pole whose servant he had become. He was in Florence from about 1670 until, at the latest, the end of 1673, when he returned to Germany. From 1 January 1674 he was in the service of the elector of Saxony at Dresden as 'primo violinista da camera'. By 1681 he had moved to Mainz, where he was clerk and 'Italian secretary' at the electoral court and where he remained until his death.

With Biber, Walther was the most important and daring of the late 17th-century violinist-composers in Germany and Austria who cultivated virtuoso techniques involving polyphonic writing, multiple stopping and the use of high positions: Fétis called him 'the Paganini of his century'. Whereas in using multiple stopping Biber was interested chiefly in scordatura, Walther emphatically rejected it, preferring instead the imitation of other musical instruments and of birds and animals. In doing so he was following in the footsteps of such composers as Biagio Marini, Carlo Farina (who had also worked at the Dresden court and whose *Capriccio stravagante* (1627) is a notable example of such pictorial music), Marco Uccellini, J.H. Schmelzer and even Biber himself. He is known by only two collections of music: *Scherzi da violino solo con il basso continuo per l'organo o cembalo accompagnabile anche con una viola o leuto* (Dresden, 1676, 2/1687; ed. in EDM, 1st ser., xvii, 1941) and *Hortulus chelicus uni violino duabus, tribus et quatuor subinde chordis simul sonantibus harmonice modulanti* (Mainz, 1688/*R* in Masters of the Violin, ii (New York and London, 1981), 2/1694, also 3/1708 according to Walther; edns of three works plus citations of other modern republications of individual works in Saslav).

Most works in the *Scherzi* are in free form, reminiscent of earlier sonatas in their sudden changes of tempo and metre: in *Hortulus chelicus* most movements are similar to the dance movements typical of the *sonata da camera*. Sets of variations and varied strophic arias in the form *AA′BB′* are likewise prominent in both volumes. But Walther's most characteristic works are those in which programmatic elements predominate. In the *Serenata a un coro di violini* (*Hortulus chelicus*, no.28) Walther imitated a 'chorus' of violins, the tremulant organ, bagpipes, trumpets, timpani, the hurdy-gurdy and the guitar; *Galli e galline, Scherzi d'augelli con il* [sic] *cucci* and *Leuto harpeggiante e rossignuolo*, are among those works in which various birds are imitated.

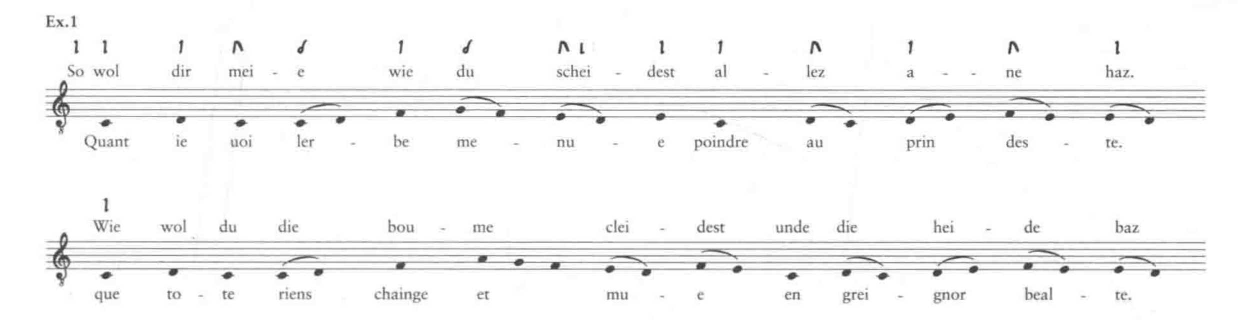
ISIDOR SASLAV

Walther, Joseph. *See* WALTER, IGNAZ.

Walther von der Vogelweide (*c*1200). German Minnesinger and *Spruch* poet. He is regarded as one of the most outstanding and innovative authors of his generation. In the opinion of his contemporaries, too, he was considered the leading poet and musician among the Minnesinger (see, for example, Gotfrid von Strassburg: *Tristan*, 4751–820; for an overview of contemporary comments on his work (see Bein, 1997; also Ranawake, rev. 11/1997 of Paul edn). His poetic oeuvre is the most varied of his time, comprising many Minnelieder and *Spruch* stanzas as well as religious lieder (including one *Leich* and a *Kreuzlied*), and his poetry treats a number of subjects, adopting frequently contradictory positions. In his work he freed Minnesang from the traditional patterns of motifs and restricting social function and transformed it into genuinely experienced and yet universally valid love-poetry.

1. LIFE. Little is known for certain about his life. The title 'her', which he is given in two sources of his works, is not necessarily an indication that he was of knightly birth, especially as these sources (*D-HEu* Pal.germ.848;

D-Sl HB XIII 1) tend to add this title to authors' names (Sayce, 1982). With Walther, as with most writers of Middle High German song, we are largely dependent on contemporary allusions in his own texts for information about his life and career. In fact, Walther adopted a more personal stance than any earlier writer towards contemporary political events such as the dynastic disputes between the Hohenstaufens and the Guelphs, the struggle for political power between the papacy and the Empire, and the repeated efforts to revive the crusading movement. Study of the identifiable events and persons that he mentioned shows that his works are likely to date from the end of the 12th century to the first third of the 13th, and that he may have been active principally in the Austrian area, where, according to his own account (ed. in Cormeau, 12.IV, line 8), he learned 'singen unde sagen' (this would mean that rather few sources transmitting Walther's work come from his main area of activity). In Walther's case, unlike that of other authors of his generation, there is also a non-literary reference mentioning him as a singer: the expense accounts of Wolfger von Erla, Bishop of Passau, contain an entry for the day after Martinmas (12 November) 1203, recording payment of five shillings made to Walther for a fur coat: 'Sequenti die apud Zei(zemurum) [Zeiselmauer, nr Vienna] Walthero cantori de Vogelweide pro pellicio .v. sol(idos) longos'. It appears that Walther was being remunerated for his services as a travelling singer, a role mentioned in several of his poems.



It is difficult to draw many conclusions about the author's career from his texts, since the circumstances of their performance are not usually clear. The same difficulty applies to the significance of intertextual references. For instance, several of Walther's verses suggest some rivalry (or at least engagement) with the work of Reinmar der Alte, the most prominent example probably being the borrowing of a *Ton*, perhaps with some variation – mentioned only in *D-HEu* Pal.germ.848, with the words 'In dem dône: Ich wirbe umb allez daz ein man' (Cormeau, 81; see *Des Minnesangs Frühling*, 159.I). However, this citation gives no grounds for any precise dating of a 'feud' between Reinmar and Walther, nor does it prove that Walther served for any long period of time at the Viennese court, as earlier research has assumed (see Schweikle, 1986). The information about Walther's grave from the collections of the episcopal protonotary Michael de Leone (for instance in *D-Mu* 2° Cod.ms.731, from 1347–54), stating that he was buried in the cloisters of the collegiate foundation of Neumünster in Würzburg, is of late date, and is associated with texts that were compiled with local 'patriotism' in mind. It is not impossible, however, that Walther did die in the Würzburg region.

2. Works. Despite the wide transmission of his poetic works, any attempt at adequate assessment of the musical aspect of his work, explicitly mentioned in Gotfrid von Strassburg's *Tristan*, is almost impossible in the state in which it has come down to us. As far as musical transmission is concerned, we may set out by assuming that in Walther's time poetry usually meant poetry for singing (for a different view see Cramer). It is generally presumed that in the 12th and 13th centuries a new *Ton* was created for each song (*Ton* meaning the metrical rhyme scheme as well as the melody). Walther was probably one of the first poets to compose *Sprüche* in several different *Töne* (it seems that earlier *Spruch* poets each used a single *Ton*); his *Töne* were often of *Stollen*-like construction. Those *Töne* that bear his name, or may be ascribed to him for reasons of parallel transmission, are contained in over 30 extant sources dating from the 13th century to the 17th. The breadth of the transmission of his works may reflect something of the high regard that Walther enjoyed. The sources are of very different types, from isolated works added later to manuscripts predominantly containing material of a different nature, through collections of works by different authors and manuscripts containing representative examples of repertory, to the records of the Meistersinger who venerated Walther as one of the 'old masters'. Most of the transmitted documents, including those containing the most extensive collections of Walther's works (such as the Manessische Liederhandschrift, *D-HEu* Pal.germ.848; see illustration), give the texts but no melodies, so that only the metrical-rhyme scheme of the *Töne* are preserved and we know nothing about the way they were performed. There may be a number of different reasons for this absence of melodies: a lack of interest in writing them down during the preparation of a manuscript, inadequate means for doing so, or in many cases perhaps a change in the function of the songs.

There are three early sources that transmit stanzas by Walther with their melodies: the Carmina Burana manuscript (*D-Mbs* Clm 4660/4660*a*), the manuscript *A-KR* 127 and the fragment *D-MÜsa* VII 51. The Carmina Burana, one of the earliest sources of Minnesang, contains notation in staffless neumes for part of the anonymously transmitted stanza *So wol dir meie wie du scheidest*, appended to a Latin poem, *Virent prata hiemata* (the

Walther von der Vogelweide: miniature from the Manessische Liederhandschrift, c1320 (D-HEu Pal.germ.848, f.124r)

German stanza is ascribed elsewhere to Walther and to Lutold von Seven). The melody and the metre of this stanza correspond to the Latin poem, although no concordant version with a transcribable melody is known. Other stanzas ascribed to Walther elsewhere have no neumatic notation in the Carmina Burana manuscript. One, *Roter munt wie du dich swachest*, is in the same *Ton* as *So wol dir meie*, while the other, *Nu lebe ich mir alrest werde*, is the first stanza of the famous 'Palästinalied' and is also transmitted in the Münster fragment. The Kremsmünster manuscript contains seven stanzas ascribed to Walther in other sources, but only one stanza, *Vil wunder wol gemachet wip*, is notated for only part of the verse. Although the concrete pitches of the melody (which is notated in staffless neumes) are not clear, it is evident that the melody has a relatively large number of melismas compared with the melodies in the Carmina Burana. The only early source to contain legible versions of Walther's melodies is the Münster fragment. It contains three *Töne* with uncontested attributions: the 'Palästinalied' (with 12 stanzas), the 'König-Friedrichston' (10 stanzas, the first incompletely preserved) and the 'Zweiter Philippston' (1 incomplete stanza). Another *Ton*, the melody of which is partly preserved in the Münster fragment (Cormeau, 115), is ascribed to Walther but doubt has been cast on its ascription (see Cormeau).

A number of later manuscripts also ascribe melodies to Walther, principally among them the Kolmarer Liederhandschrift (*D-Mbs* Cgm 4997), dating from about 1460. This source ascribes three *Töne* to him, the 'Gespaltene

Weise', the 'Hof- oder Wendelweise' and the 'Goldene Weise'. The 'Gespaltene Weise' was left unnotated in the source, but its formal scheme matches that of the 'König-Friedrichston' in earlier manuscripts. The 'Hofweise' matches the 'Wiener Hofton' transmitted in older sources, so is regarded as genuine, but the 'Goldene Weise' is generally regarded as spurious, as there is no earlier evidence that Walther used its formal scheme (although see Stauber, 1974, for a different opinion). Both the 'Hofweise' and the 'Goldene Weise' are found in later Meistersinger manuscripts, the latter usually under slightly different names and ascribed to Wolfram von Eschenbach; sources preserving its melody have different versions from that in the Kolmarer Liederhandschrift. Such different versions may reflect either different strands of tradition or 'editorial' revision, factors that must be considered in all study of melodies from the *Spruch* tradition. Among other *Töne* ascribed to Walther in Meistergesang manuscripts of the 16th and 17th centuries, the 'Feiner Ton' has been identified with Walther's 'Ottenton' and consequently its melody has been claimed for him (see Cormeau); in this case there are two distinct versions of the melody.

Other melodies may be provided for *Töne* by Walther if we consider works transmitted with conflicting attributions and possible contrafacta. For example, four stanzas included among Walther's works in the Manessische Liederhandschrift (Cormeau, 104.I-IV) are transmitted in the Jenaer Liederhandschrift (*D-Ju* El.f.101) as part of a *Ton* ascribed to 'Meyster Rumelant'; the latter source has square staff notation and thus provides us with a transcribable melody in a version roughly contemporary with the Münster fragment. Possible contrafacta among Walther's works of Romance models (for a brief survey see Brunner and others, 1996) include two melodies: the *Ton* for *So wol dir meie* (Cormeau, 28) has been suggested as a contrafactum of the chanson *Quant je voi l'erbe menue* by Gautier d'Espinal (R.2067), and Walther's 'Palästinalied' may be modelled on Jaufre Rudel's *Lanquan li jorn son lonc en mai* (PC 262.2). In the first of these cases the melodies appear not to be identical (see Welker, 1988): there is seldom direct correspondence between the neumatic notation of the Carmina Burana manuscript and the melody preserved (in staff notation) in the chansonnier *F-Pn* fr.20050 – although the preference for notating single notes with *virgae* in the Carmina Burana conveys only a very vague idea of the course of the melody (ex.1); much the same applies to the 'Palästinalied'. As a result the same material may be interpreted either as confirming the contrafactum connection (Brunner, 1963) or as evidence of its improbability (McMahon, 1982–4). The problem is exacerbated by the several variant versions of the troubadour melody in the French/Occitan manuscripts, none of which matches in a convincing way the version ascribed to Walther (ex.2). We would therefore have to assume deliberate revision of the melody in the course of its adaptation or else find an alternative explanation for the similarities in the Occitan and German melodies as the result of a largely analogous pattern in an existing melodic and tonal context (for a discussion of these issues see Treitler, 1995).

Although there are many difficulties associated with the musical transmission of Walther's works, compared with his Germanic contemporaries the transmission pattern of his music may be described as relatively rich (only the works of Neidhart are much more widely copied). However, any attempt to assess style or to determine national idioms from his works (see Gülke, 1975) is doomed to failure: the many discrepancies between the surviving melodies have ensured that, as yet, we can say little of a convincing nature about Walther's musical art.

WORKS

Edition: *Die Gedichte Walthers von der Vogelweide*, ed. K. Lachmann (Berlin, 1827, rev. 14/1996 by C. Cormeau as *Walther von der Vogelweide: Leich, Lieder, Sangsprüche*, with edition of melodies by H. Brunner) [W]

MELODIES IN EARLY SOURCES

transcribable

Mir hat eyn liet von vranken ('Zweiter Philippston'), inc., *D-MÜsa* VII 51; W 8*b*

Nu alrest leb ich mir werde ('Palästinalied'), 12 stanzas, *MÜsa* VII 51; W 7; possible contrafactum of Jaufre Rudel: Lanquan li jorn son lonc en may (PC 262.2)

Uil hoch gelopter got ('König-Friedrichston'), 10 stanzas (first stanza inc.), *MÜsa* VII 51; W 11 (also in *Mbs* Cgm 4997, unnotated, as 'Gespaltene Weise')

untranscribable

So wol dir meie wie du scheidest, *D-Mbs* Clm 4660/4660*a*, anon., partly notated in staffless neumes but matches melody of preceding Latin poem Virent prata hiemata; C 28.III; also Roter munt wie du dich swachest, *Mbs* Clm 4660/4660*a*, anon., same Ton, no notation; W 28.IV; Ton is possibly contrafactum of Gautier d'Espinal: Quant je voi l'erbe menue (R.2067)

Vil wunder wol gemachet wip, 5 stanzas, *A-KR* 127, anon., partly notated; W 30.I–V

MELODIES IN LATER SOURCES

'Feiner Ton', ascr. Walther in Meistersinger MSS *PL-WRu* 1009, lost; *D-Nla* Fen.4°V182 (*c*1590–95), anon.; *Nst* Will III. 784, annotated 'Im Feinenthon/H. Walthers'; ed. in H. Brunner and others, 1977, no.11; matches 'Ottenton' (W 4) from older tradition; melody thus attrib. Walther

'Gespaltene Weise', *D-Mbs* Cgm 4997, ascr. Walther; see Uil hoch gelopter got

'Goldene Weise', *Mbs* Cgm 4997, ascr. Walther but generally assumed not to be by him; *PL-WRu* 1009, *D-Nst* Will III.784, *Nst* Will III.792, all ascr. Wolfram von Eschenbach; ed. in Brunner and others, 1977, no.8

'Hofweise', *Mbs* Cgm 4997, ascr. Walther, matches 'Wiener Hofton' (W 10) in older MSS (also in *D-WRl* fol.421/32)

'Kreuzton', *PL-WRu* 1009, *D-Bsb* mgf 25, *Nst* Will III.784, *Nst* Will III.792, *WRl* Q576/1, ascr. Walther in Meistersinger MSS; ed. in Brunner and others, 1977, no.10

'Langer Ton', *Ju* El.f.100, *PL-WRu* 1009, *D-Nst* Will III.784, *Nst* Will III.792, ascr. Walther in Meistersinger MSS; ed. in ibid., no.9

Got in vier elementen, melody first copied in *D-Ju* El.f.101, annotated 'Meyster Rumelant', matches Ton of 4 stanzas in *D-HEu* Pal.germ.848; W 104.I–IV

MICHAEL KLAPER

Walton, Blanche W(etherill) (*b* Philadelphia, 15 Nov 1871; *d* New York, 17 July 1963). American patron of music. After her marriage at the age of 22 to Ernest F. Walton, she moved to New York, where she was among the last of MacDowell's piano pupils. She supported the work of many composers in the 1920s and 1930s, including Cowell, Bartók (who stayed in her home during his first American visit in 1927), Varèse, Ruggles, Riegger, Weiss, Carlos Chávez, Paul Arma (the pseudonym of Imre Weisshaus) and Ruth Crawford. In 1932, with Charles Seeger and Joseph Yasser, she founded and supported the American Library of Musicology. In 1934 the American Musicological Association (later Society) was formed in her home. Cowell, who considered her an important and highly esteemed sponsor of modern music, organized a concert in her honour at the New School, New York, in 1959.

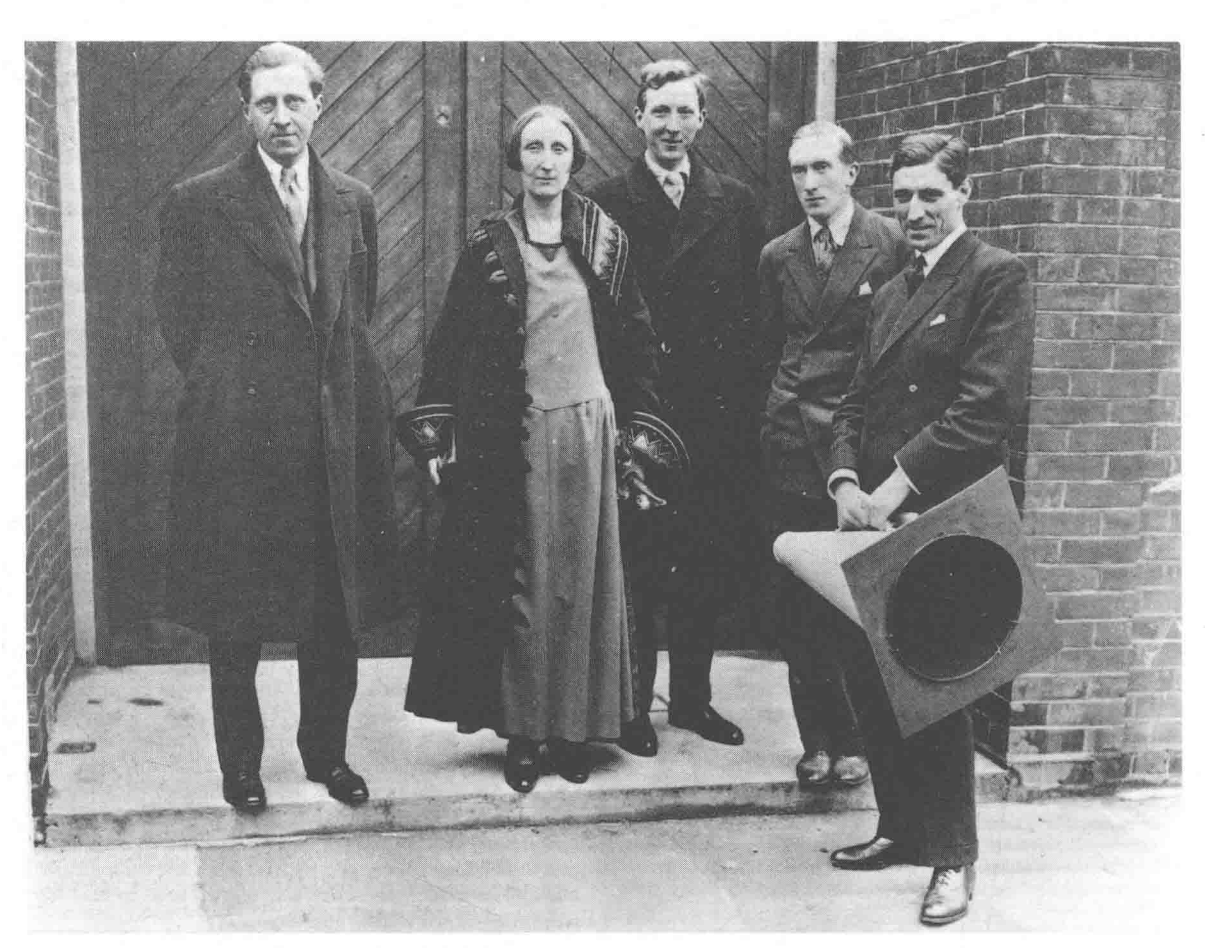
RICHARD JACKSON

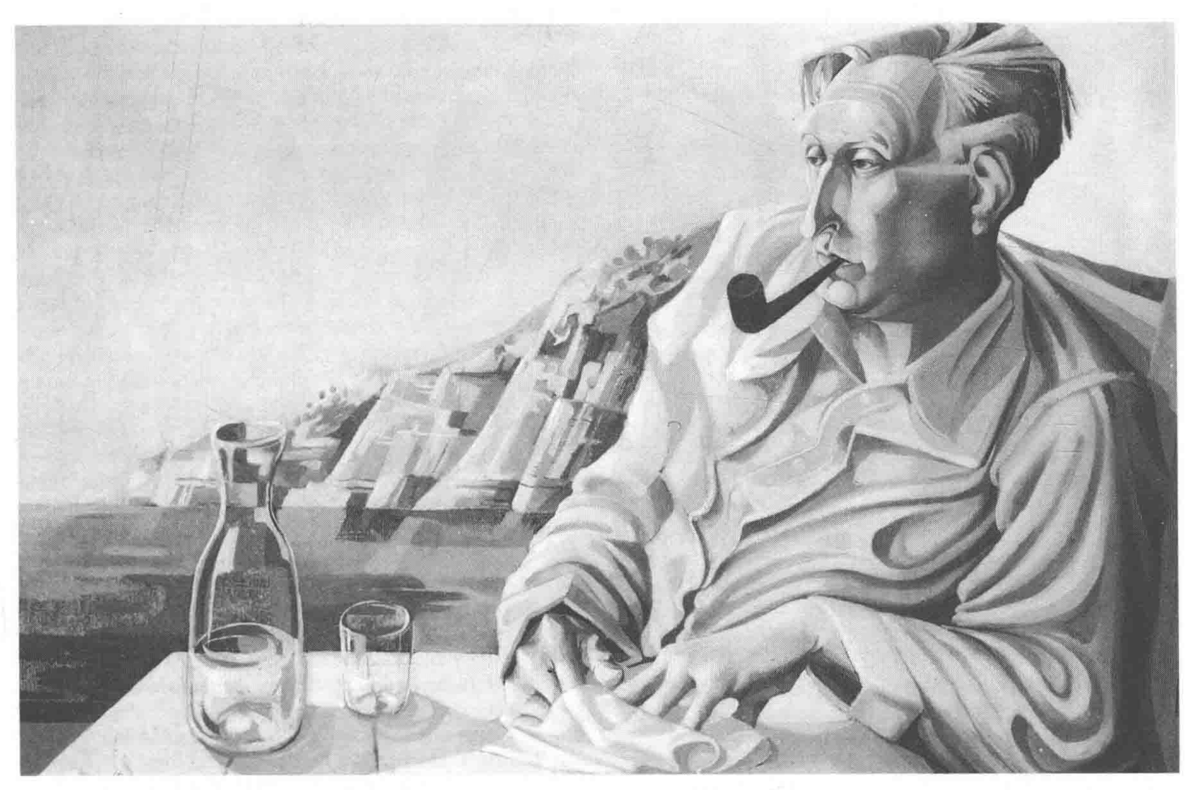
Walton, William (Turner) (*b* Oldham, 29 March 1902; *d* Ischia, 8 March 1983). English composer. Noted above all for his orchestral music, he is one of the major figures to emerge in England between Vaughan Williams and Britten.

1. LIFE. The second of four children, Walton was born into an impecunious family. His father, Charles, was a baritone who made a modest income as a choir master and his mother, Louisa (née Turner), was a contralto. Walton's earliest musical experiences came as a choirboy in his father's church choir. Anglican anthems, as well as the secular vocal music he heard at home, thus formed the basis of his musical habits and laid the foundation of his later style. The punishment he received as a choirboy (his knuckles were rapped by his father for each musical mistake he made) may have also contributed to his often painful quest for musical perfection.



In 1912 Walton won a scholarship to be a chorister at Christ Church Cathedral, Oxford. He remained at the

cathedral school for six years, singing treble solos and studying the piano and the violin. While many of his early compositions are the apprentice efforts of a choirboy with a good ear, the choral work *A Litany* (1916, rev. 1930) remarkably anticipates his mature style. (In later life, he claimed that he began to compose as a way to avoid returning to his family in Oldham). During these years, Walton attracted the attention of Thomas Strong, the dean of Christ Church (later the bishop of Oxford), who provided artistic encouragement and financial support and arranged for him to enter the University in 1918 at the age of 16. Although in later years Walton was prone to exaggerate his lack of musical education, he in fact received careful training under Hugh Allen, the organist at Christ Church (later the director of the RCM). A great deal of his time at Oxford was spent in the library, studying scores by Debussy, Ravel, Prokofiev and Stravinsky, and developing his abilities as an orchestrator. He left Christ Church in 1920 without a degree, however, having failed three times to pass an obligatory BA exam.



While at Oxford, Walton met Sacheverell, Osbert and Edith Sitwell, friends with whom he lived for over a decade (fig.1). The Sitwells provided him with freedom from want, time to compose and a lively cultural education. During this period, he attended the Russian ballet, met Stravinsky and Gershwin, listened to jazz at the Savoy Hotel and wrote an experimental string quartet that won the praise of Alban Berg. His first trip to Italy, taken with the Sitwells in 1920, proved to be a seminal experience. He found there a congenial musical tradition steeped in Mediterranean lyricism, as well as the sunlight that he craved. His first important score, *Façade* (1922–9) reflects these influences. The scores that followed, such as the overture *Portsmouth Point* (1924–5) and the Sinfonia concertante (1926–7) enhanced his growing reputation.

With the Viola Concerto (1928–9), Walton deepened his expressive range and contrapuntal technique, advancing his musical language far ahead of those of his friends and acquaintances Constant Lambert, Peter Warlock and Lord Berners. An uninhibited Italian vivacity animated his next major score, the cantata *Belshazzar's Feast* (1930–31). The success of this highly dramatic choral work confirmed Walton's place as an prominent figure in the British musical world. He extended his reputation internationally with the impressive First Symphony (1931–5), inspired by his stormy love affair with Baroness Imma Doernberg.

During the early 1930s Walton began to detach himself from the Sitwells. He attracted such patrons as Siegfried Sassoon, Mrs Samuel Courtauld and especially Lady Alice Wimbourne, with whom he enjoyed a long, happy and intimate relationship. He gained further financial security by composing film scores, the first of which, *Escape Me Never*, was written in 1934. During World War II, he

2. William Walton: portrait by Michael Ayrton, 1948 (National Portrait Gallery, London)

wrote music for a series of patriotic films, including Laurence Olivier's stirring adaptation of William Shakespeare's *Henry V* (1943–4). Following the death of Lady Wimbourne in 1948, Walton travelled to Argentina for a conference of the Performing Rights Society. In Buenos Aires he met and tenaciously courted Susana Gil Passo, an Argentine woman 24 years his junior. They were married in a civil ceremony on 13 December 1948; a Catholic ceremony was held on 20 January the following year. In 1949 the couple settled on the island of Ischia.

From 1947 to 1954 Walton struggled with the composition of a grand opera, *Troilus and Cressida*. His severe standards of craftsmanship, combined with dissatisfaction with the librettist, Christopher Hassell, conspired to make the project a slow and painful one. Although the opera was a success at its Covent Garden première (3 December 1954) and in subsequent productions in New York and San Francisco, its outright failure at La Scala wounded Walton deeply and sapped his self-confidence. He continued to revise, cut and make other alterations to the work for many years.

Walton's output slowed as he grew older, partly because of the cool critical reception given to *Troilus and Cressida*, the Second Symphony (1957–60) and other postwar scores, and partly because his health became increasingly precarious. He continued to attend major performances, however, and to tour as an effective conductor of his own works. He visited Australia and New Zealand in 1964 and received a tumultuous welcome on a trip to Russia in 1971. During these years the Waltons built an expansive villa with a luxurious garden on Ischia; he spent the rest of his life in that idyllic setting.

Walton received many awards during his long career: seven honorary doctorates, including one from Oxford (1942); the Gold Medal of the Royal Philharmonic Society (1947); a knighthood (1951); the Order of Merit (1967); and the Benjamin Franklin Medal (1972). He was elected to honorary membership in the American Academy of Arts and Letters (1978) and received the Ivor Novello Award (1982). Despite such recognition, his critical reputation fell after World War II, the victim of rapid changes in musical fashion. By the end of the 20th century, however, his music again secured a prominent and valued place in the repertory.

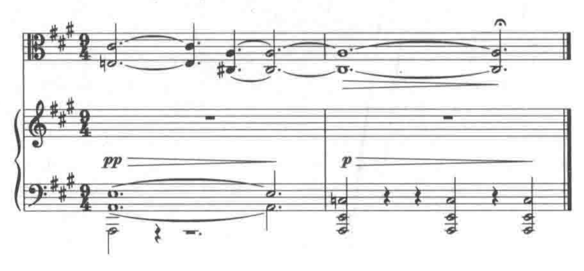
2. Works. Walton's most important work of surviving juvenilia is *A Litany* (1916, rev. 1930) for unaccompanied chorus. A precocious production for a teenager, this lapidary setting of a text by Phineas Fletcher ('Drop, Drop Slow Tears') demonstrates many of the stylistic traits of the mature composer. Walton's peculiarly effective writing for voices, characterized by arching melodic lines, elegant but idiosyncratic part-writing based on practical experience rather than textbook rules, and admirable formal concision, is already present. Other aspects of *A Litany* familiar from later works include an harmonic vocabulary based on triads (often spiced with added notes) and seventh chords (but avoiding diminished and dominant seventh structures), and unusual cadential formulas. Walton also leavens the expression of voluptuous melancholy with a characteristic touch of irony.

Other early scores include two charming solo songs, *The Winds* (1918) and *Tritons* (1920), and a lively Piano Quartet (1918–21), which takes as its model a work by Herbert Howells for the same combination of instruments.

3. Original front curtain for Walton's 'Façade', designed by Frank Dobson, for the first performance in the Sitwells' drawing room at 2 Carlyle Square, London, Sunday 22 January 1922

Self-consciously English in style, the quartet is filled with echoes of Vaughan Williams, Elgar and Delius. While lacking the suavity of Howell's score, Walton's work possesses an abundance of melodic invention and rhythmic variety.

Walton aptly described his first, experimental String Quartet (1919–22) as 'full of undigested Bartók and Schoenberg'. The most striking features of this work are its clotted textures and self-conscious use of dissonance. In the score, Walton experiments with an angst-ridden, expressionistic aesthetic that was foreign to his pleasure-loving nature. Despite the praise lavished on the work by Berg after its première at the first ISCM Festival in 1923, Walton soon withdrew it.



Walton's next composition, *Façade* (1922–9, rev. 1951), could not be more different from the severity of its immediate predecessor. A setting of Edith Sitwell's poetry, the text forms a complex reminiscence of Sitwell's difficult Edwardian childhood, including recollections that are delicate ('Through Gilded Trellises'), terrifying ('Black Mrs Behemoth') or satirical ('Jodelling Song'). In the work, Walton rediscovers and deepens certain stylistic elements first manifest in *A Litany*. His expressive range is expanded through the assimilation of popular styles of the early 1920s, such as the tango, fox-trot and Charleston, and the hybrid Anglo-American jazz he heard at nightclubs and at the Savoy Hotel. Additional influences include Schoenberg's *Pierrot lunaire* which, like *Façade*, uses a reciter, and the spiky instrumentation and irregular metres of Stravinsky's *Histoire du soldat*.

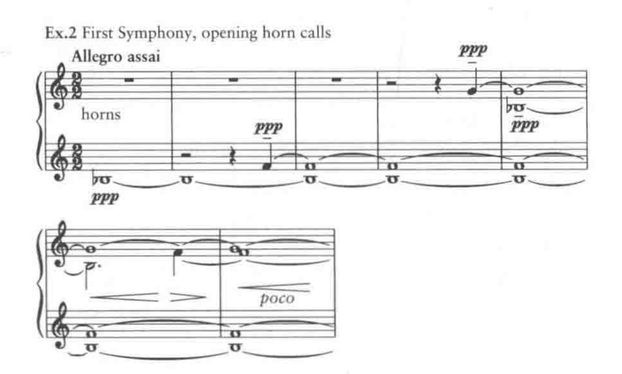
These scores provided Walton with models of how popular genres – cabaret songs in *Pierrot* and ragtime in *Histoire* – could be incorporated into a distinctive style essentially predicated on art music. It is interesting to note his sly parody of the formal organization of *Pierrot* (its division into 21 [3 x 7] succinct movements) in *Façade*'s final version.

Walton's fascination with the etchings of Thomas Rowlandson resulted in the overture *Portsmouth Point* (1924–5), which had a successful première at the 1926 ISCM Festival in Zürich. In this admirably concise evocation of Rowlandson's bawdy etching, jazzy syncopation and orchestral athleticism jostle reminiscences of Stravinsky's *Pulcinella*. The virile pandiatonicism of *Portsmouth Point* also pervades the neo-classical Sinfonia concertante for orchestra and piano obbligato (1926–7), a work in which even greater echoes of Stravinsky can be heard.

The Viola Concerto (1928–9) represents an important development in Walton's style. For the first time Stravinskian influences are smoothly integrated into music displaying lessons learned from Hindemith (who performed the solo part in the work's 1929 première), Prokofiev, Ravel and Gershwin. Consisting of a scherzo preceded and followed by two more substantial movements, the concerto is a marvel of orchestral poise; the orchestra never impinges on the soloist's both melancholy and muted voice. Walton's contrapuntal inventiveness is much in evidence throughout the work. The musical narrative is organized into broad paragraphs that extend melodic material through continuous variation. A pervasive use of cross-relations is integral to both motivic

Ex.1 final cadence, finale, Viola Concerto

development and harmonic language (see, for example, the final cadence of the finale; ex.1) and contributes a smoky *cinema noir* quality to its finest pages.



Commissioned by the BBC, *Belshazzar's Feast* (1930–31) is a sardonic inversion of the 'dramatic cantata' beloved by Victorian composers and audiences. Osbert Sitwell's libretto consists of cunning juxtapositions of Old Testament excerpts that draw implicit parallels between the excesses and downfall of the Babylonian monarch and the opulence and eventual implosion of Edwardian society. Rather than using Biblical texts to express religious sentiment, Sitwell uses them to titillate. The audience at the première must have been discomfited by the perverse innuendo of the cantata's opening line: 'Thus spake Isaiah: Thy sons that thou shalt beget, They shall be taken away/And be eunuchs in the palace of the King of Babylon'.

Walton's music colludes fully with Sitwell's text in its intent to subvert Edwardian mores. The real protagonists of *Belshazzar's Feast*, the captive Jewish people represented by the chorus, react with the ferocious indignation of powerless outsiders forced to serve an oppressive society. Walton, himself a Lancastrian outsider at Oxford and in London, vividly contrasted the searing anguish of the Jewish slaves with a caricature of the garish ostentation of Belshazzar's court. A parody of Elgar's *Pomp and Circumstance* marches erupts as a paean of praise to Belshazzar's God of Gold to cleverly characterize Babylonian decadence through a specific reference to an Edwardian musical style.

After the triumph of *Belshazzar's Feast*, Walton began to sketch his First Symphony (1931–5), the genesis of which was protracted and agonized. In composing this work Walton struggled against the weight of symphonic tradition, in particular the overwhelming precedent set by Sibelius, whose music was immensely popular in England during the 1930s. He placed an additional creative block in his own path by allowing the first three movements of the symphony to be performed by the LSO under Harty on 3 December 1934. After further anguished work, the finale was finally completed and the full work given its première by the same orchestra and conductor on 6 November 1935.

The ascending horn calls that open the work recall the initial bars of Sibelius' Fifth Symphony (ex.2); an extensive use of pedal points, ominous timpani rolls and menacing low brass timbres also derive from Sibelius. Walton's deployment of ostinatos to organize extensive passages is his own particular innovation, however, and the peculiar thematic logic of the symphony is closer to Beethoven than Sibelius. With its mixture of orgiastic power, coruscating malice, sensuous desolation and extroverted swagger, the symphony is a tribute to Walton's tenacity and inventive facility.

Ex.2 First Symphony, opening horn calls

Both the coronation march *Crown Imperial* (1937, rev. 1963) and the Violin Concerto (1936–9, rev. 1943) pay a less equivocal homage to Elgar than is found in *Belshazzar's Feast*. Modelled on Elgar's *Pomp and Circumstance* marches, *Crown Imperial* is the finest and most infectious of Walton's essays in that genre. The Violin Concerto is an ingenious reconciliation of the demands of virtuosity and Romantic expressiveness. Commissioned by Heifetz, it shares the same basic formal plan of the Viola Concerto, consisting of a fleet scherzo flanked by two larger movements. The orchestral colour of the Violin Concerto, however, is brighter than that of the earlier work, the themes more extroverted and the harmonies more luscious. The *commedia dell'arte* capriciousness of the scherzo anticipates the high spirits of the concert overture *Scapino* (1940, rev. 1950), written for the 50th anniversary of the Chicago SO, while the Neapolitan languor of the trio evokes the earlier *Siesta* (1926, rev. 1962).

During World War II Walton composed music for a series of patriotic films that included *The First of the Few*, from which he drew the exhilarating *Spitfire Prelude and Fugue* (1942). His cinematic experience is particularly evident in his music for *Christopher Columbus* (1942), a BBC radio programme celebrating the 450th anniversary of Columbus's first voyage to America. In addition to *Christopher Columbus*, Walton composed two ballets: *The Wise Virgins* (1940), a skilful orchestration of music by Bach, and *The Quest* (1943), a 'propaganda ballet' oddly reminiscent of Vaughan Williams. Aside from these scores, and miniatures such as *Duets for Children* (1940), he focussed his attention on film music. His collaboration with Laurence Olivier resulted in magnificent scores for *Henry V* (1943–4), *Hamlet* (1947) and *Richard III* (1955). 'Doing films', Walton once said, 'gave me a lot more fluency'; the assurance he gained from writing film scores increased his depth, concentration and versatility.

Immediately after the war, Walton turned to chamber music composition, producing in succession the String Quartet in A Minor (1945–6) and the Sonata for Violin and Piano (1947–9). The quartet, one of Walton's supreme achievements, can be justly compared to Ravel. At the suggestion of Marriner, he later arranged it as the Sonata for Strings (1971). Written for Yehudi Menhuin and Louis Kentner, the Violin Sonata is cast in an unusual bipartite form; extensive motivic connections between the two movements create a highly cohesive design. Despite the brief appearance of a 12-note passage in the set of variations that comprises the second movement, the sonata is strongly tonal.

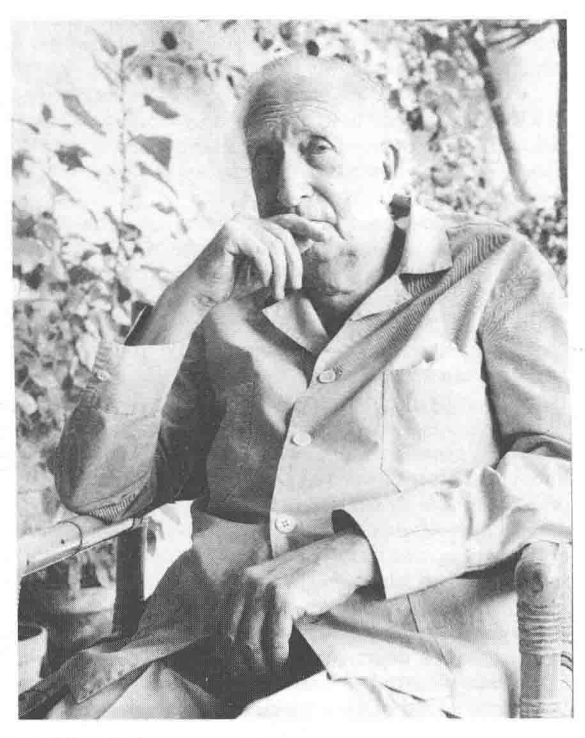
In 1947 Walton began planning his grand opera *Troilus and Cressida* (1947–54, rev. 1963, 1972–6). As with the First Symphony, the process of composition was fraught with difficulties. (The complex history of the opera's painful evolution and extensive revisions is lucidly unravelled in Kennedy, 1989). Walton was so preoccupied with *Troilus and Cressida* that during the protracted period of its creation he wrote only two brief occasional pieces: a second coronation march, *Orb and Sceptre*, and the effervescent *Coronation Te Deum* (both 1952–3).

Hampered by Christopher Hassell's 'poetic' and pseudo-archaic libretto, Walton nevertheless managed to compose dramatically effective music that often rises to

both nobility and passion, especially in Cressida's three arias. His compassion for the hopeless plight of his vacillating heroine, a weak young woman facing an insoluble moral dilemma, gives the opera consistency and poignancy. Despite its many beauties, however, *Troilus and Cressida* represents a late and only partially successful attempt to revivify the traditions of 19th-century Italian opera in a postwar era wary of heroic Romanticism.

Walton's second opera, *The Bear* (1965–7), completed 13 years after the première of *Troilus and Cressida*, contrasts markedly with the earlier work. A one-act 'extravaganza' with an expert libretto by Paul Dehn after the play by Anton Chekhov, *The Bear* is a burlesque on the excesses of Romanticism. Chekhov's unsentimental view of human nature gave Walton ample opportunity for a pointed expression of wit and irony. His composition of *The Bear* was preceded by two song cycles, both of which share the opera's melodic invention and high spirits: *Anon in Love* for tenor and guitar (1959) and *A Song for the Lord Mayor's Table* for soprano and piano (1962).

Compared with the torturous creation of *Troilus and Cressida*, the Cello Concerto (1955–6) was composed with comparative ease. Commissioned by Piatigorsky, the concerto is related both to the Mediterranean lyricism of *Troilus and Cressida* and to the mastery of variation displayed in the Violin Sonata. While the formal plan of the Cello Concerto superficially recalls that of the viola and violin concertos, it possesses an unusually introspective depth of feeling. The luminous ticking present throughout the work suggests the inexorable passage of time, and the pensive melancholy of its conclusion recalls Cressida's aria 'At the Haunted End of the Day'.



Composed after the Cello Concerto, the Partita for orchestra (1957) is, in contrast, an extroverted showpiece written to celebrate the 40th anniversary of the Cleveland Orchestra. More substantial than either the *Johannesburg Festival Overture* (1956) or the diverting but hard-edged *Capriccio burlesco* (1968), the Partita is an impressively concentrated score with a high-spirited finale, the main theme of which gradually emerges during the course of the movement. The steely counterpoint and orchestral virtuosity of the Partita are also present in the Second Symphony (1957–60), commissioned by the Royal Liverpool Philharmonic Society. A grander conception than the Partita, the Second Symphony is one of Walton's finest works. More refined than the First Symphony, it is remarkable for its stylistic integration, developmental ingenuity and orchestral mastery. Although not as urgently passionate as its predecessor, the Second Symphony is notated with greater clarity and displays clearer formal articulation. The finale, a passacaglia based on a 12-note theme (ex.3), is an intriguing reconciliation of Baroque

Ex.3 Second Symphony, Finale, 12-note passacaglia theme

formal procedures with a complex and dissonant harmonic vocabulary.

The symphony's density of texture and sonorous brilliance is also found in the next of Walton's large works, the Gloria (1960–61) composed for the 125th anniversary of the Huddersfield Choral Society. Like the

4. *William Walton*

earlier *In Honour of the City of London* (1937), the Gloria shares some of the glittering energy of *Belshazzar's Feast* without possessing either its high level of invention or its enlivening irony. Far more satisfying are the orchestral acts of homage to admired colleagues: the *Variations on a Theme by Hindemith* (1962–3) and the *Improvisations on an Impromptu of Benjamin Britten* (1969). The *Hindemith Variations*, commissioned by the Royal Philharmonic Society for its 150th concert, is an extraordinary meld of Hindemithian craftsmanship and Waltonian exuberance. Walton takes as his theme a substantial passage from the slow movement of Hindemith's Cello Concerto and, through the variations, relates it to a quotation from the opera *Mathis der Maler*. Though the variations begin with Hindemith's material, Walton's own voice becomes more prominent as the work progresses. For Walton, an 'improvisation' was a free and fanciful elaboration of a theme rather than a formal variation. In the improvisations based on the opening melody of the second movement, 'Impromptu', of Britten's Piano Concerto, op.13, the theme is subjected to a variety of kaleidoscopic metamorphoses. Commissioned for the San Francisco SO, the *Britten Improvisations* is a curiously ambivalent tribute: the atmosphere is often chilly and remote and the celebratory tone of the final improvisation sounds oddly forced.

Both the ingenuity and austerity of the *Britten Improvisations* are found in Walton's two final orchestral works. The engaging *Varii capricci* (1975–6) is a skillful transcription for orchestra of the *Five Bagatelles* for guitar (1970–71). The *Prologo e Fantasia* (1981–2), written for Rostropovich and the National SO of Washington, DC, is a chilling glimpse into the bleakness of old age.

Throughout his life Walton returned to the composition of choral music, producing such fine pieces as *Set me as a*

seal upon thine heart (1938) and *Where does the uttered music go?* (1946). As he grew older, he frequently explored this medium, producing an anthem, *The Twelve* (1964–5), a *Missa brevis* (1965–6), a *Jubilate Deo* (1971–2), a *Magnificat* and *Nunc dimittis* (1974) and the *Antiphon* (1977). All of these pieces, as well as the spare *Cantico del sole* (1973–4) are reminders of the music that he composed as a choirboy and bring his career full circle.

Walton's music has often been too neatly dismissed by a few descriptive tags: 'bittersweet', 'nostalgic' and, after World War II, 'same as before'. Such convenient categorizations ignore the expressive variety of his music and slight his determination to deepen his technical and expressive resources as he grew older. His early discovery of the basic elements of his style allowed him to assimilate successfully an astonishing number of disparate and apparently contradictory influences, such as Anglican anthems, jazz, and the music of Stravinsky, Sibelius, Ravel and Elgar, to name a few. Walton's allegiance to his basic style never wavered and this loyalty to his own vision, along with his rhythmic vitality, sensuous melancholy, sly charm and orchestral flair, gives his finest music an imperishable glamour.

WORKS

STAGE

The First Shoot (ballet, 1), 1935, Manchester, Opera House, 23 Dec 1935, band suite, 1979–80 [arr. orch, C. Palmer, 1987]

The Wise Virgins (ballet, 1), 1940, London, Sadler's Wells Theatre, 24 April 1940, orch suite, 1940 [arr. of Bach]

The Quest (ballet, 1), 1943, London, New Theatre, 6 April 1943

Troilus and Cressida (op, 3, C. Hassall), 1947–54, London, Covent Garden, 3 Dec 1954, rev. 1963, 1972–6, London, Covent Garden, 12 Nov 1976, orch suite, 1987 [arr. Palmer]

The Bear (extravaganza, 1, P. Dehn and W. Walton, after A. Chekhov), 1965–7, Aldeburgh, Jubilee Hall, 3 June 1967

Varii capricci (ballet), 1983, New York, Metropolitan Opera House, 19 April 1983 [arr. of 5 Bagatelles, gui, 1975–6]

OTHER DRAMATIC

Film scores: Escape Me Never, 1934; As You Like It, 1936; Dreaming Lips, 1937; Stolen Life, 1938; Major Barbara, 1940–41; The Foreman went to France, 1941–2; Next of Kin, 1941; The First of the Few, 1942; Went the Day Well?, 1942; Henry V, 1943–4, choral suite, 1945 [arr. M. Sargent], orch suite, 1963 [arr. M. Mathieson]; Hamlet, 1947; Richard III, 1955, orch suite, 1963 [arr. Mathieson]; The Battle of Britain, 1969 [score used only in part], orch suite, 1984–5 [arr. C. Matthews]; Three Sisters, 1969

Incid music: A Son of Heaven (L. Strachey), 1925; The Boy David (J.M. Barrie), 1936; Christopher Columbus (radio, L. MacNeice), 2 spkrs, A, T, B, SA speaking chorus, TB speaking chorus, gui, orch, 1942, choral suite, A, T, SATB, orch, 1987 [arr. C. Palmer]; Macbeth (W. Shakespeare), 1942; March: A History of the English-speaking People's (ABC TV), 1959; Granada Preludes, Call Signs and End Music (Granada TV),1962; Title Music for BBC Shakespeare Series (BBC TV), 1977

ORCHESTRAL

Pedagogic Ov. 'Dr Syntax', 1920–21, withdrawn; Fantasia concertante, 2 pf, jazz band, orch, 1923–4, withdrawn; Portsmouth Point, ov., 1924–5; Sinfonia concertante, orch, pf obbl, 1926–7, rev. 1943; Façade, suite no.1, 1926; Siesta, small orch, 1926, rev. 1962; Va Conc., 1928–9, rev. 1936–7, 1961; Sym. no.1, 1931–5; Ballet Music, 1934 [from film score Escape Me Never]; Vn Conc., 1936–9, rev. 1943; Crown Imperial, coronation march, 1937, rev. 1963; Façade, suite no.2, 1938; Music for Children, 1940–41 [based on Duets for Children, pf]; Scapino, comedy ov., 1940, rev. 1950; Spitfire Prelude and Fugue, 1942 [from film score The First of the Few]; 2 Pieces, str, 1944 [from film score Henry V]; Memorial Fanfare for Henry Wood, 1945; Orb and Sceptre, coronation march, 1952–3; Variation on an Elizabethan Theme 'Sellinger's Round', str, 1953; Vc Conc., 1955–6, rev. 1975; Johannesburg Festival Ov., 1956; Partita, 1957; Sym. no.2, 1957–60; The Quest, 1961 [from ballet, arr. V. Tausky and Walton]; Variations on a Theme by Hindemith, 1962–3; Funeral Music, 1963 [from film score Hamlet, arr. M. Mathieson]; Prelude, 1963 [from film score Richard III, arr. Mathieson]; Hamlet and Ophelia, poem, 1967 [from film score Hamlet, arr. Mathieson]; Capriccio burlesco, 1968; Improvisations on an Impromptu of Benjamin Britten, 1969; Sonata, str, 1971 [transcr. of Str Qt, a, by Walton and M. Arnold]; Varii capricci, 1975–6, rev. 1977 [arr. 5 Bagatelles, gui]; Prelude, 1977 [from Granada TV Music]; Prologo e Fantasia, 1981–2; A Shavian Sequence, suite, 1987 [from film score Major Barbara, arr. C. Palmer]

BAND AND BRASS ENSEMBLE

Salute to the Red Army, 2 fanfares, brass, perc, 1943; A Queen's Fanfare, 1959; Fanfare for a Great Occasion, 1962 [from film score Hamlet, arr. M. Sargent]; March, concert band, 1966 [from Granada TV Music, arr. G. Vinter]; Anniversary Fanfare, 1973; Fanfare for the National, 1974, rev. 1976; Roaring Fanfare, 1976; Salute to Sir Robert Mayer on his 100th Birthday, 1979; A Birthday Fanfare, 1981; Fanfare and March, 1987 [from incid music for Macbeth, arr. C. Palmer]

CHORAL

With orch: The Forsaken Merman (M. Arnold), S, T, SSSSAAAA, orch, 1916, unperf.; Belshazzar's Feast (O. Sitwell, after Bible), Bar, SSAATTBB, orch, 1930–31, rev. 1931, 1948, 1957; In Honour of the City of London (W. Dunbar), SSAATTBB, orch, 1937; Coronation Te Deum, boys' chorus, 2 SATB, 2 SSSATB, orch, org, 1952–3; Gloria, A, T, B, SSAATTBB, orch, 1960–61; Henry V (A Shakespearean Scenario), spkr, boys' vv, SATB, orch, 1988 [from film score, arr. BYRON ADAMS

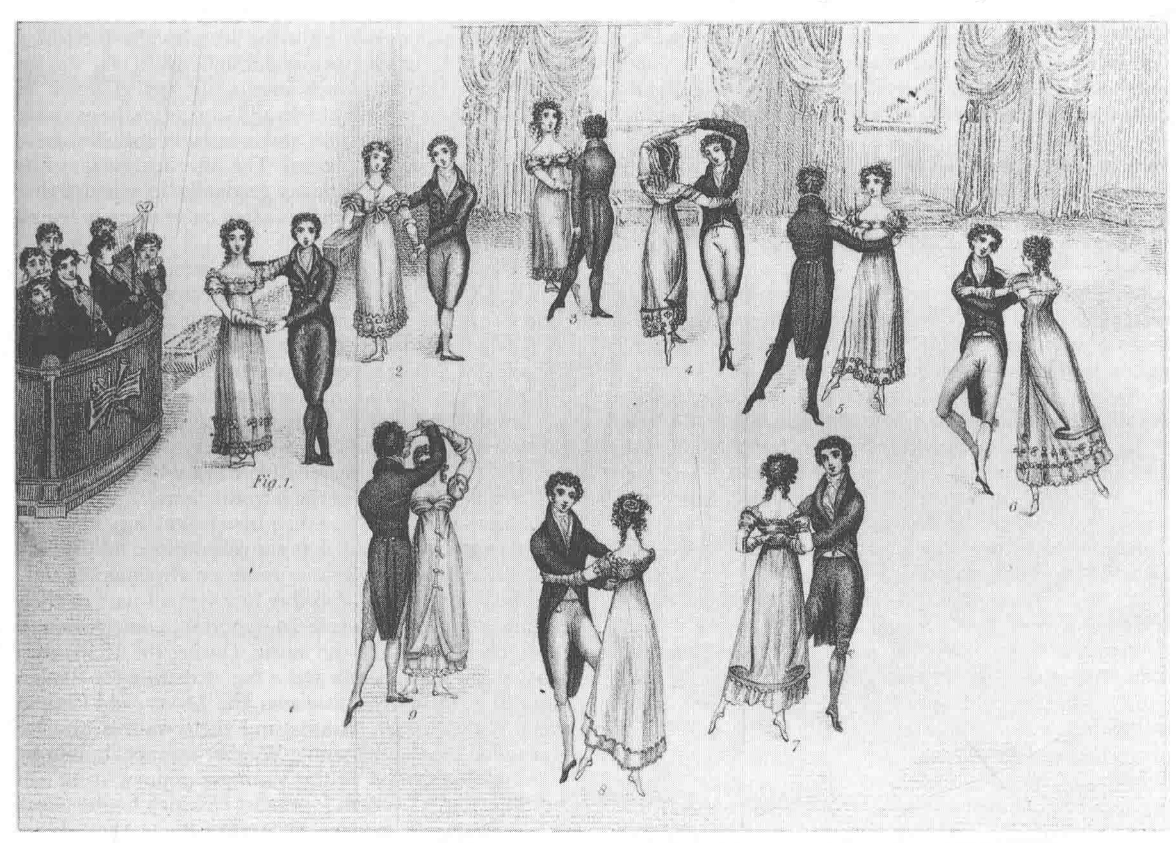
Waltz (Fr. *valse*; Ger. *Walzer*). A dance in triple time which became the most popular ballroom dance of the 19th century. Not only has it proved the most celebrated and enduring of dance forms, but its influence on musical history has probably been greater than that of any other (with the possible exception of the minuet). It attracted the attention of major composers of the 19th and early 20th centuries, and was accepted into all forms of musical composition. As a dance form its musical quality was developed to an unusual extent.

1. Origins and early forms. 2. Revival and heyday. 3. The wider influences. 4. 1920 onwards.

1. ORIGINS AND EARLY FORMS. The actual origins of the waltz are somewhat obscure, but it is clear that its evolution as a separate dance form was gradual. The name can be seen to be derived from the German verb *walzen*, which in turn is connected with the Latin verb *volvere* denoting a turning or rotating. French writers, starting with Castil-Blaze, have found an ancestor of the waltz in the 16th-century *volte*, but there seems to be no firm evidence with which to bridge the centuries before the first appearance of the word 'walzen' to describe a form of dancing, around the middle of the 18th century. The earliest known example of music specifically associated with 'walzen' is to be found in the *Stegreifkomödie* (extempore comedy) *Der auf das neue begeisterte und belebte Bernardon* (1754), which contains a song listing various types of dancing then in vogue and associates the verb 'walzen' with the music of ex.1.

The term 'walzen' was only one of several used as descriptions of basically similar dances – mostly in triple time and danced by couples in close embrace – to be found in southern Germany, Bavaria, Austria and Bohemia. Known under the generic name of 'Deutscher' or 'German dances', their particular names indicated either the nature of the dance, as in Dreher, Weller, Spinner or Schleifer, or the geographical origin, as in Steirer (from Styria) or Ländler (from Landl ob der Enns, another name for Upper Austria). The simple, unsophisticated form of these German dances, as opposed to the stateliness of the minuet, helped them to gain popularity and wide social acceptance, and the gliding and whirling associated with the description 'walzen' particularly helped the progress of what was eventually to be known as the waltz. In *Die Leiden des jungen Werther* (1774), Goethe described how, after Lotte had told her cavalier that she would very much like to dance 'à l'Allemande', she and Werther 'soon took to waltzing and circled round each other like the spheres'. But the term is still used as a descriptive verb (rather than specifically as the name of a dance), as was the case in the booklet *Etwas über das Walzen* (1782) by C. von Zangen.



Even with the acceptance of the German dances into the ballroom it was unusual to distinguish the waltz from the generic term 'Deutsche'. A collection of dances published in Vienna in 1786 by the firm of Artaria included 'Walzer' among other forms, but Mozart, who wrote many delightful Deutscher and ländler, never described any of them specifically as 'Walzer'. However, the implicit inclusion of the waltz in what he composed is demonstrated on the one hand by the fraudulent publication under his name of a pamphlet purporting to be 'A method of composing with two dice as many Waltzes and Schleifer as one wishes, without being musical or knowing anything of composition', and on the other hand by the description of some of his dances as waltzes when published abroad. Indeed it seems to have been due as much as anything to the spread of the dance abroad that the name 'waltz' became generally accepted. Four 'favorite waltzes' for 1791 appeared in England in 1790.

In the last decade of the 18th century reports of the popularity of the waltz are easily found. In its March 1792 edition, the *Journal des Luxus und der Moden* reported that in Berlin 'waltzes and nothing but waltzes are now so much in fashion that at dances nothing else is looked at; one need only be able to waltz, and all is well'. In his *Taschenbuch für Freunde und Freundinnen des Tanzes* (1800) J.H. Kattfuss wrote of the extent to which the waltz had replaced the contredanse in popularity,

1. Steps of the waltz: engraving by Hopwood after J.H.A. Randall, from Thomas Wilson's 'A Description of the Correct Method of Waltzing' (London, 1816)

pointing out that the waltz 'has now become such a general favourite and is so fashionable that no one can any longer be reconciled to the English dance without it, for practically all English dances are usually mixed with two turns of the waltz'. In addition he gave a clue to the way in which the waltz was speeding up and beginning to emerge from the body of German dances on musical considerations: 'There is no difference in the steps of the waltz, Dreher or ländler, except that the waltz is danced quickly and the ländler slowly'.

But the increasing popularity of the waltz brought with it objections: on the one hand on medical considerations, because of the speed with which the dancers whirled around the room, and on the other on moral grounds because of the closeness with which the partners held each other. In 1797, in Halle, Salomo Jakob Wolf published a pamphlet entitled *Beweis dass das Walzen eine Hauptquelle der Schwäche des Körpers und des Geistes unserer Generation sey* ('Proof that waltzing is a main source of the weakness of the body and mind of our generation'), and in an account of a journey through parts of Germany, Hungary, Italy and France in 1798 and 1799 Ernst Moritz Arndt wrote of 'the erotic nature' of the waltz as danced in some parts:

> The male dancers grasped the long dresses of their partners so that they would not drag and be trodden upon, and lifted them high, holding them in this cloak which brought both bodies under one cover, as closely as possible against each other, and in this way the whirling continued in the most indecent positions; the supporting hand lay firmly on the breasts, at each movement making little lustful pressures; the girls went wild and looked as if they would drop. When waltzing on the darker side of the room there were bolder embraces and kisses. The custom of the country; it is not as bad as it looks, they exclaim: but now I understand very well why here and there in parts of Swabia and Switzerland the waltz has been prohibited.

In England too there were objections. Burney, in *Rees's Cyclopaedia*, reflected 'how uneasy an English mother would be to see her daughter so familiarly treated, and still more so to witness the obliging manner in which the freedom is returned by the females'. In his poem *The Waltz: an Apostrophic Hymn*, published in 1813 under the pseudonym of Horace Hornem Esq, Byron expressed his initial shock at the waltz and referred to 'hands which may freely range in public sight where ne'er before'. In the book *A Description of the Correct Method of Waltzing* published in 1816 by the English dancing-master Thomas Wilson, the author found it necessary to defend the dance against accusations of being 'an enemy to true morals and as endangering virtue' and he reassured his readers that the waltz 'is generally admitted to be a promoter of vigorous health and productive of an hilarity of spirits' (see fig.1). At any rate the rapidity with which the book reached a second edition is indicative of the dance's popularity.

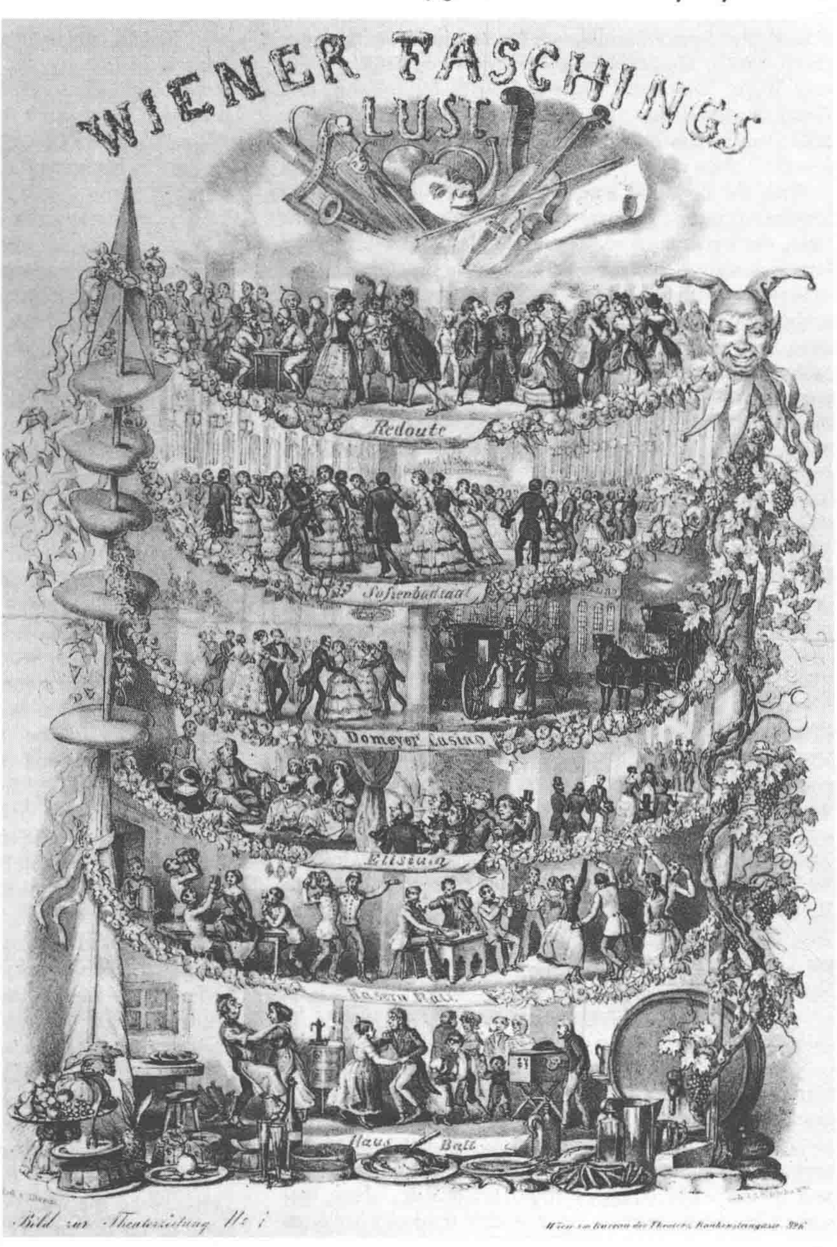
In Vienna, certainly, there was no doubting the popularity of dancing as a pastime, and this was demonstrated by the opening of large dance halls such as the Sperl in 1807 and the Apollosaal (with accommodation for 6000 dancers) in 1808. The Vienna Congress, held against the background of the waltz, produced the famous phrase 'Le Congrès ne marche pas – il danse'. The

demand for dance music was increasing, and the genre was increasingly attracting the attention of more eminent musicians. Hummel was early in the line of piano virtuosos composing waltzes, with a set for the opening of the Apollosaal. Some of Beethoven's *Mödlinger Tänze* (1819) were in waltz form, and he also completed his set of 33 variations on a simple waltz theme by the publisher Anton Diabelli which was the subject of a further 50 variations by as many different composers including Schubert and Liszt.

It is with Schubert that we find a major talent producing pieces specifically described as waltzes, rather than issued under a more general title, although even he might call a piece a ländler on one manuscript, a Deutscher on another and find it published as a Walzer. Some of these waltzes are still in the primitive form of two eight-bar sections, as in the *Erste Walzer* D365, while others run to 16 or even 24 bars, are in ternary form, or even have a proper trio (as in the *Letzte Walzer* D146). There is no attempt at a major development of the waltz form, but the sets are distinguished by typically Schubertian melodies, harmonies and modulations, and make notable use of minor keys. The 'Trauerwalzer', dating from about 1816, achieved a remarkable popularity even before it was published in his D365 waltzes, and provides an interesting indication of the value of associating a waltz with a name.

But by far the most significant event in the light of the waltz's future development was the publication of Weber's piano rondo *Aufforderung zum Tanz* (1819). Not only did he raise the status of the waltz from the dance hall to the concert platform, but he foreshadowed the form which the major dance composers were later to adopt for their waltzes, with the sequence of waltzes bound together with a formal introduction and a coda referring back to themes heard earlier. In the lengthening of the waltz sections, the elegance of its themes and the flow from one waltz to the next, it was at least a decade ahead of its time.

2. Revival and heyday. By the 1820s the waltz had already enjoyed an international currency of several decades. For even the most popular dances this was a fair lifetime, and in France and England at least there appear to have been signs that its popularity was declining. In Vienna, however, the waltz had undoubtedly maintained its popularity, and dance bands flourished. That it was able to enjoy a renaissance and become a dance of unequalled significance was due to the emergence of a younger generation of bandleaders-cum-composers who were able to lift the form of the dance on to a higher plane, and to make the waltz acceptable just as much as a musical composition as in its role as a dance.



The two mainly responsible for this were Joseph Lanner (1801–43) and the elder Johann Strauss (1804–49). Having worked together for some years, in 1825 they split up and set up in friendly rivalry. Prior to their parting, most of Lanner's compositions had been ländler, but from then onwards both men concentrated on the waltz, interspersed with other popular dance forms, such as the galop. In the next few years, as their personal popularity grew, they expanded the waltz form. Strauss's op.1, the *Täuberln-Walzer* (1826), consisted simply of seven separate waltzes, each in turn made up of two eight-bar sections, except for a final lengthened 16-bar section. By the early 1830s the number of waltzes in a set was generally five, the constituent parts becoming increasingly of 16-bar rather than eight-bar length. The increasing fluency of the waltz themes brought with it a further increase in tempo, which eventually settled down at around 70 bars per minute. In addition, after the example of Weber, an introduction and a coda recapitulating the main themes became general. The introductions, at first only a few bars, themselves gradually lengthened and became descriptive, as well as often contrasting in tempo and metre.

The custom of naming the waltz sets was important, adding to their individuality and memorability. At first the name merely indicated the place or occasion for which the sets were composed, as in Strauss's *Täuberln-Walzer* (for the inn Zu den Zwey Tauben) and *Wiener-Carneval-Walzer* op.3, or commemorated some personal event, as in Lanner's *Trennungs-Walzer* (which marked the separation of Lanner and Strauss). Later, composers were forced to use more imaginative titles which were then reflected in the moods of the introductions.

Lanner and Strauss had their own followings, and their styles were contrasting. Lanner relied more on delicacy and melodic appeal, Strauss more on rhythmic variety. But their appeal was also due in no small part to their orchestration, which made an important contribution to the hypnotic effect of the music. During the 1830s they were the rage of Vienna and a big attraction for foreign visitors, particularly musicians. The 21-year-old Chopin noted that 'Lanner, Strauss and their waltzes obscure everything', while the young Wagner was spellbound by Strauss, 'this demon of the Viennese popular spirit'. In 1833 the north German journalist Heinrich Laube wrote of an evening of dancing to Strauss at the Sperl dance hall:

> To hold the unrestrained crowds in check a long rope is taken, and all who remain in the middle are separated from those actually occupied in dancing. But the boundary is flexible and yielding, and only in the steadily whirling girls' heads can one distinguish the stream of dancers. The couples waltz intoxicated through all the accidental or intentional obstructions, wild delight is let loose . . . The start of each dance is characteristic. Strauss begins his quivering preludes . . .; the Viennese takes his girl low on his arm, they ease themselves in the most wonderful way into the beat. One hears a whole while longer the long-held chest notes of the nightingale with which her song begins and ensnares the senses, until suddenly the warbling trill splutters out, the real dance begins with all its raging velocity, and the couple plunge into the whirlpool.

The waltzes of Strauss and Lanner began to achieve popularity abroad, but it was only when Strauss began to tour with his orchestra that the popularity became a craze. Lanner scarcely left Vienna, but Strauss's travels during the 1830s took him first on increasingly extensive tours of Germany in 1834–6 and then on a lengthy tour of France and Britain in 1837–8. Audiences already familiar with his waltzes through local performers were carried away by the rhythmic appeal of his own orchestra, and the waltz became firmly entrenched abroad both in the ballroom and as the centrepiece of popular promenade concerts. Pleasure gardens were opened where such concerts were a prime attraction, for example the 'Vauxhall' at Pavlovsk near St Petersburg in 1838, and the 'Tivoli' at Copenhagen in 1843. As well as dance leader-composers who had already achieved local renown, such as Philippe Musard (1792–1859) in Paris, Joseph Labitzky (1802–81) in Carlsbad and Philipp Fahrbach (1815–85) in Vienna itself, others began to establish themselves during the early 1840s, including Isaac Strauss (1806–88, no relation of the Viennese family) in Vichy,

2. *'Wiener Faschings Lust': lithograph by Albrecht, from the supplement to the 'Wiener Theaterzeitung, Satirische Bilder' (1854) caricaturing, in descending social order, some Viennese dance halls*

Josef Gung'l (1809–89) in Berlin, H.C. Lumbye (1810–74) in Copenhagen and Louis Jullien (1812–60) in London.

In Vienna, after Lanner's death, his place as chief rival to Strauss was taken by Strauss's son, who in due course was to prove not only the outstanding exponent of the waltz but also the most widely popular composer of light music ever. His style perhaps showed a greater similarity to that of Lanner than to that of his father in its concentration on melody rather than rhythmic appeal. The rhythm became implicit rather than explicit, the musical phrases were lengthened, the themes became less symmetrical, and the scoring made more conventional use of instrumental colouring than in the rather brashly scored waltzes of the elder Johann Strauss. Even after the death of the father in 1849, the Strauss name became more synonymous with the waltz with the appearance on the scene of his other two sons, Josef in 1853 and Eduard in 1859.

Like their major rival, Gung'l, the Strausses had to travel widely to maintain their international renown. Gung'l was the first of the major waltz composers to cross the Atlantic, in 1849, and during the 1850s he achieved several big international successes, including *Die Hydropaten* (1858) and *Amorettentänze* (1860). But it was under Johann and Josef Strauss during the 1860s that the waltz achieved its peak of perfection as a combination of dance form and musical composition, and as the symbol of a gay and elegant age. No other waltz composer could consistently match their fund of melody, the flow of the music from introduction through to coda, or the sharply contrasted shapes of their themes. The decade produced a sequence of waltzes which have retained their place in popular esteem: *Accelerationen* (1860), *Morgenblätter*

(1864), *An der schönen blauen Donau* and *Künstlerleben* (both 1867), *Geschichten aus dem Wienerwald* (1868) and *Wein, Weib und Gesang* (1869) by Johann, and *Dorfschwalben aus Österreich* (1864), *Sphärenklänge* (1868) and *Mein Lebenslauf ist Lieb' und Lust* (1869) by Josef.

With the death of Josef Strauss in 1870 and Johann Strauss's progress to operetta composition about the same time, the two major exponents of the waltz form were largely lost to it, and the most successful independent sets of waltzes produced by Johann Strauss in the next decade and a half were either based on themes from his operettas, as in *Tausend und eine Nacht* (1871) and *Rosen aus dem Süden* (1880), or, in the case of *Frühlingsstimmen* (1884), composed as a soprano showpiece. But by 1870 many other exponents of dance music had established or were acquiring their own reputations. Besides Labitzky, Gung'l, Lumbye and Eduard Strauss, there were Kéler-Béla (1820–82) in Wiesbaden, Emile Waldteufel (1837–1915) in Paris, Philipp Fahrbach jr (1843–94) and C.M. Ziehrer (1843–1922) in Vienna and Dan Godfrey (1831–1903) in London. Godfrey's *Mabel Waltz* (1865) was the most celebrated English waltz of the 19th century.

During the 1870s and 80s the string of internationally successful works by Waldteufel were appearing, demonstrating the more easy-going French style of waltz music: *Mon rêve* (1876), *Pluie d'or* (1879), *Les patineurs* (1882), *Estudiantina* (1883) and *España* (after Chabrier, 1886). During the last two decades of the century there appeared a number of waltzes from several different composers which have remained popular: *Valurile Dunării* (*Donauwellen*, 1880) by Iosif Ivanovici (?1845–1902), Ziehrer's *Weana Mad'ln* (1887) and *Wiener Bürger* (1890), Johann Strauss's *Kaiser-Walzer* (1889), *Sobre las olas* ('Over the Waves', 1891) by the Mexican Juventino Rosas (1868–94), *Mondnacht auf dem Alster* by the Hamburg conductor Oscar Fetrás (1854–1931), *Bad'ner Mad'ln* by Karl Komzák (1850–1905) and, after the turn of the century, Lehár's *Gold und Silber* (1902) and *Winterstürme* by Julius Fučík (1872–1916).

Several of these display a further development in the form of the popular waltz, with introductions on a much grander scale and the constituent waltzes reduced to three, each consisting, possibly, of two 32-bar parts. Some are perhaps more successful as concert music than as dances, and in the early years of the 20th century there was something of a reaction against this tendency towards greater pretentiousness. Lehár began to produce waltzes in a slicker form, with a shorter introduction prefacing a single, longer waltz and trio, followed by a coda. This refining process was also apparent in the compositions of English waltz composers, for example *Dreaming* (1911) by Archibald Joyce (1873–1963), *Destiny* (1912) by Sydney Baynes (1879–1938) and *Nights of Gladness* (1912) by Charles Ancliffe (1880–1952).

3. The wider influences. During the 19th century the waltz was making its mark on all forms of music. In the theatre it became, later in the century, an important ingredient of operetta. Examples are to be found in Offenbach's *La belle Hélène* (1864), Lecocq's *La fille de Madame Angot* (1872) and in early Viennese operettas, such as Suppé's *Die schöne Galatea* (1865). But the possibilities of the waltz for operetta were most clearly demonstrated by Arditi's celebrated coloratura showpiece *Il bacio* (1860), by the inclusion of a full-scale waltz for soloists and chorus in the second-act finale of Gounod's *Faust* (1859) and by the waltz song in the same composer's *Roméo et Juliette* (1867). Johann Strauss had himself produced his waltzes *An der schönen blauen Donau* and *Wein, Weib und Gesang* for performance by male chorus, and it was his turning to the composition of operetta that brought about the Viennese operetta as it is familiarly known, with the waltz as its centrepiece.

In the operettas the waltz was most obviously in evidence in ballroom scenes, as in *Die Fledermaus* (1874), but there was altogether a profusion of waltz songs, notably those written for the Viennese operetta star Alexander Girardi (1850–1918) by Strauss in *Der lustige Krieg* (1881), by Carl Millöcker in *Gasparone* (1884) and *Der arme Jonathan* (1890), and by Carl Zeller in *Der Vogelhändler* (1891) and *Der Obersteiger* (1894). Later the waltz in a pronouncedly nostalgic vein was the foundation of such operettas as Heuberger's *Der Opernball* (1899), Lehár's *Die lustige Witwe* (1905) and *Der Graf von Luxemburg* (1909), Straus's *Ein Walzertraum* (1907) and *Der tapfere Soldat* (1908), Fall's *Die Dollarprinzessin* (1907) and Kálmán's *Die Csárdásfürstin* (1915). Outside Vienna the waltz also figured prominently in the operettas of André Messager in Paris, Paul Lincke in Berlin, Lionel Monckton and Paul A. Rubens in London, and Victor Jacobi in Budapest.

In ballet too the waltz featured prominently in the major scores of the 19th century, including Delibes' *Coppélia* (1870) and *Sylvia* (1876), and Tchaikovsky's *Swan Lake* (1877), *Sleeping Beauty* (1890) and *Nutcracker* (1892). In opera, having been introduced for dramatic reasons as a simple rustic dance in Weber's *Der Freischütz* (1823) and Marschner's *Hans Heiling* (1833), it could by 1843 be included by Balfe in *The Bohemian Girl* as an acknowledgment of popular taste. Besides the waltzes in Gounod's operas, familiar examples are to be found in Tchaikovsky's *Yevgeny Onegin* (1877) and Offenbach's *Les contes d'Hoffmann* (1881). Wagner's enthusiasm for Johann Strauss found expression in the waltz of Klingsor's Flower Maidens in *Parsifal* (1882).

Waltzes frequently appear in the operas of such late 19th-century composers as Massenet and Leoncavallo. But the waltz found particularly strong advocates in the two leading opera composers of the period immediately before World War I. Puccini, who was a close friend of Lehár, used the waltz to good effect in Musetta's waltz song in *La bohème* (1896) as well as in the somewhat incongruous surroundings of the Polka Saloon in *La fanciulla del West* (1910) before attempting a sentimental operetta in the style of Lehár which finished up as *La rondine* (1917). Richard Strauss, perhaps wishing to live up to his surname, included a long waltz scene in his early *Feuersnot* (1901) and a waltz section in the Dance of the Seven Veils in *Salome* (1905) before indulging in it somewhat anachronistically for the Vienna of Maria Theresa in *Der Rosenkavalier* (1911) and more appropriately for the Vienna of 1860 in *Arabella* (1933). Baron Ochs's favourite waltz in *Der Rosenkavalier* is an interesting variant of Josef Strauss's waltz *Geheime Anziehungskräfte (Dynamiden)* of 1865 (ex.2).

Orchestral and instrumental waltzes are to be found in the output of almost all the major composers of the 19th and early 20th centuries. Almost as significant as the composition of Weber's *Aufforderung zum Tanz* was the use of the waltz – again for programmatic reasons – by

Berlioz in his *Symphonie fantastique* (1830). By that time too Chopin had followed the lead of Weber in beginning his series of piano waltzes in many different styles, ranging from virtuoso brilliance to a mood of melancholy, and displaying the greater freedom of rhythm that most noticeably differentiated the concert waltz from the dance. Liszt, too, exploited the waltz craze, not only in his transcriptions of music by other composers, as in the *Soirées de Vienne* (1852) after Schubert and his transcription of the waltz from Gounod's *Faust* (1861), but also in such works as the four *Mephisto Waltzes* (1860, 1881–5) and the *Valses oubliées* (1881–5).

Among the Viennese symphonists of the late 19th century, Bruckner and Mahler were more inclined to resort to the rustic ländler than to the waltz, though Mahler introduced a grotesque version of the waltz into his Fifth Symphony. Brahms, a close friend of Johann Strauss, wrote his own set of waltzes for piano duet, op.39 (1865), and later the two sets of *Liebeslieder Walzer* (1869 and 1874). The Russians showed a particular predilection for the waltz. Glinka's *Valse-fantaisie* (1839–56) was first performed at the Pavlovsk Vauxhall in 1840, and waltzes of special distinction are to be found throughout Tchaikovsky's output, not only in his ballets and operas but also, for example, in *The Seasons* (1876), the Serenade for Strings (1880) and the Fifth Symphony (1888). Glazunov too composed several waltzes, of which the two orchestral Concert Waltzes are particularly noteworthy.

In France Saint-Saëns showed a special fondness for the waltz in compositions such as the *Wedding Cake* caprice-valse for piano and strings (1886), and like Liszt completed an essay in the macabre with his *Danse macabre* (1874). A further example in similar vein is the *Valse triste* of Sibelius in the incidental music to the play *Kuolema* (1903). But the composer who effectively summed up the whole era of the waltz was Ravel, whose *Valses nobles et sentimentales* (1911) look back unashamedly over a period of 90 years to the waltzes of Schubert, and whose choreographic poem *La valse* (1918) similarly looks back to an imperial ball of 1855 and magnificently captures the sweep of the waltzes of that period, while remaining notable for the typically brilliant orchestration of its composer.

4. 1920 ONWARDS. By destroying the Austro-Hungarian monarchy, World War I also destroyed the community in which the waltz had held sway. Those of the popular pre-war practitioners who were still active in the 1920s were forced to adjust to new dance styles coming from the USA and to the switch of the centre of European light music from Vienna to Berlin. In more serious music, Ravel's waltz compositions had reflected the waltz as a thing of the past, and the dance had been treated in a grotesque manner not only by Mahler but also by Stravinsky in *Petrushka* (1911, where Lanner's *Die Schönbrunner* is quoted) and by Walton in *Façade* (1923).

Nevertheless, the waltz retained sufficient hold on popular sentiment for it to continue to attract the attention of composers of light music, whether in orchestral examples such as by Eric Coates, in unashamedly sentimental songs by Robert Stolz (1880–1975), in the musicals of Ivor Novello (1893–1951), or for dramatic reasons in musical scores such as Richard Rodgers's *Carousel* (1945) and Cole Porter's *Kiss Me, Kate* (1948) or Oscar Straus's for the film *La ronde* (1950). Stephen Sondheim's *A Little Night Music* (1973) is composed entirely in 3/4 time or derivatives thereof. Among more serious composers the waltz was noticeably embraced by Soviet musicians, as for example Khachaturian in his music for *Masquerade* (1939), Prokofiev in his Suite of Waltzes op.110 (1947) and Shostakovich in his light music, though other examples are to be found elsewhere, as in Britten's Variations on a Theme of Frank Bridge (1937).

In current ballroom dancing the waltz is known chiefly through the slow waltz, which became internationally popular from about 1910, having derived from the 'Valse Boston', which came from the USA during the 1870s. Most examples have been adapted for dancing from popular song hits, from *Ramona* (1927) and *Parlami d'amore, Mariù* (1933) to *The Last Waltz* (1970)

Though the development of the waltz can thus be traced from the German dance of the 1750s to the popular music of the recent past, it is chiefly for its influence during the 19th century that the waltz is remembered. In particular, the Viennese waltz compositions of the second half of the 19th century, especially when played with the slight anticipation of the second beat and the subtle use of rubato which are characteristics of the traditional Viennese performance, remain a popular feature of concerts, and more than any other form of purely light music are a regular part of the repertory not only of salon orchestras but also of all major symphony orchestras.

ANDREW LAMB

Waltz, Gustavus (*fl* 1732–59). English bass of German birth. His first known appearances were in Arne's English opera season at the Little Theatre in the Haymarket in spring 1732, when he sang in Lampe's *Amelia* and a pirated production of Handel's *Acis and Galatea* (Polyphemus). The following season (1732–3) he sang in Lampe's *Britannia*, J.C. Smith's *Ulysses* and Arne's *Opera of Operas* at Lincoln's Inn Fields. On 17 March 1733 he took a small part, probably the Chief Priest of Baal, in the first performance of Handel's *Deborah* at the King's Theatre. He accompanied Handel to Oxford in July, singing in the first performances of *Athalia* (Abner), the bilingual *Acis and Galatea* (Polyphemus), probably *Esther* (Haman) and *Deborah* (Abinoam and Priest of Baal), and in anthems at St Mary's church. He then joined Handel's opera company, first at the King's Theatre, later at Covent Garden, until the summer of 1736. He was to have made his Italian début in the pasticcio *Semiramide riconosciuta* on 30 October, but was apparently replaced. He took part in the revivals of *Ottone* (Emireno), *Sosarme* (Altomaro) and *Il pastor fido* (Tirenio), the pasticcios *Caio Fabricio* and *Oreste*, and the first performances of *Arianna in Creta* (Minos), *Il Parnasso in festa* (Mars), *Ariodante* (King of Scotland), *Alcina* (Melisso) and *Atalanta* (Nicander). At his benefit at Hickford's Room on 21 February 1735 he advertised himself as 'Singer in Mr Handel's Operas'. He also repeated his Oxford parts in oratorios, including the first London performances of *Athalia*, and continued to sing in English theatre pieces, among them Lampe's *Opera of Operas* and *Cupid and Psyche*, *The Tempest* and Arne's *Britannia* in 1733–4, and Arne's *Grand Epithalamium* in April 1736, all at Drury Lane. He had another benefit at Hickford's on 7 April 1737.

Waltz rejoined Handel for the oratorio season of 1738–9, singing the title role in the first performance of *Saul* on 16 January, in the première of *Israel in Egypt* on 4 April, and probably in *Jupiter in Argos* on 1 May. He had meanwhile appeared in Pescetti's *Angelica e Medoro* at Covent Garden on 10 March. His later career was associated with English theatre pieces of the lighter type, chiefly by Lampe and Arne, though he sang occasionally at concerts and in December 1739 in a composite Purcell masque at Covent Garden. He was employed at that theatre in 1739–42 and again in 1749–51, at Drury Lane and the Little Theatre in the Haymarket in 1743–5, and in May and June 1744 at Ruckholt House, Essex, where he sang in Boyce's *Solomon* and Handel's *Alexander's Feast*. He had a benefit at the Little Theatre in the Haymarket on 19 December 1748. Handel cast him as Charon in the unperformed incidental music to *Alceste* in January 1750. He was the teacher of Isabella Young (ii) (later Mrs Scott) and gave a concert with her at the Little Theatre in the Haymarket on 18 March 1751. He was a choral bass at the Foundling Hospital performances of *Messiah* on 15 May 1754, 27 April 1758 and 3 May 1759, on each occasion receiving the minimum fee of 10s. 6d. He may have sung in the chorus of Handel's Covent Garden oratorios at this period.

Gustavus Waltz: mezzotint by Johann Sebastian Müller after John Maurice Hauck

Waltz is generally recalled for the wrong reasons. Burney and Hawkins both said he was at one time Handel's cook, which is possible but unverifiable. He may well have known as much counterpoint as Gluck in 1745: there is a ring of truth about this reported *mot* of Handel's. But Burney's notorious aspersions on Waltz – 'a German, with a coarse figure, and a still coarser voice', 'Waltz had but little voice, and his manner was coarse and unpleasant' – almost certainly do him an injustice. Burney did not hear him until his later years, when he admitted that 'as an actor, [Waltz] had a great deal of humour'. Although he was never in the class of Montagnana, whom he replaced in 1733, some of Handel's parts for Waltz, notably the King in *Ariodante* and Saul, suggest that he commanded not only dramatic power but majesty and pathos, with a good legato and a compass of nearly two octaves (*G* to *f*♯′). A portrait by Hauck, engraved by Müller, shows Waltz playing the cello with refreshments at his elbow (see illustration).

WINTON DEAN

Wamsley [Walmsley, Warmsley], **Peter** (*fl* London, *c*1725–45). English maker of violins, violas and cellos. Although the foremost English maker of his time, following Daniel Parker and Nathaniel Cross, his reputation suffered with

the publication of Sandys and Forster's *The History of the Violin*, in which his instruments were criticized for having had the wood worked too thin. The repetition of this allegation has tended to obscure his considerable merits as a maker.

Wamsley was evidently a pupil of Cross, and inherited from him a respect for the work of Stainer and for a pleasing pale golden varnish of rather brittle consistency. Later he developed a much softer dark brown oil varnish, quite satisfactory from the tonal viewpoint and similar in all but colour to that used by the Forsters in the second half of the century. In his woodwork he was one of the makers who exaggerated Stainer's archings by hollowing out too much towards the edge, but in thus leaving his edges thin in wood he was doing no worse than near-contemporaries such as Rombouts in the Netherlands, most of the Florentines and literally dozens of fine German and Austrian makers. In the relatively few instances where his instruments have not been treated harshly by the passage of time, they are both handsome in appearance and of fine quality tonally. His numerous cellos are the forerunners of an English school of making which is often regarded by players as second only to the best of the Italians. He made quite a number of violins, and also a few violas of good size.

Wamsley's shop, at the sign of the Harp and Hautboy in Piccadilly, was taken over by his pupil, Thomas Smith. Another pupil was Joseph Hill, perhaps the most successful London maker of his time, and the first of the Hill dynasty of violin makers and experts.

CHARLES BEARE/JOHN DILWORTH

Wanczura, Arnošt [Ernest]. *See* VANČURA, ARNOŠT.

Wand, Günter (*b* Elberfeld, 7 Jan 1912). German conductor. After early music lessons in Wuppertal and at Cologne University, he studied at the Cologne Conservatory and Staatliche Hochschule für Musik under Philipp Jarnach (composition) and Paul Baumgartner (piano); as a conductor he was largely self-taught, although he did receive some instruction from Franz von Hoesslin at the Munich Akademie der Tonkunst. He was first appointed to Wuppertal and Allenstein as répétiteur and conductor, and later became chief conductor in Detmold. In 1939 he was appointed conductor (later first conductor) at the Cologne Opera until its destruction in 1944, when he became conductor of the Salzburg Mozarteum Orchestra until April 1945. After the war he was musical director of the Cologne Opera (1945–8), and in 1946 he was appointed Generalmusikdirecktor at Cologne, making him responsible for both the orchestra and the opera company. He was also conductor of the Gürzenich Orchestra (1947–74), and taught conducting at the Hochschule für Musik, Cologne, where he became professor in 1948. Wand began touring widely as a guest conductor in Europe, the USSR and Japan, and made his British début with the LSO in February 1951, in a Beethoven concert at Covent Garden. His work nevertheless remained centred on Cologne, where he tried to maintain a traditional style of German musical life while also extending his repertory to foster contemporary music, notably works of Ligeti, Varèse and Zimmermann.

In 1974 Wand resigned his Cologne appointment and moved to Switzerland, but then commenced work with the major German radio orchestras. In 1977 he began to record the complete symphonies of Schubert and Bruckner with the Cologne RSO and in 1982 he became chief conductor of the NDR SO in Hamburg. During the 1980s he was also chief guest conductor of the BBC SO. His excitingly direct recordings of the Brahms and Beethoven symphony cycles, released in 1989, and his American début with the Chicago SO in January of the same year generated ecstatic reviews and an instant international following. His performances are eloquent, committed and extremely well rehearsed; for his Chicago début he demanded and got 11 hours of rehearsal for Schubert's 'Unfinished' Symphony and Brahms's Symphony no.1. Revered as one of the last exponents of a vanishing tradition, he has latterly conducted a limited number of orchestras in Germany (especially Berlin) and London and made live recordings of his core repertory. His compositions include *Odi et amo* for soprano and chamber orchestra, music for ballet and songs with orchestra. (F. Berger: *Günter Wand: Gürzenichkapellmeister 1947–74*, Cologne, 1974)

HANSPETER KRELLMANN/JOSÉ BOWEN

Wangenheim, Volker (*b* Berlin, 1 July 1928). German conductor and composer. At the West Berlin Hochschule für Musik (1946–51) he studied conducting with Felix Lederer and Erich Peter, composition with Hermann Grabner, keyboard with Richard Rössler, and the oboe with Fritz Flemming. During his appointment as principal conductor of the Berlin Mozart Orchestra (1950–59), he was also conductor at the Staatstheater, Schwerin (1951–2), and conductor of the Berlin Academy Orchestra (1954–7), of which he became music director in 1957. In 1963 he was appointed Generalmusikdirektor for the city of Bonn. From 1969 to 1984 he was also artistic director of the German National Youth Orchestra and from 1972 to 1993 a professor of conducting at the Hochschule für Musik, Cologne. A frequent guest conductor of the Bournemouth SO and the Bournemouth Sinfonietta from 1970, he was principal conductor of the latter from 1977 to 1980. Wangenheim has also appeared as a guest conductor in most European countries, in North and South America and in Asia. He takes a special interest in contemporary music and has conducted the first performances of works by Erbse, Huber and Kelemen among others. A member of numerous juries, such as that of the Bonn Beethoven Prize, and from 1972 a member of the German Music Council, he was awarded the city of Berlin Artists' Prize (1954) and the Grosse Verdienstkreuz der Bundesrepublik Deutschland (1972). His works, which include a setting of the *Stabat mater* (1965), *Hymnus choralis* for voices and orchestra (1966), an unaccompanied Mass (1968) and *Nicodemus Jesum nocte visitat* for voices and orchestra (1968–74), are mainly symphonic and choral, written in a freely tonal style; from 1973 he included aleatory and improvisatory elements in graphic notation.

RUDOLF LÜCK

Wangermée, Robert (*b* Lodelinsart, 21 Sept 1920). Belgian musicologist. He studied music with Jean Absil and in 1946 took the doctorate at the Free University of Brussels with a dissertation on musical taste in 19th-century France. He was then successively lecturer (1948–65) and professor (1965–85) at the university, where he set up a centre for the sociology of music in 1965 and was its director until 1975. At the same time he pursued a brilliant career with Belgian radio and television, which he joined in 1946, later becoming director of music (1953) and director-general of French-language broadcasting (1960–84). He was also elected president of the Conseil de la Musique de la Communauté Française in 1980, of the Conseil Supérieur de l'Audiovisuel in 1984 and of the Conseil de l'Education aux Médias in 1994. Wangermée's main area of research is Belgian music from the Middle Ages to the 20th century. In his many writings on this subject he has studied the music in both its social and cultural context. He has also written on piano virtuosity, improvisation, opera and surrealism in music. In addition to his contributions to the field of musicology, he has published many works that discuss general aspects of radio, television and culture.

GODELIEVE SPIESSENS/SYLVIE JANSSENS

Wang Guangqi [Kuang-chi Wang] (*b* Wenjiang, Sichuan province, 5 Oct 1892; *d* Bonn, 12 Jan 1936). Chinese musicologist. Having been involved in various social movements in Sichuan from an early age, he studied law at Zhongguo University in Beijing (1914–18). In 1918 he established the Young China Association (Shaonian Zhongguo xuehui), an influential organization devoted to social reform. He was an influential essayist and journalist in the May Fourth Movement of 1919, and initiated a short-lived utopian movement called Work-Study Mutual Aid Group (Gongdu huzhu tuan), propagating a new style of urban life. Disappointed by the failure of the movement, he went to Germany in 1920 as a journalist to seek new knowledge of social reform. However, he soon became attracted to music, and by 1923 he was writing on the subject. In 1927 he entered Berlin University, studying with Ludwig Schiedermair, Erich Hornbostel, I. Schmitt and Curt Sachs. In 1934 he received his PhD in musicology from the Frederick William University, Bonn. In his numerous writings in the 1920s and 30s for both Chinese and Western readers he was the first scholar systematically to introduce European music to China and Chinese music to Europe. His profound knowledge of traditional Chinese music and his Western training in comparative musicology established him as the founder of comparative musicology in China.

SU ZHENG

Wang Lisan (*b* Wuhan, Hubei, 24 March 1933). Chinese composer. From 1948 he studied the piano at the Art Institute in Wuhan, becoming a student of composition at the Shanghai Conservatory with Ding Shande, Sang Tong and Arzamanov in 1951. Wang was one of the group of audacious composers who provoked a sharp political response in the 1950s by experimenting with broken or suspended tonality along the lines of Debussy, or even with dissonant harmonies approaching the language of Bartók. Though this newly-explored harmonic territory seemed to complement well the floating nature of Chinese pentatonicism, Western 20th-century music was viewed with suspicion by the communist authorities. In 1957, shortly after completing his playful, transparent *Sonatina*, Wang was branded a rightist, and

in 1959 he was exiled to China's far north to work on farms. In 1963 he became a teacher of composition at Harbin Normal University, where he resumed his career as a composer after the Cultural Revolution (1966–76). Wang is primarily known as the writer of a small but distinctive number of piano works, in which he freely blends Chinese pentatonicism with mild dissonance and serial techniques, and takes his inspiration from traditional paintings and literature.

Wanless, Thomas (*d* York, bur. 2 Feb 1712). English organist and composer. Many musicians with the name Wanless (or Wanlesse, Wanlass, Wanlasse, Wandles, Wansley etc.) are to be found in the cathedral records of Durham, Lincoln, Ripon and York during the 17th century, with Henry, John and Thomas the most common Christian names. Shaw suspected they originated from Durham. The only one with any reputation as a composer was Thomas Wanless, organist of York from 1691 to 1712 and Master of the Choristers from 1692 to 1698. His father was probably John Wanless, organist of Lincoln before and after the Civil War; Thomas was admitted as one of the Burghersh chanters on 2 April 1677. He married Mary Harrison of Holtby on 10 February 1698.

Later that year he took the Cambridge MusB, with the verse anthem *Awake up my glory* as his exercise (*GB-Lbl* Harl.7341). It is a rather empty, though competent, piece. A total of 18 anthems by him are known, 14 of which are lost. His litany was no doubt in use at York Minster (*Y* M. 8. S, with copies elsewhere); likewise a simple, homophonic burial service (*Lbl* Add.17820). In 1702 he published *The Metre Psalm-Tunes*, intended for use in the parish church of St Michael-le-Belfrey, York. It is unusual for the time in that the tunes are in the treble rather than the tenor. He also published two editions of a wordbook of *Full Anthems and Verse Anthems as they are ... sung in the Cathedral and Metropolitical Church of St Peter's in York* (York, 1703, 2/1705).

Wannenmacher [Vannius], **Johannes** (*b* ?Neuenburg am Rhein, *c*1485; *d* Berne, spr. 1551). Swiss choirmaster and composer. In 1510 he arrived in Berne completely destitute, and obtained the position of choirmaster at Berne Minster, but gave it up in 1513 because of disagreements with the cathedral chapter. In autumn of the same year the council of the town of Fribourg appointed him choirmaster of St Nicolas and in 1515 to a similar position in the new collegiate foundation there. In the following years he joined the Fribourg humanist movement, together with Hans Kotter, organist of St Nicolas, and found like-minded friends in Zwingli and Glarean. At the movement's peak Wannenmacher was removed from office by its opponents, arrested and put on trial. At the urgent request of the council of Berne he was released and exiled. On 17 March 1531 Wannenmacher went to Interlaken where he was a magistrate's clerk until his death.

Wannenmacher was among the most important Swiss composers of the Reformation. His compositions are found in the collections of songs of Apiarius, Schoeffer and Ott, as well as Glarean's treatises. In his 26 extant compositions all the vocal genres of the age may be found, both religious (motet, psalm and hymn as well as settings of the Ordinary and the Proper) and secular. Two stylistic techniques can be recognized in the religious works: cantus-firmus technique, in which three to five parts join an existing or freely composed melody (usually in the tenor) and unite in imitative passages; and the contrast of groups of parts, a technique arising from the antiphonal delivery of the psalms which Wannenmacher had taken over from Josquin. In the songs Wannenmacher combined the two techniques.

HANS JOACHIM MARX

Wanning [Waningus Campensis, Wannigk, Wannicke, Wangnick], **Johannes** (*b* Kampen, Netherlands, 1537; *d* Danzig [now Gdańsk], bur. 23 Oct 1603). German composer of Netherlandish birth. From 1560 he studied at Königsberg; until 1567 he also sang alto in the ducal Kapelle and wrote music for it from 1564. From 1569 to 1599 he was Kapellmeister at the Marienkirche, Danzig. He was the first Protestant composer to write cycles of *de tempore* motets for the whole church year. His Latin *Sententiae insigniores* was the immediate precursor of, and probably also the model for, the many collections of settings of German Gospel texts for the church year that appeared in the late 16th and early 17th centuries. His compositions are technically assured and the settings of texts in dialogue form are vital and well constructed.

WALTER BLANKENBURG/CLYTUS GOTTWALD

Wański. Polish family of musicians.

(1) **Jan Wański** (*b* Wielkopolska, ?1760–62; *d* ?1830). Violinist and composer. He was professionally active for 30 years, first in Poznań and later in other places in Wielkopolska, such as Sarnowa (near Rawicz), Święciechowa, Wschowa and Gostyń. His works, based on elementary forms and in a Classical style, were enriched by elements of Polish folk music, which are present even in his Latin masses.

WORKS

Ops: Pasterz nad Wisłą [The Shepherd on the Vistula], *c*1786, lost; Kmiotek [The Peasant], 1786–7, Radomicko, nr Poznań, collab. J. Wybicki, lib pubd (Poznań, 1788), music lost; Powstanie [Insurrection], *c*1820, lost
Sacred: Requiem, D♯, 1788, *PL-GNd*; Missa pastoralis, C, *c*1800, *Pa*; Missa solemnis, F, *c*1817, *Pa*; Salve regina, 1821, *CZ*; Vespers, G, before 1830, *Pa*; 2 masses, D, *Pa*; 2 Vespers, D, *GNd*; Regina caeli, D, *Pa*; 2 Salve regina, *Pa*; Litaniae Laurentanae, 2 Veni creator, other masses, vespers: all lost

F, vii (New York, 1982) [based on ovs. to his ops]; D, 1790, *GNd*, ed. in *Muzyka staropolska* (Kraków, 1966)
Other works (all lost): songs; vn duets; polonaises, mazurkas, marches, pf

(2) **Roch Wański** (*b* Wielkopolska, *c*1780; *d* 1810). Cellist, son of (1) Jan Wański. A valued chamber music player, he was a member of the string quartet maintained by Count Feliks Polanowski at Moszków (near Lwów). Through his influence, from 1800 to 1808 his nephew Karol Kurpiński was employed as a second violinist at the court.

(3) **Jan Nepomucen** [Jean Nepomucene] **Wański** (*b* Wielkopolska, 1782; *d* Aix-en-Provence, 1840). Violinist and composer, son of (1) Jan Wański. He studied in Kalisz and in Warsaw. After the November Uprising of 1830–31 he emigrated to Paris and there continued his studies with F. Baillot. He performed in Warsaw (1834–5) and Florence (1836) and in other cities in Italy, Spain and Switzerland. In 1838 he was elected a member of the Accademia di S Cecilia in Rome, and in 1839 settled at Aix-en-Provence. He composed violin works and published a number of instrumental tutors: *Méthode de violon*, *Méthode complète d'alto* and *Gymnastique des doigts et de l'archet* (all n.p., n.d.); he also wrote the textbook *L'harmonie ou la science des accords* (n.p., n.d.). His daughter, Anna, was a concert pianist and piano teacher.

ALINA NOWAK-ROMANOWICZ/BARBARA CHMARA-ŻACZKIEWICZ

Wanskura [Wansura], **Arnošt** [Ernest]. *See* VANČURA, ARNOŠT.

Wan Tongshu (*b* ?Shanghai, ?1925–30). Chinese musicologist of Uighur music. A close colleague of the Uighur musician TURDI AXON, though of Han Chinese ethnicity, Wan Tongshu devoted his life to the Uighur *muqam*. As a young graduate of the Shanghai Conservatory, Wan was sent to distant Xinjiang in the months immediately following the Communist revolution of 1949 to lead a collection project in response to the recently decreed 'policy of safeguarding the minority arts'. From 1950 to 1955 Wan recorded versions of the 12 *muqam* as performed by Turdi Axon, who had won a competition for the greatest exponents of the genre, and six others. From 1954 to 1959, in a major project commissioned by the Bureau of Culture of the Autonomous Province of Xinjiang, Wan led a team transcribing dozens of hours of recordings. Published in 1960, the work consists of 577 pages of musical transcription, with an important bilingual introduction in Chinese and Uighur. In 1964 a Uighur edition of annotated texts was prepared by Wan

and his team, but due to the outbreak of the Cultural Revolution it was never published.

Since the end of the Cultural Revolution Wan Tongshu has written several articles which pursue the themes of the introduction to the book, as well as a book on Uighur instruments based on his fieldwork in the 1950s. Today, in discreet retirement from the Urumqi Bureau of Culture, he is a delightful character who is forthcoming with an interlocutor whom he trusts.

SABINE TREBINJAC

Wanžura, Česlav. *See* VAŇURA, ČESLAV.

Ward, Clara (*b* Philadelphia, 21 April 1924; *d* Los Angeles, 16 Jan 1973). American gospel singer and pianist. She began to play piano at the age of six, and by 1934 was accompanist for the Ward Trio, a family group that included her mother Gertrude (1895–1981) and her sister Willa (*b* 1922). The trio came to prominence in 1943 when they sang before the National Baptist Convention and undertook tours throughout the East and South. By 1947, having expanded to include Henrietta Waddy (c1907–84) and Marion Williams, they became known as the Ward Singers, and in 1949 began a 15-year association with the composer W. Herbert Brewster; the success of their recording of his *Surely, God is able* (1949) made them one of the most popular female gospel groups. With her dark and powerful contralto voice, Ward was highly regarded for her ability to express drama in slow gospel ballads and nonmetrical hymns, such as Thomas A. Dorsey's *When I've done the best I can* (1955). In later years she adopted the growling techniques and shrieks associated with the 'hard' gospel style, for example on *Packing Up* (1957). In 1961 she began performing in clubs and theatres and lost much of her following in the gospel community, although she made occasional appearances at gospel extravaganzas. There followed several successful tours of England, France, Germany and Australia, as well as appearances in the USA at Walt Disney World, at jazz festivals and on television. Through her musical arrangements and stage personality, she was one of the first commercially successful gospel singers.

HORACE CLARENCE BOYER

Ward, David (*b* Dumbarton, 3 July 1922; *d* Dunedin, NZ, 16 July 1983). Scottish bass. He studied at the RCM and later in Munich with Hans Hotter. In 1952 he joined the chorus of Sadler's Wells Opera and in 1953 sang the Old Bard in *The Immortal Hour* and Count Walter in *Luisa Miller*. He created Hardy (*Nelson*) the following year and from then until 1958 sang a variety of roles with the company including Méphistophélès, Daland and the Dutchman. In 1960 he made his Covent Garden début as Pogner, sang Lord Walton (*I puritani*) at Glyndebourne and made his Bayreuth début as Titurel. At Covent Garden he sang Morosus in the English première of *Die schweigsame Frau* (1961), the Wanderer (1962), Wotan in a complete *Ring* cycle (1964), and other roles including Arkel, Pope Clement (*Benvenuto Cellini*), Ivan Khovansky, Rocco and Don Basilio. No less distinguished in Verdi, he sang Zaccaria, Philip II and Fiesco. His Boris with Scottish Opera was highly praised. He sang in Italy, Germany and the USA, and in 1967 sang Wotan in six complete *Ring* cycles in Buenos Aires. To a voice of beautiful quality and range he added a sensitivity and dignity which made his Wotan and King Mark profoundly moving. He was made a CBE in 1972.

HAROLD ROSENTHAL/ALAN BLYTH

Ward, John (*b* c1589; *d* before 31 Aug 1638). English composer. There are two theories regarding his biography. One holds that the composer lived from 1571 to 1617 and was a minor canon at Canterbury Cathedral. A Canterbury birth and family is suggested by the composer's pedigree, presented at the heralds' visitation of Essex in 1634. This document does not confirm any connection with the cathedral there, however, and his identification with the minor canon is dependent on the death date of 1617, which is challenged by the fact that the composer, whose musical handwriting is preserved (in *GB-Och* 61–6), was still signing Exchequer documents in 1638. He may be the son of the minor canon or alternatively of the John Ward senior who was a lifelong retainer of Elizabeth Smyth of Ashford and Westhanger, Kent, wife (from 1594) of Sir Henry Fanshawe, Remembrancer of the Exchequer in London and a great patron of the arts.

Ward was a cathedral chorister (1597–1604) and King's Scholar (1604–7) of the grammar school at Canterbury. Soon after leaving school he joined the flourishing musical establishment in the household of Sir Henry Fanshawe. Sir Henry died in 1616, and support for the musical establishment sharply declined under his son, Sir Thomas. Sometime between 1616 and 1621/2 Ward took a modest post as an attorney (i.e. a subordinate substitute) under Sir Thomas, who had taken over from his father as Remembrancer. Ward still occupied his post at Warwick Lane, near St Paul's Cathedral, in May 1638. It is likely that he continued his connection with the Fanshawes for many years, and that his new base in London encouraged the composition of consort music. By the time he made his will, on 1 April 1636, he was living in Ilford Magna, Essex, and held property. Various contemporary references describe him as a 'Gentleman'. By his marriage to Thomasina Clee there were three children, but there is no evidence that his son John was also a composer, as some commentators have suggested. His wife outlived him and proved his will on 31 August 1638.

Ward's surviving compositions consist of madrigals in both printed and manuscript sources, sacred music with and without viol accompaniment and much music for viols. His volume of madrigals (1613) was dedicated to Sir Henry Fanshawe. Ward's gratitude to his patron was expressed in the dedication where he referred to his madrigals as the 'primitiae' of his muse, 'planted in your pleasure, and cherisht by the gentle calme of your Favour; what I may produce hereafter is wholy Yours'. Ward set

texts of high poetic quality including poems by Sidney and Drayton. Nevertheless, he was sometimes insensitive in his selection of texts, especially where he carelessly lifted a few lines of verse out of their context, as in *A satyr once did run away*, where four lines are wrested from a sonnet by Sidney. Ward's approach to his madrigals was serious, and even those in three and four parts lack the lighthearted mood found in similar works by many of his contemporaries. He always sought to portray the text in the true Italian madrigal tradition, at times creating word-painting of the most obvious and naive kind; sometimes, however, it makes his music profoundly expressive, as in *Come, sable night* and *If the deep sighs*.

The large number of 17th-century sources for Ward's compositions for viols proves that they were widely known in his lifetime. The music ranges from short ayres for two viols to extended six-part fantasias. Assured, though at times mechanical, his technique in the viol music reveals a strong sense of instrumental idiom and a definite awareness of the dramatic value of tonal and stylistic contrast between the individual sections of many of his fantasias. Here, as in his madrigals, Ward was at his best when writing in five and six parts. It is difficult to date much of the music for viol consort, but its greater stylistic maturity suggests that it was written later than his vocal music. The five-part consorts appear on grounds of style to postdate the six-part, which have much more in common with his madrigals. Most of the five-part works were composed before 1619, when Francis Tregian, the copyist of one of their sources (*GB-Lbl* Egerton 3665) died.

Apart from the two unaccompanied pieces in Leighton's *Teares or Lamentaciones* (RISM 1614[7]), Ward's sacred works are long, but structurally well integrated by a subtle use of thematic cross-reference. Four anthems and an evening service were published in the 17th century. The First Service and the verse anthem for two basses *Let God arise* are of outstanding quality. The madrigalian ethos persists throughout his sacred music, and his main means of expression of the more poignant moments in his texts was an unusual and (for his time) progressive use of dissonance. The many secular sources in which his sacred music survives – in particular Thomas Myriell's *Tristitiae remedium* (*GB-Lbl* Add.29372–7, 1616) and Will Forster's Virginal Book (*Gb-Lbl* R.M.24.d.3, 1624) – suggest that many works were written for domestic use. (Ward's pieces in the latter source are not music for solo keyboard but accompaniments to his three-part anthems.) Some pieces are occasional: *No object dearer* was composed after the death of Prince Henry in 1612 (as was the madrigal *Weep forth your tears*). *This is a joyful day* marked the creation of either Henry (1610) or Charles (1616) as Prince of Wales, and *If Heav'n's just wrath* the death of Sir Henry Fanshawe in the same year. Two further works (in *GB-Och* 61–6) may be attributed to Ward on grounds of handwriting and style: *Mount up, my soul*, for five voices and viols, and (less confidently) the unaccompanied six-part motet, *Vota persolvam*.

Certain stylistic traits are evident in all of Ward's compositions. His use of dissonance was most distinctive and often magical in effect: the devices he used were always the logical result of the combination of strong and individual melodic lines. Outside the five-part consorts there are no instances of extreme chromaticism, and the few milder examples that occur in his vocal music coincide with suggestions of pain or anguish in the text. Certain overworked formulae (two parts moving in parallel 3rds or 6ths, for example), sequences which are often mechanical and, above all, his somewhat limited rhythmic invention detract from the quality of many of Ward's compositions which might otherwise vie in their excellence with those of Byrd, Gibbons and Tomkins.

MICHAEL W. FOSTER/IAN PAYNE (with ROGER BOWERS)

Ward, John M(ilton) (*b* Oakland, CA, 6 July 1917). American musicologist. He studied with Gombosi at the University of Washington (MM 1942), with Herzog at Columbia University (1945–6) and with Sachs and Reese at New York University (PhD 1953, with a dissertation on the *vihuela de mano*). From 1947 to 1953 he was an instructor at Michigan State University and from 1953 to 1955 an assistant and then an associate professor at the University of Illinois. In 1955 he joined the faculty of Harvard University, where he was William Powell Mason Professor of Music from 1961 to 1985. His special interests are in 16th-century instrumental music, especially that of Spain and England, Elizabethan music in general, and English popular and folk music from the 16th century to the present day. He has published the results of his research in a series of painstaking articles that are models of careful bibliographical technique, but his greatest impact on American musicology has been his influence on several generations of Harvard students, to whom he has taught sound musicological method, a healthy respect for accuracy, the importance of constructing well-reasoned arguments and the ideal of complete bibliographical control. He is the general editor of the Pantomime, Ballet and Social Dance group of the series Music for London Entertainment (London, 1990–).

HOWARD MAYER BROWN/PAULA MORGAN

Ward, John Owen (*b* Sydenham, 20 Sept 1919). English editor. He was educated at Dulwich College (1933–7) and at St Edmund Hall, Oxford. He was active as an antiquarian music dealer both before and after the war (1938–9, 1946–8) and in 1949 he became assistant to Percy Scholes. In 1957 he was appointed manager of the music department of Oxford University Press, New York, and during 1958–72 he had sole editorial responsibility for the *Concise Oxford Dictionary of Music*, the *Oxford Junior Companion to Music* and the *Oxford Companion to Music*, whose revised tenth edition he brought out in 1970. He is also the author of *Careers in Music* (New York, 1968). From 1972 to 1979 he was director of serious music for Boosey & Hawkes, New York, and in 1972 he was elected first vice-president of the Music Publishers' Association of the United States (president, 1974–6).

PAULA MORGAN

Ward, Justine (Bayard Cutting) (*b* Morristown, NJ, 7 Aug 1879; *d* Washington DC, 27 Nov 1975). American music educationist. She studied music with Hermann Hans Wetzler in New York (1895–1901). Inspired by the Moto Proprio (1903) of Pius X she converted to Catholicism and dedicated her energies to the reform of Church music. In 1910 she met Thomas E. Shields, from the Catholic University of America, who invited her to write music texts for use in Catholic schools. She devised a curriculum later known as the Ward Method using Chevé number notation and Shields's progressive educational philosophies. It focusses on pupils' aural skills as much as technical ability, and is taught using folksongs, standard hymnody and Gregorian chant. A series of teaching books were published (1914–23).

In 1920, at a Gregorian Congress at St Patrick's Cathedral in New York, thousands of children trained in the Ward Method sang chant under the direction of Dom

André Mocquereau of Solesmes, with whom Ward then studied (1921–9). The Ward Method spread throughout the 1920s, 30s and 40s largely fuelled by the Caecilian and liturgical movements' efforts to restore chant to the liturgy. The disuse of chant after the Second Vatican Council and the social changes of the 1960s, however, led to its decline. Theodore Marier and an international board of Ward teachers began republishing revised texts in 1976.

RICHARD R. BUNBURY

Ward, Robert (Eugene) (*b* Cleveland, 13 Sept 1917). American composer. He studied with Howard Hanson and Bernard Rogers at the Eastman School of Music and began postgraduate study with Frederick Jacobi at the Juilliard School. After serving as an army band director during World War II, he both graduated from and gained a teaching position at Juilliard. He left in 1956 to become executive vice-president and managing editor of Galaxy Music Corporation and Highgate Press, posts he held until 1967 when he was appointed chancellor of the North Carolina School of the Arts; in 1975 he stepped down from that position to become a professor. From 1978 until his retirement in 1987, he taught at Duke University.

Even as a student, Ward had no difficulty securing performances for his compositions. By the time he and his Juilliard colleague Bernard Stambler wrote their first opera, he was already well known for his orchestral works. *Pantaloon* (1955, retitled *He who gets Slapped*, 1959) was well received, leading to a commission from the New York City Opera for *The Crucible* (1961), the work on which his reputation almost entirely rests. None of his later operas was able to duplicate its success. His compositional language derives largely from Hindemith, but also shows the considerable influence of Gershwin. In the operas he modifies this basic style to incorporate references to appropriate local colour, such as the imitations of 17th-century hymnody that appear in *The Crucible*. The operas, as well as many shorter vocal works, reflect a concern for social and political issues.

WORKS

Ops: He who gets Slapped (3, B. Stambler, after L.N. Andreyev), 1955, as Pantaloon, New York, 17 May 1956, rev. 1973; The Crucible (4, Stambler, after A. Miller), 1961, New York, 26 Oct 1961; The Lady from Colorado (2, Stambler, after H. Croy), 1964, Central City, CO, 3 July 1964, rev. as The Lady Kate, 1994; Claudia Legare (4, Stambler, after H. Ibsen: *Hedda Gabler*), 1973, Minneapolis, 14 April 1973, rev. 1978; Minutes till Midnight (3, D. Lang, Ward), 1978, Miami, 4 June 1982; Abelard and Heloise (prol, 3, J. Hartman), 1981, Charlotte, NC, 19 Feb 1982, rev. 1983; Roman Fever (1, R. Brunyate, after E. Wharton), 1993, Durham, NC, 9 June 1993

ANDREW STILLER

Ward-Steinman, David (*b* Alexandria, LA, 6 Nov 1936). American composer. He studied at Florida State University (BM 1957) and the Univeristy of Illinois (MM 1958, DMA 1961). His teachers included John Boda, Wallingford Riegger, Darius Milhaud, Milton Babbitt, Nadia Boulanger and Burrill Phillips. In 1961 he joined the faculty at San Diego State University. Among his many awards are prizes from the National Federation of Music Clubs and the Ford Foundation, the Bearns Prize (Columbia University) and a Fulbright Senior Scholar Award. He has held residencies in Australia at the Victorian Centre for the Arts and La Trobe University, Melbourne.

Ward-Steinman has written music for a wide variety of ensembles and instruments. His style, characterized by upbeat and optimistic writing, is thoroughly American in outlook, exhibiting a clarity and accessibility that is strongly influenced by his experience as a jazz improviser. He is especially fond of 'tightly-written' music, in which a work grows out of a few initial notes. *Intersections II: Borobudur* (1989), for example, is constructed almost entirely out of four pitches. A number of works for keyboard contrast inside-the-piano sounds with traditional piano writing. The six movements of the third piano sonata, *Prisms and Reflections* (1995–6), alternate between the sound sources of the piano strings and the piano keyboard. *Child's Play* (1968) for bassoon and piano uses similar techniques in an accompanimental mode. He has also composed for synthesizer and other electro-acoustic media. His works for chorus and orchestra include the oratorio *Song of Moses* (1963–4).

WORKS

(*selective list*)

Stage: Western Orpheus (ballet, R. Carter), 1964; These Three (ballet, E. Loring), 1966; Rituals, dancers, musicians, 1971; Tamar (mixed-media music drama, W.J. Adams, after R. Jeffers), 1970–7; incid music for TV and theatre

Orch: Sym., 1959; Conc. grosso, jazz combo, chbr orch, 1960; Prelude and Toccata, 1962; Conc. no.2, chbr orch, 1960–2; Vc Conc., 1964–6; Jazz Tangents, band, 1967; Antares, 1971; Arcturus, orch, synth, 1972; Raga for Winds, 1972; Scorpio, band, 1976; Bishop's Gambit, 1979; Olympics Ov., 1984; Moiré, pf, chbr orch, 1985; Cinnabar Conc., va, chbr orch, 1991–3; Double Conc., 2vn, orch, 1994–5

Vocal: Pss of Rejoicing, unacc. chorus, 1960; Frags. from Sappho (trans. M. Barnard), S, fl, cl, pf, 1962–5; Song of Moses (orat), 1963–4; Tale of Issoumbochi (S. Lucas, after Jap. trad.), S, nar, fl, cl, perc, vc, 1968; And in these Times (Christmas cant., D. Worth), 6 solo vv, nar, mixed chorus, wind ens, 1979–81; Of Wind and Water (W.C. Williams and others), suite, chorus, pf, perc, 1981–2; And Waken Green (Worth), song cycle, medium v, pf, 1983; Voices from the Gallery, S, T, Bar, pf, 1990

Chbr and solo inst: Pf Sonata, 1956–7; 3 Songs, cl, pf, 1957; Brass Qnt, 1959; Improvisations on a Theme of Milhaud, pf, 1960; Duo, vc, pf, 1964–5; Child's Play, bn, pf, 1968; Montage, ww qnt, 1968; Putney Three, ww qnt, prepared pf, synth/tape, 1971; Sonata, prepared pf, 1972; The Tracker (B. Childs), cl, prepared pf, tape, 1976; Brancusi's Brass Beds (Brass Qnt no.2), 2 tpt, hn,

trbn, tuba, 1976; Golden Apples, a sax, pf, 1981; Intersections II: Borobudur, prepared pf, perc, 1989; Night Winds, ww qnt, 1993; Pf Sonata no.3 (Prisms and Reflections), 1995–6

Warenoff, Leonard. *See* WARREN, LEONARD.

Waring, Joh. (*fl c*1440). Composer, perhaps (from his name) of English origin. He is known only through a setting of the text *Alle dei filius* found in *D-Mbs* Clm 14274 (see K. Dèzes, *ZMw*, x, 1927–8, pp.65–105). The work is for three voices with the cantus firmus in the tenor.

TOM R. WARD

Warka, Adam. *See* JARZĘBSKI, ADAM.

Warlock, Peter [Heseltine, Philip (Arnold)] (*b* London, 30 Oct 1894; *d* London, 17 Dec 1930). English composer, editor and writer on music. Born in the Savoy Hotel, he came from a well-to-do family of stockbrokers, solicitors and art connoisseurs; his father died when he was only two. His domineering mother, Edith Covernton, had Welsh connections and Warlock was to have strong ties with Wales throughout his life. In 1903 she married Walter Buckley Jones and mother and son moved to Wales. At preparatory school his interest in music was awakened through the pianola; his education continued at Eton where his musical interests were encouraged by a sympathetic piano teacher, Colin Taylor. It was Taylor who in 1911 obtained permission for him to attend a concert of Delius's music, an event which was to have a lasting effect on his life. Warlock's interest in Delius's music had begun as early as 1909 and, by the time of his first meeting with Delius at the concert in 1911, he had already become obsessed with his music. From then on a quite remarkable friendship developed between the two men and for the next seven years Delius was Warlock's mentor as well as a regular correspondent for the rest of his life.

Although it had been presumed that Warlock would follow in the family footsteps and work in either the Stock Exchange or Civil Service, there was a certain indecision about his immediate future and, on finishing school, he spent a few months in Cologne studying German and the piano. These musical studies, however, proved unsuccessful and, resigned to a non-musical career, he entered Oxford in October 1913 to read for a degree in classics. Dissatisfied and unhappy, he left after only one year and for a short while enrolled as a student at the University of London, but this second attempt at a university career was even shorter lived than his first. In February 1915 he secured an appointment as music critic on the staff of the *Daily Mail* though he soon found the work frustrating and lasted in the position for barely four months. One of his early interests was Elizabethan literature and now, finding himself unemployed, he spent time in the British Museum editing early music.

It was during this period that he met D.H. Lawrence whose work he admired, soon finding himself part of the author's circle and planning a Utopian settlement in America. At the beginning of 1916 Warlock, a conscientious objector, followed Lawrence to Cornwall and involved himself in an unsuccessful venture to publish Lawrence's books. The friendship between the two men, however, proved highly volatile and they soon parted company under acrimonious circumstances.

Soon after Warlock's return to London he met the composer and critic, Cecil Gray, and the two soon became close friends, sharing a bohemian existence in Battersea. Together they planned a number of grandiose schemes by which to bring about the 'regeneration' of music in England. Warlock's meeting in June 1916 with the enigmatic, Anglo-Dutch composer Bernard van Dieren also had a profound effect on him and he now became an enthusiastic champion of his music. In November 1916 he published his first musical article and used, for the first time, the pseudonym, Peter Warlock.

Having in the meantime married an artists' model, Minnie Lucy Channing ('Puma'), who had earlier borne him a son, Warlock returned to Cornwall for a brief while in April 1917 and, outwardly at least, resumed cordial, if distant, relations with Lawrence. What he did not know was that Lawrence was at the time writing *Women in Love* in which he and Puma were being introduced as two unattractive characters. When in 1921 he learnt that the book was to be published, he threatened legal action and Lawrence was forced to rewrite certain passages.

Although he had intended settling in Cornwall for a time, Warlock became alarmed at the renewed possibility of military conscription and in August 1917 fled to Dublin where he remained for the next year. During this period he became involved in certain occult practices which Gray claimed were psychologically damaging. This 'Irish' year was, nevertheless, a very positive and productive one, marked by a sudden surge of remarkable artistic productivity when, in the space of a fortnight, he wrote ten songs, some of which rank among his finest compositions. In August 1918 he returned to England and sent seven of these recently composed songs to the publisher Winthrop Rogers, using the pseudonym Peter Warlock, for he realized that the name Heseltine was already being regarded with suspicion and hostility by the London musical fraternity. Given also its occult associations, the choice of name is significant. It was from this time on that he became more and more involved in a number of public and private quarrels which were to occur throughout his life.

In 1920 Rogers decided to reorganize a magazine which he owned, *The Organist and Choirmaster*, into something of more general interest. Accordingly *The Sackbut* was launched with Warlock as editor. Between May 1920 and March 1921 nine issues appeared and included a varied amount of material much of which was of a controversial nature. However, just as *The Sackbut* was beginning to succeed, Rogers, nervous of the contentious material, withdrew his financial backing, Curwen took over the publication, and an embittered Warlock was relieved of the editorship.

After this débâcle an impecunious Warlock moved back to the family home in Wales where he lived almost

continuously for the next three years. Here he completed a book on Delius, made a number of arrangements of Delius's works, transcribed an enormous quantity of early music and also composed a large number of original songs, completing in June 1922 his acknowledged masterpiece, the song-cycle, *The Curlew*.

At the beginning of 1925 Warlock decided to settle in Eynsford where he ran a kind of open house and it is from this period that much of the Warlock 'legend' originates. During these years he wrote a study of Gesualdo, a book entitled *The English Ayre*, continued with his early music transcriptions, and also produced a slowly decreasing number of original compositions, including some fine songs and perhaps his best-known piece, the *Capriol Suite*. By autumn 1928, however, he had found it financially impossible to maintain the Eynsford life-style and moved back to Wales briefly before returning to London. Having felt a slow drying up of his creative abilities, he was more than grateful when Beecham invited him to edit a magazine as part of a new operatic venture and to help in the organization of the Delius Festival held in October 1929. The festival itself was a great success but by the beginning of 1930 Beecham's venture had collapsed and Warlock was once again out of work.

Life became bleaker as the year 1930 progressed and there seemed to be little demand for his songs, if indeed the inspiration or will to compose was still there. Black moods of depression settled more frequently and he was found dead, of gas-poisoning, in his flat in Chelsea on the morning of 17 December 1930. At the inquest the coroner recorded an open verdict as there was insufficient evidence on which to decide whether death was the result of suicide or accident.

Warlock is essentially a miniaturist and the largest part of his output consists of solo songs with piano accompaniment. There are in addition choral works (some unaccompanied, some with keyboard accompaniment and a few with orchestra), the remaining handful of works being for orchestra or for piano. He was also a distinguished editor and transcriber of early music (570 published items) as well as an author (9 books, 73 articles), editor and critic (51 reviews). At a time when musical scholarship was still very much in its infancy, he made an enormous contribution to the rediscovery of early English music. Here he showed a rare respect for the composers' intentions, his strict editorial practice being to present only that which the composers had written without emendations or additions.

The initial influence of the Victorian and Edwardian drawing-room songs (notably those of Quilter), can be seen in his early settings. Although elements of Delius's style were absorbed into his harmonic palette at an early stage, his encounter with the music of van Dieren had a marked effect on his developing style and his somewhat austere *Saudades* carefully imitate the van Dieren model. As a result his style became more disciplined, less harmonic and more contrapuntal in texture. Acquaintance with the music of the Elizabethans added a new influence as in *As ever I saw* and *Sweet content*, with a strong vein of medievalism and mysticism present in songs such as *My gostly fader* and *The bayley berith the bell away*. Folksong elements also emerge (*Yarmouth Fair* and *Milkmaids*) and the roistering Warlock of the pubs and taverns surfaces in songs such as *Captain Stratton's Fancy* and *Good Ale*. The influence of Bartók, another of Warlock's enthusiasms, even manifests itself, particularly in *The Curlew*. The idiosyncratic harmonic language with its unlikely and disparate mixture of Edwardiana, Delius, van Dieren, Elizabethan and folkmusic gives Warlock's music a strongly personal voice. Among his choral pieces are some exceptionally beautiful carol-settings, notably 'Bethlehem Down' and 'Balulalow'. The marked contrast between the extrovert and gentler settings seemed for some to confirm an apparent dichotomy in the Warlock/Heseltine personality and the pseudo-psychological interpretation of his complex character as schizophrenic was exploited by Gray in his memoir. However, acquaintance with Warlock's complicated life story, with its constant family pressures, his lack of self-confidence, wild emotional swings, and lack of any permanent employment or regular income, confounds such simplistic explanation. The split-personality theory was, at any rate, vehemently denied by his closest friends. His final frustrations lay, no doubt, in his lack of formal musical training and the miniature forms in which his genius moulded itself led him into a kind of artistic cul-de-sac. In the end he had no way of breaking through the barriers of his self-created musical language either to develop new harmonic techniques or explore new territories of form.

WORKS

SONGS

all voice and piano; unless otherwise stated, all text sources are anonymous

The Wind from the West (E. Young), 1911; A Lake and a Fairy Boat (T. Hood), 1911; Music, when soft voices die (P.B. Shelley), 1911 [2 versions]; The Everlasting Voices (W.B. Yeats), 1915; The Cloths of Heaven (Yeats), 1916, rev. 1919; Saudades: Along the Stream (Li Po), Take, o take those lips away (W. Shakespeare), Heraclitus (Callimachus), 1916–17; The Water Lily (R. Nichols), 1917; I asked a thief to steal me a peach (W. Blake), 1917 [2 versions]; Bright is the ring of words (R.L. Stevenson), 1918; To the Memory of a Great Singer (Stevenson), 1918, rev. 1922; Take, o take those lips away (Shakespeare), 1918 [2nd setting]; As ever I saw, 1918

My gostly fader (C. duc d'Orléans), 1918; The bayley berith the bell away, 1918; Whenas the rye (G. Peele), 1918; Dedication (P. Sydney), ?1918; Love for Love, ?1918–19; My sweet little darling, ?1918–19; Sweet Content (T. Dekker), ?1918–19; Balulalow (M. Luther), ?1919; Mourne no Moe (J. Fletcher), 1919; Romance (Stevenson), 1919; There is a Lady, ?1919

Play Acting, 1920; Captain Stratton's Fancy (J. Masefield), 1921; Mr Belloc's Fancy (J.C. Squire), 1921 [2 versions]; Late Summer (E.B. Shanks), 1921–2; Good Ale, 1922; Hey troly loly lo, 1922; The Bachelor, 1922; Piggesnie, 1922; Little Trotty Wagtail (J. Clare), 1922; The Singer (E.B. Shanks), 1922; Adam lay ybounden, 1922; Rest sweet nymphs, 1922; Sleep (J. Fletcher), 1922; Tyrley Tyrlow, 1922

Lillygay: The Distracted Maid, Johnny wi' the Tye, The Shoemaker, Burd Ellen and Young Tamlane, Rantum Tantum (V.B. Neuburg), 1922; Peterisms, set I: Chopcherry (Peele), A Sad Song (Fletcher), Rutterkin (J. Skelton), 1922; Peterisms, set II: Roister Doister (N. Udall), Spring (T. Nashe), Lusty Juventus (R. Wever), 1922–3; In an arbour green (Wever), 1922; Milkmaids (J. Smith), 1923; Autumn Twilight (A. Symons), 1922

Candlelight (12 nursery rhymes), 1923; Jenny Gray, 1923; 2 Short Songs (R. Herrick): I held love's head, Thou gav'st me leave to kiss, 1923; Consider (F. Madox Ford), 1923; Twelve Oxen, 1924; The Toper's Song, 1924; Sweet and Twenty (Shakespeare), 1924; Peter Warlock's Fancy, 1924; Yarmouth Fair (H. Collins), 1924; I have a garden (T. Moore), 1910, rev. 1924; Chanson du jour de Noël (C. Marot), 1925; Pretty Ring Time (Shakespeare), 1925; 2 Songs (A. Symons): A Prayer to St Anthony, The Sick Heart, 1925

The Countryman (J. Chalkhill), 1926; Maltworms (Stevenson), 1926, collab. E.J. Moeran; The Birds (H. Belloc), 1926; Robin Goodfellow, 1926; Jillian of Berry (F. Beaumont and J. BARRY SMITH

Warmsley, Peter. *See* WAMSLEY, PETER.

Warmuth, Carl. Norwegian firm of music publishers, founded in Christiania (now Oslo). It was the leading music firm in the country in the 19th century. It started as a modest shop for strings, run in his home by the German emigré Carl Warmuth sr (1811–92). According to the firm, the business was established in 1843, but it seems that the actual date was a few years later. Wind and bowed stringed instruments and sheet music were added to the business, which moved in 1861 to larger premises. Its scope radically increased with Warmuth's son Carl jr (1844–95); he joined the firm and took over the management in 1874. He was an exceptionally enterprising and efficient businessman and the firm bought up almost all its competitors: Lindorff & Co. in 1864, Edvard Winther in 1878, Hermann Neupert in 1879, A.M. Hanche in 1881 and J.D. Behrens in 1890.

The firm's first publication appeared in 1851, but serious publishing activity did not begin before 1862. Warmuth's list eventually amounted to 2870 publications. The firm was of considerable significance to Norwegian

cultural life because most of its publications were by native composers, including a large number of women. Such important composers as Kjerulf, Grieg and Svendsen had some of their well-known works published by Warmuth.

From 1880 to 1896 Warmuth edited and published the first Norwegian music periodical to gain recognition outside Norway, *Nordisk musik-tidende*. The firm also operated an important concert agency and a lending library of 65,000 volumes, probably one of the largest in northern Europe. Carl Warmuth jr was awarded many Norwegian and foreign honours. After his death in 1895 the firm began to decline. There were various changes in management until it was bought by the partnership of Brødrene Hals and Wilhelm Hansen of Copenhagen in 1908. On 1 January 1909 Hals and Warmuth were incorporated into Norsk Musikforlag.

KARI MICHELSEN

Warner, Sylvia (Nora) Townsend (*b* Harrow-on-the-Hill, 5 Dec 1893; *d* Frome Vauchurch, Dorset, 1 May 1978). English music scholar. Daughter of a master at Harrow, she studied music, including composition, under Percy Buck, director of music at Harrow School. Her early compositions, which remain unpublished, were admired by Vaughan Williams. On the recommendation of W.H. Hadow, she became a member of the editorial committee of Tudor Church Music (1917–29), working alongside Buck, Alexander Ramsbotham and E.H. Fellowes. In addition to her extensive editorial work on the first ten volumes of Tudor Church Music (1917–29), she contributed a chapter on notation to the Oxford History of Music (introductory volume, 1929), lectured before the Musical Association (1918–19) and edited octavos of Tudor compositions for performing editions published by Stainer & Bell. For these clear and careful performing editions, she followed the editorial methods of Fellowes. With the success in 1927 of her second novel, *Mr Fortune's Maggot*, Warner turned from musicology to writing, becoming a successful poet and author.

BYRON ADAMS

Warner Bros. Music. American firm of music publishers. It was formed by Warner Bros. in Los Angeles in 1929 to gain control of copyrights for music used in its films. Four separate publishers of popular music, Harms, Remick, Witmark and New World Music, were purchased and amalgamated to form the Music Publishers Holding Corporation. The companies' catalogues included the works of such composers as Walter Damrosch, Rudolf Friml, George Gershwin, Victor Herbert, Jerome Kern and Sigmund Romberg. In 1937 two divisions of the firm were established, the popular and the standard (the latter dealing with educational music and texts). In 1968 the company became known as Warner Bros. Music. Among Warner's acquisitions in the 1980s were the film score catalogue of 20th Century-Fox (which included *Star Wars* and works of Johnny Mercer) and Birchtree Ltd with its 50,000 titles, including *Happy Birthday* and the Suzuki Methods. In 1987 the parent company Warner Communications took over the English firm Chappell, forming the Warner/Chappell Music Group; in 1989 it merged with Time, Inc. to create Time Warner, shortly afterwards becoming the Warner Music Group (a unit of Time Warner). With the acquisition in 1994 of CPP/Belwin (which it merged with its print division, Warner Bros. Publications), Warner/Chappell expanded its list of educational publications. In the 1990s it issued the music of such artists as Michael Jackson, Prince, Madonna and Elton John. With its alliance in January 2000 to the EMI group (which represents the Beatles and the Rolling Stones, among others), Warner EMI Music will rival Universal Music, a division of Seagram, as it expands into music distribution on the internet.

FRANCES BARULICH, DAVE LAING

Warnots, Henri (*b* Brussels, 11 July 1832; *d* Saint Josse-Ten-Noode, Brussels, 27 Feb 1893). Belgian tenor. He studied at the Brussels Conservatory, and made his début in 1856 at Liège. He sang at the Opéra-Comique, in Boieldieu's *Jean de Paris* (1862), and at Strasbourg, where his own light opera *Une heure de mariage* was produced. In 1867 he appeared at the Brussels National Theatre in Miry's *Franz Ackermann*. He taught at the Brussels Conservatory and in 1870 founded a school of music at Saint Josse-Ten-Noode. His daughter Elly Warnots (*b* Liège, 1857), a soprano, made her début in 1878 as Anna in Boieldieu's *La dame blanche* at the Théâtre de la Monnaie, where she was engaged for two seasons. She sang Pamina in *Die Zauberflöte* (1880). In May 1881 she appeared at Covent Garden, singing Marguerite de Valois in *Les Huguenots* and the same character in Hérold's *Le Pré au Clercs*.

ELIZABETH FORBES

Warrack, Guy (Douglas Hamilton) (*b* Edinburgh, 8 Feb 1900; *d* Englefield Green, Surrey, 12 Feb 1986). Scottish conductor and composer, father of John Warrack. He was educated at Oxford University, and at the RCM studied composition with Vaughan Williams and conducting with Boult. He made his conducting début at the Wigmore Hall, London, in 1925, and from 1925 to 1935 taught at the RCM. He was director of the newly founded BBC Scottish Orchestra (1936–45), then musical director of Sadler's Wells Theatre Ballet (1948–51), where he conducted the premières of *Harlequin in April*, *Selina* and other ballets; he also orchestrated Fauré piano music and

songs for Andrée Howard's *La fête étrange* (Royal Ballet; Scottish Ballet).

Warrack composed scores for many documentary films including *Theirs is the Glory* (a reconstruction of the Battle of Arnhem), 1946; *XIVth Olympiad*, 1948; and *A Queen is Crowned* (the official coronation film), 1953; his other works include a symphony. He was the author of *Sherlock Holmes and Music* (1947) and wrote a history of the RCM.

ARTHUR JACOBS

Warrack, John (Hamilton) (*b* London, 9 Feb 1928). English writer on music, son of Guy Warrack. He was educated at Winchester College and at the RCM (1949–52), where he studied the oboe with Terence Macdonagh, history with Frank Howes and composition with Gordon Jacob and Bernard Stevens. He played as a freelance oboist, chiefly with the Boyd Neel Orchestra and at Sadler's Wells, until 1953, when he joined Oxford University Press as a music editor. The next year he was appointed assistant music critic to the *Daily Telegraph*. He moved in 1961 to the *Sunday Telegraph*, as chief music critic, resigning in 1972. Warrack became a critic for *Gramophone* in 1958 and a member of the editorial board of *Opera* in 1953. In 1975–6 he was visiting lecturer at the University of Durham, and he was a university lecturer at Oxford, 1984–93. He was director of the Leeds Festival, 1977–84.

The Romantic period is at the centre of Warrack's interests, but he has also written with perception on Mozart and on contemporary music. His most important contribution is his judicious study of Weber, in which that composer's music, his operatic output in particular, is critically analysed; he has also edited Weber's writings on music. His richly illustrated book on Tchaikovsky is notable for its sensitive discussion of the relationship between the man, his background and the music he composed. A careful and elegant writer, with a wide linguistic command and a special interest in relating music to its broader cultural context, Warrack has contributed many articles and reviews to periodicals, particularly *Opera* and the *Musical Times*.

STANLEY SADIE

Warren. Canadian family of organ builders and organists of American origin. Samuel Russell Warren (i) (*b* Tiverton, RI, 29 March 1809; *d* Providence, RI, 30 July 1882), trained as an organ builder with Thomas Appleton of Boston, with whom he worked sporadically during the early 1830s. In 1836 he emigrated to Montreal, where a year later (after a short-lived partnership with George W. Mead) he formed his own firm to build pipe organs and harmoniums, eventually selling pianos, seraphims (reed organs), accordions and flutes as well. His brother, Thomas D. Warren (1815–1863), was also an organ builder, working with Appleton from 1836, briefly becoming a full partner under the name Appleton & Warren (1847–50) before joining his brother in Montreal.

Samuel became the outstanding figure in 19th-century Canadian organ building. He was the first in Canada to use Harmonic Flutes, free reeds and orchestral stops, and he was the first to adopt the Barker lever (*c*1851) and hydraulic bellows (1660–61; at the Wesleyan Chapel, Montreal). His patents include one for a piano and several for improvements to the organ. He built more than 350 organs all over Canada and the USA, although only a handful are extant unaltered. These can be found in Chambly, Quebec; Frelighsburg, Quebec; Clarenceville, Quebec; and Dorchester, New Brunswick. A four-stop melodeon dating from about 1865 is at the Sharon Temple Museum, Sharon, near Toronto.

His youngest son, Charles Sumner Warren (*b* Montreal, 30 Nov 1842; *d* Rochester, NY, 5 July 1933), became his partner in 1876 under the name S.R. Warren & Son. Another son, Samuel Prowse Warren (*b* Montreal, 18 Feb 1841; *d* New York, 7 Oct 1915), was a noted organist, a teacher in New York and a co-founder of the American Guild of Organists (AGO).

Charles moved the firm to Toronto in 1878. Extant organs from this period include those at St Michael's Cathedral, Toronto (1886) and Deschambault, Quebec (1892). In 1896 he sold the business to Dennis W. KARN, but continued to work for him. Charles's sons, Frank Russell Warren (1867–1953) and Samuel Russell Warren (ii) (1892–1965), also worked in organ building until the late 1940s.

KARL J. RAUDSEPP

Warren, Ambrose (*b* *c*1656; *d* between Dec 1727 and July 1729). English musical amateur. A teacher at Tenison's School, St Martin-in-the-Fields, he espoused a two-string

monochord in his *The Tonometer: Explaining and Demonstrating, by an Easie Method, in Numbers and Proportion, all the 32 Distinct and Different Notes, Adjuncts or Supplements Contained in Each of Four Octaves Inclusive, of the Gamut, or Common Scale of Music* (London, 1725). He claimed to have invented it, referring to Michael Wise as an early mentor, in order to help performers, practitioners and instrument makers understand what they do by ear.

The set of string lengths given by Warren divides the octave into 32 parts and is based on 1000 units of measurement. In commenting on the practicality of the instrument he said: 'This is of use as well as for speculation, since hereby a scholar may be seasonably caution'd and inform'd . . . before he can be able either to perform or speak tolerably like a master . . . especially if vocal music, or the violin, are his profession or choice'. Warren's system was discussed by J.A. Scheibe in his *Über die musikalische Komposition* (1773), 491ff.

CECIL ADKINS

Warren, Elinor Remick (*b* Los Angeles, 23 Feb 1900; *d* Los Angeles, 27 April 1991). American composer and pianist. Her parents were accomplished amateur musicians. After local study in Los Angeles and a year at Mills College, she went to New York in 1920 for further work with Frank LaForge and Clarence Dickinson; she also attended masterclasses in Los Angeles with Godowsky and later with Schoenberg, and undertook private study in Paris with Nadia Boulanger (1959). Her early works came to the attention of Cadman and Enescu, who encouraged her. Her first published composition was *A Song of June* (1919), and by 1922 her compositions were appearing in the catalogues of leading New York music firms. From 1921 to the early 1940s she toured the USA as accompanist and assisting artist with leading singers such as Florence Easton, Lawrence Tibbett, Richard Crooks, Margarete Matzenauer and Lucrezia Bori, who were among the many artists to sing her songs; the baritone Thomas Hampson has championed her music.

The New York première (1936) of *The Harp Weaver* brought Warren critical attention as a composer in the larger orchestral forms. The première by Albert Coates and the Los Angeles PO of *The Legend of King Arthur* (1940) established her reputation internationally, and her larger works received performances by important orchestras under such conductors as Pierre Monteux, Barbirolli, Kostelanetz, Pelletier, Wallenstein and Hickox.

The beauty of nature – particularly the West, where Warren lived and worked most of her life – inspired many compositions, among them *The Crystal Lake* (1946), *Singing Earth* (1950, revised 1978), Suite for Orchestra (1954, revised 1960), and *Along the Western Shore* (1954). Mysticism is also a prominent theme, notably in *The Harp Weaver* (1932), *The Legend of King Arthur* (1939, revised 1974), *The Sleeping Beauty* (1941), Requiem (1965) and a large body of smaller works.

A prolific composer, Warren was active into her 90th year; her catalogue contains over 200 compositions, including works for orchestra, chorus and orchestra, chamber ensemble, voice and chorus. She has been described as 'the only woman among the group of prominent American neo-romanticists that includes Howard Hanson, Samuel Barber and Gian Carlo Menotti' (Ammer). The English musicologist Lewis Foreman has written that 'in her chosen neo-romantic idiom, Warren is not a typical American composer of her day . . . [but] idiom matters far less than what she had to say, and the striking way she said it'.

Following her death, the Elinor Remick Warren Society was established to perpetuate her legacy and to advance her musical ideals through furthering the art song, choral and choral/orchestral repertory in America, and the tonal Romantic idiom in art music throughout the world.

VIRGINIA BORTIN

Warren, Harry [Guaragna, Salvatore] (*b* Brooklyn, NY, 24 Dec 1893; *d* Los Angeles, 22 Sept 1981). American popular songwriter. He taught himself the accordion, drums, piano and other instruments, and learned the rudiments of music while singing in a church choir. He first worked in 1909 as a drummer in his godfather's carnival band, then as a member of a vocal quartet at Vitagraph Studios and a pianist in cinemas and saloons in New York. He rose to become the assistant director of Vitagraph before becoming a pianist and song plugger for Stark and Cowan in 1920. In 1924 he joined Shapiro, Bernstein & Co. and began to find success with his own songs, beginning with *I love my baby, my baby loves me* (1926).

Warren favoured writing for revues on Broadway, including several co-authored or produced by Billy Rose. But after the Hollywood film studio Warner Bros. bought the Remick Music Corporation, which Warren had joined as a staff composer in 1928, he was called to California to write for early musical films. His first assignment was to provide six new songs for the film version of Richard Rodgers's *Spring is Here* (1930). After a period during which he spent intervals in New York, Warren settled permanently in Hollywood, where he became the most successful composer of songs for American films. He contributed songs to more than 75 films for such singers as Dick Powell, Carmen Miranda, Fred Astaire, Judy Garland, Gene Kelly and Bing Crosby. Between 1932 and 1957, 42 of his songs reached the Top Ten on popularity charts, and three received Academy awards (*Lullaby of Broadway*, *You'll never know*, and *On the Atchison, Topeka and the Santa Fe*).

At Warner Bros. Warren joined the choreographer Busby Berkeley and the lyricist Al Dubin to create the lavish musical films of the Depression era. Almost all of his approximately 250 songs were published and performed. His own publishing company, Four Jays Music, controlled the songs published by Harry Warren Music and other companies.

Warren's prolific output and the wide dissemination of his music through the medium of film made him one of the most influential of all 20th-century songwriters. He was extraordinarily versatile and wrote successful songs in many genres. His tunes have remained in the repertory of all branches of the popular-music industry, from jazz to television and even 'muzak'.

The Harry Warren Collection of 200 musical-comedy folios is in the Archive of Popular American Music at UCLA, recorded interviews with Warren are in the libraries of ASCAP and Southern Methodist University, and the American Film Institute has transcriptions of interviews with Warren in the Louis B. Mayer oral history collection.

DEANE L. ROOT

Warren, Joseph (*b* London, 20 March 1804; *d* Bexley, Kent, 8 March 1881). English organist and writer on music. In 1834 he became organist of St Mary's (Roman Catholic) Chapel, Chelsea, and composed some masses for its service. Between 1840 and 1860 he published many instruction books for organ, reed organ, concertina and church singing.

Warren was a careful and thorough editor of earlier English music: his edition of Boyce's *Cathedral Music*, for example, included new biographies of the composers with exhaustive lists of their works. Such scholarship was facilitated by the large and valuable library he collected during his life, including the partbooks from which he edited Hilton's *Ayres or Fa Las*, many unique sale catalogues, and autograph manuscripts of Purcell, A.

Scarlatti, Haydn, Mozart and Beethoven. The fruits of his research appeared often in the early *Musical World*.

EDITIONS

W.H. HUSK/BRUCE CARR

Warren [Warenoff], **Leonard** (*b* New York, 21 April 1911; *d* New York, 4 March 1960). American baritone. After formal study with Sidney Dietch he entered the Metropolitan Opera Auditions of the Air and won a contract for 1938. Following further study in Italy, he made his stage début with the Metropolitan in 1939, as Paolo in *Simon Boccanegra*; his last complete performance in the house, 21 years later, was as Simon himself.

During his career, which was dominated by New York engagements, Warren won special acclaim in the great Verdi roles and as Barnaba (*La Gioconda*), Scarpia and Tonio. His voice was huge, smooth, superbly controlled and marked by special freedom in the top range (which extended to the tenor's high C). Foreign engagements took him to Rio de Janeiro and Buenos Aires (1942), Mexico City (1948), La Scala (1953) and the USSR (1958). His recorded legacy is an important one, and includes distinguished performances in *Il trovatore*, *Rigoletto*, *La traviata*, *Un ballo in maschera* and *Macbeth*. He was also an accomplished recitalist, as a live recording from Moscow confirms. He died on the stage of the Metropolitan while singing Don Carlo in *La forza del destino*.

MARTIN BERNHEIMER, DENNIS K. McINTIRE

Warren, Raymond (Henry Charles) (*b* Weston-super-Mare, 7 Nov 1928). English composer. He read mathematics at Cambridge before turning to music, which he studied with Robin Orr (1949–52); later he studied with Tippett (1952–4) and Berkeley (1958). In 1955 he went to Queen's University, Belfast, as a lecturer, becoming professor of composition in 1966; he was composer-in-residence with the Ulster Orchestra (1966–72). He held the professorship of music at Bristol University from 1972 until his retirement in 1994.

Warren sees himself as a 'community composer' in that he is stimulated by the strengths of the particular forces at his disposal. He contributed greatly to the musical life of both the university and the wider community in Belfast and then in Bristol; many of his works have been written for local performance, most notably his opera *In the Beginning* (1982), in which he brings together 15 youth groups. His works are distinguished by an elegant simplicity of material and by an appealing and vocally derived melodic style. While he has written in a fully serial idiom in the Five Bagatelles (1967) and the Symphony no.2 (1969), he has much more frequently employed harmonic techniques derived from serial procedures, for instance in his use of rotating sets of notes in the Symphony no.3 (1995) and *In my Childhood* (1998) to create harmonic fields which articulate the larger structures. Recurring structural devices include heterophony and canon; examples of his fascination with bell changes can be found in *A Star Shone over Bristol* (1973), the String Quartet no.2 (1975) and the Violin Sonata (1993). Warren returns to themes of childhood and old age in such vocal works as *Songs of Old Age* (1968), *Golden Rings* (1987) and *In my Childhood*, while his extensive body of religious music concentrates on the sufferings of Christ and on divine involvement in human suffering. With his two cycles for speaker and piano he aims to integrate the spoken word into a musical structure. His writings on music include *Opera Workshop: Studies in Understanding and Interpretation* (Aldershot, 1995).

WORKS
(*selective list*)

Stage: The Lady of Ephesus (chbr op, 1, Warren), 1959; Finn and the Black Hag (children's op, 2, J. IAN STEPHENS

Warren [Warren-Horne], **(Edmund) Thomas** (*b* *c*1730; *d* London, 1794). English collector and editor. He was secretary of the Noblemen's and Gentlemen's Catch Club from its foundation in 1761 until his death. On inheriting

the estate of Edmund Horne, a Captain of Marines, he changed his name to Warren-Horne.

He spent much of his life acquiring, copying and publishing music, both for the Catch Club and for his own benefit. He was responsible for the most complete collection of glees, canons, catches and madrigals published in the 18th century, which became known as 'Warren's Collection' and was a standard source of such music for many years. In addition to hundreds of contemporary pieces it contained a number of older works. The *Apollonian Harmony*, probably also compiled by Warren, contained many 16th-century madrigals. His most ambitious effort, however, was a large anthology of Renaissance choral music in six volumes. 100 copies were projected in 1777, but after the proofs of the first volume had been printed the printer, Mary Welcker, broke the agreement; a copy of the proofs survives in the British Library. It is nothing less than astonishing for its date, embracing works by Isaac, Josquin, La Rue, Janequin, Clemens non Papa, Arcadelt, Rore, Marenzio, Vecchi and Wilbye. In Day's words, Warren 'came close to publishing the first large *Denkmäler* series'; Hyatt King called it 'a late eighteenth-century equivalent of the historical anthology of Davison and Apel'. Warren also composed a few glees and catches of minor importance; most are included in his own published collections.

EDITIONS

NICHOLAS TEMPERLEY

Warrock, Thomas (*b* Hereford, *c*1565; *d* after 1610). English organist and composer. He may have been the father of the organist and composer THOMAS WARWICK. He was admitted a choirboy of Hereford Cathedral in February 1574/5, and was organist there from 1586 to 1589. The pavan and galliard in the Fitzwilliam Virginal Book (*GB-Cfm*) ascribed to Warrock are presumably by him.

ALAN BROWN

Warsaw (Pol. Warszawa). Capital city of Poland. Before 1526 it was the residence of the dukes of Mazovia and from 1596 the kings of Poland. It was taken by the Swedes in 1655–6 and 1702 and the Russians in 1794, passed to Prussia in 1795, and became part of Napoleon's Duchy of Warsaw from 1807 and of the Congress Kingdom from 1815; after the collapse of the November Uprising (1831) the Congress Kingdom lost its independence and was part of the Russian Empire until 1917. In 1919 Warsaw was again capital of reconstituted Poland. In World War II the city was almost completely destroyed and its population much reduced; rebuilding continued into the 1970s.

1. To 1596. 2. 1596–1697. 3. 1697–1795. 4. 1795–1918. 5. 1918–45. 6. From 1945.

1. TO 1596. The first references to musical life in Warsaw date from the 14th century. Professional music had its origins in liturgical singing. At the centre of the town was the parish church of St John the Baptist (from 1406 a collegiate church, from 1797 a cathedral). By 1339 there was a parish school there, later connected with Kraków University. As early as in the 14th century, hymns and psalms were sung by scholars during the services; the *scholae cantorum magister* at the collegiate church is recorded as Nasiłowski (mentioned in 1543). At the beginning of the 15th century a choir of canons was also active at the collegiate church. In 1428 Duchess Anna of Mazovia engaged seven *mansionarii* to sing the Office of the Blessed Virgin in a chapel adjoining the church. In 1525 eight singers were engaged to sing psalms. The organ in the church of St John was first mentioned in 1462, and the name of the organist, Jan, is first documented in 1580. Liturgical singing was also practised in the churches of St George, the Holy Spirit, St Martin, St Mary the Virgin in 'New Warsaw' and St Anna. In 1454 the first Bernardine order to be founded was established at the church of St Anna. Władysław of Gielniów, author of many sermons, texts and hymn tunes, lived here from 1468 until his death in 1505; his popular *Żołtarz Jezusów* ('Psalter of Jesus') dates from 1488.

The earliest information on the court music of the dukes of Mazovia dates from the 14th century. In the second decade of the 15th century Stanisław Ciołek, author of many religious and secular texts, was active at the court of King Władysław Jagietto. Treatises dating from about 1440 in nearby Ciechanów testify that the concept of Ars Nova was known there (*PL-Wn*). In 1501 the chapel of Duke Konrad of Mazovia appeared in Kraków at the court of Sigismund (later King Sigismund I). It is also known that the lutenist Mikołaj Barzy was active at the Warsaw court of Duke Janusz III (*c*1526). The Mazovian bagpipes were renowned throughout Poland and there were many players in Warsaw, often engaged for family celebrations. From 1507 there also existed a literary brotherhood that sang at the church of St John.

After the death of Duke Janusz in 1526 and the annexation of Mazovia to Poland, the royal family stayed mainly in Warsaw and artistic and musical life developed at the court. In 1578, during the wedding of Jan Zamoyski and Krystyna Radziwiłł in the Ujazdów Palace, the drama *Odprawa posłów greckich* ('The Dispatch of the Greek Envoys') by Jan Kochanowski was performed; the final ode 'Orfeusz Sarmacki', for voice with lute accompaniment, was composed by the director of the royal chapel, Krzysztof Klabon.

2. 1596–1697. In 1596, after the fire at Wawel Castle in Kraków, Sigismund III moved his court to Warsaw. Warsaw Castle became the main residence and seat of government of the Polish kings (at the beginning of the 17th century they also spent much time in Kraków. While the centre of musical life at this period was the royal court, music was widely cultivated in churches, several of which maintained chapels or choirs; many also possessed organs. In the first half of the 17th century musical

brotherhoods were founded, attached to churches and composed of town musicians. Later in the 17th century the monastic colleges played an increasingly important role in the musical life of Warsaw. Private chapels were kept by wealthy magnates who were either lovers of music or wished to enhance their prestige.

Before 1603 the royal vocal and instrumental chapel was divided into two groups: the Polish musicians were directed by Klabon and the Italians by Luca Marenzio (*c*1595–7), Klabon (*c*1597–1601) and Giulio Cesare Gabussi (1601–2). In 1603 the two groups were combined. After this date the chapel consisted of between about 30 and 40 musicians, the majority of whom were Italians. It was directed successively by Asprilio Pacelli (1602–23), Giovanni Francesco Anerio (*c*1624–30), Marco Scacchi (1632–49), Bartłomiej Pękiel (informally from 1649, formally *c*1653–5) and Jacek Różycki (1657–96), who subsequently became *maestro di cappella* of the chapel of King August II.

During the reign of the Vasas kings, music at the Polish court reached its zenith. Famous musicians active at the court of Sigismund III (*d* 1632) included the organists Vincenzo Bertholusi, Giovanni Valentini (i), Tarquinio Merula and Angelo Simonelli, and the singers Francesco Rasi and Pellegrino Muti. At the court of Władisław IV (1632–48) were the singers Baldassare Ferri, Kaspar Förster, Margharita Basile-Cattaneo (sister of Andreana Basile-Baroni) and Vincenzo Scapitta. The chapel performed in the royal castle and in various churches and palaces.

The first known opera performance in Warsaw took place in 1628; *Acis* was an anonymous work, also known as *Galatea* (only a Polish summary of the text survives). During the reign of Władisław IV operas were frequently performed in the theatre in the royal castle; seven *drammi per musica* were given by the royal chapel between 1635 and 1641. Most of the librettos were written by the singer and royal secretary, Virgilio Puccitelli, and the music was by various members of the royal chapel under the direction of Marco Scacchi. Ballets were also frequently given at court celebrations, often with the participation of the king and queen. A lengthy interruption in the performance of opera and in musical life generally was caused by the Swedish invasion of 1655. During the reign of Michael Korybut Wiśniowiecki (1669–73), at least one opera, *La caduta del gran capitano Belisario*, with text by Giacinto Andrea Cicognini and music by an unknown composer, was performed at the court. In 1691, during the reign of John III, in the rebuilt theatre in the royal castle, the première took place of the opera *Per goder in amor ci vuol Costanza*, composed by the royal musician Viviano Agostini (libretto by Giovanni Battista Lampugnani).

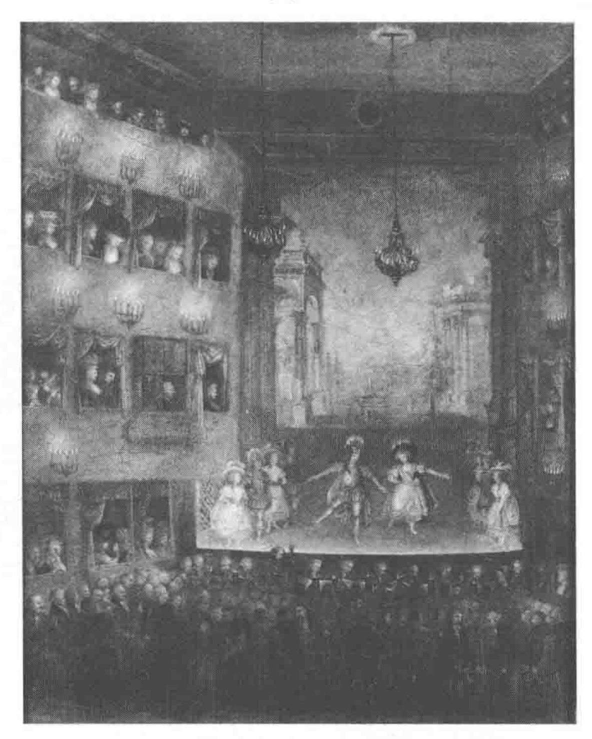
During Advent and Lent, Latin sacred dialogues were performed instead of operas; for instance, Bartłomiej Pękiel's *Audite mortales*, dialogues by Kaspar Förstev jr (pupil of Giacome Carissimi) and Philippe Friedrich Buchner. Sacred choral (including polychoral) works were sung in Warsaw churches; some of these works, composed by royal musicians at the turn of the 17th century, were published in the collection prepared by Wincenty Lilius, *Melodiae sacrae* (Kraków, 1604). The repertory of the royal chapel consisted partly of works by the *maestri di cappella* and musicians connected with the chapel, and partly of music by leading Italian and, especially after 1648, French and other composers. Among the Polish musicians active at the royal court during the 17th century were Adam Jarzębski, composer of instrumental *canzoni e concerti* and a partially preserved mass, Marcin Mielczewski, who composed masses, church concertos and canzonas, Pękiel (author of *Missa pulcherrima* and monumental *Missa 'La Lombardesca'*) and Jacek Różycki. These composers also wrote secular music, most of which is now lost. Scacchi wrote a number of theoretical works at the royal court during the 1640s, including *Cribrum musicum* (Venice, 1643), a treatise containing a critical examination of the psalms of Paul Siefert. In *Xenia apollinea*, a musical appendix to the treatise, Scacchi inserted short music examples in contrapuntal style composed by 49 members of the royal chapel then active in Warsaw.

It is known for certain that three churches had their own musical establishments in the 17th century: the collegiate church of St John, where a fine new organ was built in 1617, the Augustinian church of St Martin, whose organ dates from 1619 and whose first organist was Izajasz of Bochnia, and, from 1626, the Jesuit church. According to the description of Warsaw in rhyme by Adam Jarzębski, organs also existed by 1643 in the churches of St Anne, St Anthony (in the Praga district), the Holy Spirit and St Mary the Virgin. Among local organ builders were Albert Chrostkowski (or Gostkowski), Tomasz Gogola, Andrzej Lochmann and Jan Złocki.

3. 1697–1795. From 1697 to 1763 Poland was ruled by kings of the Saxon dynasty, whose principal residence was in Dresden. Music flourished in the royal castle only when the king and his court were staying in the Polish capital. In 1697 the royal chapel of August II consisted of 40 musicians directed by Jacek Różycki and J.C. Schmidt (i). After Różycki's death in 1703 the chapel became dominated by foreign musicians and its repertory by foreign works, with an emphasis, apart from German compositions, on French music during the reign of August II and Italian during the reign of August III (1733–63). The participation of Polish musicians in the chapel was minimal, although the Polish composers Daniel Fierszewicz and Piotr Kosmowski were both connected with the court. The king's accounts for 1725 record that there was also a janissary band at the court, consisting almost exclusively of Poles. In 1717 a smaller chamber ensemble was organized to accompany the king on his travels from Dresden to Warsaw. For larger celebrations the royal ensemble was strengthened by musicians from the Warsaw church chapels or from magnates' palaces.

During the Saxon period Warsaw's operatic life became more active. In 1748 the Operalnia (the so-called Saxon theatre) opened as the first public opera house in Poland, playing without charge to the nobility and citizens alike. Operas, mostly Italian, were presented there twice a week. Between 1754 and 1763 at least 11 of Hasse's operas were performed in Warsaw (*Zenobia* had it's première there). Hasse himself visited the city with his wife Faustina Bordoni, certainly from autumn 1762 until spring 1763 and probably in the summers of 1759 and 1760. During Lent oratorios were performed in Warsaw churches.

During the reign of the last Polish king, Stanisław August Poniatowski (1764–95), the royal chapel was reformed as a court and theatre orchestra. The first conductors were Gaetano (Kajetan Majer, 1764) and Mattia Gherard (1765–7). In the spring of 1767 artistic



activity in Warsaw was suspended for political reasons. During the next few years music for special court occasions was organized by Gaetano. In 1774 the public theatre reopened with the theatre orchestra conducted by Giuseppe Pasqua (1774–6) and Gaetano (1776–81). Between 1779 and 1781 a small ensemble of Czech musicians directed by Jan Stefani was active at the royal court. In 1781 the court and theatre orchestra was reconstituted, with about 30 musicians, conducted by Gaetano (1781, 1787–*c*1790), Gioacchino Albertini (1782–4), Pietro Perischini (1784–7), Stefano Ghinassi (1790–91), Antoni Hart (1791), Giuseppe Cervellini (1791–?). The last director of the orchestra, before its dissolution in 1795, was the Czech Antoni Weinert, who was also a composer.

During the 18th century an increasing number of Polish magnates maintained their own chapels, often consisting of musicians who also performed at the royal court and in the opera house. Magnates who kept chapels in the first half of the century included Teodor Potocki, Adam Poniński, Jan Skarbek, Janusz Antoni Wiśniowiecki and Józef Potocki, and in the second half of the century Fryderyk Michał Czartoryski, Antoni and Piotr Dunin, Jerzy Albert Mniszech, Krzysztof Antoni Szembek, Michat Wielhorski and M.K. Ogiński.

Apart from concerts in the royal castle and the Łazienki Park, private concerts were organized in the magnates' palaces. The first public concerts took place in the 1760s, and from 1779 concerts were organized in the new National Theatre (Teatr Narodowy). Foreign virtuosos who performed in Warsaw included the violinists Lolli, Pugnani and Viotti, the clarinettist Anton Stadler and the pianists J.L. Dussek and Joseph Wölfl. Paisiello stayed in Warsaw in 1784, when his oratorio *La passione di Gesù Cristo* was performed in the palace theatre during Lent. Cimarosa and Martín y Soler also visited the city.

On 11 July 1778 the first opera to a Polish libretto was publicly performed, *Nędza uszczęśliwiona* ('Misery made Happy') by Maciej Kamieński. Eight further works by Kamieński, all with strong Polish folk elements, received their premières between 1779 and 1795. From 1779 most operas were performed in the new National Theatre on Krasiński Place. Financial difficulties caused it to close in 1784, but from 1790 to 1794 a new ensemble was active under the direction of Wojciech Bogusławski (fig.1). Operas were also given in the royal Łazienki Palace, in the palace's amphitheatre and Orangery, and (from 1770) in the royal Ujazdów Palace. Apart from many Polish works, notably the popular folk opera *Cud mniemany czyli Krakowiacy i górale* ('The Supposed Miracle, or Kracovians and Highlanders') by Jan Stefani, operas by Gluck, Cimarosa, Paisiello, Pergolesi, Mozart, Salieri and others were performed in Warsaw in the two decades before the partition of Poland in 1795.

In the second half of the 18th century native and foreign composers active in Warsaw also wrote symphonies, oratorios, sacred and secular cantatas and religious and patriotic works; among the latter the programmatic keyboard polonaises of M.K. Ogiński gained wide popularity. In the final decades of the century there were two music schools in Warsaw, and music was also taught at the Collegium Nobilium and in the monasteries of the Piarists and Theatines. In the 1770s the first music engraver, Jan Engel, and in 1787 the first music printer, Piotr Zawadzki, began working in Warsaw.

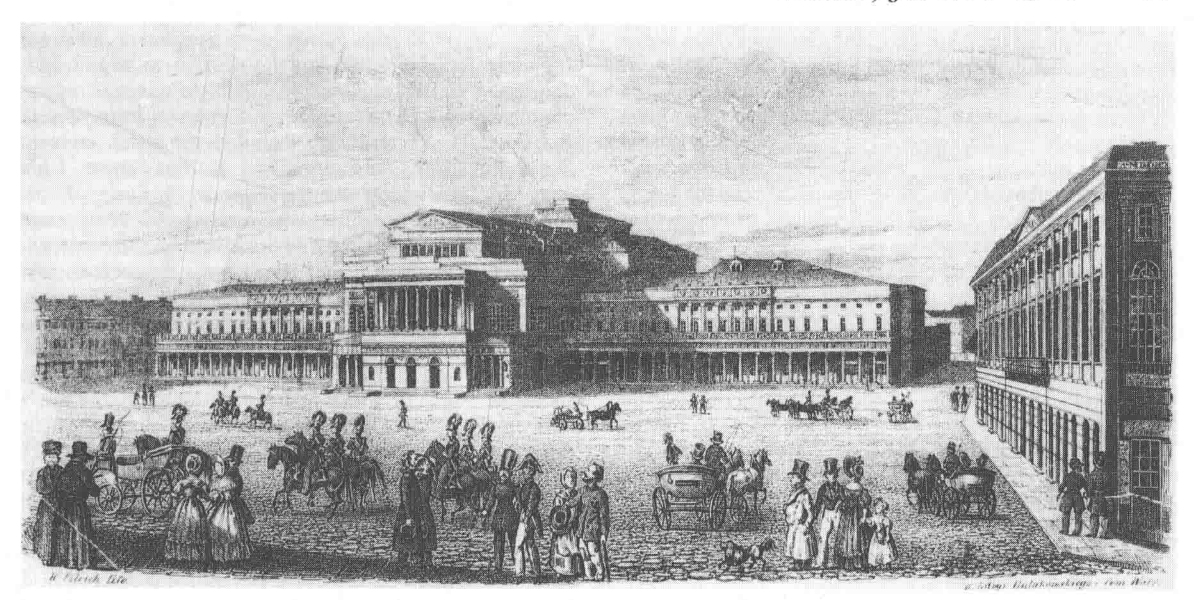
4. 1795–1918. After the loss of independence and the resulting partition of Poland in 1795 between Russia, Prussia and Austria, Warsaw found itself initially in the Prussian sector of occupation, where it remained until the arrival of Napoleon's army in 1806. From 1807 to 1815 the city became the capital of the Grand Duchy of Warsaw, which had been created from the Polish lands taken from the former Prussian sector; in 1809 the Grand Duchy was augmented by the inclusion of land from the former Austrian sector. After the Congress of Vienna in 1815 Warsaw became the capital of the so-called Kingdom of Poland (or 'Congress Kingdom') subordinated to Russia, although it possessed a degree of autonomy until 1830. The loss of independence had a profound effect on the cultural life of the city. It lost its royal court, together with the network of patronage which had stimulated artistic and scientific endeavours since the period of the Enlightenment. Nevertheless, Warsaw remained the most important musical centre in the Polish territories.

The first few years of the Prussian occupation saw a collapse of cultural life. Many of the city's inhabitants left, and the National Theatre was closed down by the Prussian authorities. In 1799 the theatre reopened with Józef Elsner as music director; in 1833 the opera company moved to the new Teatr Wielki (Wielki Theatre). The company's repertory during the period of Prussian occupation included works by Cimarosa, Paisiello, Anfossi, Salieri, Cherubini, Mozart and Elsner. The auditorium of the National Theatre was also used for concerts given by musicians from Poland and abroad. In 1805, on the initiative of a group of Prussian administrators, a music society was established in Warsaw. Among the society's founding members, apart from many Poles, was E.T.A. Hoffmann, who was in Warsaw at that time. The

society organized concerts (including the first performance in Warsaw of a Beethoven symphony), promoted music teaching and presented lectures on music. Its activities were ended by the arrival of Napoleon's troops in 1806. During the Napoleonic wars the repertory of the opera became dominated by the works of French composers (notably Dalayrac, Berton, Boieldieu and Paer), together with an increasing number of operas by Polish composers, such as Elsner and Kurpiński. From 1810 Kurpiński was second director of the opera, and after Elsner's resignation in 1824 Kurpiński became director, a position which he held until 1840.



The greatest flowering of culture, including music, in Warsaw occurred in the years between 1815 and 1830. Various types of educational institution were developed, including the Warsaw Lyceum, whose teaching staff included many professors from the university. Chopin was an alumnus of the Lyceum. In 1816 the university was founded. From the earliest years of the 19th century there had been attempts to open a public, professional music school. In 1811 the Warsaw Szkoła Dramatyczna (School of Drama), for actors and singers, was established at the National Theatre. In 1821, after many phases of reorganization, the Instytut Muzyki i Deklamacji (Institute for Music and Declamation) was created, becoming part of a department of fine arts within Warsaw University; the first director was Elsner. In 1826 the conservatory was subdivided into the Szkoła Główna Muzyki (Conservatory), devoted to theory, composition and instrumental performance and attached to the university, and a separate Szkoła Dramatyczna i Śpiewu (School of Drama and Singing), directed by C.E. Soliva from 1827. Both schools were closed in 1831 after the failure of the November Uprising. In spite of the relatively short period of its activity, the impact of the conservatory was enormous. Besides Chopin the school's graduates from this period included many others who were to become significant figures in music, among them Dobrzyński, T.N. Nidecki, Antoni Orłowski, August Freyer and Józef Sikorski.

At the Warsaw Opera, apart from operas by Polish composers, the repertory included works by Italian (above all Rossini and Cherubini), French (Boieldieu, Auber) and German composers (notably Weber's *Der Freischütz*). Concerts were dominated by soloists and chamber ensembles, and usually took the form of a loosely assembled programme of concert pieces by different performers. Besides Polish performers (such as Maria Agata Szymanowska, Lipiński and Chopin), Warsaw concerts presented the most celebrated European musicians, including Angelica Catalani (1819–20), J.N. Hummel (1828) and Paganini (1829). Concerts took place in the National Theatre and also in the halls of other institutions, including the Resursa Kupiecka (Merchants' Club, opened in 1820), which became one of the main centres of the city's concert life during the 19th century. From 1817 there were cycles of subscription concerts in such venues as the Merchants' Club and the Towarzystwo Dobroczynności (Charity Society, 1823); weekly chamber concerts were held in the Merchants' Club from 1830. Warsaw's musical life was stimulated by the foundation of several music societies. In 1814 Elsner initiated the Towarzystwo Muzyki Religijnej i Narodowej (Society of the Friends of Religious and National Music), which also organized concert series, in one of which, in 1825, Beethoven's Mass in C major was performed. In 1817 150 members of the society formed the Towarzystwo Amatorskie Muzyczne (Amateur Music Society). Throughout the 19th century Warsaw lacked a permanent orchestra other than the opera orchestra. Consequently, larger orchestral works were infrequently performed. This was the principal difference between concert life in Warsaw and that in the other major European musical centres.

In 1820–21 Kurpiński published in Warsaw the first Polish music journal, *Tygodnik muzyczny* ('Musical Weekly'). Music publishing developed from the beginning of the 19th century. In 1803 Elsner opened a lithographic press, through which he published the series *Wybór pięknych dzieł muzycznych i pieśni polskich* ('Selected Beauties of Music and Polish Songs', 1803–5), consisting of pieces intended for amateurs. Music publishers from this period included I.J. Cybulski, Franciszek Klukowski and Antoni Brzezina, who published the two rondos of Chopin, opp.1 and 5. Most of the publications comprised piano miniatures, fashionable dances, operatic extracts, songs and works written for teaching purposes. Music published abroad was also available in Warsaw; in 1829 Brzezina imported to Poland all the published works of Beethoven. The growth in the city's musical life, and above all the spread of amateur music making, brought with it an increasing need for musical instruments. Warsaw was home to firms producing string instruments, guitars, wind instruments and, above all, pianos. The most celebrated piano manufacturers during the first 30 years of the 19th century were Antoni Leszczyński and Fryderyk Buchholz. Chopin had a piano by Buchholz in his Warsaw apartment.

The main musical figures in Warsaw during this period were Elsner and Kurpiński. They were also active as composers, writing operas for the Warsaw stage, composing cantatas for various special occasions in the city and creating works in other genres, many of which had their first performance in Warsaw. Other significant musicians included Józef Stefani, Soliva and Franciszek Lessel. Chopin's career began during this period, as did the careers of other pupils of Elsner, such as Dobrzyński.

After the failure of the November Uprising in 1831 most of Warsaw's intelligentsia emigrated. The Kingdom of Poland lost its autonomy and came under the direct administration of the government in St Petersburg, which tightened the existing mechanism of censorship. Although Warsaw University, the conservatory and other educational institutions were closed by the authorities, efforts were made, not least by teachers and graduates of Elsner's school, to sustain musical activity in the city. The central position in the city's musical life was still occupied by the Warsaw Opera at the Wielki Theatre (fig.2). After Kurpiński's departure in 1840 the company's directors included Nidecki (1840–52), J.L. Quattrini (1858–93), Moniuszko (1858–72), Minchheimer (1882–90), Cezar Trombini (1875–81 and from 1891), Josef Rebicek (1883–91) and Emil Młynarski (1898–1903). The repertory was dominated by Italian composers, above all, Verdi, whose operas proved very popular, and by French or French-domiciled composers, especially Meyerbeer. Operas by Polish composers, among them Moniuszko, Żeleński, Statkowski, Noskowski and Paderewski, were also given. German operas were rarely performed. Prior to 1918 the only Wagner operas to be performed in

2. *Wielki Theatre, Warsaw, designed by Antoni Corazzi, opened 1833: lithograph by W. Ulrich, 1833*

Warsaw were *Lohengrin* (1879), *Tannhäuser* (1883), *Die Walküre* (1903) and *Die Meistersinger von Nürnberg* (1909).

Music teaching after 1830 was mainly in private homes. Music was, however, taught at the School of Singing at the Wielki Theatre (1835–41), directed by Kurpiński, at special courses in choral singing at the Merchants' Club (1835) and at the music school of the Institute for the Blind (from 1842). After protracted attempts to gain the approval of the Russian authorities, the Music Institute began its activities in 1861 as an institution for the training of professional musicians. Its first director (to 1879) was Apolinary Kątski. The school went through several phases of restructuring and was subsequently renamed the Warsaw Conservatory (from 1915), the Higher Music School (from 1946) and, from 1979, the Fryderyk Chopin Academy of Music. The Music Institute had its own chorus and orchestra drawn from its students, and these groups gave public concerts. In addition, from 1887 Stanisław Barcewicz organized chamber concerts given by professors of the institute. Among the professors a central role was played by Noskowski, who taught composition from 1888 to 1909; his students included most of the Polish composers of the next generation. In 1884 a music school was opened under the auspices of the Warsaw Music Society.

After the failure of the November Uprising there were fewer concerts given in public halls, but this was offset by an increase in the number of concerts given in churches. These church performances included large-scale choral works such as Haydn's *Die Sieben letzten Worte*, which was given in Warsaw Cathedral in 1834. From 1836 to 1838 a weekly series of concerts was directed by J.W. Krogulski at the Piarists' church. In these concerts professional musicians were joined by many amateur performers to perform works such as Elsner's oratorio *Passio Domini Nostri Jesu Christi*. During the 1830s there were also weekly concerts at the new Merchants' Club, at one of which, in 1834, Haydn's *The Creation* was performed. The same year a permanent string quartet was established at the Merchants' Club; its regular concerts included complete multi-movement works, a new practice in Warsaw's concert life. From the mid-1830s many renowned Polish and foreign artists appeared in Warsaw, among them Vieuxtemps, Giuditta Pasta, Liszt, Henryk and Józef Wieniawski, Anton Rubinstein and Paderewski. In the second half of the 1850s there was some loosening of political control by the Russian authorities and a corresponding increase in musical activities. In 1856 a new concert hall was built in the Dolina Szwajcarska where foreign, and especially German, orchestras performed.

In the second half of the 19th century a number of professional symphony orchestras were founded (among them one by Dobrzyński in 1856 and one by Noskowski in 1881), but their lack of funds meant that they lasted only a few years. This situation changed only in 1901 with the creation of the Warsaw PO. From that date there were regular orchestral concerts whose programmes increasingly featured contemporary works. From 1906 there were a series of concerts devoted to music by the group of composers known as Młoda Polska (Young Poland), represented by Szymanowski, Grzegorz Fitelberg, Ludomir Różycki and Apolinary Szeluto. In 1871 the Warsaw Music Society was established on the initiative of W. Wiślicki. Among the founding members were Moniuszko, Józef Sikorski, Józef Wieniawski and Jan Kleczyński. The society organized numerous concerts and had its own choirs and an amateur string orchestra, to which were added at the beginning of the 20th century chamber and vocal ensembles and a small symphony orchestra. From 1884 it supported a music school, which was initially directed by Noskowski and later by Minchheimer. By the beginning of the 20th century the school had attained a status comparable with the Music Institute. An important aspect of the society's activities was the collection of manuscripts and other materials of Polish composers, and the creation of the first museum of Polish musical culture. In 1897 it expanded its activities to include the publication of the works of Moniuszko, and in 1910 it started publishing the works of Karłowicz.

At the turn of the 19th and 20th centuries there was a flourishing of amateur choirs in Warsaw. The most important of these were Lutnia, established in 1886 and directed for nearly 50 years by Piotr Maszyński, Echo (1898) and Harfa. The repertory of these choirs consisted mainly of male partsongs, as in the German Liedertafel. The development of these choirs brought a need for works for such ensembles. One of the significant composers for this medium was Maszyński.

In the second half of the 19th century two important musical journals were established in Warsaw: *Ruch muzyczny* ('Musical Movement'), edited from 1857 to 1862 by Sikorski; and *Echo muzyczne* ('Musical Echo'), later known as *Echo muzyczne, teatralne i artystyczne*, edited from 1877 to 1907 by Kleczyński and others. The most significant music critics were Józef Sikorski, Antoni Sygietyński, Józef Kenig, Maurycy Karasowski and Jan Kleczyński. From the beginning of the 19th century there was a growing interest in early Polish music. In 1807 Elsner had begun to collect source materials, and a few years later Kurpiński began to do likewise, publishing some of his materials in *Tygodnik muzyczny*. In 1818 the *Pamiętnik warszawski* ('Warsaw Diary') published the *Poczet muzyków* ('Fellowship of Musicians') by Ignacy Potocki, which was the first published dictionary devoted to Polish music. Sikorski, through his writings for *Ruch muzyczny*, presented ways and methods of collecting historical materials. 1860 saw the publication in Warsaw of Kazimierz Łada's *Historia muzyki*, the first book devoted to the history of music in Poland. Warsaw's important music-publishing firms in the second half of the 19th century were Sennewald, Friedlein, and Gebethner & Wolff. They published predominantly Polish works, the majority piano pieces and songs. The most important composers active in Warsaw at that time were Moniuszko, Żeleński, Noskowski, Wieniawski, Pankiewicz, Karłowicz and Statkowski.

5. 1918–45. After World War I Poland regained its independence and Warsaw once again became the capital of a free country. As a result there were better conditions for the development of musical culture and for bringing Polish music out of its former isolation. During the 1920s Warsaw was the focus of Szymanowski's battles against a conservative musical establishment that wanted to keep Polish music free from foreign influences. In spite of these reactionary attitudes Szymanowski attracted an ever-growing body of supporters, especially among musicians of the younger generation. The newly established Polish Society for Contemporary Music (Polskie Towarzystwo Muzyki Współczesnej) organized concerts to promote works by younger Polish composers (among them Bacewicz, Szałowski, Maciejewski, Mycielski and Kassern), together with works by contemporary foreign composers such as Debussy, Ravel, Milhaud and Stravinsky. In 1938 the society organized a cycle of concerts devoted to Szymanowski's music. In April 1939 the 17th festival of the ISCM took place in Warsaw and Kraków. The musical creed promoted by Szymanowski, together with the activities of the Polish Society for Contemporary Music, created the conditions for the development of Polish music after World War II.

Concert life in Warsaw between the wars was very lively. The Warsaw PO, directed from 1923 to 1934 by Fitelberg, performed works from the classical symphonic repertory and contemporary works. For example, between 1923 and 1925 the Polish premières were given of Honegger's *Pacific 231*, and *Le roi David*, Stravinsky's *Pulcinella* and Piano Concerto, and Malipiero's *Impressioni dal vero*; there were also numerous premières of Polish works. Performers included the most eminent Polish musicians and numerous leading artists from abroad. The Society of the Friends of Early Music, founded in 1926, organized concerts of early music, and a wide range of concerts was organized by the conservatory, which reopened in 1919 and was directed, successively, by Młynarski (1919–22), Melcer-Szczawiński (1922–7), Szymanowski (1927–9) and Eugeniusz Morawski-Dąbrowa (1932–9). The conservatory was closely associated with the musical life of the city and its teachers included many of those actively involved in the city's concert life. The music school of the Warsaw Music Society was named after Chopin (from 1919). From 1928 it was directed by Wieniawski, who inaugurated the first Wieniawski Violin Competition in 1935. Before World War II three Chopin competitions took place in Warsaw (in 1927, 1932 and 1937). The programming at the Warsaw Opera became more adventurous after World War I, with Polish works occupying an important place in the repertory. Many premières of Polish ballets and operas were given, including Szymanowski's *Hagith* (1922) and *Król Roger* (1926). In addition there were performances of Wagner's operas, some of which were performed for the first time in Poland, Beethoven's *Fidelio* and many of Mozart's operas. After 1931 the opera went through a period of financial crisis, as a result of which the repertory again became more conservative.

Among the numerous musical societies active in Warsaw during this period were the Warszawskie Towarzystwo Muzyczne (Warsaw Music Society) and the Polish Society for Contemporary Music. In 1930 the Stowarzyszenie Kompozytorów Polskich (Association of Polish Composers) was formed. The previous year Towarzystwo Wydawnicze Muzyki Polskiej (Polish Music Publishing Society), the first Polish publishing house devoted exclusively to music, was established. In 1934 the Instytut Fryderyka Chopina was formed to collect materials for the projected complete edition of Chopin's works. During the interwar period many amateur choirs remained active in Warsaw. Various musical journals were published in Warsaw, among them *Muzyka* (1924–38), *Muzyka polska* (1934–9), *Muzyka współczesna* ('Contemporary Music', 1936–9), *Kwartalnik muzyczny* ('Musical Quarterly', 1928–33) and *Polski rocznik muzykologiczny* ('Polish Musicological Yearbook', 1935–6).

The outbreak of World War II destroyed the city's musical life. All institutions of higher education, including the conservatory, the Warsaw PO and the Warsaw Opera were closed, and the publication of books, journals and music forbidden. It was also forbidden to perform any works by Chopin or Moniuszko. Most of the manuscripts and printed volumes in the city's libraries were burnt, including the autograph score of Szymanowski's ballet *Harnasie*, and autograph scores by Karłowicz. In spite of restrictions, musicians gathered in secret societies and organized clandestine concerts. Orchestral concerts took place in the conservatory from 1942 to 1944. Above all, musical life was sustained in cafés and through concerts in private houses, hundreds of which were given during the course of each year. The repertory for these concerts consisted mainly of chamber pieces and solo works. There

were also performances in churches. The only 'official' music school was the so-called Staatliche Musikschule, which was intended to provide teaching at a basic level, but which in reality provided a full conservatory programme. In addition to this there was also an underground conservatory which taught piano, singing and music theory. In each of these schools there were professors from the pre-war conservatory. Many of the works written during the war by Warsaw composers were destroyed during the Warsaw Uprising of 1944. The most characteristic musical manifestation of the resistance was the development of street songs with strong political overtones.

6. FROM 1945. After the war all of Warsaw's music institutions were nationalized. While this guaranteed the financial support of the state, it brought all musical activity directly under the control of the communist government. Those private music publishers that resumed business after the war continued only until 1951. The initial postwar period saw the rebuilding of the Philharmonic Hall, the Wielki Theatre and the conservatory, all of which had been totally destroyed. In 1955 the rebuilding of the Philharmonic Hall, now known as the National Philharmonic, was completed (fig.3), and this was followed by completion of the new conservatory in 1964 and of the rebuilt Wielki Theatre in 1965. In 1946 a new symphony orchestra was founded, which in 1947 became the orchestra of the Warsaw Philharmonic; in 1955 it became known as the National PO. During the first postwar decade, in addition to the mainstream Classical and Romantic works, the orchestra's repertory included many Polish and Russian works; it also took part in festivals of Polish music.

From 1956 there was a gradual thaw in Poland's cultural climate, with a resulting increase in international musical contacts. Western artists who visited the city included Yehudi Menuhin (1957), the Cleveland Orchestra under Szell (1957), the Hallé Orchestra under Barbirolli (1958) and the Philadelphia Orchestra under Ormandy (1959). Warsaw musicians, including those of the Warsaw PO, were now permitted to undertake international tours. 1956 was also the year of the first Warsaw Autumn Festival of Contemporary Music, organized by the Union of Polish Composers. From 1958 the Warsaw Autumn Festival has taken place in September each year, with the exception of 1982, when the festival was cancelled due to the artists' boycott during the period of martial law. The festival had an enormous significance for the work of Polish composers, enabling them to become familiar with the achievements of composers from other countries. From the late 1950s Warsaw musical life became more vibrant, and various other musical ensembles were formed, including the Fistulatores et Tubicinatores Varsoviensis (1965), specializing in the performance of early music, and the contemporary group Warsztat Muzyczny (Music Workshop), formed by Zygmunt Krauze in the same year. The National PO offered subscription symphony concerts, concerts by foreign orchestras, chamber concerts and solo recitals. Among the most significant conductors of the Philharmonic were

3. Interior of the National Philharmonic, Warsaw, rebuilt 1955

Witold Rowicki (1950–55 and 1958–77), Bohdan Wodiczko (1955–8) and Kazimierz Kord (since 1977). Apart from the Philharmonic Warsaw has several other concert halls, including the halls of the Chopin Academy of Music, and the large concert studio, named after Witold Lutosławski, at Polish Radio. Concerts are also organized by other institutions and societies. 1957 saw the inauguration of the Studio Muzyki Eksperymentalnej (Studio for Experimental Music), founded and directed (until 1985) by Józef Patkowski within Polish Radio; this studio has enabled composers to create electronic music and *musique concrète*.

The first postwar opera performance took place in December 1945. From 1948 the opera was known as the Warsaw State Opera. Its performances, prior to the opening of the rebuilt Wielki Theatre, took place in the temporary surroundings of the Roma Hall. The Warsaw State Ensemble of Travelling Opera was established in 1959 to give performances in smaller cities and towns outside Warsaw. The Komedia Muzyczna (Musical Comedy, from 1949) and the Państwowa Operetka (State Operetta) have continued the tradition of light musical theatre in Warsaw. Since 1958 there has also been the annual festival known as the Jazz Jamboree. An important place in Warsaw's musical culture has been occupied by the Warszawska Opera Kameralna (Warsaw Chamber Opera, 1961), founded and directed by Stefan Sutkowski. In addition to staged productions, which since 1991 have included an annual Mozart festival and since 1993 a festival of Baroque opera, the Warsaw Chamber Opera also gives many concerts, with the emphasis on Polish music. Since 1992 it has also been associated with the foundation Pro Musica Camerata, which publishes music, and the Sutkowski Edition, which publishes books on music. The Warsaw Chamber Opera also houses a centre for the documentation of Polish music.

The music school of the Warsaw Music Society reopened in 1945, but in 1948 the state government closed down its higher education courses, and in 1950 it nationalized the school and severed its links with the Warsaw Music Society. In the autumn of 1945 the former conservatory reopened as the State Higher Music School. In addition, Warsaw had a series of music schools offering instruction at a lower level. In 1948 a department of musicology was established at Warsaw University under the direction of Zofia Lissa; in 1957 it became the Institute of Musicology of Warsaw University. Musicological studies have also been undertaken by the Catholic Academy of Theology, which was renamed the Cardinal Wyszyński Catholic University in 1999. A department for the history and theory of music was established within the Institute of the Arts in 1949; initially this came under the Ministry of Culture and Arts, but since 1959 it has been part of the Polish Academy of Sciences and is devoted to musical research. For many years the department was directed by the influential musicologist J.M. Chomiński. It publishes the quarterly journal *Muzyka*.

The Fryderyk Chopin Institute also reopened in 1945; since 1950 it has been known as the Towarzystwo im. Fryderyka Chopina (Chopin Society). The society organizes concerts and exhibitions, and is sponsored by the state to organize the Chopin International Piano Competition. It houses a library, an archive and a museum (1955) containing autographs, facsimiles, letters and other Chopin memorabilia. It has published the *Rocznik chopinowski* ('Chopin Yearbook') since 1956, and *Chopin Studies* since 1985. The other Chopin organization in Warsaw is the Polska Academia Chopinowska (Polish Chopin Academy, founded in 1994), which is an association of musicians and musicologists; it organized the 1999 International Chopin Congress. In 1945 the Warsaw Music Society resumed its activities, although with a slight change of focus, promoting musical instruction for amateurs and concerts in schools and other institutions. The society possesses the city's largest collection of musical materials from the 19th and 20th centuries. From 1945 Warsaw has been the home of the Union of Polish Composers, the successor of the Association of Polish Composers. Since 1947 the union has also had a section for musicologists. Among the other important musical associations based in Warsaw are the Stowarzyszenie Polskich Artystów Muzyków (Association of Polish Musical Artists), founded in 1956, the Stowarzyszenie Lutników (Association of Luthiers), founded in 1954, the Polish section of the International Music Council and the Polish section of Jeunesses Musicales. The fortnightly journal *Ruch muzyczny* is also published in Warsaw. Since World War II Warsaw has also been the home of many leading Polish composers, including Sikorski, Lutosławski, Grażyna Bacewicz, Panufnik (until 1954), Tadeusz Baird, Kazimierz Serocki, Włodzimierz Kotoński, Zygmunt Krauze and Paweł Szymański.

BARBARA PRZYBYSZEWSKA-JARMIŃSKA (1–3), ZOFIA CHECHLIŃSKA (4–6)

Warszawa (Pol.). *See* WARSAW.

Wartel. French family of musicians.

(1) Pierre François Wartel (*b* Versailles, 3 April 1806; *d* Paris, 3 Aug 1882). Tenor and singing teacher. He was a pupil of Halévy at the Paris Conservatoire, which he entered in 1825, and shortly afterwards went to the Institution Royale de Musique Classique et Religieuse to study with Choron. He returned to the Conservatoire in 1828 to study singing with Davidde Banderali and Adolphe Nourrit, and was awarded the *premier prix* for singing the following year. He joined the Opéra in 1831 and remained there for around 12 years, singing major roles but never achieving star billing; Pitou argues that he was undervalued. He created the role of Don Gaspar in Donizetti's *La favorite* (1840) and sang Ottokar in the Berlioz version of *Der Freischütz* (1841). In 1833 he married the pianist Thérèse Andrien, and on leaving the Opéra he undertook a series of successful concert tours in Berlin, Prague and Vienna. After several years abroad, he returned to Paris and devoted himself to teaching singing and was considered one of the finest teachers in France; his pupils included Christine Nilsson, Mlle Hisson and, most notably, Zélia Trebelli. Wartel's repertory was unusually wide: his contact with Nourrit encouraged him to champion Schubert's music; he also sang 16th-century music in Fétis's Concerts Historiques (1832–3).

(2) (Atale) Thérèse (Annette) Wartel [née Andrien] (*b* Paris, 2 July 1814; *d* Paris, 6 Nov 1865). Pianist, teacher, composer and critic, wife of (1) Pierre François Wartel. Educated at the Paris Conservatoire, she studied with Louis Adam and Fromental Halévy, winning prizes in piano and practical harmony in 1830. From 1831 to 1838 she worked at the Conservatoire as an accompanist and teacher of solfège, but was never promoted to the piano department. During several years in Vienna in the 1840s

she acted as correspondent for the *Revue et gazette musicale*. On her return to Paris she became a central figure in chamber music circles and was renowned particularly as an interpreter of Beethoven, though for her concerto appearance at the Société des Concerts du Conservatoire on 26 January 1845 she chose Mozart. Preceded by Mme Brod (piano, 1828) and Louise Mattmann (piano, 1844), she was only the third female soloist to be engaged since Habeneck's institution of the Conservatoire series.

The extent of her compositional output is not known. Three works only, all for piano, were published in Paris and Leipzig: *Six etudes de salon* op.10 (1850) dedicated to Halévy, an Andante op.11 (1851) dedicated to Louise Farrenc, and an undated Fantasie. Wartel's style combined a late Classical sense of harmonic procedure, motivic working and phrase structure with the forms and rich pianistic textures of her time. Her last major publication was a series of essays on interpretative issues in Beethoven's piano sonatas.

(3) Louis Emile Wartel (*b* Paris, 31 March 1834; *d* after 1865). Singer and teacher, son of (1) Pierre François Wartel and (2) Thérèse Wartel. He sang at the Théâtre-Lyrique in Paris from 1858 until 1865, then established a singing school of his own.

ALEXIS CHITTY/MAURICE J.E. BROWN/KATHARINE ELLIS (1, 3), KATHARINE ELLIS (2)

Warwick, (Marie) Dionne (*b* East Orange, NJ, 12 Dec 1940). American popular singer. One of the leading female pop-soul singers of the 1960s, her partnership with songwriters Burt Bacharach and Hal David formed an innovative blend of sophisticated pop and subdued gospel-inflected singing, and produced eight top ten hits, including *Anyone Who Had a Heart* (1963), *Walk on by* (1964), *I say a little prayer* (1967), *Do you know the way to San Jose* (1968) and *I'll never fall in love again* (1970). Bacharach and David's songs, which contained metre changes, modulations, modal melodic turns and lyrics of understated urban vulnerability, were ideally suited to her vocal style, which maintained a restrained emotional intensity while gradually reducing the overt gospel influences. After parting with Bacharach and David, her recording met with little success in the 1970s, with the exception of *Then came you* (WB 1974), recorded with the Spinners and produced by Thom Bell. The Barry Manilow-produced album, *Dionne* (WB 1979), sold a million copies and yielded the hit singles *I'll never love this way again* and *Déjà Vu*. Her biggest hits of the 1980s were collaborations with other singers: duets with Luther Vandross (*How many times can we say goodbye*, 1983) and Jeffrey Osborne (*Love Power*, 1987), and an all-star quartet formed with Elton John, Gladys Knight and Stevie Wonder for *That's what friends are for* (1985), a benefit record for AIDS research and a number one hit in the US pop and rhythm and blues charts. Her recordings in the 1990s aroused little interest despite a duet with her cousin, Whitney Houston, on *Friends Can Be Lovers* (1993), an album also featuring a reunion with Bacharach and David.

DAVID BRACKETT

Warwick, Thomas (*fl c*1620–50). English keyboard player and composer. He may have been the dedicatee of one of Thomas Tomkins's *Songs* (1622). In 1625 he was appointed organist of the Chapel Royal, and court musician 'for the virginals', both in succession to Orlando Gibbons; his last recorded court payment was in January 1649/50. Only one keyboard piece bears his name: *Mr Warwicks Mask* in *US-NYp* Drexel 5612 (ed. in CEKM, xliv, 1982). According to Hawkins (p.585) Warwick composed a song of 40 parts which was performed before Charles I in about 1635. Two surviving anthems in manuscripts from about 1625 may be by him, or by Thomas Warrock. (It is possible that Warwick was Warrock's son; it is unlikely that they were one and the same, as has sometimes been suggested.)

ALAN BROWN

Waschon, Pierre. *See* VACHON, PIERRE.

Washboard band. A black American instrumental group that uses a scraped idiophone in the form of a domestic washboard or 'rub-board' as a rhythm instrument. The board is played by drawing a nail, fork or thimbles over the corrugations to produce a loud, staccato rhythm. Cowbells, woodblocks and improvised metallophones were often attached to add tonal variety. Some washboard players placed two boards back-to-back and sat astride them while playing with both hands. Early washboard bands also included string instruments and were frequently augmented by other improvised instruments such as a washtub bass (probably derived from the African ground bow), comb-and-paper or kazoo as well as a harmonica. They are closely related to the children's 'spasm bands' of New Orleans; the one led by Stalebread Lacoume in 1897 was the best documented but it may not have included a washboard player. Typical performances by folk washboard bands are *Diamond Ring* (1930, Gen.) by Walter Taylor and the Washboard Trio, and Chasey Collins's *Atlanta Town* (1935, Bb).

Washboards were frequently used to accompany blues vocalists, and at least one singer, Washboard Sam (Robert Brown), played a washboard while taking vocal parts, as on his *Rack 'em Back* (1938, Bb) or *Levee Camp Blues* (1941, Bb). Almost alone among folk instruments the washboard was sometimes used by jazz bands, examples being Floyd Casey's crisp and forceful rhythms on numerous recordings by Clarence Williams, including *Beer Garden Blues* (1933, Voc.), and Jimmy Bertrand's driving accompaniments to Louis Armstrong with Erskine Tate's large Vendome Orchestra on *Stomp Off, Let's Go* (1926, Voc.). In the early 1930s the related groups of the Washboard Rhythm Kings and Washboard Serenaders recorded extensively, often with two trumpets and three reed instruments. In the 1950s the washboard was the favoured instrument of the 'skiffle bands', but its novelty soon declined and the instrument returned to the folk

Washboard band with washboard, homemade percussion, kazoo and guitar, c1940

idiom of blues. In the postwar years zydeco bands frequently used washboards. The most recent development has been the wearing of a corrugated metal vest, played with thimbles. Cleveland Chenier was the most notable exponent of this technique, as on *Zydeco et pas sale* (1965, Arhoolie) by his brother, the accordion player Clifton Chenier.

PAUL OLIVER

Washburn, George. A trademark of the Lyon & Healy Co. of Chicago, a musical merchandise business founded in 1864 by George Washburn Lyon and Patrick J. Healy. 'George Washburn' was applied to their better fretted instruments from about 1890. The Lyon & Healy *Catalog of Musical Merchandise* (Chicago, 1898) lists 28 different styles of 'Washburn' guitars at retail prices from $15 for the plainest standard instrument to $145 for a 'No.399 Grand Concert Size' which had elaborate mother-of-pearl inlay. Mandolins, mandolas, banjos as well as zithers are also shown and, in a 1927 advertisement, ukuleles. Some time about 1928 the trade name 'George Washburn' and the musical merchandise activities other than piano and harp manufacture were acquired by the Tonk Bros. Co., which continued to sell instruments under the name into the 1930s. The Tonk Bros. Co. was acquired by C.G. Conn Ltd in 1947.

In 1973 the trade name and production inventory was purchased by Beckman Musical Instruments, the American distributor for the Japanese electronics firm Roland. It was again sold in 1976 to the Chicago firm Fretted Industries, Inc., which in 1978 announced the production in Japan of instruments bearing the Washburn name. After a reorganization in the 1980s, the firm became known as Washburn International, marketing a wide range of guitars, other string instruments and sound equipment under the Washburn, Oscar Schmidt, Soundtech and Randall trade names. At the end of the 20th century most of the production was based in Korea, with some instruments at the top end of the range manufactured in the USA.

JAY SCOTT ODELL

Washington, DC. Capital city of the USA. In the past Washington was less conspicuous as a musical centre than one might expect from a city of its importance, in part because of the lack of adequate performance facilities. Since World War II, however, the cultural life of Washington has grown significantly, and it has become one of the most active musical centres in the USA.

A unique aspect of Washington's musical life has always been the prominent role of the federal government. In the 20th century government funding, channelled through such organizations as the Library of Congress, the Smithsonian Institution, Wolf Trap Farm Park and the John F. Kennedy Center for the Performing Arts, has enriched the city's musical life. Another important, if unrecognized, element in the city's cultural life has been the prominent black American community. In the early 20th century Washington had the largest urban black American population in the country; the extensive middle- and upper-class black community gave the city the reputation of the 'undisputed center of American Negro civilization' (Green, 1962–3). Cultural and intellectual organizations supported by this other half of Washington – which (until the mid-20th century) were mostly separate and distinct from the parallel organizations of official Washington – had a significant impact on the musical life of the city.

1. Opera. 2. Choral music. 3. Concert life. 4. Military bands. 5. Vernacular traditions. 6. Libraries and educational institutions.

1. OPERA. The earliest known musical theatrical works produced in Washington were ballad operas, performed in the first two decades of the 19th century by a Philadelphia troupe. The first European opera was Rossini's *Il barbiere di Siviglia* (in English), performed in 1836. Opera productions in the 1830s and 40s, mostly in the National Theatre, were of the standard bel canto repertory. In the second half of the century most of the dramatic fare in Washington consisted of operettas, musical comedies and grand opera. The latter were presented by various touring companies (including the Metropolitan Opera of New York); as early as 1872, however, a local black company was organized and mounted successful productions. In the 1880s and 90s serious opera was presented at Albaugh's Opera House, the Lafayette Square Opera House, the Academy of Music and the Columbia Theater.

In the earlier part of the 20th century there were local opera companies such as the Washington Community Opera (founded 1918; known as the Washington National Opera Association from 1923 to 1928) and the National Negro Opera Company (1943–62, with chapters in other cities). The most prominent opera company in modern Washington started in 1956 as the Opera Society of Washington, and performed for its first 15 years at the Lisner Auditorium of George Washington University (cap. 1500); renamed the Washington Opera, the company moved in 1971 into the Opera House of the Kennedy Center (cap. 2334). The directors have been Ian Strasfogel (1972–4), George London (1975–9), Martin Feinstein (1980–95) and Plácido Domingo (since 1995). The society eventually achieved an international reputation and grew dramatically; by the mid-1990s the season was expanded to 79 performances and popularity was at an all-time high. The Washington Opera mounts many of its own productions, has given several American and world premières and regularly engages prominent guest conductors. The company is supportive of younger artists and is committed to the performance of operas by American composers. Performances have also been given in two smaller halls at the Kennedy Center: the Eisenhower Theater (cap. 1100) and the Terrace Theater (513).

2. CHORAL MUSIC. One of the city's first choral societies was the Washington Sängerbund (founded 1851); still in existence, it is the city's oldest choir. Numerous other amateur (and mostly short-lived) choral organizations were active during the 19th century; these included the Washington Philharmonic Society (founded 1850), the Washington Choral Society (1869 – mid 1880s), the Wilheling Club (1886–9), the Apollo Glee Club, the Mozart Choral Society, the Harmony Club and others. Several important choral societies were also supported by the city's black American community, including the Amphion Glee Club (established in 1891), the Washington Permanent Chorus (founded 1899), the Coleridge-Taylor Choral Society (established in 1901) and the Burleigh Choral Society (1903).

The Cathedral Choir of Men and Boys (of the Cathedral of St Peter and St Paul) was once the city's principal choir (1912–37); the Cathedral Choral Society (founded 1942) is still associated with the cathedral. Four other large choral organizations (founded in the 1960s and 1970s) are active in the metropolitan area: the Paul Hill Chorale, the Oratorio Society of Washington, the Choral Arts Society and the University of Maryland Choir. Each presents concert seasons and most appear with the National SO. Several smaller choral groups, including the Norman Scribner Choir, the Washington Singers, the Wolf Trap Singers and the Washington Bach Consort, specialize in chamber repertory; there are also numerous community and collegiate groups. Other religious institutions that offer music are the National Shrine of the Immaculate Conception, the National Presbyterian Church, St John's (in Lafayette Square) and the Washington Hebrew Congregation. Washington is also a significant centre for black gospel music, which is performed in many of the city's black churches, notably the Bibleway Baptist Church. Hundreds of gospel-music concerts are given each year in the area by nationally known touring groups and by local quartets and ensembles.

3. CONCERT LIFE. Washington did not have a recital hall until 1925, when the Coolidge Auditorium (cap. 500), constructed under the auspices of the Elizabeth Sprague Coolidge Foundation, opened in the Library of Congress. The auditorium, which was closed from 1988 to 1997 for renovation, is an ideal setting for chamber music. Symphonic music was first accommodated in the city's theatres and at Constitution Hall (cap. 3811). In 1971 the John F. Kennedy Center for the Performing Arts was opened, filling a long-acknowledged vacuum in the cultural life of the capital. In addition to the Opera House, the Eisenhower Theater and the Terrace Theater, the centre features a Concert Hall (cap. 2448) and the American Film Institute Theater, all adjoining a grand foyer (see illustration). The concert hall was completely renovated between 1996 and 1997 as the first stage of a projected ten-year renovation of all of the centre's performing spaces. One of the nation's busiest performing arts complexes, each year the Kennedy Center presents approximately 2800 performances for audiences of nearly two million.

Free concert in the grand foyer of the John F. Kennedy Center for the Performing Arts, Washington, DC, opened 1971

Attempts to found a permanent symphony orchestra in Washington were not made until the early 20th century. The Washington SO, which performed in the National Theatre, was established (1902–5) through the efforts of Reginald De Koven; the ensemble was reactivated for several seasons (1909–12). During this time Washington regularly hosted visiting orchestras from other cities that performed in local theatres. The National SO began its career in 1931 with a concert at Constitution Hall under the direction of Hans Kindler, who was succeeded by Howard Mitchell (in 1949), Antal Dorati (1970) and Mstislav Rostropovich (1977); in 1996 Leonard Slatkin took over as the music director of the orchestra. Since 1971 the ensemble has performed in the Kennedy Center Concert Hall. The Gallery Orchestra (founded 1943) presents free concerts in the summer in the National Gallery of Art. The ensemble includes choral and chamber works in its series and has given world premières of approximately 1000 compositions (primarily by American composers) and Washington premières of several thousand works. Richard Bales founded the orchestra and served as conductor until 1985; he was succeeded by George Manos.

The Kennedy Center sponsors a large number of concert and chamber music series, hosts ballets and opera companies and visiting orchestras, and sponsors various award competitions, including the Friedheim Awards (since 1978) and the Thelonious Monk International Jazz Competition (founded 1986). The American Ballet Theatre (Mikhail Baryshnikov, director) also performs in the Opera House. The Washington Performing Arts Society (founded in 1965), the city's largest independent concert-promoting organization, also arranges concerts at the Kennedy Center by internationally renowned performers.

The Library of Congress has been in the forefront of chamber music activity in Washington; after a nine-year hiatus while the Coolidge Auditorium was undergoing renovation, the library re-established its weekly free concert series in late 1997. The Juilliard String Quartet has been the quartet-in-residence since 1962, and performs on the five Stradivari instruments in the library's collection. Since 1981 the Beaux Arts Trio has also been affiliated with the library. The library also sponsors various concerts, series and festivals, generally built around a particular theme or composer whose manuscripts are in the library's collections; in recent years the events have become increasingly diverse and include performances of classical and popular music, jazz, American musical theatre and dance.

The Division of Cultural Hisory, part of the Museum of American History of the Smithsonian Institution, has one of the largest instrument collections in the world. Many of the instruments are used in the Smithsonian's concerts, reflecting an interest in fostering authentic performances. Ensembles supported by the Smithsonian, including the Smithsonian Chamber Players, the Castle Trio, the Smithsonian Chamber Orchestra, the Smithson String Quartet and the Smithsonian Jazz Masterworks Orchestra, perform in the Hall of Musical Instruments (cap. 300) or in Baird Auditorium (850). The Smithsonian also sponsors concerts of popular or traditional music, instrument demonstrations, performances of musical theatre and numerous other concerts and symposia.

There are numerous concert series in the metropolitan area, held at various churches, museums and government facilities. The Corcoran Gallery of Art sponsors performances by the Contemporary Music Forum (founded 1974),

and by the Cleveland and Tokyo string quartets, which utilize the gallery's Stradivari and Amati instruments. Other series of chamber music are presented by the 20th Century Consort (founded in 1977), in residence at the Hirshorn Museum; the Emerson String Quartet (1978), at the Renwick Gallery; the Romantic Chamber Ensemble; the Theater Chamber Players; and the Folger Consort (in residence at the Folger Shakespeare Library since 1977).

There are numerous music festivals held in Washington throughout the year, including the American Music Festival at the National Gallery of Art, the longest-running American music festival. In addition, free concerts proliferate in Washington during the summer months, made possible largely through federal grants: amateur groups from all over the country perform on the Ellipse south of the White House and on the steps of the Capitol during the summer; the National SO performs occasionally on the Capitol lawn and in the city's parks; big-band concerts are held at the Washington Monument; and folk, Irish, country and popular music can be heard at the C & O Canal National Historical Park. In 1971 the US Department of the Interior opened the Wolf Trap Farm Park for the Performing Arts, the only such national park in the USA. Located about 32 km west of the city, Wolf Trap has two performing spaces: the Filene Center (cap. 7024, including the lawn) and The Barns, seating 352.

4. Military bands. During the 19th century martial music was particularly important to Washington. The US Marine Band (founded 1799) was the city's first musical organization; from 1880 to 1892 it was conducted by John Philip Sousa, a Washington native. The band was an important and ubiquitous presence in Washington musical life during the second half of the 19th century and for the first part of the 20th. Official ceremonies, parades, national holidays, dedications and similar public events have reinforced the importance of bands in Washington. Free concerts by the Army, Navy, Marine, Air Force or other military bands can be heard almost every evening during the summer around Washington. In no other city in the USA can so many band performances be heard on such a regular basis.

5. Vernacular traditions. The prosperous black American community of the late 19th- and early 20th-century Washington produced several prominent musicians who championed the black musical traditions of ragtime, syncopated music, black musical theatre and gospel. Included among these composer/peformers are Will Marion Cook, James Reese Europe, Ford Dabney and, most importantly, Edward (Duke) Ellington. Starting in the 1920s and extending through the 1950s and 60s, the spacious Lincoln and Howard theatres functioned as musical magnets in Washington's black American community, hosting the best of touring bands, orchestras and other ensembles, and attracting audiences of thousands from the black community.

Washington has also been an important nexus for bluegrass and country music since the 1940s and 1950s, and as early as the 1930s the city became a centre for the collection and study of American folk and traditional music. The Library of Congress's Archive of American Folk Song (established 1928) began in the 1930s to sponsor large-scale recording expeditions, mainly to the south, that produced important recordings of traditional performers and early jazz artists and valuable oral history accounts. In 1981 the archive was renamed the Archive of Folk Culture; it is one of the most significant collections of American folklife documents, manuscripts and recordings in the world. Other folklife establishments are also associated with the city: since 1949 the headquarters for the National Council for the Traditional Arts has been located in Washington, and every year since 1967 the Smithsonian Institution has held the popular Festival of American Folklife, which features the music and folk traditions of several different (American and world) cultural groups.

Since the 1970s there has been a dramatic growth in the music of various ethnic groups in the city, including salsa and other styles from Latin America and the Caribbean, Irish music, and the indigenous musical styles associated with Ethiopians (especially since 1981), Indo-Chinese (particularly Vietnamese and Cambodians) and Salvadorans. In the mid-1970s an indigenous Washington popular music style called go-go emerged in the black American community. Chuck Brown is an early artist associated with the style; from the mid-1980s several other bands, notably Experience Unlimited, emerged and attained some degree of national recognition.

Numerous halls regularly offer various types of popular and folk music concerts. Among these are two summer facilities, the Carter Barron Amphitheater in Rock Creek Park (cap. 4251) and the Merriweather Post Pavilion (cap. 5000 under the roof and 5000 on the lawn) in Columbia, Maryland, which draws heavily from Washington for its audiences. In late 1997 the Capital Center (renamed US Air Arena, cap. 18,756) in nearby Landover, Maryland, was augmented by the MCI Center (cap. 20,600, located in downtown Washington) as a major popular music performing space. The city's Convention Center (opened 1982) has two halls (cap. 3000 and 10,000) available for concert use. Musicals are presented in the Eisenhower Theater at the Kennedy Center, the National, Warner and Ford's theatres, the Arena Stage and at numerous suburban theatres. In 1990 George Mason University in Fairfax County, Virginia, opened a new centre for the arts; the facility includes a concert hall (cap. 2000) and the Harris Theater (521), classrooms, rehearsal halls and a studio. A similar facility, the Clarice Smith Performing Arts Center, is being constructed on the campus of the University of Maryland in College Park and is due to open in 2001.

6. Libraries and educational institutions. The Music Division of the Library of Congress was established in 1897, and has become the largest and most influential music library in the USA, with more than six million items in its collections. In addition to its Stradivari instruments, the library also owns the Dayton C. Miller Flute Collection, the largest collection of flutes in the world. The Archives Center of the Smithsonian Institution has acquired several extremely important music collections related to American music, including the Duke Ellington Collection, the Sam DeVincent Collection of Illustrated American Sheet Music and the Ella Fitzgerald Collection. Important music collections and research materials are also maintained by the Martin Luther King, jr, Library of the District of Columbia, the Folger Shakespeare Library, the National Archives and various other libraries.

There are eight large universities in the greater Washington area, and all offer degrees in music; six of the schools are located within the city. A conservatory was

established at Howard University (founded in 1867) in 1913, and eventually became the university's school of music. In 1960 the school merged with the departments of art and drama to become the College of Fine Arts; it offers bachelor's and master's degrees in music. In 1965 the Division of Music of the Catholic University of America (founded 1887) became the Benjamin T. Rome School of Music. The university offers both undergraduate and graduate degrees; the school also runs a summer opera theatre company. George Washington University (founded in 1821 as Columbian College and renamed in 1904) established a music department in 1961 and offers a variety of undergraduate and graduate degrees in music. In 1966 the American University (founded 1893) opened the new Kreeger Music Building, which houses the department of performing arts; a separate music programme was established within that department in 1977 offering bachelors and masters degrees. The University of the District of Columbia (established 1976) offers undergraduate music degrees. Georgetown University will offer a BA in music starting in 2001; since 1999 the Center for the History and Analysis of Recorded Music (CHARM), formerly at the University of Southampton (UK), has been located at Georgetown. Music programmes are also offered at the nearby George Mason University in Fairfax, Virginia, and the University of Maryland in College Park.

As the nation's capital, Washington is (or has been) home to several national music organizations that have funding programmes or grant awards to composers, performers, scholars, students and cultural organizations, including the American Symphony Orchestra League, the Music Educators National Conference (now in nearby Reston, Virginia), the National Endowment for the Arts and National Endowment for the Humanities and the National Institute for Music Theater. The National Association of Schools of Music is based in Reston, Virginia.

KATHERINE K. PRESTON

Washington, Dinah [Jones, Ruth (Lee)] (*b* Tuscaloosa, AL, 29 Aug 1924; *d* Detroit, 14 Dec 1963). American popular singer. She grew up in Chicago, where she directed and played the piano with her church choir. From the age of 15 she performed alternately in night clubs as a singer and pianist and in Sallie Martin's gospel choir. She was renamed Dinah Washington by the manager of the Garrick Stage Bar, where she was heard by Lionel Hampton, whose big band she subsequently joined (1943–6). Having recorded several blues hits in 1943, she embarked on a successful solo career from 1946. Washington's singing was characterized by high-pitched, penetrating sounds, precise enunciation, contrasts between tender understatement and gospel-inspired intensity, and an entrancing languor. Like Ray Charles, she could rework any type of material. From 1949 to 1955 her rhythm-and-blues, classic blues, pop and country recordings consistently reached the top ten on the rhythm and blues chart in the USA. *What a difference a day makes* (1959) marked her breakthrough into the general pop market, where she obtained several other gold records, some in duet with Brook Benton, before her early death from an accidental overdose of sleeping pills.

BARRY KERNFELD

Washington, University of. University in SEATTLE; its school of music was established in 1891.

Wasielewski, Wilhelm Joseph von (*b* Grossleesen, nr Danzig, 17 June 1822; *d* Sondershausen, 13 Dec 1896). German violinist, conductor and writer on music. He received his early musical education at home, and on 3 April 1843 became one of the first pupils of the Leipzig Conservatory, where his teachers were Mendelssohn, Hauptmann and David. After graduating in 1846 he played first violin in the Leipzig Gewandhaus, various theatre orchestras and in the Euterpe concerts. Following concert tours and a period in Halle playing under Robert Franz, in 1850 he went at Schumann's invitation to Düsseldorf, where he worked as a violinist and teacher, also becoming a family friend of the Schumanns and personal assistant and amanuensis to the composer. In May 1852 he moved to Bonn and conducted the recently founded Concordia choral society and later the Beethovenverein. Three years later he found a more advantageous position at Dresden, and began to concentrate on music research, without however giving up playing and teaching.

He published music criticism in the *Signale*, *Leipziger Zeitung*, *Dresdener Journal* and other papers and contributed many articles to periodicals. In 1869 he returned to Bonn as municipal director of music and became highly regarded as a conductor, but failed to obtain a university position. He retired in 1884 to Sondershausen, where he continued to teach music history at the conservatory and to write. He was decorated by the Duke of Meiningen in 1871 and was a member of the Accademia Filarmonica of Bologna.

Wasielewski composed some partsongs and a nocturne for violin and piano, but his eminence both as a performing musician and writer is the chief testimony to his extraordinary gifts. His comprehensive and objective biography of Schumann was the first definitive work on this composer, though it was tepidly received by Schumann's immediate circle and is occasionally marred by an overly formalistic approach to the music; he also wrote valuable books on early string chamber music and instruments, distinguished by their sensitive use of the available evidence. Some of his work appeared under the name Joseph Wilhelm von Wasielewski, apparently an earlier form.

GEORGE GROVE/DAVID CHARLTON

Wasitodiningrat [Tjokrowasito, Wasitodipuro, Wasitolodoro], **Kanjeng Radèn Tumenggung** [Ki] (*b* Yogyakarta, Java, 17 March 1909). Javanese gamelan musician and composer. He grew up in the Pakualaman court, where his father was gamelan musical director. Outside the court, Wasitodiningrat (known then as Tjokrowasito) performed with several famous gamelan groups, including Daya Pradangga, and in 1934 became gamelan musical director at the radio station MAVRO (Mataramsche Vereeniging Radio Omroep). He continued in this position during the Japanese occupation of Indonesia (1942–5) at Radio Hosokyoku gamelan and, after Indonesian independence, at the national radio station (Radio Republik Indonesia) in Yogyakarta. In 1962 he succeeded his father as gamelan musical director at the Pakualaman, and in 1964–5 led the Javanese gamelan musicians at the Indonesian Pavilion of the New York World's Fair. During the 1960s, Wasitodiningrat composed music for a new genre, the *sendratari* dance-drama, including the first performances held at the Lara Jonggrang temple complex in Prambanan. He taught at Konservatori Tari Indonesia (KONRI) and Akademi Seni Tari Indonesia (ASTI) and founded his own school for the study of vocal music (Pusat Olah Vokal Wasitodipuro). He also collaborated with choreographer Bagong Kussudiardjo and composed numerous light gamelan pieces (*lagu dolanan*) and experimental works (*kreasi baru*), many of which have become staples of the gamelan repertory. In 1971 he moved to Valencia, California, where he taught at the California Institute of the Arts until his retirement and return to Yogyakarta in 1992. While based in Valencia, he taught at a number of colleges and universities in California, and elsewhere in the USA and Canada.

WORKS
(selective list)

EXTENDED WORKS

Jaya Manggala Gita, 1952

MUSICAL ARRANGEMENTS FOR SENDRATARI DANCE-DRAMAS

Alleluyah; Arjuna Wiwaha; Bandung Bandawasa; Calonarang; Damar Wulan; Dewi Saraswati; Diponegoro; Hamlet; Kelahiran dan Kebangitan Kristus; Mangkubumi; Menuntut Balas; Nyai Ratu Kidul/Loro Kidul; Pangéran Mangkubumi; Ramayana 'Rara Jonggrang'; Samgita Nusantara; Samgita Pancasona; Sri Tanjung; Sumpah Palapa

R. ANDERSON SUTTON

Wassenaer, Count **Unico Wilhelm van** (*b* Delden, 2 Nov 1692; *d* The Hague, 9 Nov 1766). Dutch composer and statesman. He was born into one of the oldest and most influential families of the Dutch nobility and spent his childhood in his parents' house in The Hague and at Twickel Castle in Delden. He probably studied music with the organist, harpsichordist, composer and theorist Quirinus van Blankenburg in The Hague. From October 1707 until April 1709 he possibly accompanied his father on a mission to the Palatine Elector Johann Wilhelm in Düsseldorf. In September 1710 he matriculated in the University of Leiden and after completing his studies embarked on a grand tour which took him to England, Germany, France and probably Italy between 1714 and 1718. Between 1713 and 1715 he had contacts in The Hague with Duke Friedrich Ludwig von Württemberg, to whom he dedicated three sonatas for recorder and continuo. He was a close friend of Count Willem Bentinck, who also had a keen interest in music, and with him organized concerts which took place alternately in their homes in The Hague. At these concerts, held for a small circle of nobles, Carlo Ricciotti, known as Bacciccia, played first violin. It was for these gatherings, between 1725 and 1740, that van Wassenaer wrote his *Concerti armonici*, published in 1740 in The Hague by Carlo Ricciotti without the composer's name and with a dedication to Willem Bentinck. The *Concerti armonici* were reprinted in England with Ricciotti named as the composer. A manuscript score at Twickel Castle contains annotations in van Wassenaer's hand. In a manuscript dating from the beginning of the 19th century (in *US-Wc*, formerly owned by the composer Franciszek Lessel) the concertos are attributed to Handel, whose name was later covered by a label with the name of Pergolesi in the same handwriting. An early 20th-century manuscript (in *F-Pc*), also with an attribution to Pergolesi, was probably copied from the Washington source. The *Concerti armonici* acquired considerable popularity under Pergolesi's name, and have proved no less popular under the name of the real composer. The three sonatas for recorder and continuo follow the Corelli model, while the *Concerti armonici* reveal a strong personal stamp.

As ambassador extraordinary of the General States, van Wassenaer made diplomatic missions to France (in 1744 and 1746) and Cologne. Louis XV's court heard the music he wrote in France, and during his stay there he also composed a motet, *Nunc dimittis*. The French praised him as a 'grand compositeur: il accompagne fort bien' and considered his music 'presque aussi bonne que celle de Corelli'.

WORKS

VI concerti armonici, 4 vn, va, vc, bc (The Hague, 1740); ed. F. Caffarelli (Rome, 1940) [attrib. G.B. Pergolesi]; ed. in HM, cl, lxxxii, clix, cxlix; cliv, clv (1951–9) [attrib. C. Ricciotti or Pergolesi]
[3] Sonate, rec, bc, **D-ROu*; ed. A. Dunning and W. Brabants (Amsterdam, 1992)
Gebed voor de predicatie, **NL-DEta* [in an exemplar of G.F. Witvogel: *De zangwysen van de CL Psalmen Davids* (Amsterdam, 1731)]

Doubtful: Menuet van de Hr. van Opdam, De tweede menuet, *Hollantsche schouburgh en plugge dansen* (Amsterdam, 1718); Laudate Dominum, SSB, bc, *DEta*

Lost: Nunc dimittis, B; concs., fl, 3 vn etc.; 3 concs., 4, 5, 7 insts; sonata, vc, bc; sonata, 2 vn, bc

ALBERT DUNNING

Wassermann, Heinrich Joseph (*b* Schwarzbach, nr Fulda, 3 April 1791; *d* Riehen, nr Basel, 3 Sept 1838). German violinist and composer. He was the son of a village musician and studied with the Kantor Michael Henkel in Fulda, 1804–6, and with Spohr in Gotha, 1810–11. In 1811 he became a violinist in the court orchestra in Meiningen. He was subsequently conductor of the orchestra of the Allgemeine Musikgesellschaft in Zürich, 1817–20, first violinist at Donaueschingen, 1820–29, and from 1829 conductor of the Concertgesellschaft at Basel. Between 1811 and 1836 Wasserman gave many concerts

throughout southern and middle Germany; he was also the first to introduce the symphonies of Beethoven into Switzerland. His own works include a *Quatuor brillant* op.14, a flute quartet op.18, variations and violin duos.

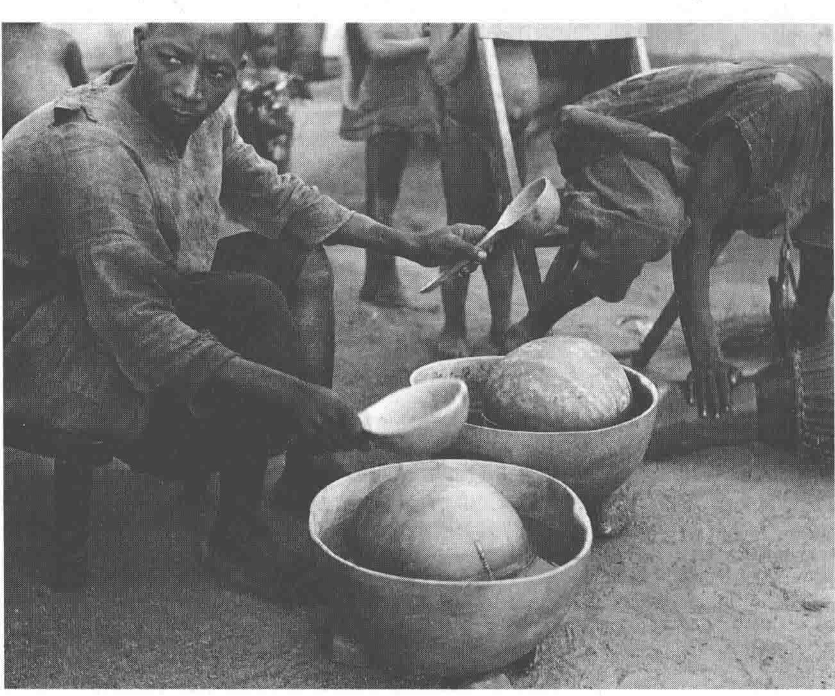
Wasserorgel (Ger.). *See* WATER ORGAN.

Water, John. *See* WALTER, JOHN.

Water-drum. A percussion instrument which makes use of the special sound-conducting qualities of water. There are two types: this article discusses the type without a membrane; for discussion of the type with a membrane, *see* DRUM, §I, 2(iv). Water-drums without a membrane are found in Africa and the African diaspora and New Guinea. The commonest type, used mostly by women over a wide area of the West African savanna region, is made by floating a half-gourd with its concave side face downwards in water within a larger vessel (half-gourd or pail); the floating piece is then beaten with a small spoon or stick (see illustration). The instrument is often played in pairs. The resultant sound, which is used rhythmically, sometimes in ensemble with other percussion instruments and usually as an accompaniment to song, combines the concussive click of two hard objects with a soft low-pitched tone. Sometimes water-drums are beaten by hand, as in reported cases where calabash hemispheres are simply laid floating face down in the shallows of a river. One origin tale relates that they were sounded thus by hunters to attract crocodiles and water lizards.

Examples of water-drums are the *assakhalebo* of the Tuareg, the *tembol* of the Kotoko people of Chad and the *dyi dunu* of the Bambara of Mali, last named being played by young women for domestic calendar rituals and at the death of an aged woman. Use for funeral rites has also been reported among the Kurumba of Upper Volta (Griaule and Dieterlen), in Haiti and in Cuba where the instrument is known as *jícara de jobá* (Ortiz).



In New Guinea the instruments have a hollow wooden body shaped like an hourglass drum, but with open ends. They are used like a stamping tube and are sounded against the surface of water during male initiation ceremonies in the Chambri Lakes.

PETER COOKE

Waterhouse, George (*b* ?Lincoln; *d* ?London, 18 Feb 1602). English musician and composer. An entry in the Chapel Royal cheque book records that he was from Lincoln and was sworn in as a Gentleman of the Chapel Royal in July 1588. The claim that he was organist of Lincoln Cathedral and the Chapel Royal is without foundation. According to Wood he spent several years studying practical and theoretical music and supplicated on 7 July 1592 for the degree of BMus at the University of Oxford. He is remembered for his extraordinary skill in the art of canon, which he demonstrated in his 1163 canons on the plainsong *Miserere*. Two manuscript copies belonged to Henry Bury, of Bury, Lancashire, who bequeathed them to the Universities of Oxford and Cambridge, with the request that they be 'kept or published in print for the credit of Englishmen and for the better preserving and continueing of that wonderful work'. In the Cambridge copy (*GB-Cu* Dd.iv.60) the canons are numbered in a rather confusing manner but are arranged in groups. They are all written in score, with the plainsong *Miserere* notated at the top of each page; except for a few three- and four-part canons (on ff.198ff) they are all of the 'two

Water-drum of the Maninka people, Guinea, West Africa

in one' kind. The copy of the canons bequeathed to Oxford is no longer traceable. Morley warmly praised Waterhouse's gigantic undertaking: 'my friend and fellow, Mr. George Waterhouse, upon the same plainsong of "Miserere" for variety surpassed all who ever laboured in that kind of study' and hoped that the canons could be published, 'for the benefit of the world and his own perpetual glory'; they never were published, however. Later, in the peroration to his book, he returned to 'those never enough praised travails of Mr. Waterhouse, whose flowing and most sweet springs in that kind may be sufficient to quench the thirst of the most insatiate scholar whatsoever'.

SUSI JEANS/JOHN MOREHEN

Waterhouse, William (Robert) (*b* London, 18 Feb 1931). English bassoonist. He studied at the RCM under Archie Camden and began his career in the Philharmonia Orchestra. He played with the Royal Opera House Orchestra, 1953–5, and as first bassoon in the Italian-Swiss Radio Orchestra in Lugano, 1955–8. He became first bassoon of the LSO in 1958 and from 1964 to 1982 was first bassoon of the BBC SO. In 1966 he was appointed professor of bassoon at the RMCM. He joined the Melos Ensemble in 1959, and with them has made many recordings and toured Europe and the USA, appearing as soloist there and in Britain, where he is widely regarded as a leading exponent of his instrument. He has been visiting professor at faculties in America, Canada and Australia, and has been a jury member for international competitions. Several composers, including Gordon Jacob, Stanley Weiner, Jean Françaix and Elliot Schwarz, have dedicated works to him. He has published a bibliography of bassoon music (London, 1962), and has edited several works for bassoon. Waterhouse has formed a collection of bassoons, which was exhibited at the 1983 Edinburgh Festival; his catalogue of the collection, *The Proud Bassoon* (Edinburgh, 1983), traces the historical development of the instrument.

LYNDESAY G. LANGWILL/R

Water key (Fr. *clef d'eau*; Ger. *Wasserklappe*; It. *chiave d'acqua*). A small sprung, pivoted lever on brass instruments (though seldom on horns), with an attached pad covering a small hole, used to release moisture trapped inside the instrument. The hole may be opened by depressing the touchpiece of the key while blowing silently into the instrument. Some instruments have more than one water key. Though the provenance of the device is uncertain, there was a water key on the hibernicon, a contrabass bass-horn patented in 1823 by J.R. Cotter of Co. Cork. A water key also features in the Stuckens 1826 French patent specification of an omnitonic horn (Morley-Pegge, 59; *see* SAX). Leopold UHLMANN patented a water key for a valve trombone in Vienna on 12 July 1830 (Dahlqvist, 111–12 and fig.1). Jean-Louis HALARY patented the 'Siphon' water key for the trombone in Paris in 1845. A recent and successful invention has been the Amado water key, used by the GETZEN CO., USA.

DAVID K. RYCROFT, REINE DAHLQVIST, EDWARD H. TARR

Waterman, Christopher A(lan) (*b* Fresno, CA, 16 Sep 1954). American ethnomusicologist, son of the ethnomusicologist Richard A. Waterman. After completing the BMus in Boston, he went on to study ethnomusicology with Bruno Nettl at the University of Illinois, taking the doctorate in anthropology in 1986 with a dissertation on *juju*, for which he carried out extensive field research with urban Yoruba musicians in Nigeria. He taught at the University of Washington, Seattle (1985–96), and was then appointed professor at UCLA. His scholarly interests have focussed on 20th-century change in west African popular music, the popular music culture of the USA, music and social identity, the history of jazz, and the history of ideas in African music research. Waterman is also a professional jazz musician (bass) and the leader of west African popular music ensembles in the USA.

BRUNO NETTL

Waterman, Richard Alan (*b* Solvang, CA, 10 July 1914; *d* Tampa, FL, 8 Nov 1971). American ethnomusicologist. After completing his undergraduate studies at Santa Barbara State College (1937), he obtained the MA in anthropology at Claremont State College (1941), and took the doctorate under M.J. Herskovits at Northwestern University in 1943. His subsequent appointment to the Northwestern anthropology faculty marked the introduction of the field of ethnomusicology to the American Midwest. He taught at Wayne State University (1957–65) and subsequently at the University of South Florida. His most extensive field research was carried out with the people of Yirkalla, northern Australia, but his research interests centred on the music of the African diaspora, particularly of Afro-Cubans and Cuban-Americans, and on jazz in its social and historical context. He was also a distinguished jazz musician, frequently performing on the double bass throughout his academic career.

Waterman's publications are modest in number, but they cover a variety of subjects and approaches and are regarded as significant, innovative and influential. His

greatest contributions were the interpretation of black American music using the concept of syncretism, the introduction of research in urban American subcultures and the assembling of major bibliographies.

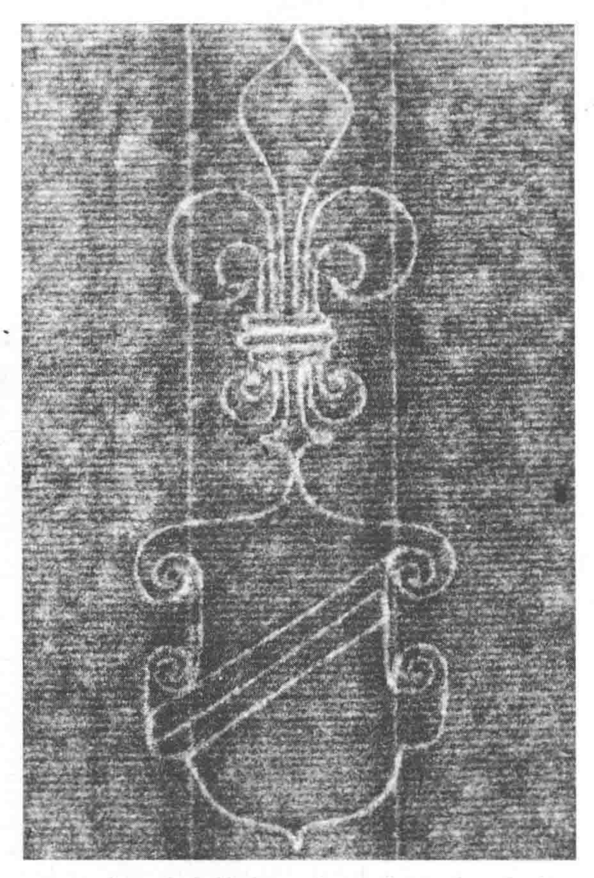
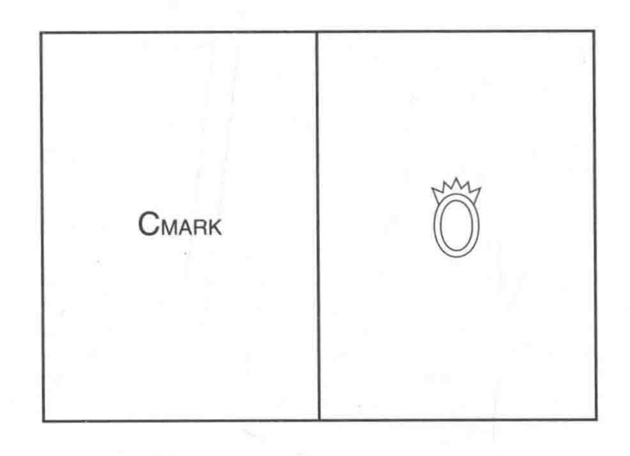
Watermarks. The traces left in paper by the use of designs in the moulds or belts ('wires') used for its manufacture. These usually show as a thinning of the paper's texture when a sheet is held up to the light. Marks have a history of over 700 years in the West, and continue to be used to the present day (especially in currency). Since marks were used as identifiers of the paper, and since they vary considerably over time and place, they are of great value to the scholar attempting to date or localize manuscripts.

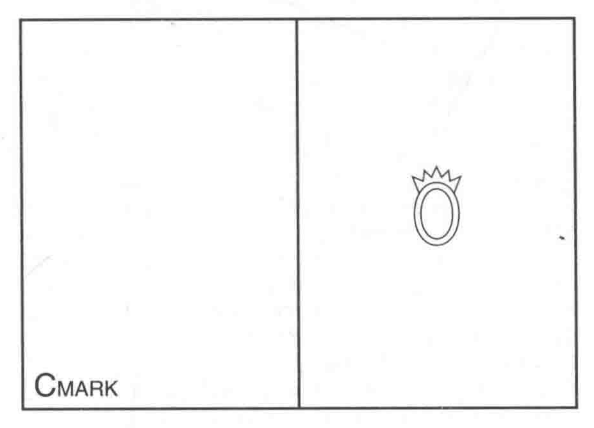


1. Character and production. 2. History and styles. 3. Use in musical research.

1. CHARACTER AND PRODUCTION. Paper from past periods is conventionally divided into two large categories, roughly corresponding to the manner in which it was made, with a transition from the earlier phase to a mechanized phase taking place around 1800. Earlier papers, called 'laid', were made by hand, a sheet at a time. The same process is still followed for some handmade papers: it involves dipping a wire 'mould', designed like a sieve, into a vat of paper pulp, and then letting the excess water drip through the mould before the paper is laid on a pile, or 'post', to dry.



The mould is made with wires, which produce the visible thinning of the paper as the pulp is pulled down into the spaces between them by the weight of the escaping water. A sheet of paper may show up to four elements of these marks, of which two are usually referred to as the watermark and the countermark. The other two, almost always to be found in handmade paper, are the traces of the basic structure of wires in the mould. Laid-lines, which are formed by the laid-wires that support the paper pulp in the mould, are close together and fine (reflecting the thinness of the wires), and run parallel to the long sides of the original sheet of paper. Chain-lines, at right angles to the laid-lines, are thicker and further apart; they are formed by the stronger chain-wires, acting to keep the laid-wires in place, and run parallel to the short sides of the sheet. The spacing of these sets of lines is critical to the quality of the paper, producing thicker or thinner results from the same vat of pulp. Typical spacings involve as many as 15 to 20 laid-lines to an inch, with chain-lines spaced perhaps one and a half inches apart, and closer at the edges of the sheet. Measurements vary from maker to maker, from one paper-type to another and even from mould to mould of the same mark.



The watermark proper is produced in the same manner, by a wire design, sewn (or sometimes soldered) to the chain-wires of the mould (fig.1). It is usually in the middle of one half of the sheet of paper: this means that it lies in the middle of a page when this sheet is folded once to make a standard bifolio. Any countermark will appear in the other half of the sheet of paper, either again in the middle or at the lower outer corner (fig.2). At certain times papers were made with a single, often larger mark placed in the centre of the sheet.

Once the pulp has been shaken down in the mould and a large part of the water has drained through (a process of a few seconds), a second craftsman takes the mould and turns the sheet of paper over on to the 'post' to be pressed (by the weight of additional sheets) and begin the drying process. Between each two sheets of paper is a piece of felt. The result is that a sheet will often show slightly different textures on its two sides, one being indented by the wires of the mould against which it was pulled by the escaping water, the other reflecting the texture of the felt placed above it. While the difference is

1. Beta-radiograph of a blank page showing the 'Strasbourg bend' (named after the arms of that city), one of the more common 18th-century watermarks; note the horizontal laid-lines of the mould and the vertical chain-lines which kept them in place

2. The two normal positions for watermarks and countermarks, with paper folded to produce a book in folio

hard to detect in many papers, in others, including much good-quality paper over 500 years old, there is a significantly different 'feel' to the two sides.

While the second man turns the paper out of the mould, the first takes another mould and dips it into the vat of pulp. Almost all paper was made this way, with two alternating moulds. The two carry marks that were intended to be identical – the same basic measurements for the placing of laid- and chain-lines, and the same design for the watermark and possible countermark. However, the two can always be distinguished, for two reasons: it is impossible to make a design in bent wire so that the two copies are identical, or to attach it in precisely the same manner to two different moulds; and both chain-lines and watermark tend to slide around a little under the repeated pressure of the water as thousands of sheets of paper are made. The two marks, used together, are now called 'twins' (Stevenson, 1951–2).

While almost all handmade paper uses this style of moulds, a development of the second half of the 18th century introduced moulds in which the wire mesh was woven into a fine mat. This produced a 'wove' paper, in which the chain-lines were not present, and indeed a mark was not always present, either. The result is a paper with a more even surface, showing a texture, when held to the light, akin to very fine knitting. These papers were not always popular at first: they were better for printing, but many individual purchasers preferred the 'old paper with the lines' (*Rees' Cyclopedia*, 1819–20). Papers from the new moulds survive in printed music from the years around 1800, particularly in English editions.

However, experiments in developing a paper-making machine began late in the 18th century, and the first was perfected in England in 1803–4 by the Fourdrinier brothers. This and its successors used a continuous belt, of woven wires or a similar surface, over which the paper-pulp flowed (the belt was originally called a 'web' and now a 'machine-wire' or 'wire', with the word 'web' reserved for the actual strip of paper-pulp on the wire). Water escaped through the wire, in the same manner as through a mould. The size of a sheet of paper was now no longer defined by the size of the mould, and its maximum not restricted to what a man could comfortably hold. While at first sheets were cut by hand from the long strip, after coming from the paper-making machine, ridges were soon added to the wire, defining the sheet size, which could be as large or as small as needed. Continuous rolls of papers, as now commonly seen in newsprint, allowed for the development of the rolling press.

These papers do not normally show the lines evident in handmade paper, for the weave of the belt is finer and more complex in design. Differences in this design give each modern paper its characteristic texture. 'Wove' papers can still carry watermarks, for designs can be placed on the 'wire' and will have the same effect as they did in the mould of handwork days. In addition, the web of paper is passed through rollers to force additional water out of it: these rollers can also have designs attached to them which will produce similar designs in the paper.

2. History and styles. While chain- and laid-lines are to be found in all early European papers, the earliest extant watermarks are found in papers made at Fabriano in Italy in 1282. They seem to have originated as indicators of the size and the quality of the paper. Early marks tend to be small and relatively simple in design: a flower-head, a bishop's crozier, crossed arrows or a simple tower. Other early marks consist of an initial (the letter F, perhaps for Fabriano, is found in 13th-century papers) which may indicate the maker's name. They could appear anywhere in the sheet; the standard position was established only slowly. The names of some of these designs have survived until recent times as indicators of size, such as elephant, foolscap or royal (using a crown).

Fairly early in the history of paper, certainly by 1400, other designs emerge, which evidently served a different function. Much paper from Rhenish areas shows devices associated with the cities of Basle or Strasbourg, and other localizing marks exist, including a range of Britannias. Other papers show the devices of local ruling families – a column for the Colonna family in Rome or a ladder for the Della Scala in Milan. Most would be placed as if the main watermark.

Individual paper mills also adopted specific identifying marks, sometimes as part of the watermark and sometimes as a countermark. The mill's name eventually became a frequent part of a mark. At the same time, marks were becoming larger and more complex: even by 1500, they often have more than one component, for example an anchor within a circle surmounted by a crown or star, or a bull's head with a cross above it. The details became more intricate: whereas a simple pot would be sufficient for 14th-century mills, later pots gradually acquired two handles, perhaps ribs and decoration on the body, or a band carrying the maker's name. A famous early complex

design comprised a bunch of grapes, with each grape made out of wire. Later bunches might add inscriptions on scroll-work or a crown above. Among the most intricate designs are complete heraldic bearings, with supporters, crest and motto, popular throughout Europe during the 18th century. These and similar large designs appear in the middle of the sheet rather than to one side. Examples can be found in Viennese sources of the late 18th century.

Countermarks were already used in the 15th century. They seem to have a more specific function, often being little more than a representation of the mill's name. Among the most famous is Whatman, named after an Englishman who began making high-quality paper in about the mid-18th century. Others carry initials or a simple device. The simpler of these marks are often placed in the lower corner of the sheet.

Dates also appear in watermarks: especially in France, from 1742 for some decades, and in England from about 1794 until the middle of the next century (LaRue, 1957), a simple impression of a year can be found in either of the countermark positions. In the French case, the date does not mean that the paper was made in that year, but in English sheet music the frequent marks do in fact indicate the year of the paper's manufacture.

Although watermarks are still present in much paper, they became rare in printed music by the middle of the 19th century, in part because many papers for printing ceased to have marks at all.

3. USE IN MUSICAL RESEARCH. Watermarks are of use to the scholar for three reasons. The user of the paper rarely if ever cared about the specific sheet of paper or the watermark it contained; so, first, the marks can be taken to represent something specific about the document, without the distractions of any outside social or cultural influences that could affect styles of handwriting and decoration. A second reason lies in the vast range of watermark designs and the extent to which they can be localized; and the third depends on the manner in which each mould was unique, leaving a watermark that would not be exactly duplicated, and relatively short-lived, deteriorating under the weight of endless sequences of water-sodden paper-pulp. The individual mould has a lifespan that will depend on circumstance, but moulds seem to have had a maximum life of about three or four years before they were replaced. In the same manner, the stock of paper held by a stationer would have turned over as frequently as possible (for simple commercial reasons), so that paper made with a particular mould would normally have left the papermill and the stationer's shop within a very few years of its manufacture.

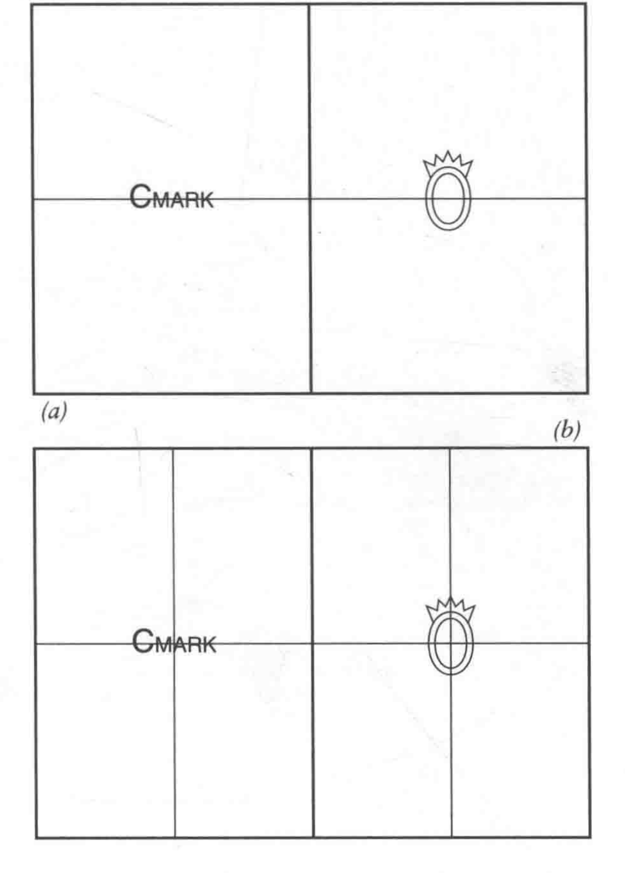
As a mould wears, so the mark will deform, becoming lop-sided, or sliding along the wires to different positions. Once a mould became useless (because some of the laid-wires had broken, for example), it was often replaced by another with basically the same design. This design could not have been identical with its predecessor, not with its twin. Paper produced from any 'single' mark, therefore, shows two sequences of continually changing details, whose course would be paralleled by other similar sequences from earlier or contemporary marks within the same design. Thus 'the same' mark will not normally appear in different sources, for there will virtually always be small variations in measurements, in the state of the mark or in design, implying the mould had endured the ravages of time or that a different mould was used.

Given that the user was not interested in the paper and its marks, it is possible, when studying the patterns that appear in a manuscript or a printed book, to decide whether the document is made up of one batch of paper or of more than one (thus suggesting a change of plan or a delay in production), and also to assign an approximate date and plausible locality to the paper used.

Although decisions on this latter point can be no more than a guide to the probable date or locality for the writing or printing on the paper, there are many occasions when this may be the best guide we have. There are whole repertories that survive with few dates: manuscripts of the Baroque cantata in Italy, or of parts for late 18th-century orchestral music, private manuscript anthologies of songs or piano music, printed editions of the 19th century or songsheets from the 18th. In these cases, a knowledge of the basic designs in use at any given period will help to narrow down the origins of the paper: reference books (among them Briquet, Churchill, Heawood and others listed in Pulsiano, 1987) provide guides to the distribution of marks over time. Most of the standard works have to be used with considerable caution, however. A prime reason is that they can only assign dates to a paper on the basis of the date when an individual sheet was used. For this reason, the most useful catalogues (those by Piccard are particularly valuable) are based on large archives from institutions which used great amounts of paper all the time. A major royal ducal court required continuous stocks of paper to keep its financial, diplomatic, legal and criminal records up to date, and thus can be relied on to have used paper soon after it was purchased. In addition, the documents in such an archive were always scrupulously dated. The result is that such an institution gives a guide to the date of manufacture of the paper, probably accurate within about a year. This condition rarely applies to musical or other cultural documents. No composer, musical scribe or amateur musician used paper in the same way, or could be relied on not to drag out of the cupboard sheets that had been lying around for some time; nor can it be assumed that the paper was local rather than acquired on a concert tour.

A second reason for caution with most illustrated catalogues of watermarks is that they consist of tracings (or even free-hand drawings) of marks, not always to life size, and often without the laid-lines and chain-lines to add precision to the picture. With the more common marks, therefore, it is difficult to be sure that a piece of paper to hand has a mark that can be called identical with any in the catalogue. The development of beta-radiography, using the isotope radiation to photograph the thickness of paper, has allowed for precise reproductions of watermarks and will produce an archive of reproductions that should overcome some of these problems. One of the few collections of such marks (Woodward, 1996) shows the extent to which individual variation is important. In music there has been little such detailed work so far, although Saunders (1989) has provided important data for the Trent codices, illuminating their history, and Dürr (1959) completely rethought the datings for Bach's cantatas. In the same way, paper and watermarks helped identify a complex of manuscripts, now dispersed, as having been copied at Mannheim (Wolf and Wolf, 1974).

Even a single manuscript can be placed in this manner: important conclusions have been drawn for the chronology of works by Mozart and Beethoven as a result of a number of studies (including Tyson 1975, 1980 and 1987). Watermark research can also help in the detection of forgeries, as in the case of Berlioz's letters (Holoman, 1974).



With dated paper the situation is easier: papers, other than French ones of the 1740s on, were probably made in the year marked on the mould, or at least within a year or two after. They will usually have been used for a manuscript or an edition soon after the date in the watermark. With engraved editions of music this is particularly important. Since engraved plates were rarely dated, and could be re-used for many years after their preparation (*see* BIBLIOGRAPHY OF MUSIC), often the only evidence for the date of an individual copy of a composition lies in the date preserved in the watermark. This may not date the first printing of the music, but it gives a *terminus ante quem* and also indicates that the compositions concerned were still commercially viable.

Another use of watermark and paper study is in detecting anomalies in the structure of a manuscript or printed edition. Since papers were available for a relatively short time, sheets of a different paper inserted in an otherwise homogeneous manuscript must often represent a later addition. While the composer or other non-professional copyist might have been using up old paper, adding odd sheets to an otherwise recently purchased batch, it is always probable that such changes stand for something more important. They have been used to indicate layers of compilation in a manuscript that apparently underwent changes of function, to show the order of composition of a major work (Mozart's *La clemenza di Tito*; Tyson, 1987, pp.48–60) or the insertions and deletions in a composer's autograph, and to indicate that a manuscript is actually a combination of several different sources bound together (Noblitt, 1974). Similar study has been used to connect fragments of a single manuscript (such as Beethoven's sketchbooks: Johnson, Tyson and Winter, 1985) that has been broken up and dispersed.

Exactly the same uses can be made of watermarks in printed books of music, with the proviso that allowance has to be made for the vastly greater use of paper involved in producing hundreds of copies. Nonetheless, careful study of paper anomalies can show that certain sheets were printed later, as replacements, or in fact belong to a totally different edition (Boorman, 1977), or alternatively, that undated editions were probably produced at a specifiable time (applied to English madrigalian and contemporary editions, Smith, 1996–7).

Manuscript study has one further use for watermarks. Almost invariably, the original sheet of paper is folded at least once before it is used. This often moves the watermark to the edge of the page as used after folding (fig.3), and often results in part of it being lost by binding. However, the surviving parts, taken with the pattern of chain- and laid-lines, will confirm whether the various pages that contain parts of a mark in fact belong together. This kind of study has been invaluable in the reconstruction of fragmentary sources such as the Beethoven sketchbooks.

However, pending the collection of archival series of beta-radiographs of watermarks, many of the other conclusions must consist of approximations, and watermark

3. The placing of watermarks in (a) quarto and (b) octavo formats, showing how they are split across the edges of different folios

evidence, while remaining a potent research tool, is most useful in conjunction with other evidence such as handwriting, type styles and staff rulings. Patterns of change, or indications of date and place, in more than one of these elements have a strong corroborative effect: the imprecision of each is to a large extent negated, and watermarks can then become a most potent research tool.

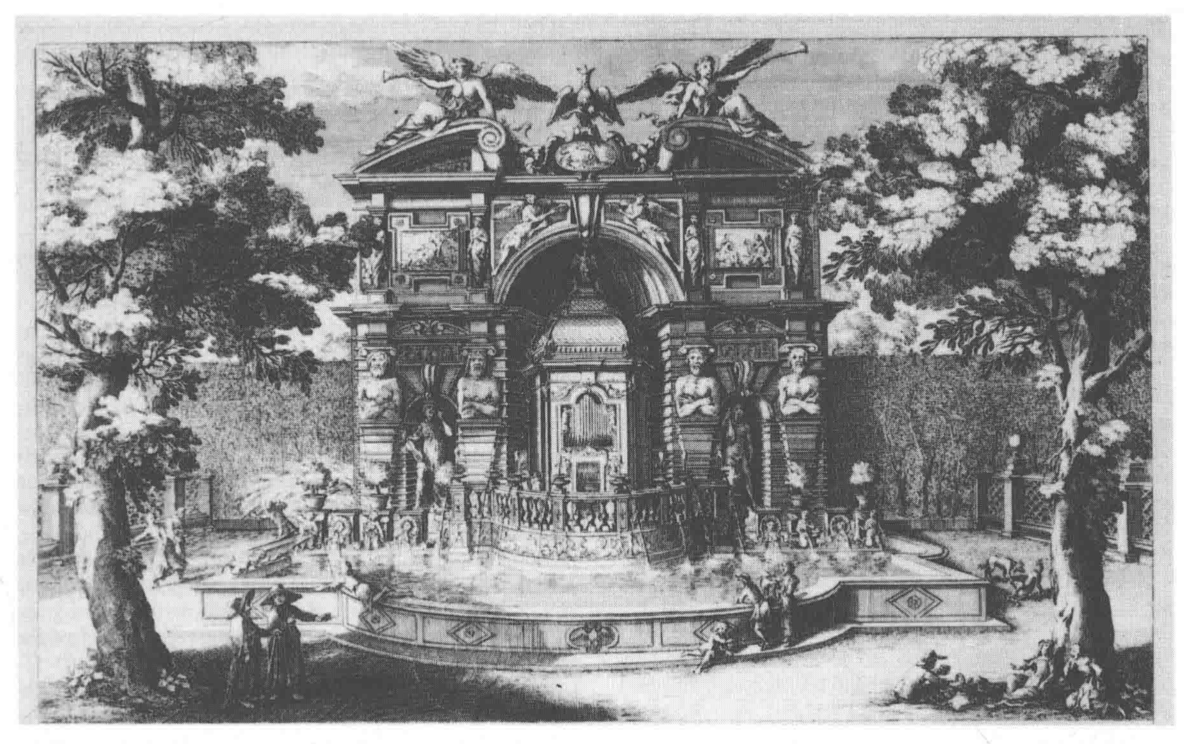
STANLEY BOORMAN

Water organ [hydraulic organ] (Fr. *orgue hydraulique*; Ger. *Wasserorgel*; Lat. *organum hydraulicum*). A kind of automatic organ without bellows. It is blown and sounded by air compressed directly by water that is activated by natural forces (e.g. by a waterfall). Water organs play without human intervention once they are set in action. Ancient and modern writers have frequently confused them with the Greco-Roman HYDRAULIS, a type of pneumatic organ in which air was supplied by hand-operated air pumps and water was used in a device to steady the wind-pressure. Unlike the steam organ (*see* CALLIOPE (ii)), which did employ 'wet' air, no water ever coursed through the musical pipes of the water organ. Apart from the method of blowing employed, the water organ is similar to the BARREL ORGAN, having a pinned barrel carrying the musical programme, a windchest and pipework.



Water organs were described in the texts of Ctesibius (3rd century BCE), Philo of Byzantium (3rd century BCE) and Hero of Alexandria (*c*62 CE). Like the water clocks (*clepsydra*) of Plato's time, they were not regarded as playthings but might have had a particular significance in Greek philosophy, which made use of models and simulacra of this type. Hydraulically blown organ pipes were used to imitate birdsong, as well as to produce the awe-inspiring sound emitted by Memnon's statue at Thebes. For the latter, solar heat was used to syphon water from one closed tank into another, thereby producing compressed air for sounding the pipes.

Arab and Byzantine engineers developed, among other pieces, an automatic water organ (described by the Banū Mūsā in their 9th-century treatise; see Farmer, 1931), and a 'musical tree' at the palace of Khalif al-Muqtadir (ruled 908–32). By the end of the 13th century hydraulic automata had reached Italy and the rest of Western Europe. During the Renaissance water organs again acquired magical and metaphysical connotations among followers of the hermetic and esoteric sciences. Organs were placed in gardens, grottoes and conservatories of royal palaces and the mansions of rich patricians to delight onlookers not only with music but also with displays of automata – dancing figurines, wing-flapping birds and hammering cyclopes – all operated by projections on the musical cylinder (fig.1). Other types of water organ were played out of sight and were used to simulate musical instruments apparently being played by statues in mythological scenes such as 'Orpheus playing the viol', 'The contest between Apollo and Marsyas' and 'Apollo and the nine Muses'.

The most famous water organ of the 16th century was at the Villa d'Este in Tivoli (fig.2). Built about 1569–72 by Lucha Clericho (Luc de Clerc; completed by Claude Venard), it stood about six metres high under an arch, and was fed by a magnificent waterfall; it was described by Mario Cartaro in 1575 as playing 'madrigals and many other things'. It was also provided with a keyboard. G.M. Zappi (*Annalie memorie de Tivoli*, 1576) wrote: 'When somebody gives the order to play, at first one hears trumpets which play awhile and then there is a consonnance .... Countless gentlemen could not believe that this organ played by itself, according to the registers, with water, but they rather thought that there was somebody

2. Water organ built c1569–72 in the gardens of the Villa d'Este, Tivoli: engraving by Giovanni Francesco Venturini from G.G. Rossi's 'Le Fontane di Roma', pt. iv (c1675)

inside'. Besides automatically playing at least three pieces of music, it is now known that the organ was also provided with a keyboard. Other Italian gardens with water organs were at Pratolino, near Florence (*c*1580), Isola de Belvedere, Ferrara (before 1599), Palazzo del Quirinale, Rome (built by LUCA BIAGI in 1598, restored 1990), Villa Aldobrandini, Frascati (1620), one of the Royal Palaces at Naples (1746), Villa Doria Pamphili, Rome (1758–9). Of these only the one at the Palazzo del Quirinale has survived. Kircher's illustration in *Musurgia universalis* (1650; see fig.1), long thought to be a fanciful representation of a hypothetical possibility, has been found to be accurate in every detail when compared to the organ grotto at the Quirinale, except that it was reversed left to right. There are still traces of the instrument at the Villa d'Este but the mineral-rich water of the river which cascades through the organ grotto has caused accretions which have hidden most of the evidence from view.

In the early 17th century water organs were built in England; Cornelius Drebbel built one for King James I (see Harstoffer, 1651), and Salomon de Caus built several at Richmond while in the service of Prince Henry. There was one in Bagnigge Vale, London, the summer home of Nell Gwynn (1650–87), and Henry Winstanley (1644–1703), the designer of the Eddystone Lighthouse, is thought to have built one at his home in Saffron Walden, Essex. After the marriage of Princess Elizabeth to the Elector Palatine Prince Friedrich V, de Caus laid out for them the gardens at Heidelberg Castle which became famous for their beautiful and intricate waterworks. A water organ survives in the gardens at Heilbronn, Württemberg, and parts of one at the Wilhelmshöhe gardens in Kassel. The brothers Francini constructed waterworks and organs at Saint Germain-en-Laye and Versailles, which reached new heights of splendour and extravagance.

By the end of the 17th century, however, interest in water organs had waned. As their upkeep was costly they were left to decay and were soon forgotten; by 1920 not one survived (the so-called water organ at Hellbrunn Castle, Salzburg, is a pneumatic organ driven by hydraulically operated bellows). Their mechanism was subsequently misunderstood until the Dutch engineer Van Dijk pointed out in 1954 that the method of air supply to the water organ was the same as that used in forges and smelting works in the 16th and 17th centuries. The most important factor is the natural characteristic of water, when drawn by gravity into an outlet, to suck air in with it. In fig.3 air is drawn through a small pipe placed in a larger vertical pipe, which takes water from a stream, pond or stabilizing reservoir. Both water and air arrive together in the *camera aeolis* (wind chamber) which is situated a considerable distance below the head of the water. The longer the vertical pipe, the more forceful the suction will be and the greater the volume of air sucked in. Here water and air separate and the compressed air is driven into a wind-trunk on top of the *camera aeolis*, to blow the organ pipes. The two perforated 'splash plates' or 'diaphragms' prevent the water spray getting into the organ pipes. The water, having been separated from the air, leaves the *camera aeolis* at the same rate as it enters it and is used to drive a water wheel, which in turn drives the musical cylinder and the movements attached. To start the organ, the tap above the entry pipe has to be turned on and, given a continuous flow of water, the organ plays until the tap is closed again. Many water organs had simple wind-pressure regulating devices. At the Palazzo del Quirinale, the water flows from a hilltop spring (once abundant, now only sufficient to play the

3. Diagram showing the blowing system of a water organ

organ for about 30 minutes at a time), coursing through the palace itself into a stabilizing 'room' some 18 metres above the *camera aeolis* in the organ grotto. This drop provides sufficient wind to power the restored six-stop instrument.

Among Renaissance writers on the water organ, Salomon de Caus was particularly informative. His book of 1615 includes a short treatise on making water organs, advice on tuning and registration, and many fine engravings showing the instruments, their mechanisms and scenes in which they were used. It also includes an example of suitable music for water organ, the madrigal *Chi farà fed' al cielo* by Alessandro Striggio (i), arranged by Peter Philips.

SUSI JEANS/ARTHUR W.J.G. ORD-HUME

Waters, Edward N(eighbour) (*b* Leavenworth, KS, 23 July 1906; *d* Mitchellville, MD, 27 July 1991). American music librarian and musicologist. He was educated at the Eastman School of Music of the University of Rochester, where he received the BMus in 1927 and the MMus in 1928. He joined the staff of the Library of Congress in 1937 as assistant chief of the music division and from 1972 until his retirement in 1976 served as chief of the division.

Waters wrote numerous articles and reviews on 19th-century Romanticism, especially the music and writings of Liszt. His other interests included American folk music and music history. He wrote on important books and manuscripts in the music division of the Library of Congress and, from 1951, frequently discussed the library's music acquisitions in its *Quarterly Journal*. From 1934 to 1947 he was compiler of the 'Quarterly Book-List' for the *Musical Quarterly*.

PAULA MORGAN

Waters [née Howard], **Ethel** (*b* Chester, PA, 31 Oct 1896; *d* Chatsworth, CA, 1 Sept 1977). American popular singer and actress. She grew up in the Philadelphia area, coming more strongly under the influence of white vaudeville singers, such as Nora Bayes and Fanny Brice, than did her southern contemporaries. Early in her career she sang 'coon' songs, and became an outstanding example of the group of black vaudeville singers who may be distinguished from southern classic blues singers such as Ma Rainey and Bessie Smith. Some of her performances from the mid-1920s (she began recording in 1921) used the scat-singing devices subsequently developed by Louis Armstrong and Ella Fitzgerald. In the 1930s, she found the mainstream of popular music, including jazz, congenial, and brought to it a combination of tragedy (in Harold Arlen's *Stormy Weather*, 1933) and comedy (in H.I. Marshall's *You can't stop me from loving you*, 1931) which, in its range, was unsurpassed by any other popular singer. From about the same time she began appearing as a stage actress, notably in *Mamba's Daughters* (1939, by Dorothy Heyward and Dubose Heyward), *The Member of the Wedding* (1950, by Carson McCullers), and most notably Vernon Duke's *Cabin in the Sky* (1940), a musical which was made into a film in 1943, with additional songs provided for Waters; she was also successful in Irving Berlin's *As Thousands Cheer* (1933). Her acting career eventually eclipsed her accomplishments as a singer in the public eye.

Waters was the first black entertainer to move successfully from the vaudeville and nightclub circuits to what blacks called 'the white time' (the West Indian Bert Williams had done this earlier in the *Ziegfield Follies*, but in blackface). Her vocal resources were adequate though unexceptional, but this shortcoming was mitigated by an innate theatrical flair that enabled her to project the character and situation of every song she performed. The early recordings of Mildred Bailey, Lee Wiley and Connee Boswell clearly reflect a debt to Waters, and most popular singers of the time came under her influence to some degree. From 1960 to 1975 Waters toured with the evangelist Billy Graham, singing with less vocal prowess than before but with an undiminished ability to characterize her material.

HENRY PLEASANTS/R

Waters, John. *See* WALTER, JOHN.

Waterson, Norma (Christine) (*b* Hull, 15 Aug 1939). English traditional singer and folksinger. From a Yorkshire family, she began in the 1960s by singing with her sister Lal, brother Mike and cousin John Harrison as the Watersons, releasing the acclaimed album *Frost and Fire* (Topic, 1965). They dressed like a typical contemporary rock band, but sang unaccompanied traditional English songs with an intensity that they described as 'earthy', acquiring a cult following before breaking up in 1968. After four years as a DJ in Montserrat, Norma returned to Yorkshire, working on a series of family musical projects. She continued to make occasional appearances and recordings with a new line-up of the Watersons, including the guitarist Martin Carthy whom she later married. She then worked with her daughter Eliza Carthy, sister Lal and her daughter Maria as the Waterdaughters. When Lal Waterson stopped touring, Norma began working with Martin and Eliza in a new family group, Waterson: Carthy.

In 1996 she released her first solo album, *Norma Waterson*, recorded in the USA with a group of musicians that included the guitarist Richard Thompson and Martin and Eliza Carthy. It included only one traditional song alongside versions of songs by Billy Bragg, Richard Thompson and Elvis Costello. Despite its remarkable success, she continued working with her family in Waterson: Carthy, releasing *Common Tongue* (1997).

Her brother Mike [Michael] Waterson (*b* Hull, 17 Jan 1941) released a critically acclaimed eponymous album (1977), while her sister Lal Waterson (*b* 14 Feb 1943; *d* 4 Sept 1998) recorded *Bright Phoebus* (1972), an album of songs written by herself and her brother. Later recordings by Lal included those with the Waterdaughters and other combinations of family members; they also included the albums *Once in a Blue Moon* (Topic, 1996) and the final, reflective *A Bed of Roses* (1998), both with her son, the guitarist Oliver Knight.

ROBIN DENSELOW, CAROLE PEGG

Watkin, David (Evan) (*b* Crowthorne, Berks., 8 May 1965). English cellist. He studied privately with Sharon McKinley and then at the Wells Cathedral School with Margaret Moncrieff and Amaryllis Fleming; while at St Catherine's College, Cambridge (where he won both a choral scholarship and an instrumental award), he studied with William Pleeth. In 1989 he made his début in St John's, Smith Square, with his duo partner, Howard Moody; his US début came ten years later at the Lincoln Center, New York, when he played the Schumann Concerto with Sir John Eliot Gardiner and L'Orchestre Révolutionnaire et Romantique. As a soloist Watkin has also appeared and recorded with the Academy of Ancient Music, Collegium Musicum '90, the English Concert and the Orchestra of the Age of Enlightenment, with which he recorded Haydn's Sinfonia Concertante. Watkin's passionate belief in the juxtaposition of scholarship and musicianship has led to his revival of the practice of realizing figured bass on the cello; he has recorded Corelli's op.5 violin sonatas in this manner with the Trio Veracini, and published his findings (*Early Music*, xxiv (1996), 645–63). It is also reflected in a special interest in performing 19th-century music, firstly with a highly acclaimed recording of Beethoven cello sonatas and, since 1999, with the Eroica Quartet, which is committed to 'performing the music of the Romantic period and rediscovering the style of its performance'. Its first CD, of Mendelssohn, was acclaimed for its boldness and vitality. Watkin's tastes remain catholic, as is witnessed by his recording of Francis Pott's Cello Sonata.

LUCY ROBINSON

Watson, Anthony (Arthur) (*b* Winton, 29 Sept 1933; *d* Dunedin, 6 March 1973). New Zealand composer. He studied music from an early age with his father, an amateur violinist. Graduating from the University of Otago (diploma in music 1957), he then worked as a string player in Wellington. From 1959 to 1969 he earned a living primarily from playing the viola in the National Orchestra of the NZBS (now the New Zealand SO). He was the inaugural Mozart Fellow, from 1970 to 1971, at the University of Otago, a position which allowed him to work full-time at composition for the only period of his life. Reduced to the precariousness of freelance work and private string teaching when the fellowship expired, and increasingly debilitated by alcoholism, he took his own life at the age of 39.

As a non-conformist personality, and working outside the academic music establishment of the time, Watson developed his own, isolated modernist voice, finding inspiration in the music of Bartók and the Second Viennese School. All of his finest music is for strings, reflecting his own performance expertise. The three string quartets form a nucleus of highly charged, yet meticulously ordered music. The first (1959) is a homage to Beethoven's *Grosse Fuge*, while the second (1962) and third (1971) use serial techniques and tightly worked canons. The *Prelude and Allegro for Strings* (1960), Watson's most popular work, is terse and densely structured, but close to hysteria in its emotional tone; the virtuoso Sonata for solo viola (1969) is similarly anguished. Works employing texts, such as *In memoriam 29th October*, reveal his left-wing political views.

WORKS
(*selective list*)

Orch: Prelude and Allegro, str, 1960

Vocal: Centennial Cant: for the Balclutha Centenary (O.H. Laytham), 1970; In memoriam 29th October (after N. Guillen, R. Estrada, J.L. Borges), nar, orch, 1971

MARTIN LODGE

Watson [née McLamore], **Claire** (*b* New York, 3 Feb 1927; *d* Utting am Ammersee, 16 July 1986). American soprano. She studied at the Eastman School of Music and privately with Elisabeth Schumann, and made her début in 1951 at Graz as Desdemona. In 1955 she was engaged at Frankfurt; during her first season she sang 12 new roles, including Countess Almaviva, Pamina, Elisabeth (*Tannhäuser*), Leonora (*La forza del destino*), Aida and Tatyana. In 1957–8 she sang Fiordiligi, Elisabeth de Valois and the Marschallin, in which role she made her Covent Garden (1958) and Glyndebourne (1960) débuts. She appeared regularly in London, where she was admired as Ellen Orford, an unforgettably intense Sieglinde, Eva, and, with the Munich company in 1972, Ariadne and the Countess in *Capriccio*. Her Munich association began in 1958, when she sang Countess Almaviva at the reopening of the Cuvilliéstheater; in 1963 she sang Eva at the inauguration of the rebuilt Nationaltheater, a performance preserved on disc. Watson made guest appearances in Vienna, Berlin, Italy and the USA, where she sang her first Arabella in New Orleans in 1969. The warmth and musicality of her singing and her sincerity illumine her portrait of Ellen Orford in Britten's own recording of *Peter Grimes*.

HAROLD ROSENTHAL/ALAN BLYTH

Watson, Thomas (*b* London, *c*1556; *d* London, bur. 26 Sept 1592). English poet, and an important translator and adaptor of Latin, French and Italian verse. There is no record of his university education, but he often described himself as *I.V. Studioso* (proficient in both laws, i.e. canon and civil). As a youth he travelled widely in France and Italy, and after his return associated with many of the rich and famous, including Sir Francis Walsingham and his son-in-law Sir Philip Sidney, both of whom were eulogised by Watson in his madrigal verse. He is also recorded as having come to the defence of the playwright Christopher Marlowe in a street brawl, killing Marlowe's assailant. Watson's verse in Latin and English was highly praised by contemporary critics. His first published volume was the *Hekatompathia* (London, 1582), the first set of connected love-poems in English and of importance for the development of the English sonnet form. His contemporary reputation rested mainly on this and on his Latin *Amyntas* (1585). He wrote the poem for Byrd's broadside *A gratification unto Master John Case* printed by Este in 1589, and the next year issued *The first sett of Italian madrigalls Englished, not to the sense of the originall dittie, but after the affection of the noate* (ed. in MB, forthcoming), containing 23 madrigals by Marenzio, three by older Italians and two, specially written in the Italian style, by Byrd. This anthology is important not only for making the madrigals available in English, but for Watson's poetic method: the words reflect the spirit of the originals, but hardly ever the literal meaning; instead new lyrics are provided, designed to fit the figuration, phrase and affective structure of the music so closely that the madrigalist's art is displayed fully. There is no doubt that Watson's collection provided models for the composers of the English Madrigal School, as well as much of the subject matter for the writers. Five of Watson's lyrics were subsequently reset by English composers. Kerman has suggested that some texts in Byrd's *Psalmes, Sonets & Songs* (1588) may be by Watson.

ALBERT CHATTERLEY

Watson, William D(avid) (*b* London, 6 Oct 1930). English bowmaker. He began his career in 1945 serving a six-year apprenticeship with W.E. Hill & Sons in London, working under Retford. After a two-year absence for national service, he returned to work there until 1962. In February of that year he left to work on his own, moving to Denham, Buckinghamshire, in October 1963. Watson's bows are cleanly and precisely made, the sticks generally being stronger than most, though without extra weight. Watson is also well known as a restorer of fine old bows.

CHARLES BEARE

Watts, André (*b* Nuremberg, 20 June 1946). American pianist. His first teacher was his Hungarian mother, who had married an African-American soldier. He studied with Genia Robiner, Doris Bawden and Clement Petrillo at the Philadelphia Musical Academy. At the age of nine he played at a Philadelphia Orchestra children's concert (Haydn's Concerto in D). He made several more appearances in Philadelphia, but the turning-point was in January 1963, when he played Liszt's First Piano Concerto with Leonard Bernstein at a New York PO children's concert, and again at a regular subscription concert. He became instantly famous and second only to Cliburn as a box-office attraction among the younger American instrumentalists. In 1966 he made his European debut with the LSO, and then made a world tour in 1967 under the auspices of the US State Department. While continuing his career he studied with Leon Fleisher (at the Peabody Conservatory sporadically between 1963 and 1972, then privately until 1974); for sheer facility he was unsurpassed and, with Fleisher's help, his musicianship began to match his technique. In 1973 he made another State Department tour, to the USSR, as soloist with the San Francisco SO; that year he taught for the first time, at the Berkshire Music Center. In November 1976 he appeared in the first live nationwide television broadcast of a solo recital in the USA. In 1988, the 25th anniversary of his début as soloist with the New York PO was celebrated in a concert with the orchestra in which Watts performed Liszt's First Concerto, Beethoven's Second and Rachmaninoff's Second in a live nationwide broadcast. Watts's recital repertory ranges from Haydn to Debussy; his concerto repertory, centred on the late Romantics, includes works by Rimsky-Korsakov and MacDowell. He has been awarded honorary doctorates by Yale University (1973) and Albright College (1975); in 1988 he was awarded the Avery Fisher Prize. Among Watts's recordings are concertos by Tchaikovsky, Saint-Saëns, Rachmaninoff and MacDowell.

MICHAEL STEINBERG/R

Watts, Helen (Josephine) (*b* Milford Haven, 7 Dec 1927). Welsh contralto. She studied at the RAM and made her début at a Promenade Concert in 1955, singing Bach arias under Sargent and subsequently developing a reputation as a distinguished oratorio singer. In 1958 she made her operatic début, as Didymus in *Theodora* with the Handel Opera Society, for whom she also sang Ino and Juno (*Semele*) as well as Rinaldo, which she repeated at the Komische Oper, Berlin, and at Halle (1961). In 1964 she sang Britten's Lucretia (conducted by the composer) on the English Opera Group tour of the USSR. At Covent Garden (1965–71) her dark-grained timbre and gift for word-painting brought to life her portrayals of the First Norn, Erda, Sosostris (*The Midsummer Marriage*) and Mrs Sedley, while for the WNO (1969–83) she sang Mistress Quickly, Sosostris, Mrs Sedley (a vivid, biting assumption) and Madame Larina. Watts's firm, evenly produced voice was admirably suited to her wide repertory of oratorio and song, as can be heard on recordings ranging from Bach and Handel to her eloquent Angel in Boult's *Dream of Gerontius*. She was made a CBE in 1978.

ALAN BLYTH

Watts, John (i) (*b* 1678; *d* London, 26 Sept 1763). English bookseller and publisher. He was established in Lincoln's Inn Fields, London, by 1713, when he began to issue editions of classical authors. From the outset he often published in conjunction with Jacob (later Jacob and Richard) Tonson, issuing plays, librettos and miscellaneous works. The introduction of the ballad opera at Lincoln's Inn Fields Theatre gave Watts a brisk trade in the publication of the operas performed there. He issued the first and later editions of *The Beggar's Opera* (1728), and after this practically the whole of the series of ballad operas (more than 27 altogether) as soon as they were performed. These editions present the airs for the songs, printed from engraved woodblocks, as an appendix, and are especially valuable for giving the old names of the tunes. Another important work is the six-volume *The Musical Miscellany* (1729–31), also printed from woodblocks and considered the finest pocket songbook of the period. The third to fifth volumes of this set were reissued by J. Wren about 1750 with different titles (*The Harp*, *The Spinnet* and *The Violin* respectively). Many of the librettos of Handel's oratorios from *Athalia* (1733) onwards were printed by Watts.

FRANK KIDSON/PETER WARD JONES

Watts, John (Everett) (ii) (*b* Cleveland, TN, 16 July 1930; *d* New York, 1 July 1982). American composer and synthesizer player. He studied at the universities of Tennessee (BA 1949), Colorado (MM 1953), Illinois (1955–6), Cornell (1958–60) and at UCLA (1961–2); his principal teachers were John Krueger, David Van Vactor, Cecil Effinger, Burrill Phillips, Robert Palmer and Roy Harris. From 1967 he was a member of the faculty at the New School for Social Research in New York, where he founded (1969) and directed the electronic music programme. He was also the founder and director of the Composers Theatre (1964–82), an organization that presented the works of some 250 American composers in various concert series, including over 150 premières and more than 50 commissioned works.

Watts composed more than 100 works for concert, theatre, dance, film and television. After 1964 he worked closely with his wife, the choreographer Laura Foreman, and developed his interest in electronic music, particularly the ARP synthesizer, which he helped to popularize in his performing, as well as his compositional, activities. Watts considered himself a traditionalist and tried to 'humanize' his electronic music, creating works that sound Romantic and orchestral rather than electronic. Representative later pieces include *Laugharne*, in which a tape functions almost as a second orchestra, and *MAS*, a 27-track study in density based on traditional gagaku. Watts also maintained an active interest in film music and conceptual

art: *Wallwork*, a collaboration with Foreman, involved posters and press releases announcing a sold-out (but nonexistent) concert.

WILLIAM DUCKWORTH/MICHAEL MECKNA

Waulking song. Labour song associated with the finishing or waulking of handwoven tweed in Gaelic areas of Scotland. Tweed waulking was traditionally a communal activity of women, who sang the songs, alternating between a soloist and chorus, to coordinate their physical efforts and to relieve the monotony of their work. *See* SCOTLAND, §II, 5(ii).

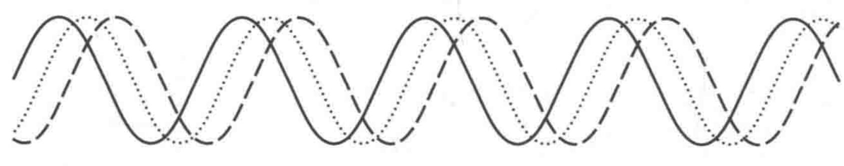
□

Wave. A pattern of vibration spatially distributed through a medium. An example of a medium of great importance in musical instruments is the stretched string. Three types of wave can exist in a string: a transverse wave, in which the particles of the string vibrate in a direction perpendicular to the string axis, a longitudinal wave, in which the string particles vibrate along the string axis, and a torsional wave, in which the string particles rotate about the string axis. All three types of wave can be generated by bowing a string, although the transverse waves normally dominate the acoustic behaviour of a bowed string. Transverse and torsional waves cannot be supported by a gaseous medium, so that only longitudinal waves are present in the air column of a wind instrument.

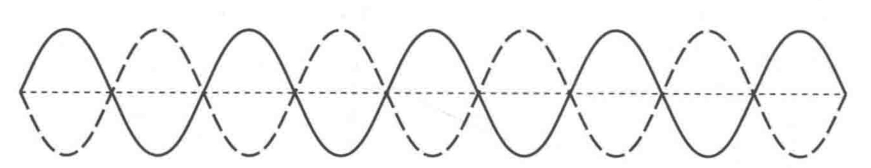
In a travelling wave the vibration pattern travels through the medium with a characteristic speed (the wave velocity); fig.1*a* shows three successive views of a transverse wave travelling from left to right on a string. When a travelling wave is reflected back on itself, a standing wave is set up; fig.1*b* shows three successive views of a standing wave on the string.

See also SOUND.

MURRAY CAMPBELL, C. GREATED



Wavelength. The distance between two successive points that are at the same position in the cycle of disturbances at the same time in a periodic wave. In a simple sine wave it is merely the distance between two successive peaks or two successive troughs. *See* SOUND, §2.



C. GREATED

Wa-wa [wah-wah]. An onomatopoeic term derived from the sound created by the regular boost and cut of treble frequencies. It is applied to devices which produce this effect, notably the Harmon mute for the trumpet and trombone (*see* MUTE, §2(ii)(c)), and to a signal processor unit, generally operated by means of a foot pedal (*see* ELECTRIC GUITAR, §2).

□

Wa-Wan Press. American firm of music publishers. It was founded in Newton Centre, Massachusetts, in 1901 by the composer Arthur Farwell (*b* St Paul, MN, 23 April 1872; *d* New York, 20 Jan 1952) to publish neglected music by contemporary American composers and music using American folk material. Named after an Omaha Indian ceremony for peace, fellowship and song, it began idealistically to further the cause of American music and a new indigenous music that Farwell believed would emerge from a study of ragtime and of black, Indian and cowboy songs. The press published the works of 37 composers (including nine women) whose main interest was in American Indian music, and Farwell, H.W. Loomis

1. *(a) Three successive views of a travelling wave on a stretched string; (b) three successive views of a standing wave on a stretched string*

and Carlos Troyer were among those whose works used such material. Other composers whose music was published by the firm include Frederic Ayres, Rubin Goldmark, E.S. Kelley, Arthur Shepherd, Henry Gilbert, E.B. Hill and Gena Branscombe. Two collections of music were issued each quarter, one vocal and one instrumental, in volumes beautifully designed and printed, often with introductions by Farwell. Later each composition was published separately in sheet-music form; Farwell designed many of the abstract covers himself, taking pride in their distinctive appearance; his typographical designs were adapted by other publishers. In 1907, encouraged by public acceptance and demand, the firm began to publish monthly instead of quarterly. In 1908 loss of subscriptions caused the publishing house to founder, and in 1912 it was acquired by G. Schirmer of New York.

W. THOMAS MARROCCO, MARK JACOBS

Waxman [Wachsmann], **Franz** (*b* Königshütte, 24 Dec 1906; *d* Los Angeles, 24 Feb 1967). American composer of German birth. After pursuing a career in banking for two years, he completed his musical studies in Dresden and Berlin. While a student, he supported himself by playing the piano in nightclubs, especially with the Weintraub Syncopators. It was this employment that led him, in 1929, to UFA, Germany's leading film studio, where he was hired to arrange and conduct Frederick Holländer's score for *The Blue Angel*. The success of that film produced additional film work, ultimately leading to his emigration to Los Angeles in 1934.

Waxman's arrival in Hollywood was timely; film music was just developing into a major art form and his fluent, highly Romantic style, coupled with a gift for melodic writing, was ideally suited to the medium. He quickly took his place as one of the most important composers of Hollywood's golden age. His first original film score, *The Bride of Frankenstein* (1935), re-used many times in other horror films of the period, set the style of scores for that genre. He went on to compose for some of Hollywood's classic films, including *Captains Courageous* (1937), *The Philadelphia Story* (1940), *Rebecca* (1940), *Dr Jekyll and Mr Hyde* (1941), *Prince Valiant* (1954), *The Nun's Story* (1959) and *Taras Bulba* (1962). In all, he worked on 144 films and received 12 Academy Award nominations, winning twice in consecutive years for *Sunset Boulevard* (1950) and *A Place in the Sun* (1951). His music for the cinema appears on many recordings.

Of Waxman's concert works, the most important are the oratorio *Joshua* (1959) and the dramatic song cycle *The Song of Terezin* (1965), his last composition. Perhaps his most famous work, however, is the *Carmen Fantasie*, a brilliant showpiece for violin and orchestra based on themes from Bizet's opera, originally composed for the film *Humoresque* in 1947. Also a gifted conductor, Waxman founded the Los Angeles International Music Festival in 1948 and for the next 20 years presented important premières of works by Stravinsky, Shostakovich, Vaughan Williams, Walton, Schoenberg and many others. A frequent guest conductor in the USA, Europe and Israel, in 1962 he was the first American to conduct major orchestras in the Soviet Union.

BRENDAN G. CARROLL

Wayditch, Gabriel von (*b* Budapest, 28 Dec 1888; *d* New York, 28 July 1969). Hungarian composer, naturalized American. In Budapest he attended the National Hungarian Royal Academy of Music, studying composition with Hans Koessler and the piano with Emil Sauer. He later conducted at the Royal Orpheum Theatre. In 1911 he emigrated to the USA and found work in New York as a theatre conductor, while composing operas in almost complete isolation. The only opera staged in his lifetime was *Horus*, conducted by Fritz Mahler (Gustav's nephew) at the Philadelphia Academy of Music (5 January 1939). After World War II, Wayditch was the pianist with the Morningside Trio which made regular radio broadcasts in New York.

Arguably the most prolific opera composer of the 20th century, Wayditch's output can best be described as 'maximalist'. Each opera requires an orchestra of 110, and many also require frequent elaborate scene changes. While the early operas are post-Romantic, the later ones are often extremely dissonant, yet never completely without tonal reference. The librettos, in Hungarian, are intricate historical myths and frequently use Old Hungarian to give a heightened sense of distance, particularly since most of the operas take place in exotic lands, in ancient times, or on other planets. His last opera, *The*

Heretics, lasts eight and a half hours and is claimed as the longest opera ever written. Interest in Wayditch has grown since his death. Besides performances by the Budapest PO and San Diego SO, two of his stage works, *The Caliph's Magician* and *Jesus before Herod*, have been commercially recorded for VAI Audio.

WORKS

Ops (librettos by Wayditch): Opium Dreams, 1910–14; The Caliph's Magician (Shu and Sha), 1917; Jesus before Herod, 1918; Land of Death (Sahara), 1920; Maria Testver, 1925; The Venus Dwellers, 1925; Horus, 1931, Philadelphia, Academy of Music, 5 Jan 1939; Mary Magdalene, 1934; Buddha, 1935; Nereida, 1940; Anthony of Padua, 1942; The Catacombs, 1945; Fisherman's Dreams, 1948; The Heretics, 1948–69

Other works: Ballet Music from Horus, orch; Dance, fl, 2 vn, vc, pf [from Jesus before Herod]; Lullaby, fl, 2 vn, vc, pf [arr. of aria from Maria Testver]; Opium Dreams, suites, orch; Prayer, SATB; Reminiscences from Opium Dreams, pf solo; Hudson River, song, 1v, pf; Bedbug Serenade, 1v, pf

MSS in Von Wayditch Music Foundation, Baldwin, NY

FRANK J. OTERI

Wayenberg, Daniel (Ernest Joseph Carel) (*b* Paris, 11 Oct 1929). Dutch pianist and composer. He studied the piano for many years with Marguerite Long in Paris but in composition he is self-taught. His first appearances were made between 1939 and 1946 at concerts held, due to war conditions, in private houses in France and the Netherlands. His public début was in Paris in 1949 as winner of the Grand Prix de la Ville de Paris in the Concours Long-Thibaud. The same year he gave the opening recital of the Chopin centenary festival held in Florence. In 1950 he was in a serious plane crash near Lyons but in spite of other injuries his hands were unhurt and he played at the Besançon Festival in 1951. He made his début in the USA in 1953 at Carnegie Hall playing Rachmaninoff's Concerto no.2 under Mitropoulos. This was followed by tours in America in 1954 and 1955 when he also played in Indonesia. He has subsequently appeared all over western and eastern Europe including Russia. A number of his recordings have been awarded prizes. His repertory is catholic and ranges from Haydn to the sonatas of Jolivet (which he has recorded) and Stockhausen's *Klavierstücke*. He is also a noted teacher at the Rotterdam Conservatory. Wayenberg's compositions include the ballet *Solstice* (1955, Paris), a concerto for five wind instruments and piano, a symphony *Capella* commissioned by the Netherlands government and a concerto for three pianos (1975).

RONALD KINLOCH ANDERSON/R

Wayes. An English term in use around 1600. 'Wayes' is the title normally given to a series of short contrapuntal compositions in two or three parts (often in canon) on a cantus firmus, apparently intended for practice in polyphonic writing. Examples of its use are in John Farmer's *Divers and Sundrie Waies of Two Parts in One, to the Number of Fortie, uppon One Playn Song* (1591); William Bathe's *A Briefe Introduction to the Skill of Song . . . in Which Work is Set Downe X. Sundry Wayes of 2. Parts in One upon the Plaine Song* (1600); *Forty Wayes of 2. Parts in One* (on *Miserere*) by Thomas Woodson in *GB-Lbl* Add.29996, ff.184*v*–9 (only 20 given); *Pretty Wayes: for Young Beginners to Looke on* in the same manuscript, ff.192*v*–193, 195*v*–196 (16 anonymous compositions on the plainchant 'Iam lucis orto sidere'); Thomas Robinson's 'Twenty Waies upon the Bels', the second of two lute duets that open his *Schoole of Musicke* (1603).

Thomas Morley used the word frequently while discussing the composition of contrapuntal music upon a cantus firmus in part two of *A Plaine and Easie Introduction to Practicall Musicke* (1597). The meaning is sometimes non-technical, as when Pupil asks 'I pray you then show me some waies of taking a discord well', to which Master replies 'Here be all the wayes which this plainsong will allow . . .'. The following passage implies perhaps a more precise meaning: 'And these few waies [musical examples] which you have already seen shall be sufficient at this time for your present instruction in two parts in one upon a plainsong'. Morley also refers to the 'forty waies' of Byrd and Ferrabosco on the plainchant MISERERE which were entered in the Stationers' Register in 1603 under the title *Medulla Musicke* (no copy now extant, if indeed it was ever printed), and to George Waterhouse's 'thousand waies' which are canons on the same plainchant in *GB-Cu* Dd.iv.60. Thomas Tomkins used the term for successive variations in his copy of a keyboard piece by Byrd based on the hexachord (MB, xxviii, 1971, 2/1976, textual commentary on no.58).

WARWICK EDWARDS

Weakland, Rembert (*b* Patton, PA, 2 April 1927). American liturgiologist. He took two BA degrees at St Vincent College (1949 and 1952) and the MS in piano at the Juilliard School (1954), and then took further graduate courses at Columbia University. From 1957 to 1967 he was associated with St Vincent College, first as a music teacher and later in administrative positions, including those of chancellor and chairman of the board of directors. He was a member of the university seminar in medieval studies at Columbia, 1957–66. In 1967 he was appointed abbot primate of the Benedictine Confederation and in 1977 he became the Archbishop of Milwaukee. He was also music editor of the *New Catholic Encyclopedia*. His principal interests are medieval Latin drama and music theorists, and Ambrosian chant. He studied the compositions and theoretical writings of Hucbald, and his transcription of the *Play of Daniel* from a British Library manuscript was widely performed by the New York Pro Musica. One of the most influential American bishops in the liturgical reforms of the 1980s and 90s, his earlier musicological writings continue to be of use to scholars.

PAULA MORGAN

Weatherall, Andy [Andrew] (*b* Windsor, 6 April 1963). English disc jockey and remixer. He was a builder in the early 1980s, then came to prominence in 1988 through *Boy's Own*, an irreverent football, fashion and club fanzine popular with the dance club community and which, as Junior Boys Own, became one of Britain's most eclectic record labels. In 1989 he became a disc jockey at Shoom, the London club that helped begin the UK boom in acid house. He came to prominence soon after with *Loaded* (1990), his remix of the Primal Scream track *I'm Losing More than I'll Ever Have*, and his subsequent production of that group's *Screamadelica* album (1991), which mixed traditional indie elements with danceable rhythm tracks and gave rise to a burgeoning indie-dance crossover movement. After working with other similarly-inclined indie artists such as James, New Order and the Happy Mondays, he formed the challenging techno Sabres of Paradise coöperative with Nina Walsh, Jagz Kooner and Gary Burns, before adopting the name Two Lone Swordsmen. He continued sporadically to work as a disc jockey.

WILL FULFORD-JONES

Weather Report. American jazz-rock group. It was founded in December 1970 by original members Joe Zawinul (keyboards), Wayne Shorter (soprano and tenor saxophone), Miroslav Vitous (double bass), Alphonse Mouzon (drums) and Airto Moreira (percussion). Over the years the group has undergone many personnel changes, with Zawinul and, until 1985, Shorter serving as the only constant members; the electric bass guitarist Jaco Pastorius gave the ensemble its most significant new instrumentalist (1976–81). In 1986 the quintet performed briefly under a new name, Weather Update, and then disbanded.

Weather Report's first albums provided several remarkable instances of unconventional collective playing, though their music remained accessible to a large audience. Discarding the traditional jazz roles of soloist and accompanist, the players took the lead by turn and created textures that were continuously changing; they elided tonal ostinato themes with improvisations, and alternated unmetred passages with others underpinned by rock or Latin rhythms. Excellent examples of this novel approach to ensemble improvisation are *Seventh Arrow* and *Umbrellas* (on *Weather Report*, 1971, Col.), or *Crystal* and *Surucucú* (on *I Sing the Body Electric*, 1971–2, Col.). By 1972 Zawinul dominated the group, which had moved towards rock. He had a preference for dance rhythms and fixed arrangements featuring complex electronic effects. His striving for commercial success precipitated the many personnel changes in the group, but also led to its resounding hit *Birdland* (on *Heavy Weather*, 1976, Col.). *Havona* (also on *Heavy Weather*) demonstrated Jaco Pastorius's unique command of the electric bass guitar, as well as the group's continuing ties to improvisation.

BARRY KERNFELD

Weaver, John (i) (bap. Shrewsbury, 21 July 1673; *d* Shrewsbury, 24 Sept 1760). English dancer, choreographer and dancing-master. The son of another dancing-master named John Weaver, he was educated at Shrewsbury School but spent part of his youth in Oxford, where his father kept a dancing school. By 1700 he was a theatrical dancer in London and early in 1703 he created *The Tavern Bilkers*, his first work for the stage. He became associated with the dancing-master Mr Isaac, who wished to improve both the status and the practice of dancing, and in 1706, at Isaac's suggestion, he published *Orchesography* as well as six of Mr Isaac's ball-dances in Beauchamp-Feuillet notation. He returned to Shrewsbury, and, in 1712, with the encouragement of the essayist and dramatist Sir Richard Steele, he published *An Essay towards an History of Dancing*. It dealt mainly with the status of dancing in antiquity, but in the final chapter Weaver argued for the reform of contemporary stage dancing so that it could represent '*Persons*, *Passions*, and *Manners*' and explain 'whole *Stories* by *Action*'. In 1717 he returned to London and produced a new work at Drury Lane, *The Loves of Mars and Venus*, in which he put his theories about expressive dancing into practice. It has been described as the first *ballet d'action*. Weaver danced Vulcan and Hester Santlow was Venus, the music was by Henry Symonds and Charles Fairbank (*d* 1729). In 1718 he created *Orpheus and Eurydice*, an even more boldly experimental danced work to music by Charles Fairbank, in which he appeared as Orpheus. In 1721 he published *Anatomical and Mechanical Lectures upon Dancing*, the first work to apply systematically anatomy and the mechanics of bodily movement to dancing. He returned to Drury Lane in 1728 to collaborate with the dancer and choreographer [?A.F.] Roger on a pantomime, *Perseus and Andromeda*, and in 1733 he produced his last work, *The Judgment of Paris*, which included singing as well as dancing, with music by Seedo, and the dancer Denoyer appearing as Paris. In the same year he retired from both the stage and writing and spent the rest of his life as a dancing-master in Shrewsbury.

MOIRA GOFF

Weaver, John (Borland) (ii) (*b* Talmerton, PA, 27 April 1937). American organist. After early studies at the Peabody Conservatory in Baltimore, he entered the Curtis Institute of Music in Philadelphia, where he studied with Alexander McCurdy. He continued his studies with Robert Baker at the School of Sacred Music of Union Theological Seminary, receiving the SMM (Master of Sacred Music) degree in 1968. Weaver's church posts have included director of music at Holy Trinity Lutheran Church, New York (1959–70), and Madison Avenue Presbyterian Church, New York (from 1970). An eminent teacher, he has served both the Curtis Institute of Music as head of the organ department (from 1970) and the Juilliard School as chairman of the organ department (from 1987). In 1989 he received a Distinguished Alumni Award from Peabody and in 1995 an honorary DMus from Westminster College, Pennsylvania. Known for the precision and technical finish of his playing, he has given frequent recitals since his début in 1959 and has often performed in concert with his wife, the flautist Marianne Weaver. In 1987 he performed at the International Congress of Organists in Cambridge. In addition to many church anthems his compositions include Toccata for Organ (1958), Passacaglia on a Theme by Dunstable (1978), Fantasia for Organ (1977), Rhapsody for Flute and Organ (1966), Prelude and Fugue in E minor and Dialogues for Flute and Organ. His recordings include music by Liszt and Mozart. He has also been active as president of the Presbyterian Association of Musicians (1984–6), and as a member of the Presbyterian Church Hymnal Committee and the North American Academy of Liturgy.

CHARLES KRIGBAUM

Weaver, Robert Lamar (*b* Dahlonega, GA, 26 July 1923). American musicologist. He began studies at Emory University and, after service in Europe with the US Army Signal Corps Intelligence (1942–6), completed the BA and MA in musicology at Columbia University with P.H. Lang. He went on to doctoral work with W.S. Newman and Glen Haydon at the University of North Carolina, earning the doctorate in 1958 with a dissertation on Florentine comic operas of the 17th century. He began his teaching career at Catawba College, and subsequently taught at George Peabody College (1960–75), and at the University of Louisville (1975–89). Under his chairmanship the Louisville music history department enrolled the first students in a joint doctoral programme in musicology with the University of Kentucky. He was a visiting professor at the University of North Carolina (1980), and won the President's Award for Outstanding Research and Creativity, University of Louisville (1987). In 1963 he founded the south-central chapter of the AMS.

Weaver's major scholarly writings have dealt with Italian music, with particular emphasis on the history, sources and performance of Florentine opera from the late 16th to the end of the 18th century. His two-volume monograph on the Florentine theatre (co-written with Norma Wright Weaver) presents a new interpretation of the historical order of the Florentine dramaturgical academies and a clearer definition of the Leopoldine school of Tuscan music. In 1987 he discovered and saved from dispersal more than 450 music manuscripts from between 1738 and 1820 that had comprised the private music library of the Ricasoli family of Florence. He was instrumental in the acquisition by the University of

Louisville music library of this collection, and, since then, of many other rare items. He has prepared editions of chamber works by Giordani, Rolla and others and a facsimile edition of cantatas by Atto and Alessandro Melani. He founded and is general editor of the series University of Louisville Publications in Musicology.

SUSAN PARISI

Webb, Chick [William Henry] (*b* Baltimore, 10 Feb 1909; *d* Baltimore, 16 June 1939). American jazz and popular drummer and bandleader. He moved to New York around 1925 and from January 1927 led a group at the Savoy Ballroom that later became one of the outstanding bands of the swing period. Although the group did not include any prominent soloists during its years of prolific recording activity, it developed a distinctive style thanks in part to the compositions and arrangements provided by Edgar Sampson, for example, *Let's get together*, *Stomping at the Savoy* (both 1934, Col.), *Don't be that way* and *Blue Lou* (both 1934, Decca), and especially to Webb's forceful drumming. In 1934 Ella Fitzgerald was engaged as the band's singer, and it soon achieved popular success with performances of such tunes as *A-tisket, A-tasket* (1938, Decca). Webb's band remained at the Savoy intermittently during the late 1920s and held long residencies there in the 1930s, regularly defeating rival bands in the ballroom's famous cutting contests. After Webb's early death, Fitzgerald led the group until 1942, when it disbanded.

Webb, a diminutive hunchback crippled by tuberculosis of the spine, was universally admired by drummers for his forceful sense of swing, accurate technique, control of dynamics and imaginative breaks and fills. Although he was unable to read music, he committed to memory the arrangements played by the band and directed performances from a raised platform in the centre of the ensemble, giving cues with his drumming. Using specially constructed bass-drum pedals and cymbal holders, he could range effortlessly over a large drum kit that offered a wide selection of colours. Unlike drummers of the 1920s, he used the woodblocks and cowbell only for momentary effects, and varied his playing with rim shots, temple-block work and cymbal crashes. In his celebrated two- to four-bar fills, he abandoned earlier jazz drumming formulae for varied mixtures of duple- and triple-metre patterns. Webb was seldom given to long solos, but his style is well represented on *Go Harlem* (1936, Decca) and *Liza* (1938, Decca), a superior response to Gene Krupa's solo performance with Benny Goodman's band on *Sing, sing, sing*.

J. BRADFORD ROBINSON

Webb, Daniel (*b* Co. Limerick, Ireland, *c*1719; *d* ?Bath, 2/3 Aug 1798). British writer. He matriculated at Oxford University in 1735 and about 1758–9 travelled to Italy, where he met the German painter Anton Raphael Mengs. After returning to England he published *Observations on the Correspondence between Poetry and Music* (London, 1769; German translation, Leipzig, 1771), which represents a shift from a narrow conception of mimesis to a broader definition in terms of 'impressions' (effects) that evoke or specify feelings. The sum of Webb's argument is this: just as the movements of the mind impress 'vibrations' on animal spirits contained in the nerves, so too the movements of music and poetry, by agitating the spirits, influence the mind. Musical impressions being 'simple' merely raise or depress the spirits, whereas poetical impressions being 'compound' excite specific motives or passions. But when music is combined with poetry, general impressions can become 'specific indications of the manners and passions'. This argument, which was borrowed without acknowledgment from David Hartley, provided the naturalistic foundation for Webb's theory of accentual prosody: that every temporal point in a 'just' poetico-musical work is created by the demands of expression, not the reverse; that metrical variety is necessary; and that the mark of poetical-musical genius is prosodic surprise, either 'by original Beauty, or Greatness in the idea'.

JAMIE C. KASSLER

Webb, George James (*b* nr Salisbury, 24 June 1803; *d* Orange, NJ, 7 Oct 1887). American music educator, editor and composer of English birth. He studied with Alexander Lucas in Salisbury, then resigned as organist at Falmouth in 1830 and emigrated to Boston, Massachusetts, where he became organist at the Old South Church. Active in many aspects of Boston's musical life, he worked closely with Lowell Mason on educational and publishing projects. He taught in the early years of the Boston Academy of Music, was conductor of the Handel and Haydn Society and the orchestras of the Academy and the Musical Fund Society, and co-edited periodicals and choral collections with Mason and others. In 1870 he moved to Orange, New Jersey, and taught in New York. His compositions, most of which are choral, are musically adept and very much a part of the New England Protestant tradition, though notably less inspired than those of Mason. Only one hymn tune remains in use today: originally written to secular words, it was by 1850 called *Goodwin*, and is now known as *Webb* ('Stand up, stand up for Jesus'). One of Webb's daughters married William Mason.

WILLIAM E. BOSWELL

Webb, Lizbeth (*b* Reading, 30 Jan 1926). English soprano. The leading ingénue of British musicals in the 1950s, she received her first break as an understudy, taking over the lead in Vivian Ellis and A.P. Herbert's *Big Ben* in 1946, but is best remembered as Lucy Veracity Willow in Ellis and Herbert's next show, *Bless the Bride* (1947). Her two biggest numbers in this were 'This is my lovely day' and 'I was never kissed before', which demonstrated the powerful soprano voice and graceful stage presence which she had the misfortune to bring to the West End just as the trend towards more energetic American musical theatre imports was taking over. After playing the juvenile lead in Novello's *Gay's the Word* (1951) she appeared as Sarah Brown in the first London production of Loesser's *Guys and Dolls* (1953), and in 1959 appeared as Giulietta in the television version of Hans May and Eric Maschwitz's *Carissima*. Although she appeared in the title role of *Die lustige Witwe* in 1969, she had in effect retired from the stage before the end of the 1950s, having married the heir to a baronetcy, in true Edwardian style entering the stage as a singer and leaving as a Lady.

PAUL WEBB

Webb, Roy (*b* New York, 3 Oct 1888; *d* Santa Monica, CA, 10 Dec 1982). American composer. He studied at Columbia University where he began to compose, arrange and conduct his own musical comedy material, and was soon conducting regularly on Broadway. In 1929 he went to Hollywood and joined RKO Radio Pictures as music director, a post he held until 1952. Much of his work was in the realm of *film noir*, and he showed great skill in translating horror and violence and their more subtle nuances into musical terms, using a wide spectrum of dissonant harmonies, atmospheric orchestral colour and sparse textures. Webb was adept at depicting nocturnal, big-city moods, for example in *Crossfire* (1947) and *The Window* (1948). In a series of horror films for the producer Val Lewton – *Cat People* (1942), *I Walked with a Zombie*, *The Leopard Man*, *The Seventh Victim* (all 1943), *The Curse of the Cat People* (1944), *The Body Snatchers* (1945) and *Bedlam* (1946) – his music is the precise aural equivalent of Lewton's half-heard sounds, half-seen shadows and atmospheric lighting; *Sinbad the Sailor* (1946) and *Underwater* (1955) display his ability to fill a broader, more colourful canvas of adventure, fantasy and romance. Although Webb may have dissipated his gifts in overproductivity (a fault endemic to the studio system), he worked on several films that have become recognized as masterpieces.

CHRISTOPHER PALMER/RANDALL D. LARSON

Webb, William (*b c*1600; *d* London, bur. 16 March 1657). English composer. He was employed to teach 'division' to the daughter of Thomas and Judith Edwards at £3 a quarter between April 1627 and October 1628. (Edwards, who had died in 1625, was a London mercer, with a country house near Wadhurst in Sussex). He is next heard of singing tenor and playing the lute in Shirley's masque *The Triumph of Peace* (1634). In 1637 he became a wait of the City of London and was still serving as such in 1645, though how he managed to combine the duties with that of a Gentleman of the Chapel Royal (which he became in 1640) is not clear. According to Anthony Wood he took a house in Charterhouse Yard at the beginning of the Civil War, and there he taught singing for 'maintainance sake'. John Playford's list of London music teachers printed in *A Musicall Banquet* (RISM 1651[6]) included him 'For the Voyce or Viole'. He was one of the instrumentalists in Davenant's *The Siege of Rhodes* (1656). He was buried at St. Margaret's, Westminster.

Some of his songs occur in manuscripts begun or compiled in the early 1620s (*GB-Och* 87; *Lbl* Add.29481; *US-NYp* Drexel 4175), so his date of birth can hardly be later than 1600 or so. His style was less declamatory than Henry Lawes's, and he inclined more to composing partsongs for such convivial collections as Playford's *Catch that Catch Can* (RISM 1652[10], 1658[5], 1663[6], 1667[6]); though simple, these songs are among the most agreeable of their time. There are further manuscripts in which his songs occur (*GB-Lbl* Add.10337 and Eg.2013; *Ob* Don.c.57; and *Gu* R.d.58–61), and six are printed in

a modern edition (MB, xxxiii, 1971). (*AshbeeR*, iii, viii; *BDECM*; *SpinkES*)

IAN SPINK

Webbe. English family of musicians.

(1) Samuel Webbe (i) (*b* ?London, 7 Oct 1740; *d* London, 25 May 1816). Composer, organist and bass singer. He was generally acknowledged as the most important composer of the glee. His father died in Minorca, where he held a government post. Sources vary as to whether his wife had already moved there before their child was born. As a result of legal complications, the widow was left in poor circumstances, and Samuel received little education. He was apprenticed to a cabinetmaker at the age of 11, which profession he left after the requisite seven years. He then began work as a copyist at John Welcker's music shop in Gerard Street, Soho. It was there that he met Barbandt, organist at the Bavarian Embassy Chapel, from whom he received his first, and only musical education. Webbe married Anne Plumb at St Marylebone Parish Church on 30 May, 1763. It was about this time that he became active as a composer.

Webbe was elected a Privileged Member of the Noblemen's and Gentlemen's Catch Club in 1771. He had been associated with the club since at least 1766, when he won the first of the annual prize medals that were offered to encourage new compositions, with his canon *O that I had wings*. He continued to win medals and cash premiums until 1792. In 1784 he succeeded Thomas Warren as secretary of the club, a position that he held until 1812. Upon its foundation in 1787 he became librarian of the Glee Club. He composed several hundred catches, canons, rounds and glees, and wrote many of the texts. His works display a broad stylistic range, from short, witty, three-part catches and more serious canons (in which there is a marked delight in technical proficiency), to the glees, whose sectional nature is designed to reflect more closely the changes in mood of the text. His contribution to the field of the glee was such that his compositions were recognized as the standard to which both his contemporaries and successors aspired. It is unfortunate that *Glorious Apollo* became his most famous glee, by virtue of its being sung at the opening of every meeting of the Glee Club, as it is far from representative of his talents.

In 1775 Webbe became organist at the Sardinian Embassy Chapel, a post held earlier in the century by Arne. He was closely associated with the other Catholic embassy chapels in London, where his music was also performed. In 1782 he contributed some items to a volume mostly containing plainchant, and three years later he published a collection of his own music, as used at the Sardinian chapel. *A Collection of Masses* and a further volume of motets appeared in 1792. His compositions became widely used in the Catholic church in the 19th century, mainly as a result of arrangements by Novello. He was influential as a teacher, providing free instruction on Friday evenings at the chapel 'to such young gentlemen as present themselves to learn church music'. Among his pupils were Danby, Dignum, Knyvett and Novello, who were choristers at the chapel. He almost certainly influenced the young Samuel Wesley, who became a friend of his son, Samuel.

Much of his Catholic Church music is in a simple homophonic style, as would have suited the mostly amateur singers who made up the embassy choirs of the time. Of much greater interest are the solos and duets within these works. They reflect the taste and conventions of contemporary operatic writing, including provisions for cadenzas, and the growing influence of the Viennese Classical style. With the number of continental singers in London at the time, and with his own involvement in opera, it seems more than likely that he would have had the services of professional soloists to do justice to such works. Subsequent generations turned away from the graceful miniatures of Webbe towards the larger works of the Viennese school, popularized early in the 19th century by Novello in the Portuguese Embassy Chapel.

Webbe also sang as a professional bass. The contemporary Catholic writer Charles Butler relates that Webbe was called in an emergency to sing the role of Mengotto in Piccinni's *La buona figliuola*. His name appears on the cast lists at Drury Lane, Covent Garden and the King's Theatre, where he sang the role of Count Baccellone in Gassmann's *La contessina* in January 1774. He was also connected with the pleasure gardens at Marylebone and Vauxhall, and his own compositions were performed there. His obituary in *The Gentlemen's Magazine* contains the comment: 'As an English composer, he will always rank with Lock, Morley, Purcell and Arne', yet with the demise of the glee Webbe's reputation declined dramatically. Throughout his compositions elements of the continuing influence of Handel blend with the Classical style, as a result of his contact with continental composers such as J.C. Bach and Abel working in London. Some of his Anglican compositions, in which Webbe was careful to adhere to the tradition of the verse anthem, survived in use into the 20th century. His most enduring works, however, are his hymn tunes, particularly 'St Thomas', 'Tantum ergo', 'Veni Sancte' and 'Melcombe'.

(2) Samuel Webbe (ii) (*b* London, 15 Oct 1768; *d* London, 25 Nov 1843). Organist and composer, eldest son of (1) Samuel Webbe (i). He followed a similar career to that of his father, who was his main teacher. He was organist of the Bavarian Embassy Chapel by 1791; of the Unitarian Chapel, Liverpool, from about 1798 to 1817; of the Spanish Embassy Chapel, London, from 1817; and from the late 1820s at St Nicholas's, Liverpool, and St Patrick's Roman Catholic Chapel, Toxteth Park. He was a founder-member of the Philharmonic Society in London in 1813, and a director from 1815 to 1817; in London he also established a piano academy, teaching according to Logier's system. Webbe composed many glees, catches and songs; the music for an operatic farce, *The Speechless Wife* (Covent Garden, 22 May 1794); masses and other Catholic church music; psalm and hymn tunes; four harp sonatas; and a considerable amount of piano music. His fine technique and sense of style is shown in his Sonata in E♭ for piano duet (?1809, repr. in LPS, xix, 1986).

(3) Egerton Webbe (*b* Liverpool or London, 1810–11; *d* Liverpool, 24 June 1840). Composer and journalist, son of (2) Samuel Webbe (ii). He was named after an uncle, the Liverpool publisher Egerton Smith. In the early 1830s Webbe worked in London as a literary assistant to Leigh Hunt, showing an uncommon wit and flair for both scholarship and criticism. Besides philological essays for Hunt's *London Journal* (*c*1834–6), poems in *Bentley's Miscellany* (1837) and contributions to the *Monthly Repository* and *Atlas* (1837), *Spectator* and *Monthly Chronicle* (1838), he wrote chiefly for the *Musical World* (1837–9). With his friend Edward Holmes, he co-edited that magazine between October 1838 and April 1839, relying on Hunt as a star contributor. The editors made a bold attempt to take over the journal's ownership and sharpen its intellectual appeal (recorded in letters from Webbe to Hunt now in the British Library), but the episode came to nothing.

Like Holmes, Webbe criticized the state of English music and advocated deeper study of Italian and German models, notably J.S. Bach. His performance reviews are sensitive to facial expressions in a listening audience: Webbe himself was partially deaf and found the lack of enthusiasm in English performers only one of the nation's 'musical wants'. As a composer, he had undoubted gifts. He wrote a comic opera, *Love in the City*, to his own libretto, which impressed Holmes and was accepted in

mid-1837 by Bunn for performance at the English Opera House but never staged (singers resisted its technical and dramatic demands); and his organ Prelude and Fugue in A major (op.1, 1837), was widely acclaimed. Webbe also contributed some incidental music to Hunt's *Legend of Florence* (1840, Covent Garden). His premature death from tuberculosis caused much sadness. Louisa Sarah Webbe, one of Egerton's sisters, married Edward Holmes in 1857.

PAUL WEAVER (1), NICHOLAS TEMPERLEY (2), LEANNE LANGLEY (3)

Weber. German family of musicians. The earliest professional musicians in the family were two brothers, (1) Fridolin Weber (i) and (2) Franz Anton Weber; their father, also Fridolin (1691–1754), is said to have been a singer, violinist and organist. For further information on their ancestry, see below under (9) Carl Maria von Weber.

Bibliography for all members of the family except (9) Carl Maria appears following the entry on (8) Edmund Weber.

(1) **Fridolin Weber (i)** (*b* Zell, Wiesental, 1733; *d* Vienna, 23 Oct 1779). Singer and violinist. He was a member of the Mannheim electoral chapel and was for some time a copyist there. In 1756 he married Marie Caecilia Stamm (1727–93), by whom he had four daughters, (3) Josepha, (4) Aloysia, (6) Constanze and (7) Sophie.

(2) **Franz Anton Weber** (*b* Zell, 1734; *d* Mannheim, 16 April 1812). Composer and violinist. He left the service of the Elector Palatine Carl Theodor in 1758 and moved to the vicinity of Hildesheim. His marriage to Maria Anna Fumetti enabled him to take over a post in the civil service previously held by his father-in-law. From this first marriage came his sons (5) Fridolin (ii) and (8) Edmund. In 1761 he was offering his musical services locally, describing himself as 'Hoff Musique Director'. In 1778 he was musical director of a theatrical company in Lübeck; he was appointed Kapellmeister at the end of that year, and in 1785 moved to Eutin as *Stadtmusicus*. That same year he married his second wife, the singer Genovefa Brenner, who gave birth to their son (9) Carl Maria von Weber in Eutin in 1786. Franz Anton spent some time in Vienna (1787) and Hamburg (1788–9), and in the years that followed was both a member of other theatre companies and ran a company of his own, performing in Kassel (1789), Meiningen (1789–90), Nuremberg, Erlangen, Ansbach and Bayreuth (1791–4), Hildburghausen, Rudolstadt and Weimar (1794), and from the end of 1797 in Salzburg, where his second wife died in 1798. He and his youngest son, Carl Maria, went into business with the Gleissner lithographic printing process in Munich in 1799 and Freiberg in 1800. He subsequently stayed in south Germany and Austria, furthering his son's musical education, and accompanied Carl Maria to Breslau (1804–7), Stuttgart (1807–10) and Mannheim.

(3) **(Maria) Josepha Weber** [Hofer; Mayer] (*b* Zell, 1758; *d* Vienna, 29 Dec 1819). Soprano, eldest daughter of (1) Fridolin Weber (i). After her father's death she moved to Vienna, and was then engaged as a soprano at Graz, 1785–7. On 21 July 1788 she married the court musician Franz de Paula Hofer (1755–96), a friend of Mozart's, and began performing at the suburban Theater auf der Wieden the following January. According to contemporary reports, she commanded a very high tessitura but had a rough edge to her voice and lacked stage presence. In September 1789 Mozart wrote for her the bravura insertion aria 'Schon lacht der holde Frühling' (K580, for a German version of Paisiello's *Il barbiere di Siviglia*). Two years later he composed the role of the Queen of Night in *Die Zauberflöte* for her; she finally ceded the part to Antonia Campi in 1801. Josepha's second husband, from 1797, was (Friedrich) Sebastian Mayer (1773–1835), who created Pizarro in Beethoven's *Fidelio* (*Leonore*) in 1805. In that year Josepha retired from the stage, to be replaced by her daughter Josefa Hofer.

(4) **(Maria) Aloysia (Louise Antonia) Weber** [Lange] (*b* Zell or Mannheim, 1759–61; *d* Salzburg, 8 June 1839). Soprano, daughter of (1) Fridolin Weber (i) and sister-in-law of Mozart who married her younger sister (6) Constanze in 1782. She studied with G.J. Vogler in Mannheim and was active primarily at the Burgtheater in Vienna during the 1780s in both German and Italian comic opera.

Aloysia's long association with Mozart produced seven concert arias and a role in *Der Schauspieldirektor* as well as a series of letters by Mozart notable for his views on vocal performance and training. Their first encounter,

1. *Aloysia Weber as Zémire in Grétry's 'Zémire et Azor': engraving by Johann Esaias Nilson*

during Mozart's stay in Mannheim in 1777–8 (when he fell in love with her), resulted in the concert arias K294, K316/300*b* and probably K538. She moved from Mannheim to Munich in 1778, where she made her début as Parthenia in Schweitzer's *Alceste*. Engaged for the newly established National Singspiel in Vienna, she made her début on 9 September 1779 as Hännchen in the German adaptation of Philidor and Favart's *La rosière de Salency*. She married the court actor and painter Joseph Lange on 31 October 1780.

When in 1782 Joseph II reinstated Italian opera at the Burgtheater, Aloysia was retained as a leading singer. For her début as Clorinda in the revival of Anfossi's *Il curioso indiscreto* (30 June 1783) Mozart composed two new arias, K418 and K419. She participated regularly in Italian opera for only eight months, becoming *persona non grata* owing to disagreements over salary and role distribution as well as missed performances. In 1785 she was among the German singers transferred to the less prestigious Kärntnertortheater. Here she revived many German roles of her early career with the important addition of Konstanze in Mozart's *Die Entführung aus dem Serail* (1785–8).

Aloysia continued to make occasional appearances at the Burgtheater, most notably for a revival of Gluck's *La rencontre imprévue* (1785) and for the Viennese première of Mozart's *Don Giovanni* (Donna Anna, 7 May 1788). After the death of Joseph II (1790), Leopold II retained her for his newly formed *opera seria* venture (1790–92), although only as a seconda donna. In 1795 Aloysia undertook a concert tour with her sister Constanze, continuing her successes as Mozart's Sextus, a role she had performed in Vienna.

Leopold Mozart expressed his opinion of Aloysia's voice in a letter to his daughter of 25 March 1785:

> It can scarcely be denied that she sings with the greatest expression: only now I understand why some persons I frequently asked would say that she has a very weak voice, while others said she has a very loud voice. Both are true. The held notes and all expressive notes are astonishingly loud; the tender moments, the passage-work and embellishments, and high notes are very delicate, so that for my taste the one contrasts too strongly with the other. In an ordinary room the loud notes assault the ear, while in the theatre the delicate passages demand a great attentiveness and stillness on the part of the audience.

Mozart's compositions give the clearest picture of her voice. The light orchestrations show sensitivity to her small instrument, while the melodic lines exploit expressive, cantabile delivery and give ample opportunity for portamento and the addition of ornaments. There is an almost casual assaying of her remarkable upper range, extending to *g‴*. Gebler regarded her as 'a splendid singer, [with] a tone and an expression that goes to the heart, an extraordinary upper range; she correctly performs the most difficult passages and blends them with the song as it should be done'.

(5) Fridolin (Stephan Johann Nepomuk Andreas Maria) [Fritz] **Weber (ii)** (*b* Hildesheim, 29 Nov 1761; *d* Hamburg, 11 March 1833). Composer and violinist, son of (2) Franz Anton Weber. Like his brother (8) Edmund he was a pupil of Joseph Haydn, and held a post in the Esterházy orchestra for a brief period in 1788. He was then a member of various theatre companies in south and central Germany, and was a musical director in Wiesbaden around 1812. From 1819 until his death he played the viola in the orchestra of the Hamburg Stadt-Theater. Franz Anton and Edmund Weber probably also had a hand in the pasticcios ascribed to Fridolin, *Der Freybrief* (1789, Meiningen) and *Der Aepfeldieb* (1791, Hamburg), which were largely based on music by Haydn.

(6) (Maria) Constanze [Constantia] **(Caecilia Josepha Johanna Aloisia) Weber** (*b* Zell, 5 Jan 1762; *d* Salzburg, 6 March 1842). Soprano, daughter of (1) Fridolin Weber (i) and wife of Wolfgang Amadeus Mozart. *See* MOZART family, (4).

(7) (Maria) Sophie Weber [Haibel] (*b* Zell, Oct 1763; *d* Salzburg, 26 Oct 1846). Daughter of (1) Fridolin Weber (i). She married the composer and singer JAKOB HAIBEL on 7 January 1807. Mozart described her (15 December 1781) as 'good-natured but feather-brained'. She was present during his last hours, of which she wrote (34 years later) a moving account for Georg Nikolaus Nissen, her brother-in-law and Mozart's biographer. During her widowhood she lived with (6) Constanze in Salzburg.

(8) (Franz) Edmund (Kaspar Johann Nepomuk Joseph Maria) Weber (*b* Hildesheim, 19 June 1766; *d* ? after 1831). Composer, son of (2) Franz Anton Weber. He studied with Joseph Haydn in 1787–8 and led an unsettled existence in the theatre all his life (in the capacity of instrumentalist, singer, stage manager and director), with his father Franz Anton's troupe and with other theatre companies. It was for these that he wrote his operas *Der Transport im Koffer* (1792, Nuremberg), *Martin Fex, oder Ich habe der Brüder mehr* (1795, Salzburg) and *Die Zwillinge* (?1797, Salzburg). After spending some time in Würzburg (1804–5), Bamberg (1809) and Wuppertal (1810–11), he became a musical director in Berne (1812–19) and was briefly a singing teacher in Lübeck (1819); he subsequently held further posts as musical director in Königsberg (1823–4) and Cologne and Aachen (1824–6). By now active only as a double bass player, he accompanied his daughter, the singer Therese Weber, to her engagements in Detmold (1827–9) and Würzburg (1830). The documentary records lose his track in 1832, somewhere in the Cologne area.

(9) Carl Maria (Friedrich Ernst) von Weber (*b* Eutin, ?19 Nov 1786; *d* London, 5 June 1826). Composer, conductor, pianist and critic, son of (2) Franz Anton Weber. A prototypical 19th-century musician-critic, he sought through his works, words and efforts as performer and conductor to promote art and shape emerging middle-class audiences to its appreciation. His contributions to song, choral music and piano music were highly esteemed by his contemporaries, his opera overtures influenced the development of the concert overture and symphonic poem, and his explorations of novel timbres and orchestrations enriched the palette of musical sonorities. With the overwhelming success of his opera *Der Freischütz* in 1821 he became the leading exponent of German opera in the 1820s and an international celebrity. A seminal figure of the 19th century, he influenced composers as diverse as Marschner, Mendelssohn, Wagner, Meyerbeer, Berlioz and Liszt.

1. CHILDHOOD AND ADOLESCENCE: UP TO 1804. The early years of Weber's eventful life are cloaked in obscurity, as relatively few documents survive to illuminate his life before 1810. He was the son of the *Stadtmusicus* and sometime Kapellmeister at Eutin, (2) Franz Anton Weber (1734–1812), and his second wife, the former Genovefa Brenner (1764–98). For most of his life Weber celebrated 18 December as his birthday, but he learnt in 1817 that the registry in Eutin recorded the date of his baptism as 20 November. In his later years he observed his birthday on 19 November, a date that coincided with his wife's presumed birthday and with the anniversary of their betrothal.

Weber's early biography is dominated by the activities of his father, a quixotic person who had appropriated the title 'Baron' and the 'von' in his name from an extinct Austrian noble family. Franz Anton resigned his position as *Stadtmusicus* in 1787 in order to form his own theatre company, composed largely of members of his own family. Between 1787 and 1794 the family travelled to Hamburg, Vienna, Kassel, Meiningen, Nuremberg, Bayreuth, Erlangen and Augsburg. In summer 1794 Genovefa, a soprano, was briefly engaged for Goethe's theatre in Weimar. The family troupe was in Salzburg in 1795 and 1796, now under the direction of Weber's half-brother Edmund. According to Carl Costenoble, a member of the company in 1795, its repertory included plays by Iffland and Kotzebue, and operas by Mozart, Wenzel Müller, Neefe and Edmund Weber. Costenoble also provides a picture of the boy Weber as a weak, lame child, and later sources confirm that he was afflicted by a congenital hip disorder that caused him to limp.

Because of Genovefa's pregnancy and fragile health, Franz Anton withdrew from the company and settled in Hildburghausen in 1796. About this time he evidently began to entertain the thought of developing his son into a child prodigy along the lines of Mozart. Weber, who had studied music with his father and older half-brothers, now took piano and thoroughbass lessons from the local organist, oboist and composer Johann Peter Heuschkel. Studies in counterpoint with Michael Haydn followed, when the family moved back to Salzburg in late 1797. (Genovefa died there on 13 March 1798.) From the lessons with Haydn emerged Weber's first known composition, a set of six four-voice fughettas published in open score (J1–6).

From late 1798 to August 1800 Franz Anton and Carl Maria made Munich their base, and the father continued his efforts to promote his son as a second Mozart. Weber studied singing with Giovanni Valesi and piano and composition with Johann Nepomuk Kalcher. According to his *Autobiographische Skizze* (1818), Weber composed while studying with Kalcher an opera (*Die Macht der Liebe und des Weins*), a mass, piano sonatas, several sets of variations, string trios and songs. He offered a number of these pieces to publishers in late 1800, but the only ones known to survive are the mass (in a manuscript copied in Salzburg in 1802) and a set of published variations (op.2). Following the *Autobiographische Skizze* and an early obituary (*BAMZ 1826*), Weber's principal biographer, his son Max Maria von Weber, claimed that the rest of these juvenilia was accidentally destroyed by a fire at Kalcher's, but the fact that Weber and his father were still offering these pieces to publishers in November 1801, by which time they had moved again to Salzburg, contradicts this. Instead, it is more likely that Weber himself destroyed the bulk of his juvenilia (as asserted in Gustav Schilling's *Encyclopädie*, 1835–8) some time in the first half of 1802.

In Munich father and son were introduced to lithography, a process used to print Weber's op.2, which was lithographed by Alois Senefelder's brother Theobald (not by Weber himself, as is often claimed in the literature). With plans to start their own lithographic business, the Webers moved to Freiberg in Saxony in September 1800. There Weber rapidly composed an opera, *Das Waldmädchen*, to a libretto by the local theatre director Carl von Steinsberg. Its première on 24 November 1800 in Freiberg and subsequent revival in Chemnitz in December triggered a heated exchange in early 1801, in the *Freyberger gemeinnützigen Nachrichten für das chursächsische Erzgebirge*, between Weber (doubtless guided by his father) and local musicians. In the wake of the controversy the Webers resettled in Chemnitz in March 1801. Apart from this opera, of which only parts of two pieces survive, Weber composed very little between autumn 1800 and the end of 1801 – 12 Allemandes for piano later published as op.4 are the only other original compositions known from this period – as he seems to have been distracted by his father's ultimately unsuccessful efforts at lithography.

After a brief stay in Munich in summer 1801, Weber and his father were again in Salzburg from November 1801 until July 1802. Beyond the possible revision of the early mass, the compositions of this period include a few canons and a new opera, *Peter Schmoll und seine Nachbarn*. Of importance for Weber's future development

was his friendship in Salzburg with Thaddäus Susan (1779–1838), an amateur flautist and law student with whom he began to plan various literary and critical projects.

By August 1802 the Webers had left Salzburg for an extended tour to northern Germany. The tour is largely documented by an album that Weber kept from 1799 to 1812 (*D-Bsb*). Passing through Munich, where they had the libretto of *Peter Schmoll* printed, the Webers visited Augsburg, where they made the acquaintance of the publisher Gombart and it is likely that they sold *Peter Schmoll* to the local theatre. In Sondershausen Weber met Gerber, probably giving him autobiographical material for the revision of his music-biographical dictionary and also volunteering to write entries on Salzburg musicians for it. The tour continued to Hamburg, where Weber gave a public concert (30 October 1802) and composed his earliest surviving songs. According to his autobiographical sketch, he began to collect treatises on music theory on this trip in an attempt to answer technical and aesthetic questions that his earlier training had neglected. This claim is largely substantiated by the discovery in 1983, among the autographs of his letters to Gottfried Weber (*US-NYpm*), of a list of approximately 45 theoretical works, ranging from the 16th century to the most recent, that Weber had acquired before 1810 (Veit, G1988). Weber and his father returned to Augsburg in late 1802 in order to supervise the première of *Peter Schmoll* in spring 1803. Nothing is known of this production, and the opera achieved no further performances during Weber's lifetime.

An important watershed for Weber's early development was his stay in Vienna from August 1803 to May 1804, a sojourn that is principally documented by his letters to Susan, with whom he continued to discuss a number of ambitious literary projects. For the first time in his life, Weber was separated for an extended period from his father, who returned to Augsburg. More important, in Vienna Weber came under the tutelage of the theorist, organist and composer Georg Joseph Vogler, who was then at work on *Samori*, a new opera commissioned by the Theater an der Wien. Consisting largely in the analysis of Vogler's own works, the lessons with Vogler imparted to Weber that which he felt he needed most, a method for understanding the aesthetic reasons for compositional procedures. Through Vogler Weber gained entrée to the upper echelons of Viennese musical society, making the acquaintance of Salieri, Teyber, Gyrowetz, Schuppanzigh, Wranitzky, Hummel and even Joseph Haydn; interestingly, Weber's letters to Susan make no mention of Beethoven, whom Vogler may have regarded as a rival. However, the lessons with Vogler came at a price, as Vogler restrained Weber from composition for nine months and required him to prepare the vocal score for *Samori*. Further, when Vogler finally allowed Weber to compose again he instructed him to write two variation sets for piano based on his own theatrical works (J40, J43).

2. Breslau, Carlsruhe and Stuttgart, 1804–10. In May 1804, through Vogler's influence, Weber received an appointment as conductor at the theatre in Breslau (now Wrocław) in Silesia. Leaving Vienna on 28 May, he travelled via Salzburg for a final visit to Susan, and from there to Augsburg, where he collected his father. He assumed his duties in Breslau on 11 July 1804 at an annual salary of 600 thalers and made his first appearance as conductor on 1 August with a performance of *La clemenza di Tito* in German translation. During his two-year tenure at Breslau the idealistic young conductor worked hard to raise standards. He enlarged the orchestra and obtained higher salaries for its members, but also insisted on more stringent discipline at rehearsals and performances. He introduced a new orchestral seating arrangement, placing the first violins on the conductor's right and the second violins and violas on his left. His ambitious repertory included many operas by Mozart and other Viennese composers, operas by Peter Winter, a small number of works by Berlin composers, German translations of Italian works by Paer, Paisiello and Salieri, and a substantial number of *opéras comiques* in German translation, the last reflecting his exposure to French opera in Vienna in 1803 and 1804 (Zduniak, L1987, Waidelich, L1994).

Given the demands of the position, it is hardly surprising that Weber composed relatively little at Breslau. The major work of the period was the unfinished fairy-tale opera *Rübezahl*, based on a libretto by the theatre director, J.G. Rhode. Nor is it surprising that the young conductor, still in his teens, encountered substantial opposition to his reforming efforts. Orchestral members allegedly resented the increased demands, critics were bothered by the new seating arrangement and by their perception of excessively fast tempos, and the management was troubled by the increased expenses and a repertory that did not always cater to the popular taste. According to Weber's son Max Maria, an accidental poisoning that left Weber bedridden for a prolonged convalescence allowed the theatre management to make changes in the orchestra that provoked him to resign. He closed his career in Breslau with a farewell concert on 21 June 1806.

Following his departure from Breslau, Weber spent the autumn and winter in Carlsruhe in Upper Silesia at the court of Duke Eugen Friedrich of Württemberg, who at Weber's request granted him the honorific title of 'Musik-Intendant'. Temporarily freed from obligations, Weber composed a number of pieces for the small court orchestra and its musicians, including his two symphonies and the first version of the Concertino for horn. With letters of introduction from Duke Eugen and a portfolio of new music in hand, Weber left Carlsruhe on 23 February 1807 to undertake an extended tour to the west, giving concerts in Ansbach, Nuremberg, Erlangen and Bayreuth in the spring and early summer.

On 17 July 1807 Weber reached his ultimate destination, Stuttgart, the residence of Duke Eugen's brother Friedrich, King of Württemberg, and by 17 August Weber was appointed 'Geheimer Sekretär' to Duke Ludwig Friedrich Alexander, another brother of the king, with a salary of 400 gulden and responsibilities for administering the duke's affairs and the instruction of his children in writing and music. Little is known of Weber's day-to-day life during his 31 months in Stuttgart and Ludwigsburg, where Duke Ludwig maintained a residence. His circle included his father, who joined him in December 1807, the civil servant and librettist Franz Carl Hiemer, and the singer Margarethe (Gretchen) Lang, with whom he possibly had a romantic liaison. He also enjoyed contacts with men of letters like the editors of the *Morgenblatt für gebildete Stände*, J.C.F. Haug and Georg Reinbeck, and

the royal librarian Lehr, who allegedly introduced him to the philosophical writings of Immanuel Kant, Christian von Wolff and Friedrich von Schelling. Such contacts renewed his interest in musical journalism and prompted him to start a quasi-autobiographical novel, *Künstlerleben*, of which an early segment was published in the *Morgenblatt* in 1809.

Most important of all, Weber's friendship with the composer Franz Danzi, Kapellmeister in Stuttgart since October 1807, kept him involved with art at a time when his official duties could easily have diverted him from a career in music. Thus, after composing relatively little in the second half of 1807, Weber produced a fairly steady stream of compositions during 1808 and 1809, including the melodrama-cantata *Der erste Ton* (J58), which he dedicated to Danzi. Presumably through Danzi's influence Weber also received commissions to write music for a production of Schiller's *Turandot* at the court theatre. The major work of the period was also intended for the theatre, the opera *Silvana* (composed between July 1808 and February 1810), for which Hiemer reworked the old *Waldmädchen* libretto.

The period in Stuttgart did not, however, come to a good end, largely through severe lapses in Weber's own judgment. Research by Joachim Veit has greatly clarified this dark episode in the composer's life (*NZM*, G1989). In 1808 Weber diverted about 50 friedrichs d'or from ducal funds to cover his and his father's personal debts. To repay this 'borrowing' Weber then compounded the problem by obtaining a loan from the innkeeper Hönes, who lent him 1000 gulden in the belief that Weber would procure for his son a nominal court appointment that would exempt him from military service (a scheme that Duke Ludwig himself used to finance his extravagant life style). Hönes's son was conscripted anyway and died in the war, and when Weber's repayments fell in arrears, Hönes lodged an official complaint against him, bringing to light the sale of military exemptions.

Weber and his father were arrested on 9 February 1810, charged with embezzlement, participation in a corrupt draft-evasion scheme and theft of royal silverware (an unfounded charge). The criminal trial was heard on 9–10 February by the king, who dismissed the criminal charges (probably in order to obtain Weber's silence about Duke Ludwig's corruption) and transferred the matter to the civil court, where Weber's creditors could make claims against his assets for his debts of about 2600 gulden. On 18 February Weber was placed under civil arrest at the expense of his creditors. Allowed to have visitors and writing materials, Weber finished *Silvana* during his confinement. After checking Weber's assets, the creditors petitioned on 22 February for his release, which the king ordered on 23 February along with a lifelong banishment from Württemberg. On 26 February Weber and his father were escorted to the Baden border, with only a small amount of money and letters of introduction from Danzi to various acquaintances in his old home town, Mannheim.

3. Years of travel, 1810–12. The traumatic last weeks in Stuttgart left an indelible impression on Weber, who resolved thenceforth to hold himself to a higher level of fiscal and moral responsibility. To this end he started a diary on 26 February 1810 to mark the beginning of a new period in his life. He maintained this remarkable document (*D-Bsb*) until his death in 1826, and but for a few lacunae it records in detail Weber's daily activities and accomplishments, his expenses, personal and professional contacts, correspondence, performances, creative work, illnesses and impressions.

Arriving in Mannheim on 27 February 1810, Weber quickly established contacts with prominent professional and amateur musicians there and in nearby Heidelberg, including the lawyer Gottfried Weber, his brother-in-law the cellist Alexander von Dusch and the tenor Ludwig Berger. These contacts allowed him to participate in concerts in the vicinity shortly after his arrival and to give his own 'academies' in Mannheim on 9 and 28 March. Over the course of the next year he became a frequent participant in the concerts of the Carl-Stéphanie Museum, a society founded in Mannheim in 1808. Leaving his father in Mannheim, Weber then moved in April to Darmstadt, where he resumed studies with Abbé Vogler. As had earlier been the case, Weber reciprocated with work for Vogler, writing an analytical introduction to Vogler's revision of chorale settings by J.S. Bach and helping with a piano score for a new Vogler opera, *Der Admiral*. Vogler also entrusted Weber with the task of writing his biography. At this time Weber formed close friendships with two fellow students, Johann Gänsbacher (whom he had known in Vienna in 1803–4) and the young Meyerbeer.

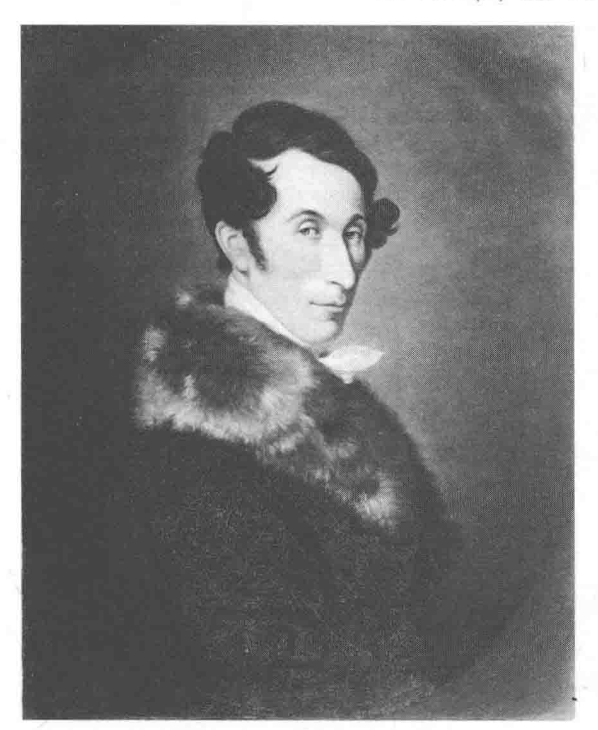
With no position or steady income, Weber supported himself in a variety of ways that are mirrored in the compositions of the period. For his frequent appearances as a pianist and composer, he revised the First Symphony and composed the C major Piano Concerto, a set of variations for cello and orchestra (J94), the rondo for soprano and orchestra op.16 (J93) and a duet for two altos and orchestra (J107). Contracts with publishers allowed Weber to sell works composed at Stuttgart and new compositions, like the six songs of op.15 bought by Simrock. Simrock also published the six sonatas for piano and violin (J99–104) originally commissioned by André, who had rejected them, however, because he found them too difficult for the intended amateur market. Weber drew much-needed income from the sale of *Silvana*, which the theatre in Frankfurt purchased for 100 gulden and whose first performance it gave on 16 September 1810. Aristocratic patronage also remained important for Weber, who cultivated the support of Princess Stéphanie of Baden and Grand Duke Ludewig I of Hesse-Darmstadt. Weber's new one-act opera *Abu Hassan* (composed between 11 August 1810 and 12 January 1811) also figured in his hopes for patronage, as the Grand Duke rewarded him with a very generous gift of 440 gulden for the dedication of the work. Lastly, Weber negotiated to sell his incipient novel to the publisher J.F. Cotta.

Of particular importance during this period was the formation of a secret society called the Harmonischer Verein, a group that initially included Weber, Gottfried Weber, Dusch and Meyerbeer, and that later included Gänsbacher and a few others. According to the statutes that Weber drafted, the Verein, a society of musicians with literary skills, sought at one level idealistically to raise the standards of music criticism and taste through non-partisan reviews that would promote the good wherever it existed. At another level, however, the society had a practical function, as its members were obliged to promote the careers and works of their 'brothers' through reviews and notices. To spread their reputations as widely

as possible, members were also urged to establish contacts with editors and publishers throughout the German-speaking world. The Verein also made preliminary, but unrealized, plans for its own musical journal. In order to maintain the secrecy necessary for the appearance of impartiality, the members employed pseudonyms. For example, Weber, the group's director, styled himself 'Melos', whereas Gottfried Weber, its secretary and archivist, was 'Giusto'. Over the course of time, the society gradually ceased to function; however, Weber continued in later years as a conductor in Prague and Dresden to promote the works of his 'brothers' whenever the opportunity arose.

Weber left Darmstadt on 14 February 1811 to begin a long-planned tour with which he intended to establish his reputation, cultivate contacts for the Verein and educate himself as to the state of music. Travelling via Giessen, Aschaffenburg, Würzburg, Bamberg, Nuremberg and Augsburg (where he settled an outstanding debt with his former publisher Gombart by offering him the *Momento capriccioso* for piano and the five songs of op.13) he arrived in Munich on 14 March. With royal permission he gave a concert at the court theatre on 5 April, at which the court clarinettist Heinrich Baermann performed a newly composed Concertino, the first of a series of pieces written by Weber for him. The success of this work led immediately to royal commissions for two full-length clarinet concertos.

Because of the difficulties of arranging concerts during the summer months, Weber stayed in Munich throughout the summer of 1811 to supervise the première of *Abu Hassan* (4 June) and devote himself to composition and music criticism. On 9 August he set out for Switzerland to attend the music festival at Schaffhausen, enlist new allies for the Verein and present concerts of his own. He arrived on 19 August in Schaffhausen, where he was made an honorary member of the Société de Musique Helvétique. After giving a concert at Winterthur on 28 August, he went to Zürich to confer with the editor Hans Georg Nägeli and present a concert on 3 September. During his stay in Zürich he conceived a plan (ultimately unrealized) for a *Noth-und Hülfs-Büchlein für reisende Tonkünstler*, a kind of travel guide providing practical information for touring virtuosos about artistic conditions in cities and towns throughout Europe. Travel on foot from Zürich to Lucerne allowed Weber to experience sunrise on the Rigi; but, unable to arrange concerts in Lucerne, Solothurn or Berne, he spent ten days at Jegisdorf, near Berne, as the guest of a wealthy acquaintance, composing a concert aria (J121) and starting work on a quintet for clarinet and strings for Baermann. Weber ended his Swiss tour with a concert in Basle on 13 October and a stay at Schloss Wolfsberg, Ermatingen, on Lake Constance from 15 to 21 October.



Between 24 October and the end of November Weber was again in Munich. In preparation for his farewell concert on 11 November he revised the old *Rübezahl* overture as the overture *Der Beherrscher der Geister* and started work on a new piano concerto (J155, of which only the finale was ready by the time of the concert). Weber's last weeks in Munich were spent composing two works commissioned by the king, a concerto for the bassoonist Georg Friedrich Brand and an aria (J126) for the tenor Georg Weixelbaum, and completing three Italian duets and three canzonettas that he presented to the queen at a royal audience on 26 November.

Weber and Baermann left Munich on 1 December 1811 for a joint tour to Prague, Leipzig, Gotha, Weimar and Dresden. In Berlin they performed publicly on 15 and 25 March, following which Baermann continued the tour on his own while Weber remained in the Prussian capital for a production of *Silvana*. After taking charge of the rehearsals himself and recomposing the two principal arias, Weber conducted the première of the revised version on 10 July and the repetition on 14 July to general acclaim. In Berlin he learnt of the death of his father, but he also met a number of people with whom he formed lasting friendships, including F.F. Flemming, Friederike Koch, Hinrich Lichtenstein and F.W. Gubitz. This social circle, comprising mostly members of Zelter's Liedertafel, stimulated Weber to compose a number of choruses and solo songs during his sojourn. He also wrote the first of his four surviving piano sonatas (op.24), which he sold along with a collection of four songs (op.23) and the piano score of *Silvana* to the relatively new publishing firm of A.M. Schlesinger, who in the remaining years became Weber's principal publisher.

On 31 August 1812 Weber left Berlin for Gotha, where he had been invited by Duke Emil Leopold for an extended stay (6 September – 20 December). With few professional obligations or social distractions Weber was free to compose or complete a number of works, including the Second Piano Concerto, the variations for piano (J141) on a *romance* from Méhul's opera *Joseph*, a set of piano waltzes for the publisher Kühnel (J143–8), a concert aria (J142) for Duke Emil Leopold's son Prince Friedrich, a new duet for *Abu Hassan* and a setting of J.F. Rochlitz's hymn *In seiner Ordnung schafft der Herr* for chorus and orchestra.

4. Prague, 1813–16. Weber left Gotha on 20 December with the intention of undertaking another extended tour, which he opened on 1 January 1813 with the première of the hymn and the first public performance of the new concerto at the Gewandhaus in Leipzig. On 12 January he arrived in Prague, ostensibly on the way to Vienna and thence to Italy. But the tour did not continue beyond the Bohemian capital, as the administrators of the Estates Theatre offered him the position of Musikdirektor in the hope that he would revive the moribund opera. Forgoing his dream of Italy, in part so that he could discharge his outstanding debts and in part because he relished the opportunity to shape an institution according to his own vision, Weber accepted the appointment for three and a half years at an annual salary of 2000 gulden and with provision for yearly benefit performances and annual leaves. With the dissolution of the old company at Easter 1813, Weber went to Vienna at the end of March to recruit new singers, choristers and orchestra players. There he also encountered Baermann, Meyerbeer, Vogler and Spohr, and presented a concert on 25 April at the Redoutensaal.

Despite the orchestra's initial resistance to Weber and the difficulties of putting together a new company – compounded by wartime conditions that kept some potential cast members from travelling to Prague – the opera was able to start again on 9 September 1813 with a German-language performance of Spontini's *Fernand Cortez*, the first of the 72 works and approximately 430 performances given during Weber's tenure (Bužga,

2. Carl Maria von Weber: portrait by Ferdinand Schimon, 1825 (Carl-Maria-von-Weber-Gedenkstätte, Dresden-Hosterwitz)

L1985). As he had in Breslau, Weber attempted an ambitious repertory of original German works and French and Italian operas in translation. But for reasons outside his control the company never fully attained the goals he set. Although the theatre boasted a fine orchestra and a great dramatic soprano in Therese Grünbaum, Weber was unable to cast classics like *Die Zauberflöte* and *Die Entführung aus dem Serail*, or any of Gluck's operas. Nevertheless, under Weber the Prague theatre did perform such difficult works as Beethoven's *Fidelio*, Cherubini's *Faniska*, Poissl's *Athalia* and Meyerbeer's *Wirth und Gast* (later known as *Alimelek*), and it gave the première of Spohr's *Faust* (1 September 1816).

For a number of reasons Weber never really enjoyed his tenure in Prague. His heavy workload doubtless contributed to the frequent bouts of ill-health during these years, illnesses that weakened a constitution already exhibiting symptoms of tuberculosis. Weber quickly came to feel isolated in Prague; despite a good friendship with the amateur cellist Dr Philipp Jungh, he failed to find a congenial circle of artists and intellectuals with whom he could associate and make music. In his letters he frequently complained about the Prague audiences, which he found generally unresponsive. A particularly volatile personal life also contributed to his misery. By the end of 1813 Weber was embroiled in a doomed relationship with a married actress, Therese Brunetti, from which he extracted himself in spring 1814 with the start of a romantic involvement with the singer Caroline Brandt, a popular member of his company. Weber eventually married Caroline, in 1817, but the early years of the courtship were stormy, as her jealousy and quick temper, her justified pride in her own career and her mother's initial disapproval of Weber provided ample grounds for frequent dissonance in a relationship that admittedly is illuminated only from Weber's side by his diary and the many surviving letters that he wrote to her (Bartlitz, D1986). The relationship faltered in summer 1815 when the couple agreed to separate prior to Weber's annual leave, but by June 1816 they were fully reconciled and by the end of 1816 they were betrothed.

With such distractions, it is not surprising that Weber found it difficult to compose in Prague. The strong desire to write a new opera was repeatedly thwarted by his inability to obtain a suitable text, as a call for librettos that he published in the *Allgemeine musikalische Zeitung* in March 1813 yielded no viable subjects. More fruitful for composition were the summer vacations that afforded him the chance to restore health and spirits. In summer 1814 Weber went to Bad Liebenwerda for a three-week cure before moving on to Berlin for nearly five weeks to enjoy the company of his old friends. The vacation concluded with another stay with Duke Emil Leopold at Gotha and Schloss Gräfentonna, where, with the celebrations surrounding the victorious return of the King of Prussia to Berlin fresh in his mind, Weber began to compose the first pieces that won him widespread acclaim, the six songs for unaccompanied male chorus *Leyer und Schwerdt* (op.42) on patriotic poems by Theodor Körner.

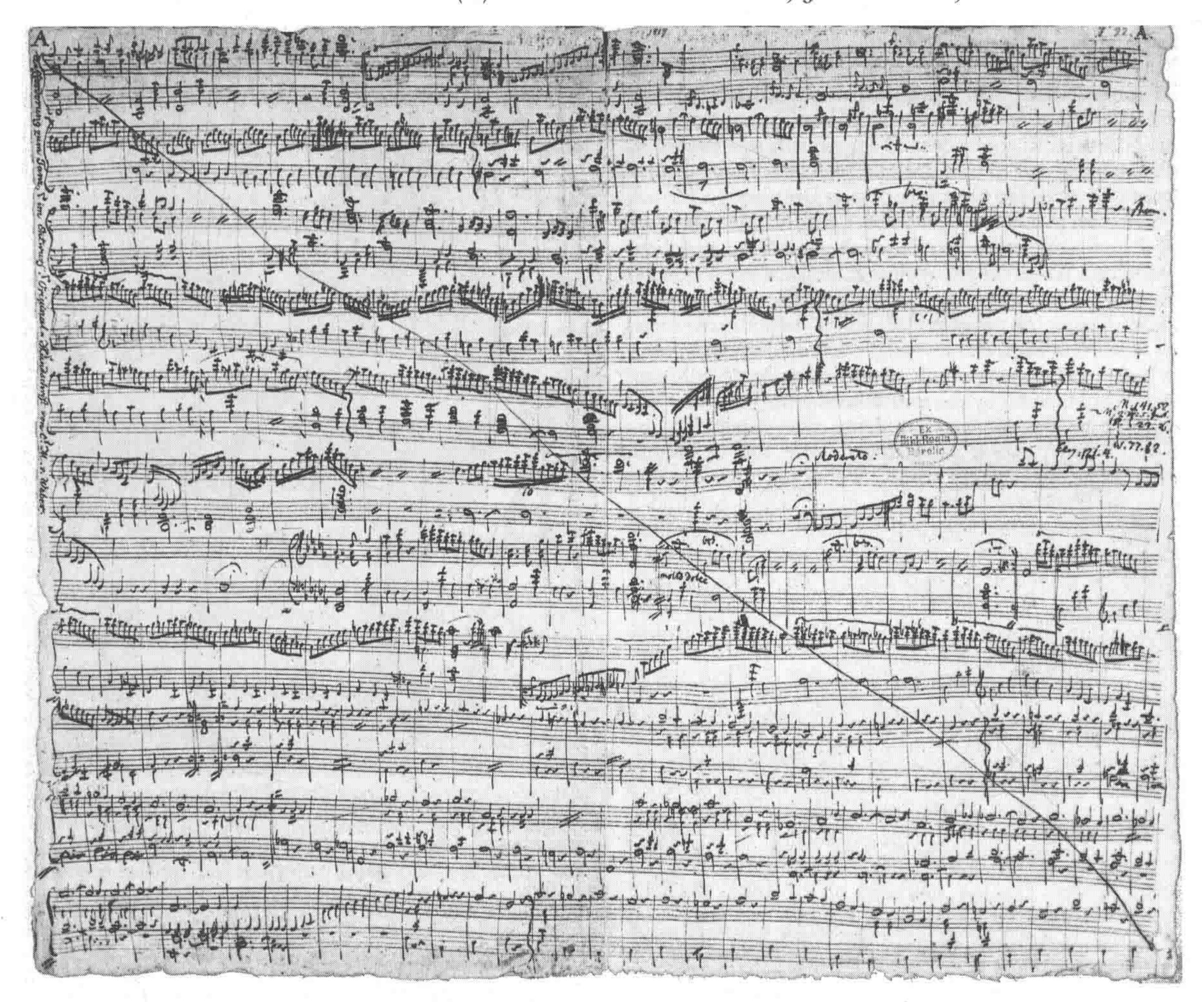
In summer 1815 Weber spent most of his leave in Munich reunited with Baermann. At first unable to concentrate because of his recent breakup with Caroline Brandt (with whom he nevertheless continued a painful correspondence), he eventually began to compose again, writing two movements of the *Grand duo concertant* for Baermann and himself and a concert aria for the soprano Helene Harlas. In Munich patriotic fervour once again stimulated artistic creation, as Weber's experience of public celebration of the allied victory at Waterloo engendered a plan for a cantata entitled *Kampf und Sieg*. After a concert in Munich on 2 August and one in Augsburg on 8 August, Weber remained in Munich in relative seclusion to work on the cantata, complete the Clarinet Quintet, which he had started in 1811, and revise the Horn Concertino for the horn player Sebastian Rauch.

By the time of his return to Prague on 7 September 1815 Weber had decided to terminate his association with the Estates Theatre at the end of his contract in September 1816. Although he continued to fulfil his duties conscientiously, his activities during the last year in Prague broadened considerably. He returned to literary activity, writing not only concert reviews for the *k.k. priv. Prager Zeitung*, but also 'dramatic-musical notices', brief historical-critical essays designed to enhance the public appreciation of new works in the Prague repertory. His reading in February 1816 of the fourth part of E.T.A. Hoffmann's *Fantasiestücke in Callots Manier* prompted him to resume his own novel, and two Prague concerts given by Hummel in April encouraged him to apply himself again to the piano. After the première of *Kampf und Sieg* on 22 December 1815, Weber set about systematically to send manuscript copies of the score to the allied monarchs in the hope of financial reward and a possible appointment. From this resulted permission to perform the cantata in Berlin. Weber went there in early June 1816 and the success of the performances on 18 and 23 June fuelled the efforts – ultimately unsuccessful – of the Intendant of the royal Prussian theatre, Count Carl von Brühl, to secure a court appointment for Weber. On his way back to Prague, Weber spent four days (13–17 July) in Carlsbad (now

Karlovy Vary), where the Intendant of the royal Saxon theatre, Count Heinrich Vitzthum von Eckstädt, approached him about directing a new German-language opera company that the court hoped to establish in Dresden.

In his last weeks in Prague Weber conducted the première of Spohr's *Faust*, prepared a number of organizational aids for his successor, and cleared his debt to his creditors in Stuttgart. By this time he could entertain serious hopes for a position in Dresden, for on 19 August he had accepted Vitzthum's terms: an appointment as Kapellmeister at a salary of 1500 thalers with primary responsibility for the German opera but with responsibilities as well for music at the court church and the Italian opera. However, official confirmation of the appointment was slow to come, as the Dresden court was cautious about committing resources to the new venture. Conducting his last performance on 30 September, Weber left Prague on 7 October, with plans to go to Berlin and from there (if no news arrived from Dresden) on an extended tour of northern Germany and Denmark.

Weber arrived in Berlin on 13 October, accompanied by Caroline Brandt, who had been engaged for guest appearances at the theatre, and her mother. There Weber composed or completed the second and third piano sonatas, three volumes of songs (opp.43, 46 and 47), and the *Grand duo concertant*. The stay in Berlin exposed Weber to E.T.A. Hoffmann's *Undine*, which stimulated his most important opera review, and witnessed two events that were to change the rest of his life. On 19 November, the eve of Caroline's departure from Berlin, she and Weber became engaged, and on 25 December Weber at last received a letter from Vitzthum confirming the new appointment and requesting him to come to Dresden as quickly as possible.



5. Dresden, 1817–21. With his arrival in Dresden on 13 January Weber had the mandate to create a royal company for German-language opera, which hitherto had been provided by Joseph Seconda's private troupe while the court itself had maintained a first-class Italian company. At his disposal was an excellent orchestra, but the vocal resources were less promising, as the new German company had few trained soloists and no female choristers, the high choral parts having been assigned to boy sopranos and altos from the Kreuzschule. Accordingly, Weber's initial goal, which he outlined in an open letter to the residents of Dresden designed also to temper unrealistic expectations, was to build up a functional ensemble, to which star soloists would be added over time. Rehearsals began on 18 January for Méhul's *Joseph*, an opera chosen largely because it required no prima donna, and the first performance on 30 January was deemed a success by no less than the king himself.

However, Weber never fully realized his ambitions for the German opera (W. Becker, L1962). Although the chorus was reorganized to his satisfaction by September 1817, the numerous *Gastspiele* in 1817 failed to result in the speedy permanent engagement of star singers. Only with the acquisition of the coloratura soprano Caroline Willmann in 1820 and her replacement, the great dramatic soprano Wilhelmine Schröder-Devrient, in 1823 was the company finally able to cast the leading soprano roles with distinction. Tenor roles posed even more of a problem, as the only tenor Weber considered adequate, Friedrich Gerstäcker, left for Kassel at Easter 1821 after only one year in Dresden. A disillusioned Weber met Vitzthum's cost-conscious successor Hans Heinrich von Könneritz on 24 January 1821 to discuss the possible dissolution of the German company.

Nor did Weber's repertory in Dresden develop exactly as he wished. The company's vocal limitations forced it at first to rely on relatively modest *opéras comiques* and Singspiele. Restrictions also arose because the German opera was not allowed to duplicate the repertory of the Italian opera. Thus a number of works that Weber had presented in German in Prague (*La vestale*, *Fernand Cortez*, *Camilla*, *Le cantatrici villane*, *Così fan tutte*, *Le nozze de Figaro* and *La clemenza di Tito*) were not available to him, and only over time was Weber able to wrest from the Italian company Joseph Weigl's *Die Schweizerfamilie* (1818), Peter Winter's *Das unterbrochene Opferfest* (1819) and Mozart's *Don Giovanni* (1821). Because of such constraints, one should therefore be cautious about reading too much ideological import into Weber's almost exclusively Franco-German repertory in Dresden.

Cultural politics were a further source for frustration during Weber's tenure in Dresden. Rightly or wrongly, Weber strongly believed that a pro-Italian faction, led by the Kapellmeister Francesco Morlacchi, was at work surreptitiously to undercut his authority and lower the status of the German opera in the eyes of the court and the public. Thus ensued a series of petty grievances and major crises that Weber blamed on the Italians. For instance, to his dismay he found upon his arrival in Dresden that his title was not 'Kapellmeister', to which he had agreed, but rather the less prestigious 'Musikdirektor', whereupon he threatened to leave for breach of contract. Vitzthum was able to mollify him, and the matter was officially resolved to Weber's satisfaction by 10 February 1817. A second crisis occurred in early 1818, when the court countermanded his efforts to reorganize the seating of the Italian opera orchestra for performances of *La vestale* and *Elisabetta, regina d'Inghilterra* that he conducted during Morlacchi's absence in Italy. Weber sparked a third crisis in early 1820 through his published comments about Meyerbeer's *Emma di Resburgo*, wherein he not only chastised his friend for having capitulated to Rossinian mannerisms but also questioned the 'digestive capacity' of Italian audiences that had made Rossini their principal operatic fare. Weber's comments provoked Morlacchi to go to Count Detlev von Einsiedel, the king's minister, to demand that Weber be offically reprimanded for his 'insult' to Italians, a move that Weber in turn perceived as a serious threat to artistic integrity and freedom of critical judgment (Allroggen, G1991). Only in spring 1822, by which time Weber had mitigated his own ambitions for the German opera, did he and Morlacchi finally come to an uneasy peace.

Weber's first year in Dresden was perhaps the most significant in his life. Though he had no close musical colleagues, he quickly cultivated friendships with various members of the theatre and with members of the 'Dichter-Thee' and Liederkreis, two groups of local poets who gathered socially to read their respective works aloud. The editor of the *Abend-Zeitung*, the theatre secretary Carl Gottfried Theodor Winkler (who used the pseudonym Theodor Hell), provided Weber with a forum for introductory essays of the kind that he had written in his last year in Prague. And in the playwright Friedrich Kind,

3. *Autograph sketch for Weber's 'Aufforderung zum Tanze', composed 1819 (D-Bsb)*

the *spiritus rector* of the Liederkreis, Weber found a collaborator with whom he soon began to discuss plans for a new opera. By 21 February Kind had agreed to write a libretto after Johann August Apel's novella *Der Freischütz*, and thus began a project that resulted in Weber's most famous work. Throughout the year Weber also made plans for his impending marriage to Caroline Brandt, who was still in Prague finishing her contract. In June, Count Brühl attempted once again to recruit Weber for Berlin, but Brühl's plan was eventually vetoed by the King of Prussia. At the end of October, following a round of wedding festivities at court for which he composed an Italian cantata (J221), Weber returned to Prague, where he exchanged his own wedding vows with Caroline on 4 November. After a six-week honeymoon that took them to western Germany, they went to their new home in Dresden on 20 December 1817.

Weber's duties as Kapellmeister and the attendant crises that arose periodically caused his own projects frequently to be shelved while he worked on pieces for the court, such as a mass completed in early 1818 for the king's nameday (J224). In the summer of 1818 Weber and his wife rented rooms at Hosterwitz in the countryside nearby, in the hope that the quiet rural life would allow him to finish the composition to Kind's libretto, which had been provisionally accepted for Berlin, but he was obliged at this time to compose a cantata for the queen's nameday and several major works for the celebration of the 50th year of the reign of King Friedrich August. For the 50th wedding anniversary of the king and queen he completed a second mass in early 1819 (J251). The birth of a daughter on 22 December 1818 and Caroline's difficult recovery provided additional distractions. And shortly after Weber set to work again on the opera in March 1819 he was himself struck by a severe illness that left him incapacitated for nearly two months, during which time his infant daughter died. Convalescing in Hosterwitz in summer 1819 he was finally able to complete a number of pieces under contract to Schlesinger, to whom he sent on 26 August the piano variations op.55, the aria op.56 (written for Cherubini's *Lodoïska*), the *Festgesänge* op.53/57, the *Jubel-Cantate* (op.58), the *Jubel-Ouvertüre* (op.59), the four-hand piano pieces op.60, the *Rondo brillante* op.62, the Flute Trio op.63, the *Polacca brillante* op.72 and the songs of opp.66 and 71. During the summer he also composed one of his most celebrated solo piano pieces, *Aufforderung zum Tanze*, and began work on a fourth piano sonata.

In autumn 1819 Weber resumed the composition of *Die Jägersbraut*, as Kind's libretto was called at the time, and worked on it more or less continuously until he finished it on 13 May 1820. Shortly thereafter, at Brühl's

recommendation, the title of the opera was changed to *Der Freischütz*. Upon completing the opera, Weber composed between May and July the incidental music for P.A. Wolff's play *Preciosa*, which was commissioned by Brühl for Berlin, and began at the same time to work on a comic libretto by Theodor Hell, *Die drei Pintos*, which he intended for the German opera in Dresden.

With the première of *Der Freischütz* postponed because of delays in the construction of the new Schauspielhaus in Berlin, Weber and Caroline embarked on a concert tour to northern Germany and Copenhagen in late July 1820. The tour took them to Halle, where the overtures to *Der Freischütz* and *Preciosa* were given their public début on 31 July. At both Halle and Göttingen Weber was overwhelmed by the enthusiasm with which he was received by the university students, who serenaded him with his own choral songs from *Leyer und Schwerdt*. Because of her delicate health, Weber left his expectant wife in Hamburg (where she nevertheless suffered a miscarriage after he departed) and continued on to Eutin, Plön and Kiel. On 24 September he arrived in Copenhagen, where he played at a court concert on 4 October and presented his own public concert on 8 October. After concerts in Lübeck and Hamburg he and Caroline returned to Dresden on 4 November.

In the first months of 1821 Weber continued to work on *Die drei Pintos* and discussed with Kind a new opera based on the Spanish epic El Cid. At Brühl's request, he also composed an additional piece for *Der Freischütz*, for whose long-delayed première Weber and his wife travelled to Berlin on 2 May. During the rehearsals for his opera, Weber attended the luxuriant production of Spontini's *Olimpia* (in E.T.A. Hoffmann's translation) at the royal opera house. On the morning of 18 June 1821 he completed the Concert-Stück in F minor for piano and orchestra, and that evening he conducted the first performance of *Der Freischütz* at the new Schauspielhaus. The work struck a responsive chord in the Berlin audience, which at one level embraced its theatricality and tuneful, folklike melodies (a fact driven home in Heine's well-known *Reisebrief* of 16 March 1822) and at another welcomed it as a potent symbol of German cultural resistance to the Franco-Italian style of the king's unpopular protégé, Spontini.

6. Between 'Der Freischütz' and 'Euryanthe', 1821–3. The triumph of *Der Freischütz* in Berlin changed Weber's life. After the première in Berlin, all the principal German theatres acquired and staged it within the next couple of years. Weber became a national celebrity of the first order. In August 1821 he received from Kassel a firm offer of appointment as Kapellmeister at a generous salary of 2500 thalers, which he declined after obtaining a modest increase of his salary in Dresden from 1500 to 1800 thalers. The production of *Der Freischütz* at the newly remodelled Dresden court theatre on 26 January 1822 at last gave the German opera a work that equalled the popularity of even the most frequently performed Rossini operas at the Italian opera. And in Vienna the enthusiastic response to the first performance of *Der Freischütz* there in early November 1821 led the Kärntnertortheater, under the management of the famous Neapolitan impresario Domenico Barbaia, to offer Weber a commission for a new opera. He eagerly accepted the commission as an opportunity to write an ambitious through-composed opera for the most important centre for music and theatre in the German world (Tusa, P(v) 1984–5).

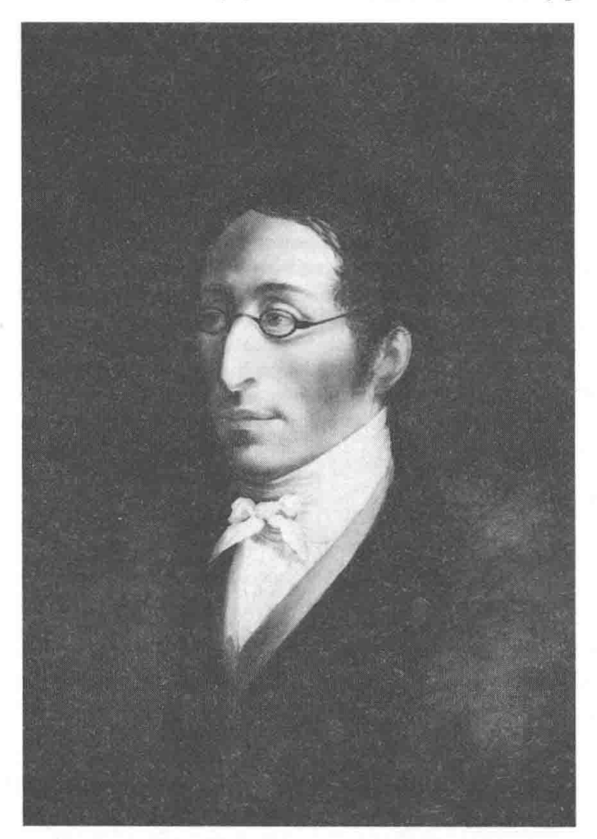
At the same time, Weber's life after *Der Freischütz* took on decidedly darker hues as well. He and Kind grew apart as the librettist became envious of the praise lavished upon the composer. The progress of Weber's disease was such as to cause him to make a last will and testament on 21 July 1821, and he was bedridden again in October 1821. Frustrations with his colleagues and the feeling that the German opera was treated like a stepchild by the court caused him to express again, in late 1821, his wish for the dissolution of the German company in letters to Brühl and I.F. von Mosel.

Recognizing the need to husband his fragile health for his own compositional projects and desiring to avoid the charge of self-promotion, Weber declined to direct a new series of subscription concerts organized by the court orchestra (although in the event he did participate as soloist in his Concert-Stück in November and he conducted a performance of the *Jubel-Cantate* in December). The reasons advanced in his letter of 14 October 1821, published in Kapp (F1922, revised 1931), also shed some light on the almost total cessation of Weber's critical and literary activities after 1820 and on his rejection of the editorship of a new musical supplement to the *Abend-Zeitung* offered to him by its publisher in early 1822.

Weber's output as a composer after 1821 was conspicuously reduced, as evidenced by the fact that a new contract with Schlesinger in autumn 1822 stipulated mainly older pieces from his unpublished backlog. The

little time that his duties and declining health left for composition were focussed at first on the opera that had been commissioned by Vienna. Because of his estrangement from Kind, he turned to a lyric poet, Helmina von Chézy, who by the end of 1821 had drafted the libretto of *Euryanthe* based on the 13th-century *Roman de la violette* by Gerbert de Montreuil. Weber was in Vienna in February and March 1822 to observe the company for which he would write the opera and to show an early version of the libretto to the conservative censors who had mutilated the Viennese *Freischütz*. In Vienna Weber had his first encounter with the young Wilhelmine Schröder-Devrient, whose benefit performance of *Der Freischütz* he conducted on 7 March, and also his first inkling that the overwhelming popularity of this one work would pose a serious threat to any subsequent operas he would write.

Though Weber had initially agreed to have the opera ready in autumn 1822, the genesis of *Euryanthe* stretched until autumn 1823, for two main reasons. First, the longer Weber lived with the libretto, the more aware he became of its shortcomings; as a result of his own misgivings and consultations with outside parties including Ludwig Tieck and Ludwig Rellstab, he made repeated requests for revisions from Chézy well into 1823. Secondly, Weber had little time to devote to the opera. He began to compose it in May 1822, following the birth of his son Max Maria on 25 April and the family's move to the summer house in Hosterwitz on 15 May. However, his progress was frequently interrupted by the need to return to Dresden to conduct in the place of the assistant conductor Franz Anton Schubert, who had fallen gravely ill. After moving the family into a spacious new apartment in Dresden at the end of September, he made another attempt to finish the opera, but was hindered by Chézy's extended sojourn in Berlin, the illness of Morlacchi and a royal wedding in late 1822. In February 1823 Weber was finally able to mount a sustained effort to finish the opera, which progressed efficiently to completion with his move to Hosterwitz on 10 May for the summer. By 29 August the opera was completed apart from the overture.



Accompanied by his pupil Julius Benedict, Weber travelled to Vienna on 16 September 1823 for the première of *Euryanthe*. During his first days in the imperial capital he attended the last performances of Barbaia's Italian company and was greatly impressed by the virtuosity and dramatic skills of its members. With the return of the German company Weber made his final recommendations about casting his own opera. As he completed the overture and the piano score and supervised the rehearsals, he enjoyed the company of the 'Ludlamshöhle', a convivial society of actors, writers and musicians. A highpoint of his stay was a trip on 5 October to Baden to meet Beethoven, with whom he had entered into correspondence (mostly lost) in early 1823 in conjunction with the Dresden performance of *Fidelio*.

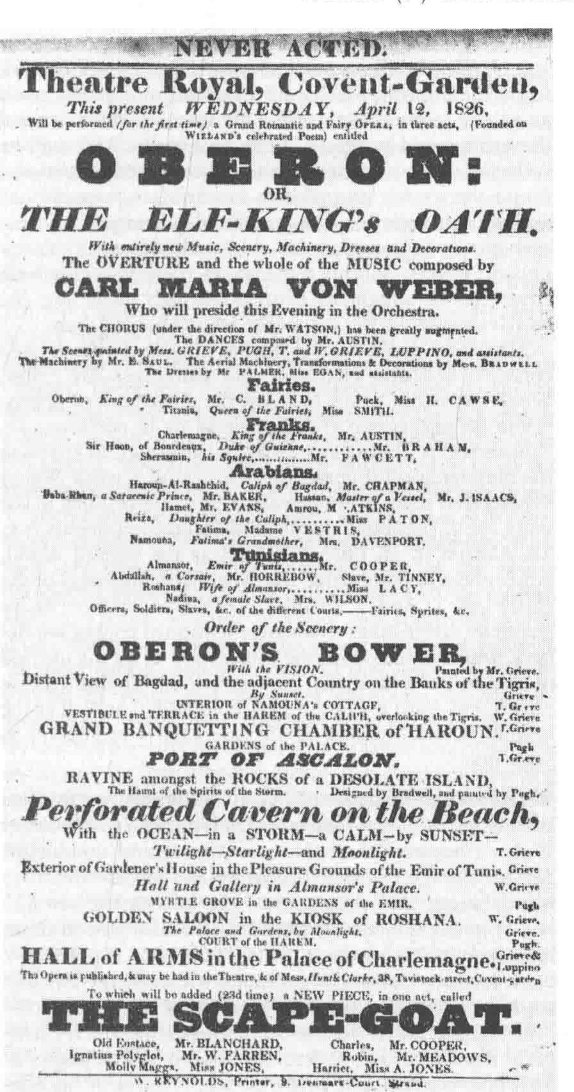
Weber conducted the première of *Euryanthe* on 25 October and the next two performances as well, at which he introduced a few small cuts to shorten the playing time. He also attended the fourth, conducted by Conradin Kreutzer. Weber was convinced that the performances at which he was present were triumphs, and after his return to Dresden on 10 November he never tired of pointing out the number of curtain calls he had received. But the press reports suggest that *Euryanthe* had been greeted with mixed feelings by the Viennese, who, expecting a second *Freischütz*, received instead a much more complicated work. The ambivalent reception that was accorded *Euryanthe* in Vienna set the tone for its subsequent dissemination. Under Weber's supervision and with Wilhelmine Schröder-Devrient in the title role, *Euryanthe* proved a great success at its first performance in Dresden on 31 March 1824; but its failure in other centres was a source of increasing disappointment for the ailing composer. Weber's desire to have it performed in Berlin was a source of further irritation, as *Euryanthe* became the pawn in a highly publicized power struggle between Spontini and Brühl throughout the first half of 1824. As a result, *Euryanthe* was not performed in the Prussian capital until December 1825.

7. LAST YEARS, 1824–6. Because of declining health, his bitterness about *Euryanthe*'s fate and a crushing workload at court, Weber entered a long compositional hiatus after the première of *Euryanthe*. Even the return to the beloved summer house at Hosterwitz for the spring and summer of 1824 failed to shake him out of this dormancy; he could generate no enthusiasm for *Die drei Pintos* (Mahler later completed it and gave the première in 1888), and the only piece he composed between autumn 1823 and January 1825 was a commissioned French *romance* (J292). The few professional pleasures the demoralized composer seemed to enjoy came from conducting, as he gave a memorable performance of Haydn's *The Seasons* at the old opera house in Dresden on 6 June 1824 and went at the end of the month to the Klopstock centenary celebration at Quedlinburg, where he conducted the 'Eroica' Symphony, his own *Jubel-Ouvertüre*, J.G. Naumann's *Vater unser* and the third part of Handel's *Messiah*. He then went to Marienbad on 8 July to seek, unsuccessfully, a cure for his illness.

The return from Marienbad in mid-August marked, however, a turning-point that led Weber to his last major composition, as he found in his mail a letter from Charles Kemble, manager of the Covent Garden theatre in London. The success of *Der Freischütz* in Germany had prompted informal overtures from London and Paris in 1822 and 1823, and during Weber's trip to Vienna in autumn 1823 Barbaia had tried to interest him in a commission for Italy. But when a veritable mania for *Der Freischütz* swept London in 1824, Kemble decided to make a firm offer to the man of the hour, inviting him to London to conduct the opera season and compose two new operas for Covent Garden. Recognizing that his days were numbered and believing that the potential rewards offered by London would provide a measure of financial security for his family (which was soon to expand with the birth of a second son, Alexander, on 6 January 1825), Weber wrote to Kemble on 7 October to agree to compose an opera based on Wieland's romance *Oberon* and to go to London for three months in spring 1825. To prepare himself for composition to an English libretto and the trip to London, Weber – who had earlier learnt some Czech during his stay in Prague and had taken Italian lessons during his first year in Dresden – began to study English, and by January 1825 he was able, with the help of his friend C.A. Böttiger, to correspond with his British contacts in their native language.

Weber received J.R. Planché's libretto for *Oberon* in three mailings between 30 December 1824 and 1 February 1825, by which time he had requested a postponement of

5. Carl Maria von Weber: portrait by John Cawse, between 14 March and 5 June 1826 (Royal College of Music, London)



the première until spring 1826. An initial reading of the text revealed to him the profound differences between 'English opera' and continental opera, which he lucidly analysed in a pair of letters to Planché. While working on *Oberon* in early 1825 Weber also accepted a commission from George Thomson of Edinburgh to arrange ten Scottish melodies for voice, flute, violin, cello and piano. By early March he was again severely ill and on 3 July he set out for Bad Ems for another cure. There Kemble and the conductor George Smart met the composer on 10 August to discuss his fee, but they were unable to agree terms. Only in early December did Weber accede to Kemble's offer of £500 for the score and British rights to publication, far less than he had hoped for; he subsequently agreed to conduct the first 12 performances for £255 and four (in the event, five) so-called Oratorio Concerts at £25 each.

Although the treatment at Ems produced no physical improvement, Weber returned to Dresden on 1 September in higher spirits than for a long time, and thus he was able to work on *Oberon* more or less continuously throughout the last part of 1825 and the first months of 1826. The latter months of 1825 witnessed a luxuriant Dresden production of Spontini's *Olimpia* in November in conjunction with yet another royal wedding, and the long-delayed production of *Euryanthe* in Berlin in December 1825, for which Weber supplied additional ballet music. Despite shortness of breath and hoarseness that alarmed his friends as to the seriousness of his condition, Weber went to Berlin to supervise the final rehearsals and conduct the first two performances, on 23 and 28 December. Returning to Dresden on 31 December, he celebrated his last New Year's Day with members of the Liederkreis.

In his final months in Dresden Weber's irritation over the mostly unauthorized dissemination of his work abroad led him to try to exert more control over his intellectual property. The actions of the Parisian arranger Castil-Blaze caused special concern. Although he could do nothing about Castil-Blaze's adaptation of *Der Freischütz* as *Robin des bois* at the Théâtre de l'Odéon (7 December 1824), Weber wrote in October 1825 to reproach him for the unauthorized publication of the full score of his version. And on learning that Castil-Blaze planned to produce a new work based in part on the music of *Euryanthe*, Weber wrote again in January 1826, this time threatening to make his protest public, which he did after Castil-Blaze proceeded anyway to incorporate pieces from *Euryanthe* in the pasticcio *La forêt de Sénart* (14 January 1826). Chastened by his experiences, Weber took forceful measures to impede the unauthorized distribution of *Oberon*, sending to the German theatres a circular to remind them of his exclusive right to sell the score and writing letters to German sovereigns requesting privileges prohibiting the publication or sale of unauthorized editions and arrangements within their territories.

Accompanied by the flautist A.B. Fürstenau, Weber left Dresden on 16 February 1826 to begin the long trip to London. On 25 February he arrived in Paris, where he spent a week making contacts with prominent musicians and poets, including Auber, Berton, Catel, Cherubini, Fétis, Kalkbrenner, Onslow, Paer, Rossini and Pixis. With plans to return to Paris on the way back from London, Weber continued on 2 March, crossing the channel from Calais to Dover on 4 March and reaching London the next day. Staying at the home of George Smart in Great Portland Street, Weber completed the overture to *Oberon*, finished the music to Act 3, and composed two additional pieces specifically for the leading tenor, John Braham. During the month of rehearsals leading up to the première Weber somehow found the energy also to complete the piano score, conduct four Oratorio Concerts at Covent Garden, conduct at the Philharmonic Society, take part in two benefit concerts and perform in a number of aristocratic salons. The première of *Oberon* on 12 April 1826 was a great success, with lavish settings and spectacular scenic effects that impressed even Weber, and the opera remained popular throughout the season.

With the *Oberon* performances behind him, Weber conducted once more at the Oratorio Concerts, participated in three more benefit concerts and made preparations for his own concert at the Argyll Rooms on 26 May, for which he wrote his last composition, a song for the soprano Catherine Stephens (J308). The concert, which also presented the *Jubel-Cantate* in an English version entitled *The Festival of Peace*, netted only £96 11s. 0d. In May plans were broached to mount *Der Freischütz* at Covent Garden on 5 June as a benefit for Weber, but the composer's health ultimately did not permit this. Following his last public appearance at a concert given by Mary Anne Paton on 30 May, he decided to forgo the *Freischütz* production in order to leave London on 6 June. But he did not live to see his homeland again, as he died alone and quietly in his room at Smart's during the night of 4–5 June, succumbing at last to tuberculosis. To the strains of the Requiem by his beloved Mozart, Weber's funeral service was held on 21 June at

6. Playbill for the first performance of Weber's 'Oberon', Covent Garden, London, 12 April 1826

the Roman Catholic chapel of St Mary Moorfields, and there his mortal remains were interred. In 1844, thanks in part to the efforts of Wagner, his coffin was transferred to its final resting-place in Dresden.

8. WRITINGS AND THOUGHT. Any attempt to come to terms with Weber must start with the fact that one work, *Der Freischütz*, has tended to overshadow his many other accomplishments. What Weber feared as early as 1822 did come to pass. But to focus one-sidedly on Weber as the creator of *Der Freischütz* does little justice to an individual who did not dwell single-mindedly on opera. As early as 1810 Weber consciously cultivated an image as a musician who combined composition in a variety of genres with performance, aesthetic reflection and criticism, and to these talents must be added his remarkable skills as conductor and opera organizer. Contemporary evidence demonstrates the extent to which this image of universal achievement was accepted. What is more, to view Weber's accomplishments primarily through the prism of *Der Freischütz* obscures the ways in which his career reflected various cultural and social cross-currents in the German-speaking world of his day, like the shift of patronage from the aristocracy to the bourgeois marketplace, the role of the press in shaping the opinion of the new musical public and the emergence of a new compositional aesthetic from late 18th-century sources.

As the polemic surrounding the production of *Das Waldmädchen* in Freiberg attests, Weber learnt at a tender age the power of the press, and throughout his life he took up the pen for a variety of practical and idealistic reasons: as a source of income, to promote his own artistic activities and those of his own associates, to raise the level of critical discourse about music, to educate largely bourgeois audiences to an appreciation of 'the good' and on occasion to express poetic urges. The correspondence with Thaddäus Susan from 1802 to 1804 reveals collaborative plans for the founding of a musical journal and for a history of the Viennese theatre; however, from this period survive only a few entries that made their way into Gerber's *Neues … Lexikon der Tonkünstler* (Kaiser, K1910). Although the last year in Stuttgart witnessed the production of a few essays and the start of his novel, it was his life as a freelance musician from 1810 to 1812 that led Weber to turn regularly to writing as a source of much-needed income and as a way to further the goals of the Harmonischer Verein. From this period also date a number of ambitious but unrealized plans: a new journal, a handbook for touring musicians, a biography of Vogler and a larger study of aesthetics. After a hiatus during his first two years as conductor in Prague, Weber resumed writing in late 1815 with 'dramatic-musical notices' in the *k.k. priv. Prager Zeitung*, brief essays about new operas designed to overcome what he perceived as unresponsiveness in the Prague audiences. In Dresden he continued from 1817 to 1820 to publish such introductions in the *Abend-Zeitung*, fully aware that his efforts ran the risk of being misconstrued as an attempt to prejudice audiences only to his point of view. During the years 1815–20 Weber also produced a substantial number of reviews for the *Prager Zeitung* (1815–16), a lengthy explanatory essay about his cantata *Kampf und Sieg* (1816) and various essays for the *Allgemeine musikalische Zeitung*, including the important review of Hoffmann's *Undine* (xix, 1817, cols.201–8).

Beyond the expository prose, two other sources provide important insight into his views on music, culture and society. First, Weber produced a number of items of poetry and fictional prose, of which the most significant by far was his unfinished novel *Tonkünstlers Leben*. Drawing inspiration from Hoffmann and Jean Paul, Weber worked sporadically on *Künstlerleben* (its original title) between 1809 and 1820, conceiving it as a forum for discussion of social and aesthetic issues in modern music and opera. The loosely constructed plot, to the extent that one can be inferred from the extant sources, is quasi-autobiographical, as the life, professional career and attitudes of its musician-protagonist are strikingly similar to those of Weber himself. Second, his extensive correspondence not only provides indispensable biographical information but also frequently sheds important light on his critical perspectives and artistic goals.

Various factors converged around 1820–21 to cause Weber to stop writing reviews and 'dramatic-musical notices' and to turn over his unfinished novel to Friedrich

Kind. The hostility with which some of his literary efforts were greeted in Dresden, especially his comments on Meyerbeer's *Emma di Resburgo* in early 1820, was a source of profound disillusionment. His declining health led him to see the need to conserve his strength and time for his own projects. And finally, his breakthrough to widespread celebrity as a composer with *Der Freischütz* in 1821 seems to have made it harder for him to appear publicly as a judge of other composers' music.

Weber's writings deal with a number of crucial issues in early 19th-century music, such as the relationships between artist and society (particularly the problems of the touring virtuoso), the function and nature of criticism, and new developments in instrument construction. His numerous writings on opera, based on extensive knowledge of repertory and years of experience in the theatre, are of exceptional interest. For instance, they reveal his perspectives on various genres and national schools of opera. In Weber's writings French opera, as found especially in lighter works by Boieldieu, Dalayrac and Isouard, is seen to give priority to verbal, dramatic and intellectual values. In contrast, Weber regarded Italian opera as more passionate and more melodically orientated, although in his view it had declined in recent years, especially in the works of Rossini and his followers, into merely sensuous delight with little substance. As Weber saw it, the ideal of German opera was to synthesize the melodic and expressive qualities of the older Italian style and the French concern for drama and declamation with traditional German mastery of harmony and instrumentation and a purported German inclination towards seriousness and depth of feeling. But he also articulated serious weaknesses in German opera, including its difficulty in developing a strong identity, the lack of experienced librettists, the superhuman demands placed on German singers by the cosmopolitan repertory of German theatres and the relatively weak institutional support afforded it by theatre managements.

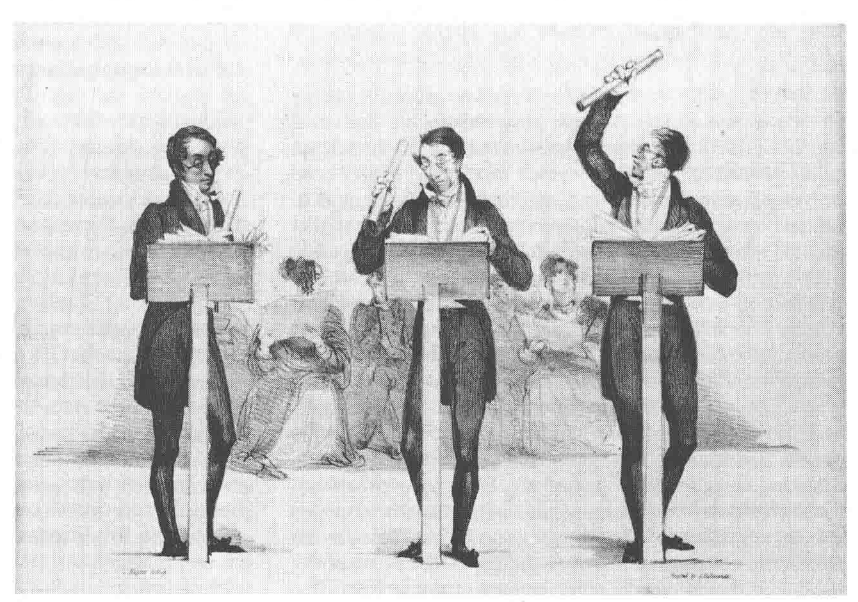
Given the fact that Weber's discussions of art are, for the most part, scattered throughout letters, brief essays and the disconnected chapters of the unfinished novel, it is hardly surprising that they do not develop a systematic and consistent aesthetic or theoretical viewpoint. But they do offer a number of important hints about his understanding of art and his goals as a composer. For a figure often considered representative of early Romanticism in Germany, many of his views seem quite old-fashioned. Thus for Weber music is a language of the passions whose principal goal is to arouse the feelings of the listener. His writings abound with references to the 18th-century principle of variety within unity and his language retains many concepts derived, probably through Vogler, from traditional rhetorical approaches to music. His comments on harmony and modulation reveal a fairly conservative bent, as he criticizes composers for abrupt or unwarranted modulations that destroy the sense of key or are not matched to changes in feeling. And though he encourages young composers to cultivate all genres of composition, his comments on the string quartets of Friedrich Fesca (*AMZ*, xx, 1818, cols.585–91) imply the traditional primacy of vocal music, inasmuch as he considers it to be more deeply immersed in human activity than are the genres of instrumental music.

At the same time, Weber's writings manifest a number of newer or more individual ideas. Various comments about influence and emulation and about composers (like Joseph Weigl) who tended to repeat themselves demonstrate the importance that he attached to originality, not as an end in itself but as the only way by which art and the artist could progress along new paths. Although he collected dozens of treatises, he criticized traditional music theory for its inability to correlate prescriptions and prohibitions for compositional technique with his own goals of expression. He abhorred 'imitation' of non-musical effects, and his remarks on vocal music make it clear that he sought to express through music not the words themselves but rather the feeling behind them.

Especially prominent in his writings are interrelated concepts of truth, character and wholeness. By 'truth' Weber generally seems to mean the projection of appropriate feeling, either in composition or in performance. 'Character' is almost synonymous, although in stressing the maintenance of character throughout a work Weber implies that it is a more permanent quality residing in the work itself, encompassing its individual components (e.g. 'characters' in an opera) as well as the overall mood, atmosphere or 'colouring' (*Kolorit*, *Farbengebung*) of the entire piece. And a strongly delineated and pervasive character contributes to the oft-mentioned goal of wholeness, which entails both the integration of all the utilized means (melody, harmony, orchestration, verbal and scenic means, etc.) into a 'Haupt- und Totaleffekt' as well as the 'organic' subordination of successive parts and details to the whole.

9. The pianist and conductor. As with all performers before the era of recorded sound, it is difficult to document Weber's accomplishments as a pianist and conductor. Apart from the evidence his own piano pieces offer as to his technique and treatment of the instrument (see §11 below), there is relatively little detailed information about his piano playing, about which published reports give contradictory views. For example, while the reviews and memoirs emanating from the Harmonischer Verein, from his friends in Berlin (Lichtenstein's memoirs) and from his pupil Benedict (F1881) extol the sensitivity and poetry of his improvisation and performance, reviews of his concerts in Vienna in 1813 and 1822 are decidedly lukewarm, suggesting that Weber did not possess the brilliance and accuracy of the best Viennese pianists of the day.

His accomplishments as a conductor were more universally acclaimed, as he seems to have had a genius for getting the most out of his orchestras. In many ways Weber was the prototype for the modern opera conductor. Viewing the conductor as the 'central point and effective soul of the whole' (letter of 21 January 1818 to Vitzthum), he directed with a baton and arranged the podium and orchestral seating so as to facilitate his communication with both stage and pit and improve the acoustical qualities of the performance. In line with his view of opera as total theatre, he immersed himself in all aspects of production and took special interest in innovations in stagecraft, as is evident from his detailed notes on the Berlin staging of the Wolf's Glen scene in *Der Freischütz* (W. Becker, L1962). In principle a proponent of 'Werktreue' and a foe of intrusions (like inappropriate coloratura) that violate the spirit of a work, Weber was nevertheless also pragmatic enough to admit alterations that accommodated a piece to local tastes or modern audiences, like the cuts that he made in Dittersdorf's *Doktor und Apotheker* in Prague or his use of updated



versions of Méhul's *Joseph* and Grétry's *Raoul Barbe-bleue* in Dresden. His letter to the conductor Aloys Praeger about the performance of *Euryanthe* shows that he also tolerated facilitations to allow a performer to convey more effectively the spirit of a work. His emphasis on spirit and feeling as the ultimate arbiters of artistic truth led him in the same letter to espouse a theory of tempo – one that he presumably followed in practice – that allowed subtle fluctuations in the pulse according to the ebb and flow of passion in the piece.

10. THE COMPOSER. Despite the wide currency of certain works, Weber the composer remains far less well understood than most figures of comparable stature of the 19th century. There are a number of reasons for this, beginning with the fact that scholarship failed to produce a complete critical edition of his works during the 20th century. Such an edition, however (along with critical editions of his diaries, correspondence and writings), was begun in the 1990s under the auspices of the Carl-Maria-von-Weber-Gesamtausgabe. The origins and early development of his style are clouded by the loss of most of the music composed before 1802 and by ignorance of his earliest studies. Clearly he came to know and admire Mozart's music very early, through the repertory of his family's 'Wandertruppe', and he continued throughout his life to profess in work and deed his allegiance to Mozart. Superficial Mozartisms abound in the early pieces, and Weber's propensity for climactic contrapuntal perorations in his mature instrumental pieces may betray a lingering influence of the finale of K551 (which Weber called the 'crown' of all symphonies) and that of the string quartet K387.

Yet Weber's study of Mozart and, to a lesser extent, Haydn only partly accounts for the ways in which his style developed, as his formative years also exposed him to works by numerous composers of German Singspiel and Italian opera of the later 18th century, as well as to the music of his various teachers. The sojourn in Vienna in 1803–4 doubtless marked an important turning-point, for during that time Weber probably made his first significant contact with the music of Beethoven and with the *opéras comiques* of Cherubini, Méhul, Dalayrac, Isouard and other French composers. And above all, the impact of Vogler at this juncture must not be underestimated, as the young composer acquired from the controversial old master not only a greater correctness in matters of harmony, part-writing and musical orthography, but also an enduring interest in folk and exotic music and, most important, a system for analysis that allowed him to understand the aesthetic basis for compositional procedures (Veit, H1990). From that time on Weber's development as a composer was essentially one of constant growth and maturation with no obvious breaks or 'periods' in terms of style or compositional approach; with continuous exposure to new works in a wide variety of styles and a self-imposed mandate not to repeat himself, he continued in his major works to explore and refine new means of musical expression up until the end in *Oberon*.

Another fundamental impediment to a full appreciation of Weber as a composer is that dominant analytic paradigms and procedures of the 19th and 20th centuries (developed mainly with reference to the music of Viennese Classical style and Beethoven in particular) do justice neither to Weber's vocal and dramatic works nor to his instrumental pieces. Despite his allegiance to Mozart, Weber did not adopt the peculiarly Viennese techniques of 'thematische Arbeit' or 'durchbrochene Arbeit'. And his inability to understand the integrative devices in Beethoven's middle-period music – evident in his letter to Nägeli of 21 May 1810 where he reproaches Beethoven for lack of unity – suggests that it is futile to look for similar techniques in his own music. But to view his music therefore merely as a kind of potpourri or mosaic is unsympathetic to his professed goals of unity and clarity and belies the effect of his best works. Nor do traditional analytical models deal well with issues of paramount importance for Weber's music like 'dramatic truth' or the interplay of contrasting sonorities.

The documents of his compositional processes do not afford much help either. Like Beethoven, Weber usually sketched his pieces before writing them in score, and for large-scale vocal works like operas and cantatas he seems usually also to have made preliminary plans for overall

7. Weber conducting selections from 'Der Freischütz' at Covent Garden, 8 March 1826: lithograph by John Hayter

tonal organization and choices of instrumentation (see his comments on the composition of *Kampf und Sieg*, ed. Kaiser, *Sämtliche Schriften*, 1908). But unlike Beethoven, Weber normally destroyed most of his preliminary drafts, and those that do survive, like the drafts for *Euryanthe* and *Oberon*, generally provide little evidence for the decision-making processes, as Weber seems mainly to have worked things out in his head and at the piano, sometimes over a long period, before writing out a draft. As implied in his comments on Cherubini's *Lodoïska*, he also seems to have conceived texture and sonority simultaneously with the invention of melodic content and thus was usually able to write out his scores quickly and with very few revisions. The fact that he often borrowed ideas from his earlier compositions is an aspect of the compositional process that has been little studied. Exactly how one can best discuss his music therefore remains an important issue for study. Attempts to apply Vogler's theories and the rhetorical traditions of the later 18th century, which a number of Weber's comments seem to echo, have shed some insight on Weber's approach (Veit, M1986), and Weber's own comments about composition and aesthetics, though scattered, afford further perspectives for sympathetic appraisal.

Lastly, various facets of reception history and criticism have disinclined scholars to take seriously the whole of Weber's compositional output. On the one hand critical biasses against 'functional' art have tended to cause scholars to overlook the large amount of occasional music, although most of Weber's music arose in conjunction with specific provocations – his own concerts, contracts with publishers, or commissions from theatres – just as had most of the music of 18th-century masters. And, as mentioned above, the way that historiography has tended to place his mature operas in general (and *Der Freischütz* in particular) at the centre of his output has worked against a clear and sympathetic understanding of his achievements by casting the vast majority of his works into their imposing shadow. This runs the risk of marginalizing the rest of his music as only a reflection of Weber's dramatic genius. To avoid this, the present article places the instrumental and vocal music first, in their chronological context before the major operas, which were the product of a brief but intense lifetime of observation, reflection, self-criticism and composition.

11. Instrumental works. Weber produced a steady stream of instrumental music between the six fughettas (op.1) of 1798 and the completion of the Piano Sonata no.4 in 1822, following which his poor health and pressing commissions forced him to devote hs energies to his last two operas. The surviving instrumental works include examples in most of the major genres of the early 19th century – notably absent are the string quartet and piano trio – as well as pieces in newer genres, like concert dances for solo piano and through-composed concertante works for soloist and orchestra. Much of this music arose from Weber's specific needs as a performer or concert-giver. The piano concertos, several of the variation sets and the *Rondo brillante* can be directly related to his public appearances as a pianist, and the piano sonatas, designed for private performance, were also calculated for his formidable technique. His contracts with virtuosos led to concertante works for various instruments, of which the concertos for Baermann represent some of the most significant works ever written for clarinet. The symphonies (especially no.1) and the overtures figured prominently in his activities as concert-giver. And most of the surviving 'chamber' works – the *Grand quatuor* (piano quartet, which he frequently performed), the variations for piano and violin J61 and three pieces for Baermann (J128, 182 and 204) – were also largely calculated for public performance, with the result that they stand apart from Classical ideals of equal participation and 'durchbrochene Arbeit' by featuring a principal virtuoso soloist.

In contrast to the amount that he wrote for professional performers, Weber composed relatively little explicitly for the burgeoning amateur market: three sets of four-hand piano pieces, the six *Sonates progressives* for violin and piano, the *Divertimento assai facile* for guitar and piano, and the piano variations on a gypsy theme (J219). And though he frequently alluded to contemporary dance music throughout his compositional output, and transformed the dance itself into concert music in the two polonaises and *Aufforderung zum Tanze* for solo piano (see fig.3 above), he wrote only a small amount of functional dance music for home consumption, significantly distancing himself from this genre when he had his last set of dances (J143–8) published anonymously by Kühnel in 1812.

(i) Style. Stylistically, the instrumental music manifests a number of traits that are also characteristic of the vocal and dramatic works. Given the fact that his writings stress the primacy of the melodic line, it is not surprising that Weber's approach is essentially homophonic; exceptions include frequent note-against-note passages (often in fast tempo) and conspicuously contrapuntal passages normally reserved for developments and codas. He preferred diatonic melodies, often based on the notes of the triad, but these are frequently embellished with appoggiaturas and chromatic auxiliary notes. With respect to rhythm, his music demonstrates a strong predilection for dotted and dance rhythms, and pieces in triple and compound time frequently exploit cross-rhythms. A favourite melodic-rhythmic gesture is to break off an energetic line abruptly at its apex. To the tonal and harmonic conventions of the time Weber also brought personal touches, including sudden pivots from one key to another by means of diminished 7th and augmented 6th chords, unconventional harmonizations of exotic melodies (another legacy of Vogler), the use of surprising harmonic progressions for climactic effect near the conclusion of a piece, and (in the vocal pieces) unorthodox, sometimes even harsh, progressions to emphasize the poetic or dramatic content.

A major concern of Weber, throughout his music, was to maximize the technical, sonic and expressive potential of the forces. In the piano music, for instance, he took over all the typical virtuoso techniques of the period around 1800 (scales, arpeggios, double notes, trills, octaves), but his search for new techniques and sonorities led to features that set his pianism apart from the brilliant style of Hummel and other virtuosos, including techniques based on rapid arm movements (octave glissandos, fast staccato chords, leaps), widely spaced chords in the left hand for a fuller sonority, tremolos, and the combination of legato melody and staccato accompaniment in one hand. In addition to the clarinet's traditional athleticism, the works for Baermann were designed to exploit the cantabile qualities of his playing and the distinctive characteristics of the instrument's lower registers. And

the multiphonics in the Concertino for horn offer a particularly recherché example of pushing an instrument to its limits. Similarly, the works for orchestra (particularly the slow movements) contain many novel, atmospheric effects, such as the juxtaposition of low strings (in Weber's 'melancholy' key of A♭ major) against the high register of the soloist in the second movement of the First Piano Concerto; the combination of clarinet and three horns in the slow movement of the F minor Clarinet Concerto (no.1); and the combination of muted *divisi* violins and viola in the slow movement of the Piano Concerto no.2. Weber the dramatic composer later drew upon various of these sonorities in pieces like Agathe's cavatina in *Der Freischütz* and the ghost music in *Euryanthe*.

(ii) Forms and genre. With respect to form, Weber relied on the conventions established by the later 18th century but frequently interpreted them in ways that deviate from the descriptions codified by 19th-century writers like A.B. Marx. Moreover, Weber's desire not to repeat himself led to a number of differing strategies within the conventions.

Variation forms are prominent throughout Weber's output, especially in the earlier years where they are closely associated with his needs as a performer. Thus the independent sets for solo piano and chamber combinations are generally extrovert, virtuoso pieces orientated towards public performance, as Weber played several of them (especially J53 and 141) at public concerts throughout his career; what is more, it seems likely that the solo variations on *Joseph* (J141) and on a Russian theme (J179) originated in public improvisations in 1811 and 1815 respectively. Variation procedures are important for a number of concertante works from his earlier years (J49, 64, 79, 94, 109, 158 and 188) and also occur as movements in each of the collections of four-hand piano music and as slow movements within the Piano Sonata no.3 and the Flute Trio. In addition, the *Turandot* overture, based on the lost *Overtura chinesa* of 1806, is essentially an orchestral theme and variations movement.

Weber's approach to variation reveals several individual traits. As to the choice of theme, only the variations on the *romance* from *Joseph* can be said to be based on a truly popular operatic melody. On other occasions Weber chose themes that pay homage to his mentors Vogler (J40 and 43) and Danzi (J64, 83 and 94 are probably based on an unidentified melody by him), or that refer to his own music (J103 and 128 are based on *Silvana*; J265 on the song J212). Most characteristic, however, and one of Vogler's strongest legacies to Weber, is his preference for themes drawn from folk or exotic sources, like the Chinese melody taken from Rousseau's *Dictionnaire de musique* for the *Turandot* overture, the Norwegian theme from Vogler's *Polymelos* for J61, and the Russian and gypsy melodies in the last two sets for solo piano. Various formal strategies are also characteristic. Following his studies with Vogler in 1803–4 (and a probable encounter with Beethoven's variations op.34), Weber tended to exploit higher degrees of tempo and character contrasts between successive variations (Veit, H1990). From this period on the variations normally conclude with codas or finales that extend the last variation into an elaborate, developmental peroration; moreover, the variations for piano on a Russian theme begin with an impressive introduction that adumbrates not only the theme but also the variation techniques that will be used in the course of the piece, perhaps a notated reflection of the kind of 'Fantasie' with which Weber would normally preface the performance of variations in public. And in the *Turandot* overture and the variation movements or sections within the larger cyclic works strict variation procedures are interrupted with interpolated codettas and episodes that develop aspects of the thematic material more freely.

With two prominent exceptions (J64 and 279), the large cyclic works (those in three or four movements) begin with movements in so-called sonata form, which also provides the basis for most of the overtures. Because of their superficial proximity in time to the masterworks of the Viennese school, these movements are among the least appreciated in Weber's output, since, on the one hand, they demonstrate few of the high Classical style's motivic and textural complexities that are favoured by most analytic methodologies, and, on the other, they do not demonstrate the extravagant experimentation associated with Beethoven's music. The distance from the Viennese style is particularly evident in transitional passages and developments, where Weber's preference was to juxtapose and vary complementary and contrasting musical ideas rather than elaborate a small number of themes and motifs systematically in the manner of Haydn and Beethoven. Yet Weber's sonata-style movements offer a number of points of interest and certain of his experiments were in fact influential in their own right.

For example, the sonata-form movements contain a fairly wide range of strategies for presenting and interrelating the principal themes. Some of them (e.g. the first movements of the Symphony no.2, the Piano Quartet, the Clarinet Quintet and the Piano Sonata no.3) approximate the Beethovenian-Marxian paradigm with strong thematic contrast between the two main tonal areas of the exposition; this is also the norm in the opera overtures, which typically draw their thematic substance from vocal pieces in the opera. But other movements, like the opening movements of the first and fourth piano sonatas, reduce the contrast between the so-called first and second themes and instead stress contrasts within the first theme itself, or between the first theme and the ensuing transition, that are then developed in the subsequent themes (Veit, M1986; Quintero, M1996). Similarly, the first movements of the concertos, though generally dependent on the traditional alternation of tutti and solo sections, tend to reduce the amount of material that is literally shared between orchestra and soloist. In the majority of the concerto movements in double exposition form the orchestra presents only a 'pre-form' of the music that will be more fully given by the soloist, and in the First Clarinet Concerto there is very nearly a complete separation of the orchestra's rather martial, triadic themes from the plangent, drooping melodies (marked 'con duolo') of the soloist.

The recapitulations and codas of Weber's sonata-style movements are also interesting as he employs a number of strategies for surprise and variation. The first movements of the Symphony no.1, Piano Sonata no.1 and the F minor Clarinet Concerto, and the overture *Der Beherrscher der Geister* elide the end of the development and the start of the recapitulation so that the definitive return to the tonic key does not coincide with the restatement of the opening theme. The recapitulation of the Flute Trio reverses the order of the first and second themes. Many of Weber's recapitulations – which generally are quite compressed in comparison with their

respective expositions – and/or codas play out strongly teleological trajectories to bring about a sense of catharsis or climax in the latter stages of a piece. The first movements of the Piano Quartet, the First Piano Concerto and the Piano Sonata no.3 seemingly follow Beethoven by offering a heroic reinterpretation of the principal theme at the start of the recapitulation. The simultaneous combination of themes originally presented separately (perhaps inspired by the first movement of Mozart's F major keyboard sonata K533) affords a kind of intellectual climax in the recapitulation of the First Piano Concerto and in the coda of the Clarinet Quintet. A number of movements have significant codas that build tension just before the end by delaying a strong structural cadence to the tonic. Most characteristic of all is Weber's technique of reinterpreting a lyrical secondary theme heroically in the recapitulation; first appearing in the overture *Der Beherrscher der Geister* of 1811 and particularly associated with the overtures to the last three operas, where this kind of transformation conveys obvious programmatic connotations, this effect of apotheosis left a strong impression on later composers, most notably on Liszt's understanding of sonata form.

Weber's slow movements also betray a composer who bridges past and future. A number of them focus in traditional fashion on cantabile melody, with vocal models like the *romanza* or lied very close to the surface in cases like the Second Clarinet Concerto and the Flute Trio. But others, like those of the Piano Quartet and the Second Piano Concerto, eschew traditional lyricism and periodic melody in favour of a more atmospheric, 'speaking' or fantasy-like approach that assigns a greater role to gestural and sonic qualities than to melodic continuity *per se*. Formally, Weber's slow movements tend towards sectional structures that juxtapose pronounced contrasts of style and character. The ternary forms of the Piano Quartet and the slow movement of the *Grand pot-pourri*, for instance, follow the Romanze of Mozart's D minor piano concerto by combining slow outer sections in a major key with a faster middle section in a minor key. Weber's slow movements also include examples (J50, 114, 138 and 199) that juxtapose three or more contrasting elements. The first three sections of the slow movement of the First Piano Sonata, for instance, present in succession warm chordal writing, an ornate bel canto melody and an ominous rhythmic ostinato; the movement concludes with a varied reprise of the opening section that synthesizes these three characters.

For his dance-like movements Weber preferred quick tempos, irrespective of whether he designated them 'Minuetto' or 'Scherzo'. Here Weber approximates Beethoven's notion of the scherzo as a large triple-metre movement in which the humour implied by the title normally accrues through cross-rhythms, hypermetrical irregularities and other disturbances of the basic motion. Trios are normally more relaxed and are often cast as waltzes or ländler.

The finales of Weber's cyclic works generally look back to 18th-century notions of the finale as an entertaining, good-natured piece, a *lieto fine* rather than a cathartic summation and transcendence of the entire cycle. Here are witty duple-metre pieces (J50, 182), *grazioso* finales in the tradition of Mozart and early Beethoven (J199), and perpetual-motion pieces (for instance the finale of J138). The dance is once again important, informing both entire movements (the Polacca in J118 and the exotic Tarantella of J287) and significant dance-like episodes within movements (J51, 98 and 206).

Although some of the finales employ sonata form (J50, 76 and 259), Weber's preference was to conclude the cycle with a rondo. Most of Weber's finales synthesize rondo form with features of sonata form, such as modulation to a related key for the first episode and developmental episodes, but here again one can observe a certain distance from the Classical sonata-rondo of Mozart and Beethoven. In many examples no theme other than the refrain ever appears in the tonic, whereas in others (e.g. Piano Concerto no.1) Weber chose the second episode rather than the first as the one to be subjected to the 'sonata principle' (i.e. the recapitulation in the tonic of a secondary theme initially presented in a related key). Like the first movements, the finales also have their own teleological trajectories, reaching a climax at or near the end through conspicuous counterpoint (J64, 76, 98, 206), through a prolonged resolution of the final structural cadence (J138), or through a boisterous final presentation of a rondo's refrain (J287). A recurring tactic in the concertos especially is the initiation of the last statement of the refrain with a solo presentation over a dominant pedal that is forcefully resolved by a loud tutti presentation of the same theme.

In terms of the overall organization of the three- and four-movement cycles, Weber was generally quite conservative, preferring to separate the movements rather than run them together with *attacca* connections and avoiding the obvious inter-movemental quotation pioneered by several of Beethoven's middle-period works. To achieve a sense of wholeness his cycles instead normally contain features that subtly cross-reference the component movements: for instance, the similar contours in the opening themes of the first two movements of J50; the rhythmic jest that carries across the last two movements of J51; the G minor outbursts at the respective midpoints of the first two movements of J76; the emphasis on C major as an antipode to E minor in three of the four movements of J287; and the textural, expressive, melodic and formal resemblances between the first, second and fourth movements of J199. But one can also adduce many forward-looking features in the way that Weber organized his cycles. For instance, two of the smaller concertante works, J94 and J109, end in a key other than the one in which they start; such 'progressive' or 'directional' tonality (a feature normally associated with composers like Chopin and Wagner) also occurs in the *Preciosa* overture and a number of the songs. The underrated *Grand pot-pourri* for cello and orchestra and the famous *Concert-Stück* for piano and orchestra present novel alternatives to the traditional three-movement concerto, as both are large-scale four-movement works in which, unusually for Weber, the component parts do run together without break and, what is more, dispense with traditional first-movement form.

(iii) Programme music. In the case of the *Concert-Stück* the unusual form is also tied to a poetic conception, a private programme that Weber divulged only to family and close associates like his pupil Benedict (who passed it on to Weber's son, Max Maria) but was otherwise unwilling to circulate openly for fear of being misunderstood and branded a 'charlatan' (as he explained in a letter to Rochlitz of 14 March 1815 concerning an early

plan for this piece). To put it another way, Weber did not wish his musical expression of emotional states to be misconstrued as imitative 'tone-painting'. Another suppressed programme, again transmitted by Benedict, apparently lies behind the Fourth Piano Sonata, whose exceptional thematic economy probably owes as much to an underlying poetic conception as to any abstract developments in Weber's style. And of course the mature overtures offer poetic interpretations of the stage works with which they are associated, not because they quote themes from the works or attempt to follow the details of the plot, but because they suggest the different dramatic spheres, conflicts and overall emotional trajectory of the drama through the use of evocative characteristic styles, strongly drawn musical antitheses and musical processes that can symbolize dramatic concepts like struggle (e.g. counterpoint) and triumph (e.g. the apotheosis of the second theme).

12. VOCAL AND INCIDENTAL MUSIC.

(i) German songs. Weber's extant output of approximately 85 lieder and *Gesänge*, the great majority of which were published in 14 authorized collections, is largely overlooked in histories of German song, despite the fact that contemporaries like Rochlitz and the poet Wilhelm Müller considered Weber a major figure in this genre (H.W. Schwab, N1986). Out of a stated desire not to set texts that had already been set to music, Weber largely avoided the great German poets of the 18th and early 19th centuries and tended instead to set the verses of poets with whom he had personal connections. Folk poetry, culled from *Des Knaben Wunderhorn* and other sources, provided the basis for a number of songs. Songs originating as incidental music for the spoken theatre also made their way into various of Weber's published collections. In certain cases Weber, an accomplished interpreter of his own songs, set texts pertinent to the circumstances of his own life, like his frequent leave-taking (J105 and the duet J208), and it is tempting to relate the incipient song cycle op.46 (J200–03), on four poems by F.W. Gubitz about rejection, to the nadir of Weber's relationship with Caroline Brandt in autumn 1815, about which time he began to think about these poems.

Conceived largely for convivial music-making in intimate circles, Weber's songs rarely attain (or attempt, for that matter) the depth and intensity of expression associated with Schubert and the later Romantics, although J140 and J156 portray passionate states with great conviction. More often, Weber's songs aim to entertain through wit or sentiment; they include settings of humorous poems about the opposite sex (J52, 67, 213), songs about art and the artist's condition (J73, 105), and sentimental songs about the blessings of domestic life (J161) and requited love (J62, 72), as well as pessimistic songs about the human condition (J63, 97, 274). The patriotic texts from Theodor Körner's *Leyer und Schwerdt* form a source to which we shall return in conjunction with the choral music. Given Weber's dramatic instincts, it is not surprising that many of his most memorable songs project the feelings of a well-defined protagonist (J57, 74, 157, 196, 200, 201) or a vivid scene, situation, or dialogue (J91, 159, 202, 217, 270, 278). The folk texts, composed mainly in 1817 and 1818 during the early stages of work on *Der Freischütz* and published mostly in opp.54 and 64, also afforded the opportunity to portray sharply drawn characters and scenes and to indulge in various verbal and musical folklorisms.

Like much of his music, Weber's songs straddle the 18th and 19th centuries in ways typical of his time. His views on the nature of the lied conventionally emphasize the primacy of the poem and the resultant need for correct declamation and close relationship between verbal and musical syntax. But at the same time, Weber acknowledged in a remarkable letter (November 1817) to the playwright Adolf Müllner that the character and 'inner life' of the words occasionally overruled the demands of strict prosody. Similarly, although Weber generally limited his songs – both those written for voice and piano as well as the 15 or so conceived for voice and guitar (Huck, N1993) – to unobtrusive accompaniments, his quest to convey emotion and character yielded on occasion more elaborate accompaniments (J157, 159, 174, 270).

Though he is frequently considered a conservative exponent of the genre, Weber's songs actually demonstrate a remarkably wide variety of formal approaches (Heuer-Fauteck, N1967), as he typically strove to match form to expression in ways that transcend the 18th-century ideals of the lied. Weber made frequent use of strophic form in cases where the parameters of feeling and poetic structure are consistent from stanza to stanza. Songs that are primarily strophic often entail variants in one or more stanzas to accommodate irregular versification (e.g. J231) or to make an interpretative point (J68, 74, 200, 202, 213). 'Through-composition' takes on a number of guises, including quasi-strophic approaches in which each stanza begins with similar music only to continue differently (J57, 73), rondo form (J71), ternary form (J63, 201), forms in which material from the first stanza recurs in no predictable fashion (J62, 130, 157, 159, 161), and forms in which there is hardly any melodic reprise at all (J28, 48, 156, 175).

(ii) Italian settings. With the exception of the concert aria J181 (1815) and an Italian cantata, *L'accoglienza* (J221), composed for a royal wedding in Dresden in 1817, Weber's Italian settings date from 1810 to 1812, when his persisting hope of travel to Italy may have led him to seek experience in setting the language. The three canzonettas op.29 (1811), conceived with guitar accompaniment and written in ternary form, affect a studied simplicity corresponding to an idealized vision of 'italianità' shared by a number of German composers of the early 19th century (Leopold, N1996). The three duets of op.31 (1811; J107, 123, 125) are longer, with an opening slow section followed by a quicker one. More significant are the five concert arias (J93, 121, 126, 142, 181), written for specific singers either for use in Weber's public concerts or to satisfy commissions. These arias merit study for the evidence they provide for Weber's understanding of Italian operatic styles, and also because they furnish – along with the two new arias for the Berlin *Silvana* production of 1812 and the two substitute arias to German texts (J178 and 239) – important insight into Weber's development as a dramatic composer between the completion of *Abu Hassan* (1811) and the composition of *Der Freischütz* (1817–21) (Huck, N1999).

(iii) Vocal ensembles. Weber's vocal music also includes a large number of pieces for ensembles of various sizes, both with and without piano accompaniment. Duets, trios and songs with choral refrains occasionally appear in the published song and folksong collections. From his

study with Michael Haydn Weber developed a fondness for canons, a number of which he wrote to entertain his musical friends in Mannheim and Berlin. His friendships in Berlin, largely with members of the Sing-Akademie and Liedertafel, also led to a number of pieces for mixed ensemble written as birthday greetings (J131, 133, 135, 165) and to an extended all-male work for Zelter's Liedertafel (J132). Without doubt, Weber's most famous choral pieces were the six songs for *a cappella* male chorus in the second volume of *Leyer und Schwerdt* (op.42), concise, homophonic settings of anti-Napoleonic verse by the poet-martyr Theodor Körner. Stemming from his experiences in Berlin in summer 1814, these pieces were the first by Weber to gain widespread acclaim, as they summed up the patriotic fervour of a people newly selfconscious of their nationhood; especially popular was the fiery *Lützow's wilde Jagd*, which usually had to be encored whenever Weber presented it and which enjoyed international circulation. A later publication of 'Männerchor' songs, op.68, made no comparable impact.

(iv) Cantatas. Of the many cantata and cantata-like pieces that Weber composed, four have special significance for his career. A major work from his time in Stuttgart is *Der erste Ton* (1808, revised 1810), based on a poem by Rochlitz about God's creation of sound after he had created the world. For the most part Weber conceived the piece as a spoken declamation accompanied by orchestral music that characterizes the different images in the poem (chaos, creation, order, the sounds of nature etc.); singing voices enter only at the end in a closing choral fugue that Weber revised under Vogler's supervision in 1810. Rochlitz also provided the text for another large-scale work with religious overtones, the hymn *In seiner Ordnung schafft der Herr* (1812), which also concludes with a fugue. Weber conceived the cantata *Kampf und Sieg* (1815) in the wake of Waterloo as an expression of the various emotions attending the Hundred Days and as an appeal for continued cooperation among the allied princes, to whom he sent manuscript copies of the full score in the hope that he would receive appropriate recognition or reward. The cantata quotes various melodies to symbolize the participants in the great struggle: an Austrian grenadiers' march, the French song *Ah, ça ira*, Prussian field trumpet calls, his own *Lützow's wilde Jagd*, and *God Save the King*. To prepare for its concluding fugue Weber studied Marpurg, only to reach the conclusion that traditional fugal theory was of little help for the composition of fugue that also spoke to feeling (letter to Gottfried Weber of 16 September 1815). Finally, one of the most important of Weber's occasional pieces for the court in Dresden is the *Jubel-Cantate* (1818), based on a text by Friedrich Kind to celebrate the 50-year reign of King Friedrich August I. Here Weber eschewed learned counterpoint to evoke in broad and simple strokes the Saxon people's feelings of devotion to their king and thanks to God for having preserved him through illness and war.

(v) Liturgical music. Although he was a devout Catholic and frequently conducted the liturgical music for the Catholic court in Dresden, Weber's output of sacred music is small, comprising only three settings of the Roman Mass and associated Proper offertories for two of them. The so-called *Grosse Jugendmesse*, discovered in the 1920s (Schneider, N1926), is one of the few juvenilia to have survived Weber's probable destruction of much of his earliest music. Weber claimed to have written the piece under Kalcher's supervision in Munich, and he assigned the mass to 1799 in his own (admittedly unreliable) work-list; however, an autograph dedication dated 1802 is attached to a score (now at Český Krumlov) prepared by a Salzburg copyist, and the contrapuntal writing that informs the Gloria, the polytextual 'Pleni sunt ... Osanna' movement and the Agnus Dei seems to point to Michael Haydn's influence (Rosenthal, N1926–7). What is more, unorthodox text setting and formal features raise the possibility that some of the music was based on lost instrumental pieces (Veit, N1993).

Weber composed the two mature masses of his early Dresden years in accordance with tacit expectations that a royal Saxon Kapellmeister would supply liturgical music for the court (Allroggen, N1993), whose exclusive property they became, and calculated these pieces for the liturgy, acoustics and forces of the Hofkirche, which he described to Gänsbacher in letters of 24 December 1818 and 26 December 1822. Despite formal similarities with each other, like the treatment of the Credo as a continuous movement in one tempo, the two masses explore rather strongly contrasted qualities of expression and character. The Mass in E♭, written for the king's nameday in 1818, is the more festive. Sometimes known as the 'Freischützmesse' because of certain affinities with the opera, the Mass also draws on some of Weber's earlier music: the Kyrie and Christe are based, respectively, on the Kyrie of the *Jugendmesse* and the Trauer-Musik J116 of 1811, and three contrapuntal passages ('Cum sanctu spiritu', 'Et incarnatus est' and 'Osanna') borrow subjects and counterpoint from the early fughettas of op.1. In contrast, the G major Mass, composed for the golden wedding anniversary of the king and queen in 1819, offers a more intimate and pastoral interpretation of the liturgical text, with less emphasis on learned counterpoint and dramatic effects (see Weber's letters of 16 October 1818 and 14 December 1818 to Rochlitz and Friederike Koch, respectively). More obviously than the E♭ Mass, the G major featured the great soloists of the court chapel, with extended solos for tenor (the 'Qui tollis peccata' section of the Gloria), soprano (a highly expressive setting of 'Et incarnatus est') and alto (the pastorale-like Agnus Dei); the Benedictus, which the Weber scholar F.W. Jähns (A1871) considered the 'pearl' of the score, is given to the quartet of soloists. The two florid offertories composed in conjunction with these masses also demonstrate the virtuoso abilities of the castrato Giovanni Sassaroli.

(vi) Theatre music. A particularly obscure area of Weber's output is his music for the spoken theatre, which he composed between 1809 and 1822 for specific productions of mostly long-forgotten plays and *Festspiele*. Understanding of Weber's contributions in this area is plagued by the relatively poor survival of musical and theatrical sources and questions of authenticity. In general, these pieces fulfil functions specified by the plays, which – with the exception of the celebratory *Festspiele* – tend to introduce music in a 'realistic' fashion. Thus much of the incidental music is song presented as such, like the narrative ballads and Romanzen to guitar accompaniment in *Der arme Minnesänger* and *Das Nachtlager von Granada*, or the singing of nuns to an organ-like wind accompaniment in *Carlo*. Comparably realistic uses of music include marches and/or dances (*Turandot*, *Das Haus Anglade*, *Der Tod Heinrichs IV*, *Sappho*, *Preciosa*)

and fanfares (*König Yngurd*). In conjunction with its tendency to such functional realism, Weber's theatre music is frequently also a locus for *couleur locale*, as Weber sought to enhance the atmosphere of a play through reference to folk or exotic melodies and use of characteristic instrumentation and harmonization; examples include the chinoiserie in the overture and marches to Schiller's *Turandot*, the allegedly authentic Spanish melody in *Das Nachtlager von Granada* (its florid style provoked criticism that Weber did not allow to go unanswered), the quotation of the well-known folksong 'Vive Henri quatre' in *Der Tod Heinrichs IV*, the archaizing harmonies of the chorus for Grillparzer's *Sappho* and the vaguely Mediterranean flavour for the Provençal setting of *Das Haus Anglade*.

By far Weber's most important contribution to spoken theatre is the music for P.A. Wolff's *Preciosa*, commissioned and composed in 1820 for a Berlin production of the play which received its first performance on 14 March 1821. Wolff's play, based on one of Cervantes's *Novelas ejemplares*, calls for an unusually large amount of music to characterize the opposed Spanish and gypsy elements in the drama and to take advantage of the singing and dancing talents of Auguste Stich, who performed the title role in Berlin (Ziegler, O1996). In response, Weber wrote some of his most affecting music, which includes choruses and dances that supply the musical *couleur locale* as well as songs that convey the feelings of the title character, a Gypsy orphan who turns out to be of aristocratic Spanish birth. The *Preciosa* music also manifests certain operatic attributes, most obviously in the programmatic overture, the melodramas for Preciosa, and the use of recurring melodies. The play (with Weber's music) rivalled the popularity of *Der Freischütz* in the Dresden repertory and was widely disseminated, but with the disappearance of Wolff's play from the stage Weber's music has also largely vanished from public consciousness.

13. OPERAS. Despite his self-professed 'inclination to the dramatic' (*Autobiographische Skizze*) and the dominance of the operas in his posthumous reputation, Weber's activities as a composer of opera are not spread evenly throughout his career. For biographical and stylistic reasons it is perhaps most meaningful to group his operas into three phases: early operas written between 1799 and 1806; the two operas that grew out of his collaboration with the Stuttgart librettist F.C. Hiemer; and the three masterworks of the Dresden years.

(i) Early works. Our understanding of Weber's early attempts at opera is greatly hampered by the incomplete survival of these works. Beyond its title, nothing is known of Weber's first operatic work, *Die Macht der Liebe und des Weins*, which the would-be prodigy evidently began to compose shortly after his arrival in Munich in autumn 1798. And only a couple of fragments survive from his second opera, *Das Waldmädchen*, despite the fact that it apparently circulated to a few theatres after its première in Freiberg (24 November 1800), possibly including the Leopoldstadt Theater in Vienna in 1804–5. A playbill for the performance in Chemnitz in December 1800, which designates it as a 'romantic-comic opera', allows us to infer a medieval-chivalric setting in which are mixed serious aristocrats and comical servants; further, the long list of *dramatis personae* suggests a plot essentially identical with that of the later opera *Silvana*. In musical style, *Das Waldmächen* evidently grew from the post-*Zauberflöte* tradition of 'heroic-comic' operas, as one of the surviving fragments is a bravura rage aria for soprano whose coloratura rivals that of the Queen of Night, whereas the other is an ensemble with distinct echoes of the Act 2 finale of *Die Zauberflöte*.

In the case of Weber's third opera, *Peter Schmoll und seine Nachbarn* (composed 1801–2; première 1803, Augsburg), the music survives in two complete scores, but since the extant printed libretto (Munich, 1802) provides only the texts of the musical pieces, the plot and dramatic situations must be inferred from the novel of the same name by C.G. Cramer. The opera seems to be a kind of *drame bourgeois* whose dramatic issues are essentially familial, small-scale problems treated in a sentimental and moralizing fashion. Musically, *Peter Schmoll* is a modest work that derives its basically consonant, diatonic and syllabic approach from the lighter forms of musical comedy of J.B. Schenk and Wenzel Müller. Echoes of Mozart are strong in the overture and in many of the vocal pieces, and the music for the comical figure Hans Bast takes up traditional *basso buffo* features like patter. A strophic *romance* for the female character Minette also betrays some familiarity with French music. At the same time, the work presents a number of features that at least hint at the development of a more personal style: the frequent recourse to obbligato solo instruments in the orchestral accompaniment; experimentation with unusual or characteristic instrumentation; a preference (to the point of mannerism) for dance-like rhythms in triple and compound metres and dotted rhythms; and an urge to interpret the text, gesture and situation through music.

The unfinished 'romantic opera' *Rübezahl* was the major project of Weber's years in Breslau. J.G. Rhode's libretto, based on a folktale in Musäus's *Volksmärchen der Deutschen* about a mountain spirit who abducts a human princess to be his wife, was partially published in the *Breslauer Erzähler* in early 1804, before Weber's arrival in the Silesian capital; differences between the published excerpts and a surviving manuscript libretto with holograph indications by Weber (*D-Bsb*) suggest that even at this early stage in his career he was able to exert a certain degree of influence over his texts. Despite Weber's claim to have composed about half the opera, only two vocal pieces and a fragment of a third survive; from the work done in Breslau also survive the closing bars of the first violin part of the original version of the overture, which Weber later revised as the overture *Der Beherrscher der Geister*. The extant quintet, which Weber plundered for several later pieces, shows a young composer still indebted to 18th-century models in some respects but free from them in others: thus, whereas its overall fast–slow structure is reminiscent of the Act 1 *Zauberflöte* quintet, its tonal plan has little to do with traditional tonic–dominant polarities.

(ii) The Hiemer operas. Weber's friendship in Stuttgart with the librettist F.C. Hiemer led to his first operas that enjoyed significant circulation to German theatres, *Silvana* (composed 1808–10) and *Abu Hassan* (1810–11). Of these, the three-act *Silvana* is the more ambitious but less even work. That its chivalric plot is a reworking of the old *Waldmädchen* story is all but certain, and even with Hiemer's revisions the libretto still betrays its origins as a heterogeneous 'heroic-comic opera' (as it is designated in the first edition of the piano score). Therefore alongside the love-versus-duty conundrum faced by the principal

aristocratic characters Rudolf and Mechtilde is an old-fashioned *buffo* bass in the part of the squire Krips; emblematic of the unevenness of the libretto, however, is the fact that Krips, so prominent in Act 1, has only one piece throughout the remainder of the opera. For ambience the libretto also stresses features like the forest and medieval court pageantry that justify its designation in other sources as a 'romantic' opera.

Musically, *Silvana* deploys a mixture of genres and styles typical of German opera in general and 'heroic-comic' opera in particular (apart from the word 'renovata' on the autograph of the overture there is little evidence of the extent to which Weber's music might also draw upon the earlier opera). The vocal styles range from that of comic and popular song to italianate bravura singing, and the solo numbers consist of strophic pieces, generally assigned to Krips and to aspects of the ambience of the drama, as well as large-scale multi-tempo aria forms for the serious characters. By Weber's own admission, the new arias for Rudolf and Mechtilde for the Berlin production of 1812 marked an important stage in his development as a composer of arias. Different kinds of ensembles are also present, including an Introduzione and multipartite finales for Acts 1 and 2. For the title character, who is voluntarily mute until the dénouement, Weber wrote a number of formal dances as well as pieces that coordinate mime with expressive orchestral playing, such as no.7 and no.12; the former of these is in effect a 'duet' in which she replies to the singing Rudolf through gestures largely accompanied by solo cello. Hunting scenes (Act 1) and court pageantry (Act 2) provide ample opportunity for the use of chorus and stage instruments, and the opera concludes with a lengthy torch dance.

The one-act comic opera *Abu Hassan* is an altogether less pretentious work, but perhaps for that reason it more fully matches dramatic and musical interest; fittingly, it is the earliest of Weber's operas to have enjoyed a modest, but more or less continuous performance history. The plot, taken from *The Thousand and One Nights*, is the story of the title character and his wife Fatime, who feign their deaths in order to collect burial funds that will enable them to pay off their considerable debts; the comical treatment of this subject may well have been inspired by Weber's own unhappy experiences with creditors in Breslau and Stuttgart. Through its economy of means (demanded in part by the small scale of the work) the opera exemplifies a level of maturity that Weber attained with his second period of study with Vogler in 1810. Though the opera falls into the tradition of 'Türkenoper', it makes relatively little use of so-called Turkish music and other exoticisms, confining these to the overture (to set the *couleur* for the entire work) and the final two pieces (which bring the Caliph on to the scene). Instead, the focus falls on the love between Hassan and Fatime, who are treated as sentimental but clever characters, more like Figaro and Susanna than Belmonte and Konstanze.

(iii) Mature operas. The great leap forward from *Abu Hassan* to *Der Freischütz* is less a matter of style or compositional technique than of clarification in Weber's thinking about the problems of opera in general and German opera in particular. The six-year gap between the completion of *Abu Hassan* and the start of work on *Der Freischütz* allowed Weber as a critic and conductor to reflect upon questions of character, dramatic truth and wholeness as they pertained to the lyric stage and to find in works that he admired – Mozart's operas, the *opéras comiques* of Méhul and Cherubini, Beethoven's *Fidelio*, Spohr's *Faust* and Hoffmann's *Undine* – models for realizing his goals.

With Friedrich Kind's libretto for *Der Freischütz* Weber finally had the basis with which to implement his mature conception of opera as total theatre. Drawing principally upon Johann August Apel's novella *Der Freischütz: eine Volkssage* (1810), about a hunter who bargains with demonic forces to obtain magic bullets, Kind, in close collaboration with Weber, developed a story depicting the conflict of the sharply opposed worlds of good and evil. The story plays out against a rustic 17th-century backdrop, a Bohemian village set in a forest that is similarly dichotomous: whereas the forest beneficially provides the livelihood for the community, it can also be unholy, as the darkest part of the forest, the Wolf's Glen, is a locus for demonic activity and the place where the protagonist, Max, obtains the magic bullets from the demon Samiel in a spectacular nocturnal scene filled with ghostly apparitions and novel stage effects inspired by popular theatre (Newcomb, P(iii) 1995). Apel's novella abuts on a tragic ending, but the Biedermeier, moralizing sensibilities of Kind (and presumably also Weber) lead their version to a happy ending, as the childlike trust in Providence of Max's bride Agathe averts disaster and reaffirms the social order (Reiber, P(iii)1990, 1993).

Like *Silvana*, *Der Freischütz* exhibits a wide diversity of types and styles, a fact signalled in the autograph score by Weber's polyglot designations of pieces according to the national origin of the type (see the edition, with facsimile of the autograph, by Georg Schünemann; P(iii)1942). The large-scale *scene ed arie* of Agathe and Max, for instance, reveal a composer knowledgeable of recent Italian developments that he appropriates and modifies. But, more than before, the diverse elements are deployed in ways that reinforce the central dramatic lines of development. As the critic and theorist J.C. Lobe (P(iii)1855) pointed out in an essay allegedly based on an interview (probably apocryphal) with the composer, Weber developed an overall 'Kolorit' for the opera by delineating musically, in conjunction with visual details, the two sharply opposed dramatic spheres. The world of simple rustic virtue and trust in God is treated primarily in a lyrical fashion that is rhythmically square, euphonious, consonant, diatonic and in the major mode. The purest examples of this type approximate to folk music (in which Weber was immersed during 1817–1818 with the composition of the folksong settings of opp.54 and 64) and the chorus no.14 is actually designated as a 'Volkslied'. A.W. Ambros (J1860) identified another simple piece, the Act 1 march, as a borrowing from a popular march that was current in Prague in the early 19th century.

In contrast, the powers of evil are consistently characterized through antitheses to the foregoing: minor mode, dissonance, chromaticism, rhythmic disturbance and unusual sonorities (e.g. flute and clarinet in their lowest, 'hollow', registers) in conjunction with vocal styles that are either non-cantabile, inappropriate (like the coloratura for the bass-baritone villain Caspar), or not even song at all. In the Wolf's Glen scene, for instance, the invisible spirits sing on a monotone, and song is denied altogether not only to Samiel but eventually also to Max, who ceases

8. Wolf's Glen scene (Act 2 scene ii) from Weber's 'Der Freischütz': engraving by Johann Lorenz Rugendas II, possibly drawing upon the Augsburg production, 1822

to sing as he descends into Samiel's realm. Features that cut across this dichotomy serve to characterize the overall ambience, like strophic form, which is taken up as an emblem of folk life both by the villagers and by Caspar (but to very different effect), and the sound of the horns, which characterize not only the hunting activities of Max's colleagues but also the demonic ghostly huntsmen in the Act 2 finale. Max also cuts across the dichotomy, inasmuch as he is caught between the two spheres; his multi-sectional *scena ed aria*, for instance, juxtaposes the demonic style in sections pertaining to his current despair with more lyrical sections devoted to thoughts about the past and Agathe.

A number of technical means also serve to reinforce the wholeness and character of the work. Following Spohr and the French composers, Weber made extensive use of reminiscence motifs in order to overcome the potential autonomy of the individual piece. Of these the most important by far is the 'Samiel chord' used to mark appearances and invocations of the demon. In an entity that is rather more a distinctive sound than a motif, evil is defined through syncopation, hushed and dark sonority, tremolando, the absence of melodic motion and the dissonance of a diminished 7th chord tied to a particular set of pitch classes (F♯, A, C, E♭). As writers since Waltershausen (P(iii)1920) have pointed out, this harmonic feature influences the tonal choices in the Act 2 finale, the famous Wolf's Glen scene, an unprecedented complex of gestural, scenic and orchestral interaction (with relatively little singing) in which the principal, tritone-related keys of F♯ minor and C minor are supplemented by E♭ major (at the point of Max's arrival) and A minor (at the apparition of Agathe and at the start of the casting of the bullets). In general, following principles enunciated in his commentary on *Kampf und Sieg*, Weber chose keys in ways that balance traditional affective connotations (like the association of C minor with tragedy or E♭ major with the divine) with structural and vocal-technical demands. And to greater extent than any of his earlier overtures, the *Freischütz* overture creates an emotional and intriniscally musical synopsis of the drama, by presenting, juxtaposing and developing within the conventions of sonata form various theme complexes, largely drawn from the opera, that embody two sharply contrasting spheres, and by resolving the implied conflict through thematic apotheosis of the 'second theme' into a sonic image of triumph.

The two completed operas written after *Der Freischütz* are built from similar principles; inasmuch as their ambience and dramatic issues are quite different, however, they differ profoundly from the earlier opera and each other with respect to style and *Kolorit*. The invitation to compose an opera for Vienna, the operatic centre of the German-speaking world, encouraged Weber to conceive his next opera, *Euryanthe*, on a far larger scale. Designated in most authentic sources as a 'grosse romantische Oper', the work combines the defining attribute of 'grand opera' as Weber understood it, the technique of through-composition (normally associated with classical subjects), with various attributes of the newer 'romantic' opera such as a medieval setting with a supernatural component and a high degree of structural and genre variety (Tusa, P(v) 1991).

Although seriously flawed in certain respects, Helmina von Chézy's libretto nevertheless allowed Weber to realize ideals of organic wholeness and 'Totaleffekt' even more thoroughly than in *Der Freischütz*. Like its predecessor, *Euryanthe* involves distinct dramatic spheres with contrasting musical colours. The overarching world of medieval chivalry is suggested by a level of seriousness, artifice, elegance and brilliance not found in *Der Freischütz*. Against this chivalric background the dramatic and musical opposition of good and evil is once again crucial to the dramaturgy, the former represented by the troubadour-knight Adolar and his beloved, Euryanthe, and the latter by Lysiart and his accomplice Eglantine. Another dramatic plane is inhabited by the ghost of Adolar's sister Emma, the principal element added by Chézy and Weber

to the original plot. Slow, chromatic and that was seemingly aimless music for *divisi* muted violins and violas characterizes the ethereal but restless existence of a spirit condemned to eternal wandering; with Emma's redemption at the end of the opera, however, this music is transformed into a diatonic form.

While *Euryanthe*'s dependence on *Der Freischütz* is evident in a number of ways, there are also features in the later opera that go beyond its predecessor. Weber himself noted in his correspondence with Brühl the more active role for the chorus in *Euryanthe*. The larger-than-life passions elicit a higher degree of chromaticism throughout the opera than in the earlier work. Because of its through-composed status as a 'grand opera', the tonal organization and instrumentation of *Euryanthe* were planned with greater ingenuity than ever, and groups of pieces often form extended scene complexes with a clear sense of dramatic and musical progression towards a local climactic goal (e.g. nos.1–4, 12–13, 17–20). And where dialogue separates the formal pieces, Weber composed a flexible, expressive type of accompanied recitative that has little in common melodically or harmonically with conventional approaches to recitative (A.A. Abert, P(v)1967).

As already noted, *Euryanthe*'s failure to capture the public's imagination was a source of bitterness and puzzlement for Weber. In retrospect, however, it is easy to identify some of the causes for its fate. Unquestionably the obscurities and logical lapses in the libretto caused much ambivalence towards the opera. But contemporary reception also suggests that audiences of the day did not always warm to its music either. On the one hand, the opera's selfconscious distancing from the tuneful, popular folk music style of numbers in *Der Freischütz* doubtless disappointed many listeners. And on the other, Weber's attempts to express every nuance of feeling through characteristic details of melodic shape, instrumentation and harmonic progression worked against the kind of melodic and rhythmic 'flow' that operagoers of the time, an age dominated by Rossini, wished to hear. For Franz Grillparzer, Weber's harshest critic, the music to *Euryanthe* ceased altogether to be music because it did not allow melody to grow out of itself in an 'organic' way, and even the mature Wagner in *Oper und Drama* (1850–51) felt compelled to criticize the 'mosaic' qualities of the melodic construction.

In accepting a commission from Covent Garden in London, Weber virtually guaranteed that his last opera, *Oberon*, would stand apart in many ways from his earlier efforts. Behind J.R. Planché's libretto, based principally on Wieland's romance of 1780, lay a tradition of English opera more closely allied to 18th-century popular theatre than to contemporary continental opera, a concept of theatre orientated more towards visual spectacle than the musical realization of action and conflict (Warrack, P(vi) 1976). The plot involves a large number of non-singing roles and the main developments take place primarily in

9. Autograph MS of the overture to Weber's 'Euryanthe', composed 1822–3 (D-Dl Mus.4689-F-37)

spoken dialogue. In such a conception, music is largely relegated to incidental functions that establish ambience and character and draw attention to scenic effects (Dahlhaus, P(vi)1986), although it must be said that Planché's libretto accorded music a greater role than most English librettos of the time. Obvious parallels with *Die Zauberflöte* point up further ties to the 18th century: the disposition of the four principal characters into two pairs of lovers, heroic (Reiza and Huon) and comic (Fatima and Sherasmin) respectively; exotic settings (Baghdad and Tunis); magical effects and scene transformations; a magic instrument (Oberon's horn) that on more than one occasion saves the principal characters from harm; and the Enlightenment theme of human perseverance in the face of severe trials.

Despite its distance from Weber's ideals of romantic opera as total theatre, Planché's libretto nevertheless played directly to many of his strengths as a composer. For example, it gave him the opportunity to delineate three distinctive musical spheres through music of great originality and charm: a Western-chivalric style, associated primarily with Huon of Bordeaux and the music of Charlemagne's court in the third act, builds on the courtly style of *Euryanthe*; the Islamic courts of Baghdad and Tunis are characterized not only by the traditional Turkish instruments but also by Egyptian and Turkish melodies that Weber found in books in the Royal Library in Dresden; and for the realm of elves and nature spirits Weber invented soundscapes of unprecedented lightness and transparency, such as the gossamer music of the opening fairy chorus, the ethereal music for mermaids and fairies in the Act 2 finale, and the recurring music for high flutes and clarinets that accompanies Oberon himself. The libretto's specification of music as an accompaniment to scenic effects also prompted some of Weber's most striking music, like the powerful storm scene in Act 2 and the majestic 'Ocean' aria, Weber's most fluid adaptation of *scena ed aria* form (Schmierer, P(vi)1986).

Although *Oberon* remains true to Weber's goals of dramatic truth and *Kolorit*, certain features in the compositional approach do seem different from the earlier operas; however, in the absence of further operas it is difficult to know whether such differences arose primarily from the character and demands of the libretto, from a desire to make concessions to specific singers and to an English audience that Weber probably considered unsophisticated by continental standards, or from new impulses in his artistic development that death prevented him from pursuing further. For example, the amount of coloratura in the music for Reiza and Huon is greater than one might expect on the basis of the preceding operas, where bravura singing had been principally associated with the rage of Caspar, Lysiart and Eglantine. The musical style of *Oberon* is on the whole more tuneful, less chromatic and less dissonant than *Euryanthe*, more 'Classical', doubtless a consequence of the libretto but perhaps also a reaction on Weber's part to various criticisms of the earlier work. The motivic approach is arguably also different from any of the preceding operas. The storm music is developed quite symphonically, the degree of motivic elaboration in Oberon's aria (no.2) has few precedents in any of Weber's earlier vocal pieces, and even the simple way that the Mermaids' Song develops its accompaniment from a persistent horn motif is unusual for Weber. And as Jähns noted in 1871, the opera points towards a more subtle use of leitmotif technique, as the stepwise rising 3rd with which both of the borrowed 'exotic' melodies begin is easily related to the opera's most important leitmotif, the call of Oberon's horn, and can be traced in a number of other pieces as well.

14. Assessment. Like other musicians active in the first decades of the 19th century, Weber lived through a volatile time marked by war, social change and intellectual upheaval. Characteristic of an era of transition, his career is marked by a number of paradoxes and contradictions that make it difficult to limit him to fixed categories. He relied quite extensively on patronage, carefully cultivating contacts with aristocrats such as Duke Eugen, Princess Stéphanie, the King and Queen of Bavaria, the Prussian royal family, Duke Emil Leopold and the Grand Princess Maria Paulovna; and despite recurring frustrations in Dresden, the last ten years of his life were filled with signs of true devotion to the royal family. At the same time, he looked to the emerging middle-class public as the more significant and stimulating audience in the new century. Yet he also recognized the risks presented by this anonymous, mass audience, whose tastes naturally ran more to entertainment than to serious art, especially in a period when the hardships of war led audiences to seek escape and diversion. Reluctant to compose in the commercial manner that Dussek had called the 'selling way', Weber chose to speak to this newer audience by elevating their popular styles and genres like the waltz and folksong to a higher level of artistic significance, and through his efforts as a writer and conductor he strove to educate this new audience to a higher standard of appreciation.

Equally paradoxical is Weber's relationship to early 19th-century German Romantic ideology. He has often been regarded as a (even 'the') leading exponent of early Romanticism in music, and much of his activity does resonate with the Romantic agenda: his emphasis on the wholeness of the art work; his insistence on the 'characteristic', sometimes at the expense of the 'beautiful'; his appeal to feeling as the ultimate arbiter of the 'truth' of an artistic experience; his reliance on 'romantic' subjects (in the sense of 'non-classical') for his operas; and the high value that he placed on originality. But his must be regarded as a qualified Romanticism, as significant elements in his thought and work are hard to reconcile with the critical thinking of contemporaries like Hoffmann and Tieck. Nowhere in Weber, for instance, does one find the quintessentially Romantic view of instrumental music as a gateway to transcendent experience; his review of Fesca's string quartets in fact seems to assert the primacy of vocal music precisely because of its more direct contact with life. Weber's works, novel as they undoubtedly are in many ways, also seem at times to go against the grain of mainstream Romanticism. The close dependence of his operatic music on text and situation as a guide for melodic, rhythmic and harmonic choices, with resultant fissures in the purely musical logic of melodic development, seems rather different from the kind of relationship between music and libretto described in Hoffmann's writings on opera. The superficially 'romantic' librettos of *Der Freischütz* and *Euryanthe* – texts that he not only sanctioned but helped shape – manifest strong ties to Enlightenment and Biedermeier values in their avoidance of moral ambiguities, their trust in Providence to guarantee the triumph of virtue and in their implicit support of the social status quo (Reiber, P(iii)1993; Doerner,

P(iii)1993–4). And more generally, the triumphant conclusions of the vast majority of large-scale vocal and instrumental works have little in common with Romantic alienation, irony and ambivalence, betraying again a consciousness rooted in Enlightenment optimism and shaped by the Biedermeier desire to restore order to a world shaken by a generation of revolution and war.

The question of nationalism in Weber's thinking and artistic output presents another area for paradox and ambiguity. Certain features of Weber's life and personality would seem to contradict the kind of nationalist interpretation evident in Wagner's *Rede an Weber's letzter Rühestätte* of 1844 and implicit in the dedication of Jähns's thematic catalogue to 'the German people'. With the exception of the emotional patriotism that he experienced along with many fellow Germans in the heady days of 1814–15, Weber mostly stayed aloof from the political issues of his time. Before 1814 his references to the Napoleonic wars primarily treat them as a nuisance impeding the pursuit of art, and the letters from the last ten years of his life contain very few references to the political conditions and climate of restoration Germany. At first glance, Weber's artistic cosmopolitanism also seems to militate against a nationalist interpretation. His operatic repertories were international, especially at Prague, where he was free to choose works from German, French and Italian traditions, and his own works drew upon the genres, forms and styles of the different national schools much as had the works of Handel, Bach and Mozart. However, various factors did combine to make Weber a potent symbol of German art and nation for his contemporaries and for later generations (W.M. Wagner, P(i)1994). In the patriotic choral songs of *Leyer und Schwerdt* and the folkloric *Der Freischütz* the German people found artistic expression of their collective experience and self-image. Cultural politics in Berlin in 1821 further helped establish *Der Freischütz* as a German antipode to the international grand opera style of the unpopular Spontini. Through his conflicts with the Italian opera in Dresden Weber became a prominent and outspoken advocate of the right of German opera to exist on an equal footing with the other national traditions, and in the wake of the 'Rossini-Fieber' of the early 1820s, Weber's operas became important rallying points for resistance to an art that Weber himself considered suspect. And Weber's seemingly cosmopolitan ideal of a German art that not only synthesizes but also deepens and extends the elements borrowed from abroad betrays more than a whiff of cultural chauvinism.

A systematic study of the reception of Weber and of his place in 19th-century music remains to be written, but certain aspects are understood well enough to give some support to Philipp Spitta's suggestion that Weber could with some justification be regarded as the most influential musician of the 19th century. Although Weber may not have been the sole 'creator of German Romantic Opera', his critical and organizational efforts on behalf of German opera made him the most visible proponent of the genre of his day, and with *Der Freischütz* he produced a work that competed successfully with popular French and Italian operas not only in Germany but in other countries as well. The impact of *Der Freischütz* on opera of the 1820s, 30s and 40s is evident, as it inspired a spate of gothic works like the vampire operas of Marschner and Lindpaintner, and even as late a work as *Der fliegende Holländer* owes much to it; outside Germany, its success as *Robin des Bois* prepared the way for Meyerbeer's *Robert le diable*. And though *Euryanthe* all but disappeared from the repertory of the 20th century, it is clear that this opera left a profound impression on *Tannhäuser* and *Lohengrin*. Weber's piano music was held in high esteem by his contemporaries and was demonstrably important for subsequent pianist-composers like Mendelssohn, Chopin and, above all, Liszt (Tusa, Q1999). For Berlioz Weber's music was a revelation that helped him find his own way to originality (Heidlberger, Q1994). More generally, Weber's exploration of novel sonorities significantly enriched the art of orchestration and placed a new premium on the expressive quality of sound *per se*. And through works like the Fourth Piano Sonata, the *Concert-Stück* and especially his mature opera overtures Weber pointed ahead to the poetically conceived concert overtures and symphonic poems of the mid-19th century.

An adequate understanding of Weber's place in 19th-century music must also take into account various negative strands of reception. Contemporary resistance to anti-Classical (and arguably anti-Romantic) tendencies in much of his music is a recurring refrain that merits serious attention. Critical comments by Hegel, Grillparzer, Spohr, Schubert and even Wagner about the 'realism', 'lack of melody', and 'mosaic'-like qualities of Weber's music point up the fact that his goals of 'truth' and 'character' occasionally produced music difficult to reconcile with traditional ideals of euphony, melodic-rhythmic flow and formal rounding. Thus, though his operatic successors eagerly emulated numerous effects in scoring, harmony and broad musico-dramatic structure, few seem to have been as willing as Weber to subordinate musical qualities to the goal of continuously truthful expression.

The decline of Weber's reputation and the disappearance of much of his music from the repertory also need to be studied, although one may provisionally suggest some reasons for these. On the one hand, with the triumph of Wagner's mature operas came heightened expectations of the logic of plot and character development that made *Euryanthe* and *Oberon* increasingly difficult for audiences to accept (efforts to 'rescue' these operas for posterity through alternative librettos have all failed); only *Der Freischütz* has been able to hold the stage, and even this work fared poorly in non-German theatres in the 20th century. And on the other, the emergence of Beethoven's style as the dominant paradigm for instrumental music and of Schubert's lieder as the corresponding model for German song tended to overshadow Weber's significant contributions in these areas. In this regard it seems significant that two of Weber's most prominent defenders in the 20th century were Debussy and Stravinsky, composers whose own distance from the predominantly symphonic style of 19th-century music allowed them to appreciate Weber's art on its own terms.

PHILIPP SPITTA (1, 7), JOACHIM VEIT (2, 5, 8), THOMAS BAUMAN (3), PATRICIA LEWY GIDWITZ (4), JOHN WARRACK (6), MICHAEL C. TUSA (9)

Weber, Bedřich [Friedrich] **Diviš** [Dionys] (*b* Velichov, nr Karlovy Vary, 9 Oct 1766; *d* Prague, 25 Dec 1842). Bohemian composer and teacher. He first had music lessons in his home town with F. Beier. He continued his education at the Gymnasium in nearby Doupov and went to the Klementinum seminary in Prague to study theology, philosophy and law, before turning his attention permanently to music. In 1792 he studied with the Abbé Vogler, and was soon renowned in Prague society as an effective teacher and an excellent pianist. During the late 1790s he gained much local success composing dance and salon pieces for piano and for orchestra; his standing was also enhanced by a number of more substantial works, notably the large patriotic cantata *Böhmens Errettung*, written for the 1797 birthday celebrations of Emperor Francis II. By 1800 Weber occupied a leading role in Prague musical life. He was involved in the formation of the Verein zur Beförderung der Tonkunst in Böhmen (1810), established with the intention of raising standards of music-making and musical education in Czech lands. This led to the founding of the Prague Conservatory, for which he was invited to compile the statute and to plan the teaching curriculum, and to which he was appointed as the first director in 1811. From 1839 he combined this post with that of director of the Prague Organ School.

Weber had long been regarded as a staid reactionary who, as a leader of the Mozart cult of early 19th-century Prague, had a deleterious influence upon the development of Czech music during this period. He is primarily remembered for his alleged description of the 'Eroica' Symphony as 'an aberration', apparently reflecting his own intractable aesthetic and his supposed abhorrence of Beethoven's music. However, on the evidence of his own compositions and his conducting activities as conservatory director, he may more accurately be regarded as a gifted artist who had the misfortune to be sandwiched between the conflicting musical styles of two different eras. He did attempt to come to terms with changing idiom and aesthetic; his own compositions, although heavily influenced by Mozart, whom he met during his youth, later showed that he was not unaffected by contemporary musical developments. The thoroughly idiomatic and splendidly lyrical sextets for chromatic french horns, for instance, contain passages evocative of Carl Maria von Weber, even though he was strongly antagonistic of his German namesake during the latter's period as conductor of the Prague opera (1813–16). The eventual broadening of Weber's aesthetic outlook was illustrated by his inclusion of Beethoven works at the Conservatory; in 1839 he presented an all-Beethoven programme, and in 1842 he even directed a performance of the 'Eroica', albeit with minor alterations. Weber also showed enthusiasm for Wagner, whom he counselled in music theory in 1832, and in whose honour he conducted Wagner's Symphony in C at the Prague Conservatory.

Weber's contributions to his country's musical culture were substantial and far-reaching. He ensured the establishment and success of the Prague Conservatory, the subsequent training-ground of many important Czech musicians. He collaborated in compiling the first published collection of Czech folksongs (1825). He maintained a strong personal interest in new instrumental developments. His patronage of the chromatic horn ensured its acceptance in Czech lands prior to its use in many other parts of Europe. He developed a pedal tuning device for timpani, the basic principle of which is apparent in today's instrument. Weber also wrote a series of important theory textbooks, which remained influential for some time after his death. His pupils included Ignaz Moscheles and the Czech composers Leopold Měchura and Jan Kalivoda.

WORKS
(*selective list*)

Böhmens Errettung, cant., Prague, 12 Feb 1797
König der Genien, op, Prague, 1 June 1800
Kanzuma, Königin von Serandib, oder Der Krieg um Liebe, Spl, *c*1807, unperf.; ov. perf. Prague, 20 Feb 1842
Other vocal: Hymne an den Frieden, chorus, pf, Prague, 1798; German choruses; many songs and arias, 1v, pf; masses
Orch (most pubd in pf arr.): numerous allemandes, minuets, marches; Variazioni di bravura, pf, orch; Variations, tpt, orch; Variationen für das neu erfundene Klappenhorn, hn, orch, Prague, 1819
Chbr: Variations, rondos for wind band; various qts, 4 hn, incl. Die Jagd, Prague, 1831; 4 sextets, 6 hn, 6 sextets, 6 tbn, Prague, 1838
Pf solo: 3 rondos; 2 variation sets; Romance, Adagio; numerous allemandes, ländler, marches and minuets
Collections: with J. Ritter von Rittersberg, *České národní písne/Böhemische Volkslieder* [Czech folksongs] (Prague, 1825)

KARL STAPLETON

Weber, Ben (William Jennings Bryan) (*b* St Louis, 23 July 1916; *d* New York, 16 June 1979). American composer. His only musical training consisted of piano and singing lessons (the latter during his time at DePaul University, where he briefly studied medicine); as a composer he was self-taught. His early pieces were performed by a circle of composers in Chicago that included Perle; in 1945 he moved to New York, where his works began to be played frequently. A superlative copyist, from 1946 he supported himself by copying for Thomson and Schnabel, among others. For many years he was active in the ISCM and ACA, of which he was elected president in 1959. His music was highly regarded by such composers as Copland, Thomson, Carter, Cage, Babbitt and Diamond, and his honours included two Guggenheim fellowships (1950, 1953), an award and citation from the National Institute of Arts and Letters (1960), two awards from the Fromm Foundation, and the first Phoebe Ketchum Thorne Music Fund Award (1965–8). He was one of two American representatives to the Convegno Musicale in Rome in 1954, and was elected to the National Institute of Arts and Letters in 1971. His Piano Concerto, which was first performed on 24 March 1961 by Masselos and the New York PO under Bernstein, was commissioned by the Ford Foundation.

From 1938 Weber used 12-note techniques to create music at once piquant and transcendental. His piano and violin music is cast in a virtuoso Romantic style, and a dark wit flashes through such chamber works as the *Consort of Winds* and the Serenade. All his music has a vocal quality that reflects his training as a singer and is most in evidence in the Concert Aria after Solomon, the Symphony on Poems of William Blake, and the Three Songs. Weber often composed works as gifts to friends: the Webernian Five Pieces op.13 began a series of works for the cellist Seymour Barab that continued throughout Weber's life; the Piano Fantasy and Three Pieces as well as the Piano Concerto were composed for Masselos; and the Violin Concerto and *Dramatic Piece* for Joseph Fuchs.

An inventive, magnetic, witty man, Weber was a polymath whose interests ranged from philosophy and the natural sciences to gourmet cooking. His musical tastes favoured German and French music up to 1930, and his aesthetic was exemplified by his heroes Busoni, Schoenberg and Schnabel. Excerpts from Weber's memoir, *How I Took 63 Years to Commit Suicide* (written in 1979), were published in the *Brooklyn Literary Review* (ii, 1981).

WORKS

ORCHESTRAL

Piece for Ob and Orch, op.22, 1943–4; Sinfonia, vc, orch, 1945–6, arr. vc, pf; 2 Pieces, str orch, op.34, 1950; Vn Conc., op.41, 1954; Prelude and Passacaglia, op.42, 1954; Rhapsodie concertante, op.47, va, small orch, 1957; Pf Conc., op.52, 1961; Dolmen, op.58, wind, str, 1964; Dramatic Piece, op.61, vn, orch, 1970; Sinfonia Clarion, op.62, small orch, 1973

MATTHEW PARIS

Weber, Bernhard Anselm (*b* Mannheim, 18 April 1764; *d* Berlin, 23 March 1821). German pianist, conductor and composer. In 1773 he studied first keyboard playing with Vogler, and then singing and theory respectively with Holzbauer and Einberger, a pupil of Vogler. From 1775 he received instruction in composition from Vogler, who

published a keyboard sonata by Weber in his *Mannheimer Monatsschrift* in 1780. Other early compositions include a collection of songs published with F. Fraenzl the younger in 1784. After studying theology and law at Heidelberg in 1781, Weber is thought to have toured as a virtuoso on Röllig's Xänorphika (an experimental keyboard instrument in which the tone was produced by friction), before becoming musical director of Grossmann's theatre company in Hanover in 1787. Here he became acquainted with the music of Handel and also produced his first stage work. In 1790 he joined Vogler in a tour through Holland, parts of Germany and Scandinavia, at the same time continuing his studies in counterpoint. After a prolonged stay in Stockholm, where he wrote several pieces of church music, Weber appeared with great success as a keyboard virtuoso at Hamburg.

In 1792 Weber was appointed joint musical director with Bernhard Wessely of the Nationaltheater in Berlin, and in 1793 he travelled to other parts of Germany, and especially to Vienna, to engage singers for the Berlin theatre. Subsequently he wrote an article on the Viennese theatre and singers for the *Berliner Musikzeitung*. In Vienna he became acquainted with Salieri, who encouraged him in the composition of stage works and made him more familiar with Gluck's operas. On his return to Berlin, Weber arranged the first performance of a Gluck opera there. The success of the production of *Iphigénie en Tauride*, which took place under Weber's direction on 24 February 1795, was a factor in his appointment in 1796 as first musical director of the theatre with a salary of 1000 thalers; previously he had been offered but had refused an engagement at Rheinsberg, which Wessely then accepted.

On 10 March 1800 Weber's heroic Singspiel *Mudarra* (text by Karl Alexander Herklots) was produced at the Berlin Opera without success. His next work, also to a text by Herklots, was a *lyrisches Monodrama*, *Hero*, written for Madame Schick. Weber also set a *lyrisches Duodrama* by Herklots, *Sulmalle* (1802), and Schiller's spoken melodrama *Der Gang nach dem Eisenhammer* (*c*1810). Besides further operas, including *Die Wette* (1805), the text of which was a German translation of P. Guillet's *Un quart d'heure de silence* set in 1804 by Gaveaux, and *Deodata* (1810), to a text by Kotzebue, Weber wrote incidental music to plays, the most famous being Schiller's *Wilhelm Tell* (1804).

In 1800 Weber went on a concert tour to Breslau with the violinist Ernst Schick and his wife, and in 1803 he visited Paris with Kotzebue and became acquainted with Cherubini. On his return he was given the title of Kapellmeister, and he retained his position as first musical director when the German and Italian theatres were merged in 1811. Only after a serious illness in 1818 was he compelled to withdraw gradually from his duties, before Spontini was appointed as general musical director in 1820. He was a prolific composer; a list of his compositions is in Carl von Ledebur's *Tonkünstler-Lexicon Berlin's* (Berlin, 1861, pp.627–8). However, only individual songs from his stage works retained their popularity, especially the melodies to 'Mit dem Pfeil dem Bogen' and 'Rasch tritt der Tod den Menschen an' from his music to *Wilhelm Tell*. His main achievement was as a conductor of other composers' music, particularly that of Gluck.

EDMUND VAN DER STRAETEN/JOHN D. DRAKE

Weber, Bernhard Christian (*b* Wolferschwenda, nr Sondershausen, 1 Dec 1712; *d* Tennstedt, nr Erfurt, 5 Feb 1758). German organist and composer. From 1732 until his death he served the Stadtkirche, Tennstedt, as organist. G.H. Noah, who knew J.S. Bach and came to Tennstedt as Kantor in 1743, possibly encouraged Weber to write a set of 24 preludes and fugues entitled *Das Wohltemperierte Clavier* which imitated Bach's work. As the manuscript (in *B-Bc*; ed. M. Seiffert, *Veröffentlichungen der Neuen Bachgesellschaft*, xxxiv/1, Leipzig, 1933) is wrongly dated 1689, Weber was for some time considered Bach's precursor.

DOROTHEA SCHRÖDER

Weber, Georg (i) (*b* Weissenfels, *c*1540; *d* Naumburg, early 1599). German composer. He studied in Leipzig, and was a Kantor in Weissenfels from 1558 to 1566 and in Naumburg until 1568. From that year until 1574 he lived in Weissenfels but held no professional appointment. Subsequently he again became a Kantor. In 1595 or 1596 he once more settled in Naumburg. He was considered a competent composer by his contemporaries, and it is highly probable that Schütz received his earliest musical instruction between 1590 and 1595 from him.

Only one of Weber's published works is extant as far as is known (see Finscher, p.63); the titles of the lost works, however, indicate that he contributed to the development of Protestant church music in the second half of the 16th century both in the fields of the homophonic chorale and the chanson motet. The one surviving work is his *Geistliche Lieder und Psalmen des ... Herrn D. Martinus Lutheri ... nach Ordnung der Jahrzeit* (Erfurt, 1588, enlarged 2/1594); it comprises 51 four-part homophonic settings, the cantus firmus being placed in the highest part, and follows the general pattern (*Kantionalsatz*) established by Osiander in 1586. The songs, however, are intended for singing by students in the streets, not for use in church services; they are, therefore, not wholly homophonic and do not always adhere strictly to the traditional chorale melodies.

A third edition of this publication appeared in 1596, *Geistliche deutzsche Lieder und Psalmen ... erstlichen mit 4 Stimmen, jetztund aber alle mit 8 Stimmen uff 2 Chor zu singen*, with each piece arranged for eight-part double choir. Manuscript sources preserve two motets by Weber: *Allein zu dir Herr Jesu Christ*, for eight voices, and *Surge propera amica mea*, for six voices (in *D-Dl* and *Mbs* respectively). He also wrote two volumes of psalm settings, *Teutsche Psalmen ... Davids mit 4, 5 und 6 Stimmen* (Mühlhausen, 1568–9), but these are now lost.

WALTER BLANKENBURG/CLYTUS GOTTWALD

Weber, Georg (ii) (*b* Dahlen, nr Meissen, *c*1610; *d* after 1652). German composer and singer. His varied career began with his appointment as bass singer in the court chapel at Gottorf on 1 October 1632. He seems to have left in 1636, when he went to Frankfurt and Darmstadt, among other places. He may also have gone to Königsberg and taken a master's degree in philosophy there. He had settled in Stockholm by 1640 and was still there at the time of his second publication in 1645. Between 1647 and 1651 he worked at several churches in Danzig [now Gdańsk]. He then became vicar and succentor at Magdeburg Cathedral. He was an active member of the school of songwriters centred on Königsberg and Danzig. The influence of Heinrich Albert (whose songs were being published in Königsberg) is apparent in Weber's work, which is somewhat Italianate, especially in the solo songs in the *Lebensfrüchte*, where recitative-like passages and ornate vocal writing occur. Of some of these solo pieces there are alternative versions in a simpler melodic style for several voices. Weber is particularly important for his cultivation of the instrumentally accompanied song, which was to play such a vital part in the later development of German song; his ritornellos are in a distinctively instrumental style. The texts, some written by himself, belong to the passionate and devotional pietistic literature of the time.

A. LINDSEY KIRWAN/LOTHAR HOFFMANN-ERBRECHT

Weber, (Jacob) Gottfried (*b* Freinsheim, nr Mannheim, 1 March 1779; *d* Bad Kreuznach, 21 Sept 1839). German composer and theorist. As a child, he studied the flute and piano, and later the organ and cello. In 1802, after studying law, he settled as a lawyer in Mannheim. There he composed, founded a musical society and conducted concerts; and he befriended Carl Maria von Weber (who was no relation) and Meyerbeer. In 1814 he moved to Mainz and in 1819 to Darmstadt, where he continued his legal career and became Grossherzoglicher Generalstaatsprokurator (General State Prosecutor).

Weber's musical achievements include writings about acoustics, music history, performing practice and theoretical issues; the founding in 1824 of the music journal *Cäcilia*; and the invention of a chronometer that initially rivalled Maelzel's metronome and a double-slide trombone, considered a predecessor of the Wagner tuba. He was the first to question the complete authenticity of Mozart's Requiem. As a composer, he is recognized for his through-composed lieder and his church music.

Weber is most widely known, however, for his contributions to music theory. His general approach was to reject a single underlying principle for all music and work from compositional practice. He was the first to write an 'Allgemeine Musiklehre', a basic music theory manual. In addition, he refined Georg Vogler's step theory (Stufentheorie), which used Roman numerals to associate chord function with scale degree. While Vogler used only upper-case numerals, Weber's system indicated quality as well. He used upper-case numerals for major, lower-case for minor, and a superscript circle for diminished quality. To identify a key, he used upper- or lower-case letters followed by a colon (for example, g: i iv V i), a system still in use.

Weber's chart of key relationships differed significantly from the 18th-century circles of fifths (by Heinichen, Mattheson and others) in that it presented two axes. The vertical axis presented 5th relations, the horizontal presented alternating parallel and relative major–minor keys. This display allowed Weber to include the parallel major–minor among the closest relatives of any key. The scheme was later modified, but only slightly, by Schoenberg in his 'Chart of the Regions' (*Structural Functions of Harmony*).

Weber's theory of harmonic progression took into account what today might be considered music cognition. He posed two principles by which progressions are understood by 'the ear'. The first asserts that the ear will understand a harmony in the simplest manner possible (for example, the opening triad of a piece will be heard as a tonic). The second, the 'Principle of Inertia', asserts that the ear will understand a diatonic harmony as belonging to the prevailing key and a non-diatonic harmony as belonging to the closest possible key. These principles allowed a kind of 'real time' analysis in which a chord's context is determined as it is heard.

An important topic throughout Weber's main treatise, *Versuch einer geordneten Theorie der Tonsetzkunst* (1817–21), is 'multiple meaning' (*Mehrdeutigkeit*). This property, defined as 'the possibility of explaining an entity in more than one way', is applied to a large variety of musical elements. For example, a C major harmony may be I in C, III in A minor, IV in G etc. Weber viewed multiple meaning as a vital property of the tonal system, a fertile source of compositional richness and variety. He has been recognized also for his theory of rhythm (which distinguishes accents at several hierarchical levels) and for his harmonic approach to counterpoint.

JANNA SASLAW

Weber, Gustav (*b* Münchenbuchsee, 30 Oct 1845; *d* Zürich, 12 June 1887). Swiss organist, conductor and composer. He received his first lessons from his father, Johann Rudolf Weber (1819–75). In 1861 he studied at the Leipzig Conservatory, and as late as 1865 studied theory and counterpoint with Vincenz Lachner at Mannheim. After a period spent at Zürich as an organist and a much-appreciated piano teacher, he decided to complete his training as a pianist under Carl Tausig and for this purpose lived in Berlin in 1869–70. In 1872 he succeeded Theodor Kirchner as organist of St Peter, Zürich. In 1876 he became organist of the Grossmünster and soon after gave regular organ concerts. From 1877 to 1886 he conducted the big mixed choir of Zürich known as Harmonie, was singing master at the public school and teacher of the organ and of theory and history of music at the music school.

Between 1876 and 1883 Weber edited the *Schweizerische Musikzeitung*, founded by his father and the most important magazine of its kind in the country, and wrote a good deal of music criticism. He published several collections of songs and – influenced by the same Romantic spirit that moved his contemporaries – he composed choruses and solos with orchestral accompaniment, partsongs for male voices, songs, orchestral and chamber music, and piano pieces.

HANS EHINGER/BRUCE CARR

Weber, Johann. German composer, possibly identifiable with JOHANN WIRCKER.

Weber, Johannès [Jean] (*b* Brumath, Alsace, 6 Sept 1818; *d* Paris, 19 or 20 March 1902). French writer on music. He studied theology and music, and on his arrival in Paris taught music. From 1845 to 1855 he was Meyerbeer's secretary. His career as a critic began with his contributions to the short-lived *Critique musicale*; he also wrote for the *Revue et gazette musicale de Paris* and the *Renaissance musicale*. From 1861 to 1895 he was music critic for *Le temps*. He was severe and precise in his judgments; he criticized violently, point by point, Bizet's orchestration of *La jolie fille de Perth*, and Bizet, in a famous letter of January 1868, admitted his faults. His rigorous musical ideas led Weber to write a number of theoretical works on music, including *Les illusions musicales*, in which he suggested that music must be understood on its own terms, without reference to other forms of art.

BRIGITTE MASSIN

Weber, Joseph [Josef] **Miroslav** (*b* Prague, 9 Nov 1854; *d* Munich, 1 Jan 1906). Czech violinist and composer. He studied the violin with his father and the organ with František Blažek at the Prague Organ School. He also studied the piano with Eduard Horn and composition

with Binař and Adolf Průcha before entering the Prague Conservatory (1870), where his teachers were the organist Josef Krejčí and the violinists Laub and Bennewitz. Leaving the conservatory in 1873, Weber began his professional career as a solo violinist at Sondershausen, but rapidly advanced to more important posts. From 1875 to 1883 he was the leader at Darmstadt, where he also organized a string quartet. In 1883 he succeeded J. Rebicek as assistant Kapellmeister in Wiesbaden, and was made first Kapellmeister (1889–93). He joined the Munich court orchestra in 1894, replacing Ludwig Abel, and in 1901, on the death of Benno Walter, became the leader. He also led a quartet in Munich, whose other members were Leitner, Bihrle and Carl Ebner.

An unusually well-trained musician, Weber was a fine pianist as well as an accomplished violinist. Reviews of performances of his G minor Violin Concerto in Darmstadt and Munich (1903) praise his tone quality and bravura playing. But he also enjoyed a well-deserved reputation as a composer of chamber music and operettas. Many of his chamber works won prizes, among them the Second String Quartet (St Petersburg in 1891), the String Quintet in D (Prague in 1898) and the Septet 'Aus meinem Leben' (Tonkünstlerverein, Vienna, in 1896), a work which recalls Smetana's quartet in more than name. His talented but derivative chamber works have been overshadowed by those of his more gifted Czech countrymen and are not available in modern editions.

ALBERT MELL

Weber, Ludwig (i) (*b* Nuremberg, 13 Oct 1891; *d* Essen-Werden, 30 June 1947). German composer and teacher. To a large extent self-taught, he was a primary school teacher in Nuremberg from 1912. With the help of Wilhelm Widmann and Anton Hardörfer, he engaged in the study of old music, but eventually became involved in the German youth music movement, which had a lasting influence on his career. He was appointed to a post in Münster in 1925, and then joined the staff of the Essen Folkwangschule in 1927. His best-known composition is *Christgeburt*, a chamber piece based on old folksongs and incorporating acting, singing and dancing; it has been much performed by the Folkwangschule. In 1949 a Ludwig Weber Society was formed to publish the large quantity of manuscripts he left.

KLAUS L. NEUMANN

Weber, Ludwig (ii) (*b* Vienna, 29 July 1899; *d* Vienna, 9 Dec 1974). Austrian bass. He abandoned projected careers as teacher and artist when he discovered his vocal promise and began to study with Alfred Boruttau in 1919. Having gained experience at the Vienna Volksoper he joined some of the smaller German companies in the mid- and late 1920s. After a successful appearance at the Munich Wagner Festival of 1931 he joined the Bavarian Staatsoper in 1933 and soon began to receive invitations to sing abroad. He was first heard in London in 1936 (Pogner, Gurnemanz, Hunding and Hagen), and in the following years he added Daland, King Mark, Osmin and Rocco to his Covent Garden roles. He joined the Vienna Staatsoper in 1945 and during its 1947 London season he sang the Commendatore and Rocco. In the following seasons he returned to give further performances of his Wagnerian roles, and to sing Boris Godunov (1950). From 1951 he was a regular singer at the Bayreuth Festival, and he also appeared at Buenos Aires. He had a magnificently rich and solid bass voice and could darken his tones to accommodate the malevolence of Hagen as successfully as he conveyed the suffering and dignity of Mark or Gurnemanz. In Mozart he commanded the line and agility to be a splendid Sarastro, Osmin and Commendatore, and he also often appeared on the concert platform. He lacked perhaps the boisterous high spirits of the complete Baron Ochs, though he was never less than impressive in this part (and some have compared him with Mayr); his recording of the role, and of his Gurnemanz in the 1951 Bayreuth recording, are still much admired.

PETER BRANSCOMBE

Weber, Max (*b* Erfurt, 21 April 1864; *d* Munich, 14 June 1920). German social economist and sociologist. He held professorial appointments in economics and sociology at the universities of Berlin (1893), Freiburg (1894), Heidelberg (1897–1903) and Munich (1920). He is regarded as the founder of comprehensive sociology which he developed from the social theories of Hegel, Comte and Marx and the historical philosophies of Dilthey, Windelband and Simmel. He avoided monocausal interpretations and stressed the concrete relationships between a spiritual climate and the corresponding material (economic and political) historical data. The range of his writings reflects his sharp distinction between the sociologist's freedom of evaluation and socially relevant comment (which he considered a non-scientific process and not a task of the sociologist), for the conservative outlook of his political writings frequently conflicts with the perspective of his scientific works. In his only substantial musico-sociological work, 'Die rationalen und soziologischen Grundlagen der Musik' (Eng. trans., *The Rational and Social*

Foundations of Music, Carbondale, IL., 1958, 2/1969), originally an appendix to *Wirtschaft und Gesellschaft* (Tübingen, 1921–2, 5/1972), Weber applied the idea that the development of capitalism entails a corresponding increase in the rationalization of social structures to the development of musical materials and instruments. He ascribed the development of the diatonic tonal system to a historical process of increasing rationalization, represented in Europe chiefly by the middle classes. The materials of music are progressively purged of all the ingredients appropriate to it under feudal conditions: musical materials and idioms are increasingly restricted to functional elements. Melismata and microtonic intervals, found in ancient and non-European music, are swept away by diatonic principles which become the basis of a functional harmony.

Weber deduced a similar process of rationalization in musical instruments, dependent both on concrete social conditions and requirements and on the concurrent development of musical materials. For example in his study of the evolution of keyboard instruments he ascribed to the increasingly public nature of musical performance the progression from clavichord to fortepiano to modern piano.

Although Weber's sociology of music contains elements of materialist philosophy, it quickly drew criticism from Marxist writers. Anatoly Lunacharsky criticized his neo-Kantian conception of rationalism as one-sided, considering musical materials in isolation, and ignoring the physiological and emotional elements of music, which are often inconsistent with the theory of progressive rationalization of musical materials which Weber had evolved from the 19th-century philosophy of musical progress. Although he examined the social determination of specific musical phenomena, he did not study the range of historical epochs in sufficient depth to re-establish whether a rationalizing trend can be applied to them.

Weber's theory of the increasing rationalization of musical materials greatly influenced Adorno's musico-sociology, though in *Philosophie der neuen Musik*, Adorno went far beyond Weber in investigating the social problems of this rationalization. Likewise, Weber's work influenced positivist musico-sociology (Silbermann, Blaukopf, etc.) only indirectly. His influence was greater on cultural sociology as a whole than on its musical specialization, and the fact that his musicological work came into being as an appendix to *Wirtschaft und Gesellschaft* suggests that he himself thought of musico-sociology as only a part of a more comprehensive social history. Although the postwar serialist composers tried to rationalize the relationships between musical idiom and the structuring of material to an extreme degree, there is no evidence that they were at all directly influenced by Weber's theory.

KONRAD BOEHMER

Weber, Rainer (*b* Leipzig, 3 Feb 1927). German wind instrument maker and restorer. He is noted for his restorations and fine reproductions of early wind instruments including crumhorns, shawms, dulcians, rauschpfeifen, cornetts, recorders, rackets, gemshorns, sorduns, oboes, bassoons and portatives. He took up the organ as a schoolboy and visited many old organs in north Germany. He became first a mechanic and later a painter and commercial artist. In Berlin he was trained by Gerhard Muchow to restore pictures and wood carvings and also learnt to play the recorder, oboe and bassoon. His taste for music of the 15th to the 17th centuries led to an unsuccessful search for instruments with sounds that matched the old organs he loved. He learnt wood-turning at Hamburg and made his first instruments there in 1947, simply to produce the sounds he wanted for amateur music-making. He was encouraged to start his own workshop in 1950 and in 1960 moved to Bayerbach in Bavaria, by which time he was making historical copies that were ever more faithful to their originals. In recent years his main career has been spent as a restorer of historic woodwinds, of which he is the acknowledged leading exponent, having had through his hands many of the most precious of surviving instruments. In addition to private collectors, he has worked for the museums of Augsburg, Bologna, Bonn, Brussels, Copenhagen, Darmstadt, Frankfurt, Ingolstadt, Modena, Munich, Rothenburg, Stuttgart and Verona. His restoration reports, a volume of which he has published, are models of their kind: revealing the use of the most modern techniques, they are nevertheless informed by a deep knowledge of and respect for the techniques employed in former times. His most outstanding achievement has probably been to save some particularly notable instruments from threatened destruction, including the crumhorns in the Verona collection. Weber has published an important corpus of articles concerned with both woodwind history and restoration topics (for a complete bibliography see Fontana).

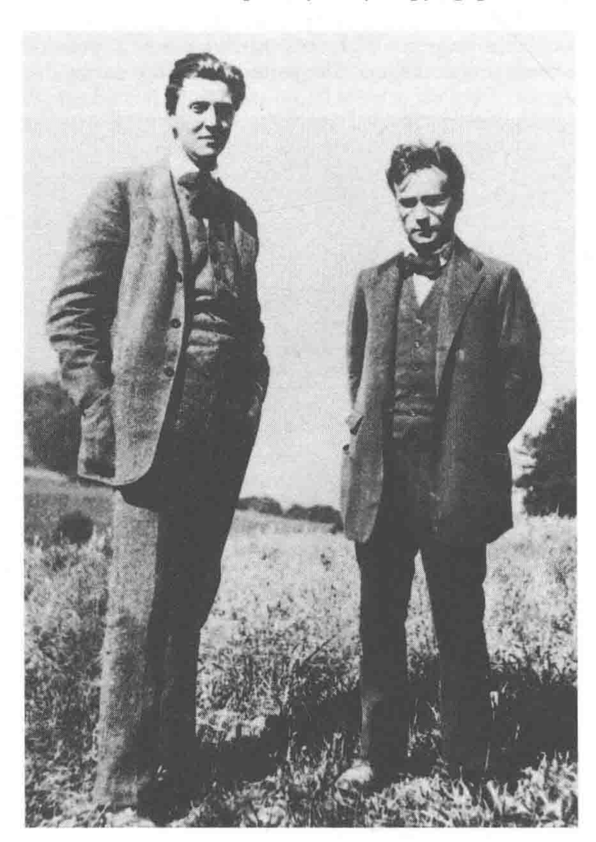
CHRISTOPHER MONK/R



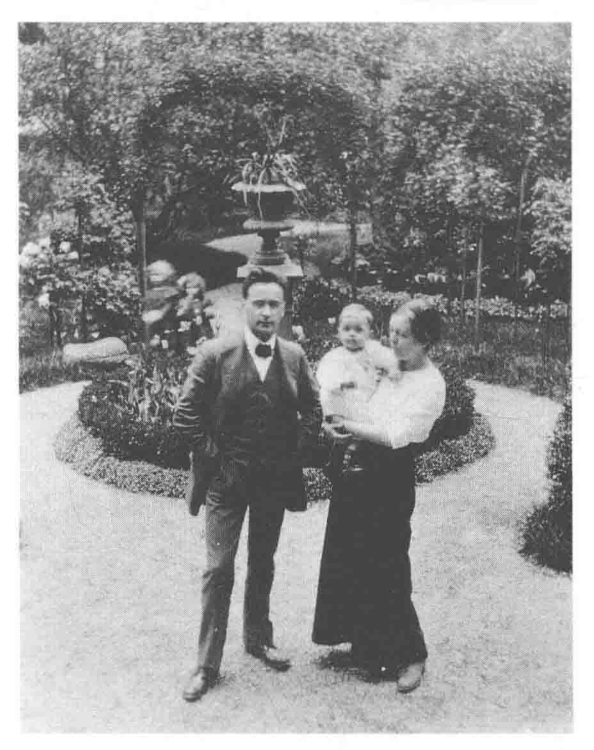
Webern, Anton (Friedrich Wilhelm von) (*b* Vienna, 3 Dec 1883; *d* Mittersill, 15 Sept 1945). Austrian composer and conductor. Webern, who was probably Schoenberg's first private pupil, and Alban Berg, who came to him a few weeks later, were the most famous of Schoenberg's students and became, with him, the major exponents of 12-note technique in the second quarter of the 20th century. Webern applied the new technique more rigorously than either Schoenberg, who took many liberties, or Berg, who never used it exclusively; Webern's strictness, and his innovative organization of rhythm and dynamics, were seized upon eagerly by Boulez and Stockhausen and other integral serialists of the Darmstadt School in the 1950s and were a significant influence on music in the second half of the century.

1. Life. Webern was born in Vienna, the son of a mining engineer who later rose to be chief of the Ministry of Agriculture's Department of Mining. The family were minor nobility; Webern dropped the 'von' from his name in 1918 in compliance with an edict from the new Austrian government prohibiting the use of such titles. As a child he attended school in Vienna (1889–90), Graz (1890–94) and Klagenfurt (1894–1902), where he studied the piano and the cello with Edwin Komauer. Holidays and vacations were spent at his family's country estate, Preglhof; here he composed many of his earliest pieces, the majority of which were settings of poetry by Ferdinand Avenarius (a lyric poet and the nephew of Richard Wagner) and the poets in Avenarius's two anthologies of German poetry, *Hausbuch deutscher Lyrik* and *Balladenbuch*. Ernst Diez, who in later life became an art historian of some distinction specializing in art of the Orient and the Middle East, was Webern's cousin and closest childhood friend, five years his senior. Diez was a frequent visitor at Preglhof, and his influence upon the thinking and artistic interests of the young Webern was considerable. The two boys favoured the work of the German 'moderns': besides the poetry of Stefan George, Richard Dehmel and others, they read Nietzsche, and they shared an enthusiasm for the work of contemporary German painters and the music of Wagner. In 1901 they saw a production of *Tristan* in Graz, and on Webern's maturation from the Klagenfurt Bundesgymnasium in 1902 his father rewarded him with a trip to Bayreuth on which he was accompanied by Diez. They saw *Parsifal* and *Der fliegende Holländer*, and on the trip home visited several art galleries in Munich, where Webern was particularly impressed with paintings by Arnold Böcklin, Giovanni Segantini and Moritz von Schwind, though he expressed the greatest disdain for the fashion-conscious Bayreuth audiences as well as for most of the modern art that he saw in the galleries.

In 1902 he matriculated at the University in Vienna, where he studied musicology with Guido Adler, harmony with Hermann Graedener and counterpoint with Karl Navrátil. During these years he continued to study the piano and cello privately and to compose, writing numerous short piano pieces and movements for string quartet as well as some pieces for small orchestra and at least one, the idyll *Im Sommerwind* after a poem by Bruno Wille, for large orchestra. He left university in 1906, having successfully completed work for a doctorate in musicology, which included as his dissertation an edition of the second volume of the *Choralis constantinus* by Heinrich Isaac.

The most influential relationship of Webern's life began in autumn 1904, when, after travelling to Berlin to inquire about the possibility of studying composition with Hans Pfitzner and having become enraged at Pfitzner's attitude towards Mahler and Strauss, he returned to Vienna to become a student instead of Schoenberg. Not only was this the beginning of his lifelong devotion to Schoenberg – an esteem the fervour of which at times resembled that of a love affair – it was also to determine the company in which he would move for the rest of his life. The members of Schoenberg's class – Karl Horwitz and Heinrich Jalowetz, who were already Webern's university friends, as well as Erwin Stein, Egon Wellesz and particularly Alban Berg – became a close circle and were to remain so, often seeing themselves as an island surrounded by mediocrity and hostility. Their experience encouraged such a feeling. For example, at what became known as the 'Skandalkonzert' of 31 March 1913, which included the first performance of Webern's op.6 pieces for orchestra along with works by Schoenberg, Zemlinsky, Mahler and Berg, performance of the Berg caused a riot of such proportions that the concert could not be finished.

Webern's formal study with Schoenberg was over by the end of 1908. Only the first two of Webern's works with opus numbers were composed during the time he was Schoenberg's pupil: the Passacaglia and the chorus *Entflieht auf leichten Kähnen* (both written in 1908). In the years directly following their apprenticeship both Berg and Webern were kept very busy copying parts and



1. Anton Webern (right) with Alban Berg

making piano reductions for Schoenberg, as well as making numerous arrangements for both his private and his professional life, which included raising money to try to keep him solvent. Their loyalty was immense. In autumn 1911 Schoenberg moved to Berlin. Webern followed him there within the week and, except for occasional trips to Vienna, remained there until he took up a post at Stettin (now Szczecin) in June 1912.

Webern married his cousin Wilhelmine Mörtl in 1911. They had four children: Amalie in 1911, Maria in 1913, Peter in 1915 and Christine in 1919. By the year of his marriage Webern had composed a large number of pieces, including all those up to op.10. He would not produce another work until the op.11 pieces for cello and piano in mid-1914. In 1908–9 he moved from the extended tonality of the Passacaglia to the aphoristic atonality of opp.3–11, perhaps the style for which he is best remembered. The next eight works with opus numbers, written between 1914 and 1925, were to represent another change of direction: all are songs, in which text is used as a way of expanding a style that had reached its maximum brevity with op.11.

'When men begin earning a living and become involved in external matters, they all get a hole inside.' So Webern wrote to Schoenberg in 1910. In the years immediately following university and his apprenticeship with Schoenberg, his instability and indecisiveness began to be apparent. In the years 1908–13 he took up and quit five theatre conducting jobs – in Bad Ischl in 1908, Innsbruck in 1909, Bad Teplitz in 1910, Danzig in 1910 and Stettin in 1912 – in most cases bolting after only a few weeks. During the same period he made unsuccessful applications for some 11 other positions, refused to consider five available posts in Riga, and turned down a position offered to him at Graz. The pattern of his life during this period was determined almost entirely by his devotion to Schoenberg and his fanatical desire to be near him. 'You are set up in my heart as my highest ideal whom I love more and more, to whom I am more and more devoted', he wrote to Schoenberg on 10 June 1914.

2. *Webern and his family*

Summer 1911 was spent securing the help of Zemlinsky in an application to the Deutsches Landestheater in Prague. The application was successful, but when Webern travelled to Prague to take up the position in September he changed his mind and returned to Vienna. Another change of mind resulted in a second application for the same job six months later. This was the beginning of a lengthy series of tergiversations in connection with Prague. Altogether he applied for the position there seven times and was given it five. He held it for about six months in total, on separate occasions in 1916, 1917 and 1920.

In January 1913 he requested and was given sick leave from the job he had held in Stettin since the previous June. During a two-month stay in a sanatorium in Semmering he decided not to return to Stettin and again entered into negotiations with the theatre in Prague, agreeing to go there for the beginning of the following season. At the end of July, after completing arrangements for moving his household to Prague, he once again travelled there and changed his mind, this time asking for, and being granted, a leave of absence for health reasons. He subsequently converted this into a formal resignation.

Webern now agreed to a course of psychoanalysis under the Viennese psychologist Albert Adler. After two months (Adler had suggested three) he declared himself cured. In April 1914 he signed a contract with Stettin which was to take effect on 20 August. On 28 July Austria-Hungary declared war on Serbia, and by 20 August the theatre in Stettin was closed.

Although Webern was himself seized by an immediate desire to join up and fight, he petitioned vociferously for Schoenberg's exemption from military service from the start. He entered military service in February 1915. Five months and five transfers later he had had enough and succeeded in getting the theatre in Prague to intercede on his behalf; he was released in December so that he could take up the position there (for the first time) in January 1916. In the meantime, however, Schoenberg was called up, and Webern's guilt at his own reprieve was so great that he left Prague before the end of the month, without telling anyone of his plans, and returned to active service. He set out with renewed energy to secure Schoenberg's release, and, when this campaign was successful, again lost interest in the cause himself. In October 1916 he approached the long-suffering Zemlinsky about securing yet another discharge so that he could return to the position at Prague, which he did in August 1917. In December Schoenberg moved to Mödling. Webern immediately left Prague, to move to Mödling as well. Probably as a result of Schoenberg's encouragement, Webern was to return to the Prague theatre for a third time in 1920, when the economic climate in Austria was extremely bleak, but once again he left after a few weeks. This was his last attempt to hold a conducting position in the theatre.

In November 1918 a short-lived but historically important society was born: the Verein für Musikalische Privataufführungen, of which Schoenberg was president and Webern one of three original musical directors. The society's aim was to provide performances of contemporary

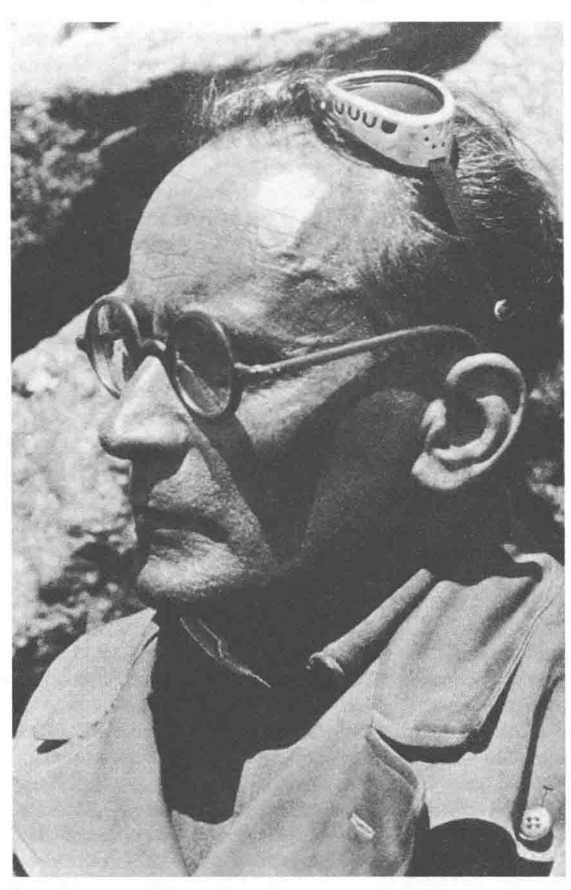
music for an audience of subscribing members, performances which were closed to the general public and thus to the usual popular critical network. The society's manifesto was published in February 1919, and in the three years 1919–21 some 117 concerts were given, including performances of many of Webern's works. The society disbanded in 1922.

Three things of great importance occurred in Webern's life in the early 1920s. He began to write music using the 12-note technique; he began a conducting career that was to become, if not very lucrative, certainly more than moderately successful; and he met Hildegard Jone.

Schoenberg formally introduced his new technique of composition to a close circle of students and friends in the early 1920s. Webern had already been experimenting along these lines, and in a letter to Berg dated 8 October 1925 he wrote that '12-tone composition is for me now a completely clear procedure'. He composed the eight songs of opp.17–19 in the years 1924–6; his first fully developed 12-note piece was the String Trio op.20, finished in 1928.

Although as a conductor he was never anything like as famous as contemporaries such as Bruno Walter or Hermann Scherchen, he did receive a certain acclaim, and Berg wrote to his wife after seeing him conduct Mahler's Third Symphony: 'Without exaggeration: Webern is the greatest conductor since Mahler – in every respect'. He was appointed chorus master of the Schubertbund in 1921, of the Mödlinger Männergesangverein in the same year, and of David Josef Bach's Singverein in 1923; although he resigned from the Schubertbund in 1922, he remained with the other two organizations for the length of their existence. In 1927 and 1928 he became conductor of the Arbeiter-Symphonie-Konzerts (a series of concerts given by the Tonkünstlerorchester for a working-class audience) and the Chor Freie Typographia as well. He first conducted on RAVAG (Austrian state radio) in 1927 and was regularly employed there from 1929 until his dismissal for political reasons in 1935. In the years 1920–36 he pursued an international career, with engagements in Berlin, Frankfurt, Munich, London and Barcelona. He conducted almost exclusively the traditional Austro-German repertory – Haydn, Beethoven, Schubert, Brahms, Bruckner and Mahler – and his own works and those of Schoenberg and Berg. It is significant that his tastes did not extend far beyond that music which is central to the German tradition, of which he firmly believed his own work to be a continuation.

Throughout the 1920s he had shown an ambivalence towards teaching that was not unlike his earlier indecisiveness concerning theatre conducting. In 1920 he refused a teaching position offered to him by the Academy in Prague and instead took over some of Schoenberg's teaching in Vienna while the latter made a prolonged visit to the Netherlands. During succeeding years he repeatedly tried to secure teaching with the Musikwissenschaftliches Institut and the Akademie für Musik und Darstellende Kunst in Vienna and the University in Berlin, but all his attempts were in vain. In 1925 he was hired to teach at the Israelisches Blindeninstitut in Vienna, the only teaching position he would ever hold, and one that he retained for six years.



As the result of Schoenberg's intercessions Webern was asked in 1929 to teach at the Austro-American Conservatory, a summer academy at Mondsee, and he suggested courses in formal analysis and 12-note composition; these were set for summer 1931, but in the end the invitation came to nothing. A private venue for the lectures, which he had already prepared, was organized by his friends and students, and in January 1932 he began a course in the home of Dr Rudolph Kurzmann, the first of a series of lectures which was to continue until the last months of World War II. The first two courses, given in 1932 and 1933, were transcribed by Webern's student Willi Reich from his notes and later published in a single volume, *Der Weg zur neuen Musik* (1960). Except for these two courses, these series dealt with the works of Beethoven and other German masters.

The years leading up to the Anschluss were distressing generally for Webern. Emil Hertzka, who had not only viewed his music sympathetically, but was responsible for publishing many of his works and had granted him a small regular income as well, died in 1932, leaving Webern's future and that of his music uncertain. Schoenberg emigrated to Paris and then to America in 1933. Austria's Social Democratic Party was outlawed in 1934, and with it all its cultural organizations, including the Singverein and the Arbeiter-Symphonie-Konzerts. In 1935 Berg died unexpectedly of septicaemia. These years saw the end of Webern's conducting career. He conducted for the last time in Vienna, for RAVAG, in July 1935. Two BBC concerts in May 1936 were his last conducting appearances anywhere.

With the Anschluss came a list of 'degenerate art' which included Webern's name; from 1938 the publication or performance of his music was banned in Germany and Austria, though performances continued in America, Britain and Switzerland. Of his last four works only the Quartet op.28 was published during his lifetime, by Boosey & Hawkes in London. His attempts to interest publishers in the outside world in the two cantatas and the orchestral Variations op.30 were to no avail, though op.30 was performed in Winterthur in 1943, the last time Webern was to hear any of his own music performed.

His son Peter was killed on military service in February 1945. Webern himself, now aged 60, was drafted into the air-raid police and embarracked. At the end of March 1945 he and his wife fled their home in Mödling on foot to join their three daughters and their children in Mittersill, in the mountains near Salzburg, to get away from the constant bombings in Vienna; Mödling fell to the Russians six days later. The final irony came when, four months after the war had ended, Webern was shot dead while smoking an after-dinner cigar on the veranda of his daughter Christine's house, the victim indirectly of his son-in-law's black-market activities.

2. JUVENILIA AND STUDENT WORKS, 1899–1908. The earliest of Webern's compositions to survive were written in 1899, his 16th year, and consist of two pieces for cello and piano and a song with piano accompaniment on a poem by Avenarius. All are between 21 and 24 bars long and bear key signatures, though the shorter of the cello pieces shows already an uncomfortable relationship with its key signature that was to become more pronounced in the pieces written in the next few years. These and subsequent compositions written prior to the time Webern entered university in 1902 (eight other works from these years survive, all songs with piano accompaniment) exhibit the same rich textures and occasionally adventurous but frequently awkward harmonic language. The texts of the songs are for the most part lyrical vignettes

3. Anton Webern, 1937

on subjects from nature (clouds, stars, the moon, blossoms, the song of the blackbird, etc.); like both cello pieces, most are in a slow tempo.

Commencing formal studies in harmony and counterpoint in 1902, Webern began to broaden his horizon. Besides a number of arrangements of music by Schubert and Wolf, surviving sketches from 1903 and 1904 are of 13 more songs for voice and piano, one for voice and orchestra, 24 pieces for solo piano, nine movements for string quartet, a theme and variations for piano quintet and seven works for orchestra. Key signatures disappear for the first time in some of the songs from 1903; though this does not indicate the absence of tonality, the more adventurous pieces do not begin and end in the same key. There is little harmonic progression in the traditional sense in the early pieces, and the level of dissonance is in most cases rather high, but the basic harmonic language remains emphatically triadic. Phrases and movements inevitably end on pure triads, though harmonic motion between these cadence points is unpredictable. Textures are thick and a wide range is covered, with extended measured arpeggios, low bass tremolos and movement in octaves, both open and filled in with 3rds or triads.

From 1905, Webern's first year with Schoenberg, sketches for only five works are extant, all instrumental movements; Webern continued to write almost exclusively for string quartet and orchestra in the next two years. Two of the movements for string quartet, both written between June and August 1905, deserve attention. In these pieces we see a composer of considerably greater refinement and sophistication than the youth of even one year earlier. Perhaps the most striking difference between these and earlier pieces is in their coherence, and in the logic, both structural and harmonic, that governs them. Whereas in the earlier pieces the frequent unexpected harmonic shifts often seem aimless and without purpose, the situation is different in the quartet movements, where motion is directed: here surprises serve to interrupt, rather than to deflect or dissipate. The first of these movements, published posthumously as *Langsamer Satz*, is the shorter and more lighthearted. It is Brahmsian in style and texture with sumptuous harmonies and is simple but structurally secure. The longer piece (in fact the longest instrumental movement in all of Webern's music), known simply as String Quartet, represents the convergence of several influences. During the 1903–4 concert season Webern had heard Schoenberg's *Verklärte Nacht*. He was later to write to Schoenberg: 'The impression it made on me was one of the greatest I had ever experienced'. The 1905 String Quartet is Webern's *Verklärte Nacht*: his familiarity with Schoenberg's work expresses itself in many ways. But the work does not refer to Schoenberg alone. Webern noted on his sketches for the quartet that it was inspired by the artist Giovanni Segantini's triptych *Werden –Sein–Vergehen* ('Becoming–Being–Passing Away'), and in addition the opening bars and various transitions within the work are obviously modelled on the 'Muss es sein?' motif of Beethoven's String Quartet op.135. Some months earlier, on 6 November 1904, Webern had compared Segantini's art with that of Beethoven. After hearing a performance of the Eroica Symphony, he wrote: 'The genius of Beethoven reveals itself more and more clearly to me . . . I long for an artist in music such as Segantini was in painting . . . That man would then be the Beethoven of our day.' Clearly the conjunction of references associated with this work was not a coincidence. Finally, and perhaps quite by chance (but who can say?), the motif used as a unifying device throughout this movement – Webern's 'Muss es sein?' – is the three-note cell that was to be the all-important germ motif in his Concerto op.24 over a quarter of a century later.

In the next two years Webern produced a large number of chorale settings as exercises for Schoenberg and made sketches for an equally large number of instrumental movements, but few of these reached completion and none has the assurance of the 1905 String Quartet. The last two works written under Schoenberg's tutelage were the first Webern felt to be worthy of opus numbers. The Passacaglia for orchestra, staunchly in D minor, is formally his most rigorous work so far, though its inevitable repetitions are well masked by a superstructure of larger sections and by frequent variations in tempo and texture. The influence of Brahms seems obvious. *Entflieht auf leichten Kähnen*, on a text by Stefan George and much less well known, is perhaps of more importance, as a forecast of what was to come many years later, for it was in his op.2 that Webern for the first time used canon on a large scale.

3. EARLY APHORISTIC STYLE, 1908–14. On leaving Schoenberg's class Webern returned immediately to composing songs with piano accompaniment. He had set two poems by Richard Dehmel in 1906 and 1907; in 1908 he composed three more. He also turned his attention once more to the poetry of Stefan George. In 1908–9 he set 14 George poems, ten of which he would

later publish as opp.3 and 4. Though his music had been increasingly atonal for some time prior to this, and key signatures had in several instances already been either absent or meaningless, in the George songs he finally abandoned them, and forever. These songs represent a new direction: they are quite different in many ways from the previous music (indeed, from even the roughly contemporary Dehmel songs) and are the first of a group of very short atonal works in what is usually referred to as Webern's 'aphoristic style'. Although his earliest attempts at composition had produced relatively short pieces, 20 or 30 bars long, a few of the songs from his university years had been two or three times that length, and several of the instrumental pieces written during his study with Schoenberg were quite extended. The songs of op.3 range from 10 to 16 bars; those of op.4 are only slightly longer. Two of the four that were left over are 22 and 30 bars long, which was perhaps one reason for their being excluded from the published sets. All ten are studies in near-silence. Half of them use a dynamic range from *ppp* to *p*, with *p* used very sparingly; in all ten *ppp* is the level that predominates. They show a new compression and a new world of dissonant non-triadic chords: both were to be essential features of Webern's music from this time onwards. Registrally they cover a wide span in a brief time: the piano accompaniment in all but one of the ten published songs makes use of over five octaves, and in two of them the range extends to just short of or just over six. Textures are dense, with complex cross-rhythms and chords of up to eight different pitches, as well as the movement in octaves and octaves filled in with 3rds that had pervaded the earlier songs, but the remarkable reduction in dynamics and the non-triadic atonal nature of the vertical collections result in shimmering and quickly changing colours rather than the turgidity their appearance on the page might suggest. The same is true of the instrumental works to follow in the next few years, opp.5–11.

This was a prolific time for Webern. Besides the completion of the George songs, 1909 saw the composition of the brief and other-worldly op.5 movements for string quartet and the slightly larger-scale orchestral pieces of op.6, which he wrote as a memorial to his mother, whose death in 1906 affected him greatly; the op.7 pieces for violin and piano and the op.8 Rilke songs followed in 1910. In 1911 he wrote four of the Sechs Bagatellen for string quartet op.9 and two of the orchestral pieces of op.10. These 23 pieces, comprising his published work of 1909–11, continue on the course set by the two groups of George songs. They are increasingly minimalist in nearly every respect; they are fleeting glimpses, whispered suggestions, breaths – with George and Schoenberg – of 'the air of another planet'. Igor Stravinsky would later write of Webern's 'dazzling diamonds', Schoenberg of 'a novel in a single gesture, a joy in a breath'.

Schoenberg's brief description is in fact more perspicacious than it might at first appear. While comparison with a novel implies a compression of content, the image of 'a joy' supposes nothing of the kind. Each of these sets of tiny pieces strikes a balance between movements of two sorts: those in which the most extreme registral and dynamic differences have been condensed into a few frenzied gestures in as many bars, and those in which time and activity seem to be suspended for a few seconds. Pieces of the first sort are generally longer than those of the second and written in a quick tempo, with thick textures and impassioned activity, and extremes of register and dynamics (*ppp* to *fff*) in close proximity. Pieces of the second type are usually between eight and 14 bars long (several are over in eight or nine bars, one in only six), contain a minimum of notes (the fourth piece of op.10 consists of 28 notes, two of these expressed as a trill), and may also cover a wide registral canvas, but are confined in dynamic activity to *ppp* and *pp* (in the case of op.7 no.3 never rising above *ppp*). Multifarious instrumental effects – harmonics, pizzicato, spiccato, non-vibrato, *col legno*, *am Griffbrett* and *am Steg* in the string parts, fluttertongue in the flutes, the liberal use of mutes in all parts – abound in the pieces of both types, resulting in an eerie sound world in which timbre frequently predominates over pitch, and silence assumes a place on a par with both. A single example of the second type of piece (a joy, rather than a novel) will illustrate many of the features just discussed; the example is the fourth of the Bagatellen op.9 (ex.1).

The small number of notes in some of these pieces is probably their most striking feature when compared with the music of other composers of the time, and can be seen as a direct expression of the crisis that the Viennese triumvirate created for themselves in abandoning tonality. Webern said later of his experience when composing the bagatelles: 'I had the feeling that when all 12 notes had gone by the piece was finished . . . In my sketchbook I wrote out the chromatic scale and crossed off the individual notes.' While none of the atonal aphorisms attempt serial composition, the constant circulation of the 12 notes is a significant feature of all of them. Other characteristic traits are the preponderance of semitones and their permutations (7ths, 9ths and so on), a lack of rhythmic pulse and metric definition, single chords and short melodic figures isolated by silence on either side, continual changes of timbre, and the juxtaposition of extremes, timbrally and registrally. While long repeated-note figures and measured tremolos in which two notes alternate are surprisingly frequent, repetition of longer figures is abjured. This refusal covers imitation, sequence, variation and even motivic development. Short melodic figures may look like motifs, but they are not treated as such.

The appearance of the final work of this type was delayed by three years, during which Webern struggled with several projects, among them a stage play, *Tot*, and a cello sonata, in which he attempted to extend the new atonal idiom to longer forms. In summer 1914 he finally admitted defeat in this experiment and produced instead the *Drei kleine Stücke* op.11 for cello and piano, once again in the spare style of 1911. In the third of these pieces, entirely *ppp* and *pp*, the cello plays eight notes and the piano a three-note melody and three chords, all in or below the bass clef (fig.4). At a total of 32 bars, this opus represents the extreme of Webern's aphoristic style.

4. A NEW LYRICISM, 1915–26. Just as Webern had turned to song composition, one of his earliest and most familiar occupations, to launch his atonal career, so he took it up again at this second time of crisis, finding in composing around a text a temporary answer to the difficulty of creating extended atonal forms. During and after his struggle with the cello sonata he began to write songs once more: in 1913–15 he sketched several on texts from various sources, including some he had written

Ex.1 Bagatelle for string quartet, op.9 no.4

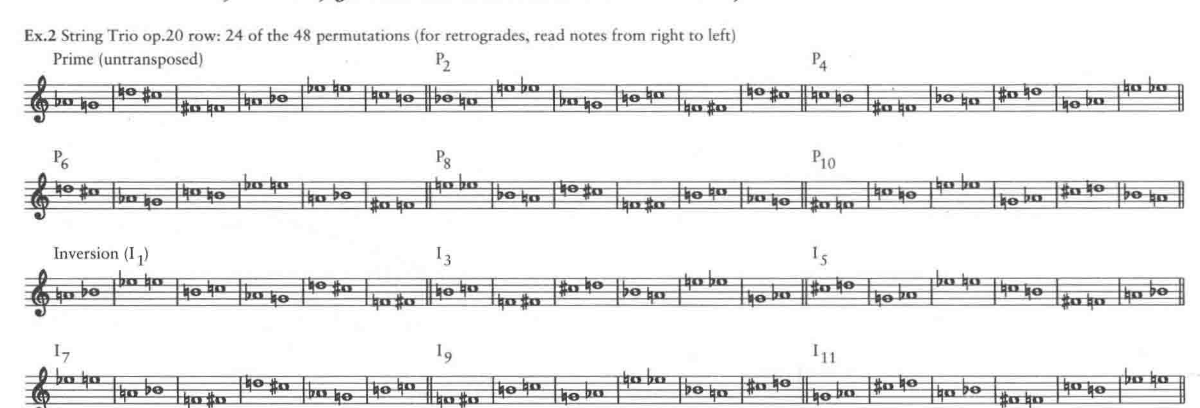
himself. At first these were in the aphoristic style of the op.8 songs, though because of the length of the text they were somewhat longer. But soon the style began to change: lines became longer and individual parts more continuous, and the result was a linear polyphony which was more prophetic than retrospective. During this 11-year period, all of Webern's finished works were inspired by lyric texts; this has prompted Anne Shreffler to write of Webern's 'lyric impulse'.

The songs written in 1913 and 1914, for voice and orchestra, were published only in 1968; the first songs from this period to be published by Webern are for voice and piano: the *Vier Lieder* op.12, written in 1915 and 1917. Their texts are from widely divergent sources – the first is a Rosegger text posing as a folksong, the others poems by Li Tai Po (from Hans Bethge's collection *Die chinesische Flöte*, from which Mahler had taken texts for *Das Lied von der Erde*), August Strindberg (from his *Spöksonaten*) and Goethe – and are, as might be expected, heterogeneous, ranging from the simple piety of the ersatz folksong to the sensuous pleasures of the poem from the Chinese. Webern follows the structure of the poetry: the piano supplies short preludes and postludes of two or three bars and interludes of a similar length between verses or lines of the poetry.

In the years 1917–22 Webern composed or sketched a large number of songs, including those of opp.13–15. All of these are for voice and some combination of instruments. The sources are again diverse in the op.13 set, which uses texts by Karl Kraus, two more poets from the Bethge collection, and Georg Trakl – a significant choice. Webern was much engaged by Trakl texts during these years, sketching fragments of several Trakl settings between 1915 and 1921, and his op.14, finished in 1921, was *Sechs Lieder nach Gedichten von Georg Trakl*. These songs, boasting a myriad of instrumental effects and

4. Autograph MS of Webern's 'Drei kleine Stücke', op.11 no.3, composed in 1914 (US-NYpm)

instructions for articulation, are wide-ranging registrally – the singer is required to negotiate a range of over two octaves routinely, and the instruments are treated in a similar way – and rarely rise above *pianissimo*. Rhythmic complexities and sometimes rapidly changing metres combine to produce an ametric effect. The texture is linear but very dense. Webern described the Trakl songs as 'pretty well the most difficult there are in this field', and it would be hard to disagree.



The next set of songs, *Fünf geistliche Lieder* op.15 (1921–2), used old German religious texts, at least one of which was taken from *Des Knaben Wunderhorn*. Webern's composition of these five songs, which are generally speaking in the same style as those of the previous set, holds special significance for his future work. In the first six pages of sketches for the fourth song, 'Mein Weg geht jetzt vorüber', he wrote out and used a 12-note row; this was the first occasion from which 12-note sketches survive. (The 12-note version was subsequently abandoned, and the method does not make another appearance until the songs of op.17.) In the fifth song Webern turns once again to canon, another of the preoccupations of his later life. The final song, 'Fahr hin, o Seel" (interestingly, the first of the set to have been written, in 1917), is a double canon in contrary motion. The songs that followed immediately, another set on old religious texts, this time from the Latin breviary, were all strict canons. These were finished in 1924.

Schoenberg's famous public annunciation of his new compositional technique occurred in February 1923; Webern got to know of it at the latest in summer 1922, and possibly much earlier. Schoenberg's reminiscences at the end of his life were contradictory on this matter: on one occasion he claimed to have carefully guarded his secret from Webern until 1923, while on another he said that he was experimenting with 12-note themes in 1914 and corresponded enthusiastically with Webern on this subject at that time. Schoenberg's first works to be based on 12-note rows, the piano pieces opp.23 and 25 and the Serenade op.24, were written in 1920–23, years in which Webern was occupied with the composition of the opp.14–16 songs. As early as 1911 Webern seems to have been thinking along the lines of 12-note fields (see his admittedly retrospective description, quoted above, of the way he proceeded when composing the first Bagatelle), and though a sketch of the sort he describes does not exist for op.9 no.1, a sketch dated April 1914 (of a setting of Stefan George's 'Kunfttag III' that was subsequently discarded) is very like this. It contains a list of the 12 notes in which nine have been crossed off, these being the pitches played by the instruments in the final chord while the voice fills in the remaining three. The next step occurred, as we have seen, in summer 1922.

The eight songs of opp.17–19, composed in 1924–6, represent a concentration on various aspects of the 12-note method of composing, none making use of all the possibilities it offers. The first two songs of op.17 proceed by means of chromatic fields; only in the second are the notes within all the fields ordered in the same way. The third song of this set contains the first linear presentation of a row in Webern's music, though the sketches show that he had experimented with linear rows before he began writing op.17. The first two songs of op.18 again proceed through a succession of rows which are shared by voice and accompaniment. In contrast, the style of op.18 no.3 is completely linear, each of the three participants setting forth a series of complete rows. This song also makes use of the row's inversion and retrograde for the first time. Row technique is more sophisticated in op.19, the first work in which the several movements (in this case only two) are based on the same row, and the first to use transposition, though only at the tritone.

5. 12-NOTE INSTRUMENTAL WORKS, 1927–40. In the String Trio op.20, completed in 1927, Webern was clearly master of the method of composition with 12 notes related only to each other. This work was a turning point in many ways. It represented a return to instrumental writing after 13 years in which the only works Webern felt to be worthy of opus numbers and publication were songs. Although the song had perhaps always been the medium in which he was most at ease, undoubtedly there was a crisis. (It is a mistake to view this long period of song production in a negative light, simply as the failure to produce instrumental music.) During this time Webern made arrangements of many earlier works, both his own and Schoenberg's, and sketched a number of movements for string quartet and trio, as well as two short piano pieces published posthumously, the *Kinderstück* (1924) and *Klavierstück* (1925), but as had been the case also with both Schoenberg and Berg, the abandonment of tonality had resulted in an inability to sustain extended forms without the aid of a text. 12-note technique provided a solution to this difficulty, and with the complete adoption of it Webern was able for the first time to write in the forms that had moulded German music for the previous two centuries, albeit considerably tailored to suit the conditions of the new method. Whereas for the slightly older Schoenberg this step represented a return to the old forms, for Webern it was a beginning: the traditional instrumental forms, while alluded to occasionally

Ex.2 String Trio op.20 row: 24 of the 48 permutations (for retrogrades, read notes from right to left)

in his early music, were not followed rigorously in any of the atonal music. After his adoption of 12-note technique, although brevity would remain a cardinal feature of his works, he was to produce no more through-composed aphorisms of only a few bars. All the instrumental movements from op.20 onwards make reference to the old forms: binary and ternary forms, sonata, rondo, variations and on occasion – in the Variations op.27 for piano, the first movement of the String Quartet op.28 and the Variations op.30 for orchestra – a combination of two or more of these.

With this new-found formal stability Webern turned to writing for instruments with considerable vigour, producing three major works in four years (opp.20–22, 1927–30). The fourth big instrumental work, the Concerto op.24 for nine instruments, should have followed immediately – the first sketches run on directly from those for the op.22 Quartet with saxophone – but Webern suffered an impasse with the first movement, and its composition was to occupy him on and off for three years. As before in times of compositional crisis, he turned to song writing, composing the three songs of op.23 and the first of op.25 during intervals in his work on op.24.

Shortly after the completion of the Concerto – the second and third movements were composed in record time – Webern turned again to the poetry of Hildegard Jone (the opp.23 and 25 songs had been on Jone texts) and spent most of the following year writing his first cantata (though not so called), *Das Augenlicht*. Between October 1935 and August 1937 he composed two more large instrumental works, the Piano Variations and the String Quartet, and in 1940, after composing another cantata on Jone texts – the genre acknowledged in the title this time – he wrote what was to be his last instrumental work, the Variations for orchestra, in the space of eight months. These seven instrumental works, all substantial, each for a different combination of instruments and each incorporating either a sonata or a variations movement and in some cases both, comprise the entire body of Webern's mature 'abstract' (i.e. untexted) composition.

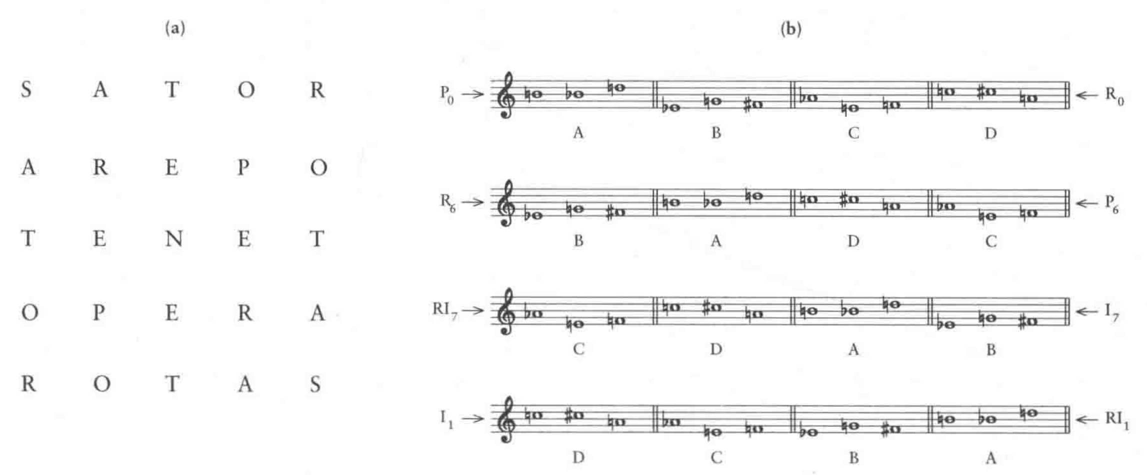
Although the length and formal scope of Webern's works changed significantly with his adoption of 12-note technique, most aspects of composition that had interested him from the time of the early aphoristic pieces continued to occupy him; thus many features of his style remained much the same. Two traits of his early music that might be singled out as particularly characteristic also of his later style are his special fondness for the interval of a semitone, together with its inversion and the various octave expansions of both, and his pointillistic scoring, with its resultant kaleidoscopic textures. When writing with a 12-note row, a preponderance of semitones could be assured by building them into the row. Thus this interval predominates in many of Webern's rows. The most rigorously organized example is the row for the Trio op.20, which consists of six semitones separated by larger intervals: the 48 row forms divide into two groups, in each of which all rows contain the same six semitones. One of these groups is shown in ex.2.

Scattered scoring is a feature of all Webern's 12-note works, the occasional section in which a long line is played by a single instrument (the theme, and variations 1, 2 and 6 of the second movement of the Symphony, for example) being the exception. Typically lines are divided among several dissimilar instruments and widely divergent registers, making continuity difficult to apprehend. Thus music which is already problematic for the hearer because of its dissonant intervals and its conciseness (material is not repeated or 'played out' in any way) is made even more formidable by its angularity and constant shifts of colour. Webern provided a good introduction to this eccentric type of orchestration (though this was not his purpose) in the arrangement he made in 1934–5 of the six-part ricercare from Bach's *Musikalisches Opfer*. Here, because the music itself is tonal and conjunct, and, indeed, familiar, the linear connections are easier to grasp. In one sense the most extreme example of Webern's pointillism is the second movement of the Piano Variations, where the impossibility of timbral variety is compensated for by a rigorous maintenance of registral disjunction.

Two predispositions that consistently shape Webern's 12-note writing are his propensity for canon and his fascination with symmetry. These preoccupations are interrelated, as we can see from the Symphony op.21, where they converge. This work is a brilliant tour de force of simultaneous vertical and horizontal symmetries (mirrors and palindromes) unfolding through a series of double canons. In fact, imitation in Webern is seldom direct: it is usually in inversion, sometimes in retrograde, and both of these situations result in symmetry.

The fascination that symmetry had held for Webern since at least as early as the op.5 pieces for string quartet acquired new scope with his adoption of the 12-note method of composition: now symmetry, like the semitone, could be built into the row itself if desired, as, indeed, it was in the row for the Symphony (ex.3*a*). This deceptively simple-looking row is symmetrical at two levels. Besides

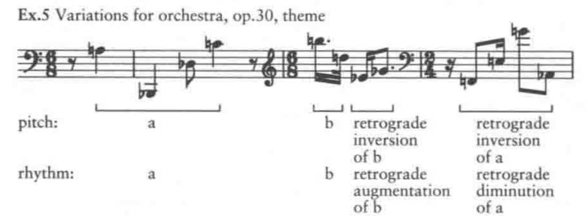
Ex.3 Symphony op.21 row



the obvious palindrome (the second hexachord being the retrograde of the first at the tritone transposition, and thus any two rows related as R_6 and P_0 being identical), there is a second and more subtle symmetry between any pair of rows related as I_9 to P_0. This can be seen in ex.3*b*. The two movements of the Symphony, in ternary sonata and variation form respectively, exploit these two symmetrical relationships, the first making use of the I_9–P_0 relationship in the outer sections and the palindrome produced by P_0–P_6 (i.e. P_0–R_0) in the central development, while the second movement offers the complement to this arrangement. The row structure of the second (variation) movement reflects the horizontal symmetry of the row itself: here not only is each of the nine sections (theme, seven variations and coda) palindromic, but the row structure of the whole movement is a palindrome, turning on the fourth variation as its axis. Characteristically, this structure is successfully obscured by the meticulous adherence to all the outward features of theme and variations: successive 11-bar sections are scored for different groups of instruments, each section heralding a change of tempo, texture and style, and these features are not symmetrically arranged.

The hiatus Webern suffered in his composition of op.24 resulted from his continued aspiration after symmetrical perfection. His row for this work was inspired by a Latin proverb (ex.4*a*) which can be read in four directions. The row he finally decided upon approximated the symmetry of this proverb to a very high degree. The second, third and fourth trichords represent the three permutations of the first (in the order P, RI, R, I), with the result that groups of four row forms related as P_0, R_6, RI_7 and I_1 are made up of identical trichords, and if listed in the same way as the words of the proverb they produce a similar result (ex.4*b*). As demonstrated here, several of the forms offered by such a row contain the same trichords in a different order or with their internal content reversed. This characteristic is exploited in op.24, where, for example, structural returns use different rows to produce the same figures on the same pitches but in a different order. The question with which Webern struggled for three years was whether to preserve the internal integrity of the row by allowing all the trichords of all rows to replicate the contour established by the first. In the end he adopted a compromise. In his exploration of symmetrical possibilities op.24 represents an extreme in its concern with microcosmic details.

The other work in which symmetry is an obvious feature is the Piano Variations op.27. In this case the symmetry is not built into the row; any row can produce palindromes and mirrors when combined with its retrograde and its inversion, and this is what happens in the first and second movements respectively.

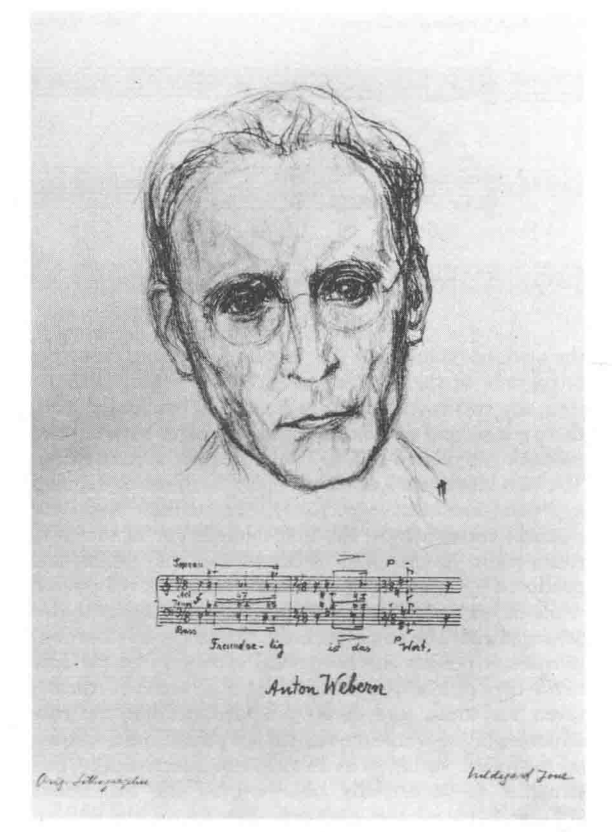


The kind of symmetry that Webern seemed to favour in his last years is the much less obvious but perhaps more comprehensive one that combines inversion and retrograde in one operation: the rows of his opp.28–30 are all identical with their own retrograde inverted forms. This is not a relationship that can be heard, but Webern presumably saw it as a strongly unifying device. The fact that it is not audible he would have found attractive, as one of the idiosyncratic features of his writing is the careful masking – as in the case of the variations movement of the Symphony noted above – of painstakingly constructed symmetries, as if in the end they were a matter of interest to the composer alone.

Ex.4 The SATOR palindrome and eight permutations of the op.24 row

In fact this inclination to conceal is one of Webern's principal traits, and is largely responsible for the listener's difficulty in coming to terms with his 12-note music. The form of these works is clearly delineated by the row structure – reprises use the same rows and the same transpositions as the original – but the musical manifestation of these is so varied as to make aural recognition unlikely. Webern does not work with themes and barely with motifs, except in the rhythmic sense. With the exception of op.30, even his variation movements do not have themes (in spite of the misleading 'Thema' written over the first section of the op.21 variations). These are nevertheless almost certainly the easiest of his structures to identify aurally because of the careful manipulation of secondary features; his penchant for veiling the truth in these instances serves to hide the absence rather than the presence of the traditional content.

The Variations op.30 for orchestra is perhaps the most rigorously motivic of all Webern's 12-note works. Here the entire fabric is woven from a multitude of versions of two rhythmic motifs presented in the opening bars. The motifs are derived from – or reflect – the row (ex.5). This



Ex.5 Variations for orchestra, op.30, theme

movement illustrates a problem endemic in 12-note music: the discrepancy between variation as a technique and variation form. Music composed on a row inevitably proceeds through a process of continual variation, and this is true whatever form the movement is cast in. In spite of Webern's description of the first 20 bars of op.30 as the 'theme', the material that is varied throughout the movement unfolds in the first four bars, and the remainder of the 'theme' is already concerned with the variation of this material.

6. 12-NOTE WORKS WITH VOICE, 1933–43. Webern's 12-note vocal works stand as a monument to his friendship with the poet Hildegard Jone. Jone's poetry is strange and mystical, an introverted latter-day version of the lyrical nature poetry that so enchanted Webern as a youth. It is filled with sounds, with lightness and darkness, spring and images from nature, all translated into human emotions and visions of God. Webern felt a great spiritual kinship with Jone, and from the time of their meeting in 1926 he set texts by no-one else.

His first Jone settings were the two groups of songs, opp.23 and 25, whose composition was so closely entwined with that of the Concerto op.24. Not only stylistically, but structurally as well, these songs are similar to the songs of opp.12–13, and thus rather different from the instrumental works surrounding them. This almost certainly represents a response to the texts, which provide occasions for word-painting but suggest nebulous rather than rigorous forms. Canon and symmetry are not concerns in opp.23 and 25, and, although the orchestral and much of the choral music of *Das Augenlicht* op.26 is canonic, imitation is freer there than in the purely instrumental music. In the voice parts of this work canons alternate with sections in chorale style.

5. Anton Webern: lithograph by Hildegard Jone; below is the opening of 'Freundselig ist das Wort' from Webern's Cantata no.2, op.31, composed 1941–3

The two cantatas may be seen as the synthesis Webern no doubt intended them to be: they combine the rigorous use of canonic techniques and symmetry that is fundamental to his 12-note instrumental works with the word-painting that characterizes his song-writing. Of the nine movements they comprise, only one, the first movement of op.31, is not canonic; however, in both works canon is frequently disguised in such sophisticated ways as to be imperceptible. Thus, for example, in 'Leichteste Bürden der Bäume', the fourth movement of op.31, as in the middle section of the following movement, 'Freundselig ist das Wort', groups of notes in the imitating voices are gathered together into chords which, without transgressing the series of durations dictated by the *dux*, do not replicate it. The resulting music in both cases is an aria with sporadic chordal accompaniment which, without Webern's insistence on its canonic roots, no-one would recognize as having anything to do with imitation. The second movement of op.31 has more the appearance of canon, but it is rather thinner-textured than one would expect a good deal of the time, as a result of Webern's practice of omitting pitches dictated by the row from one voice if they are being sung in another. The 'Ausfall', or absent note, was an idea which was fully developed only in the Quartet op.28 and works following it. All the notes are present in the earliest sketches for opp.28–31; in subsequent sketches those Webern felt to be redundant have been encircled and then omitted. In 'Kleiner Flügel, Ahornsamen', the second movement of op.29, Webern sketched all the parts as a canon in four voices, then

introduced a large number of slight rhythmic variations in only one or two voices at a time, the result being a fluid imitation in which voices constantly group and re-group in different combinations. 'Gelockert aus dem Schosse', the sixth movement of the second cantata, is obviously a canon: here imitation, though making use of both inversion and retrograde, is strict, and an archaic notation is used to emphasize the fact.

The texts of about half the movements of the second cantata are overtly religious. In a letter to Jone written shortly after completing it, Webern outlined ways in which he perceived his work to fulfil the requirements of a *missa brevis*. This perception doubtless influenced his decision concerning the final order of movements. There is no reason to suppose that this interpretation had occurred to him during the composition itself.

7. STYLE. Webern's style changed three times: in 1908, when he abandoned tonality altogether and began to write the very brief, pointillistically disposed pieces of opp.3–11; in 1914, when he took up songwriting again and began to connect the scattered parts of his ensembles to form continuities; and in 1926, when he became secure in the 12-note technique and for the first time began to compose successfully in extended instrumental forms. His style emphatically did not change with his adoption of 12-note technique, though it did change as the result of the stability the technique offered him. Certain features of his style, however, were very little affected by any of these changes. The semitone always figures significantly in his music, usually taking the form of 7ths and 9ths and more expanded forms, and his lines tend to be angular and disjunct. Extremes of register are used in close proximity. Silence and near-silence prevail, in the form of rests and very low dynamic levels; louder passages, when they occur, are usually sudden and of very short duration. The juxtaposition of extremes remains a characteristic of Webern's music. Rhythm and metre are never prominent, the one tending to be complex and the other often almost completely obscured.

Ironically Webern, the composer who was seen by many as the originator of the hyperintellectualized serialism of the decades immediately following his death and whose own music most people found thoroughly bewildering upon first hearing, was by nature an ardent romantic who always held feeling and passion – and comprehensibility – to be important above all else in art. Nature, and the Alps in particular, were almost an obsession with him, and his love of the peace and solitude to be found in the mountains, as well as his fascination with the flowers of the alpine meadows, were an influence on his work in many ways, some of which will probably never be understood. Work on many of his seemingly most abstract works was preceded by sketches or outlines in which the various movements, sections and themes were likened to specific alpine places and flowers, to climatic situations ('coolness of early spring' etc.) and to members of his immediate family. A more tangible manifestation of this fascination with alpine flowers is his interest in Goethe's theories of colour and of the *Urpflanze*, the latter being of course another expression of the idea of unity, which to him – as to Schoenberg – was paramount.

A student of Schoenberg early in life and a devoted disciple lifelong, Webern wrote music that is nevertheless quite different from that of his master. Ideas that Schoenberg guarded jealously as his own assumed a greater intensity with Webern: the 12-note row was used both more ingeniously and more rigorously by Webern; *Klangfarbenmelodie* took the form of a shotgun-like dispersal of orchestral elements, embracing both timbre and register; continuous variation proceeded from the smallest units and encompassed all musical parameters. The idea of a musical unity that was to be achieved through the synthesis of the horizontal and the vertical, an idea so often given voice by Schoenberg, was carried out relentlessly by his one-time pupil, whose distillation of material to its very essence resulted in minute masterpieces of such concentration and brevity that they were generally perceived as entirely enigmatic. Theodor Adorno, in contrasting the two composers, wrote of 'the assault that Schoenberg's constructivism launched against the walled doors of musical objectivism' as being, in Webern, 'just a vibration which comes to us from extreme distances'. And, elsewhere: 'In Webern the musical subject grows silent and abdicates'.

WORKS

this list includes all published works, printed in Vienna unless otherwise stated, and a selective list of unpublished works; Moldenhauer (1978) and Meyer (1994) list other unpublished scores, as well as numerous sketches

ORCHESTRAL

op.	
—	Im Sommerwind, idyll after B. Wille, 1904 (New York, 1966)
—	Three studies on a bass ostinato, 1907, unpubd [studies for op.1]
1	Passacaglia, 1908 (1922); arr. 2 pf 6 hands, 1918, lost
6	Sechs Stücke, 1909 (1913), rev. 1928; arr. fl, ob, cl, str qt, perc, hmn, pf, 1920, unpubd
10	Fünf Stücke, chbr orch, 1911–13 (1923); arr. pf qt, hmn, 1919, unpubd
—	Eight fragments, 1911–13, unpubd
—	Orchestral Pieces, 1913 (New York, 1971) [related to op.10]
21	Symphony, 1927–8 (1929)
30	Variations, 1940 (1956)

CHORAL

2	Entflieht auf leichten Kähnen (S. George), SATB, 1908 (1921); rev. pf qt, hmn, 1914, unpubd
19	Zwei Lieder (J.W. von Goethe), SATB, cl, b cl, cel, gui, vn, 1925–6, vs (1928): Weiss wie Lilien, Ziehn die Schafe
26	Das Augenlicht (H. Jone), SATB, orch, 1935 (1956)
29	Cantata no.1 (Jone), S, SATB, orch, 1938–9 (1954), vs, 1944 (1954): Zündender Lichtblitz, Kleiner Flügel, Tönen die seligen Saiten Apolls
31	Cantata no.2 (Jone), S, B, SATB, orch, 1941–3 (1956), vs, 1944 (1951): Schweigt auch die Welt, Sehr tiefverhalten, Schöpfen aus Brunnen, Leichteste Bürden, Freundselig ist das Wort, Gelockert aus dem Schosse

SOLO VOCAL

KATHRYN BAILEY

Webster, Ben(jamin Francis) (*b* Kansas City, MO, 27 March 1909; *d* Amsterdam, 20 Sept 1973). American jazz tenor saxophonist. He studied at Wilberforce University and worked as a professional jazz pianist before turning to the saxophone around 1930. Despite this relatively late start he was a leading figure on the instrument, playing in such important Southwestern bands as those of Bennie Moten (1931–3) and Andy Kirk (intermittently during the early 1930s). In 1934 he moved to New York, where he was retained for Fletcher Henderson's band. After playing in many swing groups, including Duke Ellington's orchestra (for two brief periods in 1935–6), Webster was offered a permanent engagement in 1940 with Ellington's band, which until that time had lacked an important soloist on the tenor saxophone. Under Ellington's influence Webster's style matured remarkably: his striking, slightly unfocussed tone, great rhythmic momentum and distinctive rasping timbre at moments of tension played a key role in many of Ellington's masterpieces of the period (among them *Cotton Tail*, 1940, Vic., and *Main Stem*, 1942, Vic.), and he soon became established, with Chu Berry and Herschel Evans, as a leading exponent of the style fashioned by Coleman Hawkins.

After leaving Ellington in 1943 Webster worked mainly freelance and with his own groups, excelling in warm renditions of popular ballads, a notable example being his recording with Sid Catlett of *Memories of You* (1944, Com.). He worked with Ellington again in 1948–9, toured with Jazz at the Philharmonic in the 1950s, and made numerous recordings as a studio musician, particularly as an accompanist to such singers as Billie Holiday, Ella Fitzgerald and Carmen McRae. In 1964 he went to the Netherlands and from 1967 was based in Copenhagen; he played frequently on the Continent in clubs and at festivals with local and expatriate American musicians.

J. BRADFORD ROBINSON

Webster, James (*b* Evanston, IL, 13 Sept 1942). American musicologist. He studied at Harvard (BA 1963), Vienna and Princeton, and took the MFA (1965) and PhD (1974) at Princeton having studied with Strunk, Mendel, Sessions, Cone and Lockwood. After working as assistant (from 1971) and associate professor (from 1977) at Cornell, he was appointed department chair (1980), professor (1982) and Goldwin Smith Professor of Music (1996); he has also been associate visiting professor at Columbia, Brandeis and Freiburg. He has been board member of the Joseph Haydn-Institut, Cologne (from 1979), co-editor (1992–5) and editorial board member (from 1996) of the journal *Beethoven Forum*, and president of the AMS (1997–8).

Webster is a specialist on the music of the Classical era and has written on many aspects of Haydn's works. He uses detailed and searching methods of formal analysis to offer fresh insights into the background and structure of the music he investigates (notably Haydn's 'Farewell' Symphony and Mozart's arias). He has also published writings on Beethoven's chamber music, Schubert, *opera buffa* and Brahms. In addition to formal analysis, Webster's studies include discussions on the theory of tonal music, editorial practices and musical aesthetics.

PAULA MORGAN

Webster, J(oseph) P(hilbrick) (*b* Manchester, NH, 18 Feb 1819; *d* Elkhorn, WI, 18 Jan 1875). American composer and performer of popular music. He graduated from the Pembroke Academy, New Hampshire, in 1840, and studied music with Lowell Mason in Boston (1840–43). For a year he toured New York and New Jersey giving concerts of popular songs. In 1844 he moved to Connecticut where he managed a singing troupe, the Euphonians, and composed many of their most successful songs. His first published song was *There's a change in the things I love* (Boston, 1844). In 1851 he settled in Madison, Indiana, where he was successful as a piano salesman, teacher, impresario and composer. His opposition to local slavery practices forced him to move to Chicago (1855–6), then to Racine, Wisconsin (1856–7), and Elkhorn (from 1859).

Webster published more than 400 songs, including sentimental ballads, patriotic songs and hymn tunes. His music, simple and restricted in style, is representative of mid-19th-century American popular song. The pieces are strophic. Their harmonies are mostly I–IV–V–I progressions; major keys predominate and modulations are rare. The lyrics are often effusively sentimental and morbid. Webster's most popular works were the ballad *Lorena* (1857) and the hymn *The sweet by and by* (1868). He wrote two cantatas, *The Great Rebellion* (1866) and *The Beatitudes* (1873), and some of his songs appeared in collections entitled *Patriotic Glee Book* (Chicago, 1863) and *Signet Ring* (Chicago, 1868).

AARON APPELSTEIN

Webster, Maurice [Morris] (*b* ?Kassel, *c*1600; *d* ?London, aut. 1635). English lutenist, viol player and composer. He was the son of George Webster, a lutenist in a company of English actors and musicians that toured Germany

around 1600. His unusual first name might indicate that he was born in Kassel, being named after the Landgrave Moritz of Hessen-Kassel. He is first recorded at the court of Count Ernst III of Schaumburg-Lippe at Bückeburg, where Thomas Simpson was also employed; Webster contributed four pieces to Simpson's *Taffel-Consort* (1621). The count died in 1622 and soon after Webster travelled to England, probably for the first time, where he was appointed as a royal lutenist by letters-patent dated 9 June 1623, backdated to Lady Day. He received allowances for buying strings for viols as well as for lutes, so he probably played bowed as well as plucked instruments. Three books of divisions, presumably for bass viol, are included among the several 'bookes, and papers that were M[r] websters' listed in an inventory of the possessions of William Cavendish, Duke of Newcastle, who employed Webster. At court Webster was succeeded by the viol player Theodore Steffkin by letters-patent dated 7 April 1636, backdated to Michaelmas 1635, so he probably died around that time.

No lute music by Webster is known to survive, and only two sets of divisions for bass viol are extant. The pieces he contributed to Simpson's *Taffel-Consort*, which include a 'mascarada' in the style of a Jacobean court masque dance, use the novel 'string quartet' scoring apparently developed at Bückeburg by Simpson and others. They are probably intended for violins and are in the Anglo-German idiom established by Brade and Simpson. The ten consort pieces attributed to Webster in English sources are in a similar style, which suggests he had a hand in introducing the idiom to composers at the English court, among them Charles Coleman and William Lawes. They include alman-like pieces entitled 'echo' and a galliard which is a version of a lute piece by Charles Bocquet.

Weck [Hüssler], **Johann** (*b* Freiburg, *c*1495; *d* Strasbourg, Aug 1536). German organist and composer. From 1510 he studied at Freiburg University and two years later he was appointed organist at the cathedral there. In 1512 he spent a short time in Basle where he took lessons with the organist, possibly Johannes Kotter. In March 1513 he returned to Freiburg. There he was drawn into the lively circle round the Swiss humanist Bonifacius Amerbach, whom he had probably met during his stay in Basle. Weck gave organ lessons to Amerbach and continued the latter's tablature book (*CH-Bu* F.IX.22, ed. in SMd, vi, 1967). The manuscript contains some dances by Weck.

HANS JOACHIM MARX

Wecker, Georg Caspar (*b* Nuremberg, bap. 2 April 1632; *d* Nuremberg, 20 April 1695). German organist, composer and teacher. After lessons with his father, Johann, a 'gold spinner', he developed so successfully under Kindermann that 'at the age of 16 he was allowed to play the clavier in the churches' (Doppelmayr). He was employed throughout his career as an organist in Nuremberg: from the age of 19 at St Walpurg, from three years later (1654) at the Frauenkirche, from 1658 to 1686 at Egidienkirche and from 1686 until his death at the parish church, St Sebaldus, where his successor was Johann Pachelbel.

Wecker and the somewhat older Heinrich Schwemmer are important in the 17th-century teacher–pupil tradition of the Nuremberg school, stemming from Johann Staden through his pupil Kindermann to Schwemmer and Wecker and on to their pupils of the fourth generation, Nikolaus Deinl, J.B. Schütz, Maximilian Zeidler, Johann Krieger and Pachelbel. From Schwemmer they learnt singing and the rudiments of music, after which Wecker taught them keyboard instruments and composition. Other pupils of Wecker were Johann Löhner, the printer W.M. Endter, C.F. Witt and Nicolaus Vetter. Wecker clearly earned a measure of fame as an organist, for Printz (1696 edn, 225) wrote that he travelled from Vienna to Nuremberg, 'where I heard the distinguished organist Georg Caspar Wecker'.

Of Wecker's few extant works, the most important are the five cantatas – the three manuscript ones and the two that survive from the print of 1695. The only other works are a keyboard fugue and one secular and 37 sacred strophic songs. Although Endter wrote in 1719 that Wecker 'was always thinking about the improvement of music' (Mattheson, 392), the extant works contain no innovations. Like most Nuremberg composers, he made little and unimaginative use of musical-rhetorical figures, was a master of concertato technique, showed a gift for writing solo songs and used neither recitative nor unprepared dissonance.

HAROLD E. SAMUEL

Wecker, Hans [Johannes] **Jacob** (*b* Basle, 1528; *d* Colmar, 1586). Swiss lutenist, intabulator, physician and university teacher. He matriculated at Basle University in 1543 and at Wittenberg University in May 1544, returning to Basle University in 1546. Here he befriended Christoph Piperinus, teacher of Basilius Amerbach, and the lutenists Johannes von Schallen and Thiebold Schoenauer, teachers of Felix Platter. In about 1550 Wecker travelled to Italy, presumably to complete his medical studies, and may have found his way into the intellectual circle surrounding the physician and theorist Girolamo Cardano. In 1552, at the behest of his friends, Wecker published a collection of lute duets that he had 'recently brought back from Italy', in the *Lautenbuch vonn mancherley schönen und lieblichen Stucken* (Basle, 1552). Platter reported playing from this book while studying medicine in Montpellier and also performed in Strasbourg in 1556 with a 'good lutenist' named 'Wolf'. In that year, 20 of Wecker's duets had been published by Wolff Heckel under a nearly identical title (*Lautten Buch von mancherley schönen und lieblichen Stucken*, Strasbourg, 1556). In 1557 Wecker married and also became professor of dialectics at Basle University; in 1560 he was professor of Latin, and later on became a professor of medicine and dean of the medical faculty. He left Basle in 1566 for the position of city doctor in Colmar, remaining there until his death 20 years later.

A follower of Ramist philosophy, Wecker was a prolific writer whose output ranged from academic works on oratory and medicine to German artisan books (*Kunstbüchlein*). His enduring fame, however, lies in his Latin translation and expansion of a popular 'book of secrets' by 'Alessio Piemontese', otherwise known as Girolamo Ruscelli (*Secreti*, Venice, 1555). His initial Latin publication of 'six books' in 1559, which he also made available in German as the *Kunstbüch ... von ... bewerten Secreten* (Basle, 1570), became the encyclopedic volume known as *De secretis libri XVII* (Basle, 1582). Translated into French and English (*Eighteen Books of the Secrets of Art & Nature*, London, 1660), it was repeatedly published over the next two centuries and was a staple item in libraries throughout Europe. A short section on the 'secrets of music', treated with the other liberal arts, describes physical and legendary aspects of strings, tuning, sympathetic vibration, wind and Flemish bells, apparently using Cardano as its authority.

Wecker's 34 duets (the tenor book was rediscovered in 1989 but the discant book is lost) are partially preserved in Heckel's publication, and include intabulations of vocal works as well as German, French and Italian dances arranged by key into small 'suites'. While both lute parts in the dances are chordal, the discant part is varied with ornamentation; in the intabulations, rearrangement of the voices sometimes results in unusual doublings, inverted harmony and obscured voice-leading. Unlike the unison tunings found in earlier lute duets (including a dance pair in Wyssenbach's print of Italian works, Zürich, 1550), Wecker's tunings between tenor and discant lutes are a major 2nd and a 4th apart (nos.1–14 and 15–34 respectively; Phalèse also published lute duets in 1552 for instruments tuned a 4th and 5th apart). The sonorities could be described as interesting or jarring, and probably bear witness to the experiments of a lively scientific mind.

WORKS

Lautenbuch vonn mancherley schönen und lieblichen Stucken mit zweyen lauten zusamen zu schlagen, Italienische lieder, Pass'emezi, Saltarelli, Paduane: weiter Frantzösische, Teütsche, mit sampt mancherley däntzen (Basle, 1552); lost; tenor book in *PL-Kj* (formerly in *D-Bsb*), discant book lost; 20 works preserved among the first 40 pieces of W. Heckel: *Lautten Buch* (Strasbourg, 1556, 2/1562)

SARAH DAVIES

Weckerlin, Jean-Baptiste (Théodore) (*b* Guebwiller, 9 Nov 1821; *d* Trottberg, nr Guebwiller, 20 May 1910). French folklorist, bibliographer and composer. Destined by his father for a career in industry he studied chemistry, but in 1843 ran away to Paris to study music. He was accepted at the Conservatoire shortly thereafter despite his lack of musical training and studied composition (with Halévy), harmony and singing. After leaving the Conservatoire he earned his living by teaching music, and from 1850 to 1855 he was the choir conductor of the Société Ste Cécile, founded and directed by F.-J.-B. Seghers; there Weckerlin gained familiarity with major choral works and was able to have his own compositions performed. Several operas and orchestral works also helped to make his name in the 1850s. In 1863 he became librarian and archivist of the Société des Compositeurs de Musique. He was appointed clerk to the librarian of the Conservatoire in 1869 and was named main librarian in 1876, succeeding Félicien David. During his 33-year tenure there, he doubled the library's holdings with carefully selected new books, started collections of autograph scores and letters, and edited a selective catalogue. From his own extensive library, which was sold in Leipzig in 1910, he had transferred to Charles Malherbe in 1908 a collection of French folksongs comprising manuscripts and rare editions of the 16th to 18th centuries; Malherbe, in turn, gave this collection to the Opéra library.

Weckerlin's compositions are little known; he wrote more than a dozen stage works (mostly *opéras comiques*),

only a few of which were presented on the Paris stage, though *L'organiste dans l'embarras* (1853) received over 100 performances. He also left grandiose works for chorus and orchestra, other choral compositions, symphonic and chamber music, numerous piano pieces and hundreds of songs; many of his compositions were never printed. His publications concerning popular and folk music, including his best-known book, *La chanson populaire*, retain their value. He made sensitive harmonizations and accompaniments to several volumes of folksongs and edited *L'ancienne chanson populaire en France: 16e et 17e siècles* and *Chansons populaires de l'Alsace*, collections of early folk music to which he contributed historical commentary. He also edited early French stage works, among them compositions by Cambert, Lully and Gluck. He contributed articles to *Revue et gazette musicale de Paris*, *Le ménestrel* and the *Bulletins de la Société des compositeurs de musique*, and to the supplement to Fétis's *Biographie universelle*.

ELISABETH LEBEAU/FIONA CLAMPIN

Weckl, Dave [David] **(Joseph)** (*b* St Louis, 8 Jan 1960). American jazz drummer. He began working in New York clubs in the early 1980s, displaying a funk-jazz style reminiscent of Steve Gadd and Billy Cobham, and also showing the jazz influences of Peter Erskine and Buddy Rich. In 1983 he played for the Simon and Garfunkel reunion tour and then did studio work in New York, demonstrating his abilities in a variety of genres. Notable early recordings were *Why not?* (King, 1985), with the Latin-jazz pianist Michel Camillo, and *Step It* (Evidence, 1984) with the fusion guitarist Bill Conners. In 1985 Weckl joined the Chick Corea Elektric Band, which showcased Weckl's emerging personal style that featured absolute metric precision of complex rhythmic subdivisions, even at the fastest tempos. Weckl also performed with the Chick Corea Akoustic Band, displaying a lighter and less technical side of his style. In the early 1990s he released three solo albums on the GRP label containing his own compositions, which featured heavily sequenced music and extremely complex drumming. After leaving Corea in 1992, he worked again with Camillo, and from 1995 to 1997 he played with the guitarist Mike Stern, recording the album *Between the Lines* (Atlantic, 1996). During the early 1990s Weckl and other drummers performed with the Buddy Rich Big Band at several concerts and on the album *Burnin' for Buddy* (Atlantic, 1994). In the mid-'90s Weckl's drumming evolved to a more relaxed, flowing style, evidenced by the 1997 album *Dave Grusin Presents 'West Side Story'* (NZK, 1997). In the following year Weckl released *Rhythm of the Souls* (Stretch, 1998) which featured a loose, New Orleans funk style with more groove and less technical display.

RICK MATTINGLY

Weckmann, Jacob (*b* Dresden, 1643; *d* ?Leipzig, 1680). German musician, son of MATTHIAS WECKMANN.

Weckmann [Weckman, Wegkmann, Weykmann], **Matthias** (*b* Niederdorla, nr Mühlhausen, ?1616; *d* Hamburg, 24 Feb 1674). German composer and organist. His surname appears in almost all autograph documents as Weckman. He probably ranks first among the many carefully trained pupils of Heinrich Schütz who went on to make important contributions to the musical life of Protestant Germany. His relatively few surviving compositions include several exceptionally fine sacred works and impressive sets of chorale variations.

1. Life. 2. Works. 3. The autographs.

1. LIFE. Weckmann was probably born in 1616 or even in 1615 (see Ortgies, 1991), but in any case before April 1619. He was the son of Jacobus Weckmann, an erudite clergyman and poet, and Maria Weckmann (née Cyriacus). Because of his musical inclination, evident at an early age, his father brought him (probably in 1627 or 1628) to Heinrich Schütz, director of the Dresden electoral court chapel, who took charge of supervising his musical education. Weckmann also received instruction from other members of the chapel, including Johann Klemm in organ and Caspar Kittel in singing; his rapid progress soon led to his appointment as discantist. When his voice changed, by 1632, he served as one of the court chapel organists. The following year Schütz took him to Hamburg to study at the elector's expense with the noted organist and Sweelinck pupil Jacob Praetorius (ii). Weckmann also spent time with Heinrich Scheidemann, enabling him, in Mattheson's words, 'to moderate Praetorius's severity with Scheidemann's gentleness'. He returned to the Dresden court in late 1636 or early 1637, but was then sent on a mission to Holstein and Denmark to pick up some musical materials belonging to Schütz. An appointment to the newly founded chapel of the elector's son Johann Georg followed in 1639. During the years 1642–6 he was 'on loan' to the Danish royal chapel

in Nykøbing, and between 1647 and 1648 he once again travelled to the north, visiting Hamburg and Lübeck, where, in 1648, he married Regina Beute, daughter of a town musician. Franz Tunder, organist at the Marienkirche, served as his best man. In 1649 Weckmann was promoted inspector of the electoral chapel.

Weckmann's last years in Dresden marked the beginning of two significant and long-lasting friendships with fellow composers. In 1649 the singer, composer and theorist Christoph Bernhard joined the chapel; he later followed Weckmann to Hamburg, where the two worked together for many more years. J.J. Froberger met Weckmann when visiting the Dresden court, probably in late 1649 or early 1650 (Rampe, 1991, p.328); they continued to exchange letters and Froberger sent Weckmann some of his music to illustrate his special style (see the discussion of the Hintze MS below).

Weckmann's life entered a new phase when, in 1655, he competed for the vacant organ positions at Hamburg's Jacobikirche and the associated Gertrudenkapelle. After a reportedly spectacular audition he received the appointment, and before long he occupied a central place in both the sacred and secular musical life of the city. In 1660 he founded a collegium musicum which, with the aid of Hamburg's élite, provided weekly concerts in the refectory of the cathedral. Some 50 people, including the town's leading musicians, participated, performing 'the best things from Venice, Rome, Vienna, Munich, Dresden etc.'. Beginning in 1663, a dark shadow was cast by an outbreak of the plague; among the victims were old Scheidemann and Thomas Selle, Kantor of Hamburg's churches. Weckmann proposed his old Dresden friend Christoph Bernhard as Selle's successor, and the appointment followed shortly after. In 1665 Weckmann's wife died; at some point during the next couple of years Weckmann visited his former patron in Dresden, and in 1669 he married Catharina Roland, with whom he had at least three children. Five years later Weckmann died and was buried, with the ringing of the 'best' bells, in the Jacobikirche under the organ that he had played for so many years. At the funeral service Bernhard directed a performance of Weckmann's *In te domine speravi*. The following year his widow married Hinrich Frese, Weckmann's successor at the Jacobikirche; she lived on until 1702.

The eight children born to Weckmann's first wife included Jacob Weckmann (*b* Dresden, 1643; *d* ?Leipzig, 1680). He studied at Wittenberg University and in 1672 was appointed organist at the Thomaskirche, Leipzig. Two works are attributed to him (in *D-Bsb* 30293): *Ein Tag in deinen Vorhöfen* and *Herr, warum trittst du von ferne* (see also *Wenn der Herr die Gefangnen zu Zion* in the list of works below).

2. Works. Interest in Weckmann during the early 20th century was motivated at first by the search for a tradition linking Schütz to J.S. Bach. Weckmann, as a major student and follower of Schütz who in turn may have taught or at least had a personal relationship with Buxtehude (as seems probable, although it is not documented), appeared likely to have played a part in this. As the music was made accessible in new editions (and recently also in recordings) and as a number of vexing questions of authorship and text were cleared up, it became evident that the composer was of considerable interest in his own right. Although the surviving works are few in number, they show him as a master of most genres, contributing to each in a uniquely personal manner. Among his compositions are several of impressive originality, richly textured in their sophisticated use of harmony and counterpoint, occasionally quirky but with an expressive intensity matched by few of his contemporaries.

Weckmann's works show a command of a wide range of styles, reflecting the breadth of his training and knowledge of music. From Schütz he learned the Italian tradition of polyphonic writing and expressive text-setting, the legacy of Gabrieli and Monteverdi, and from Praetorius the Sweelinck school of organ-playing and the mastery of intricate, motivically saturated counterpoint. This training was supplemented by his exposure to the works of younger Italian composers performed at the Dresden court and later by the collegium musicum in Hamburg, and by the study of such scores as those of French and German masters obtained from Froberger. Primary evidence of his knowledge of other composers is provided by his many autograph copies of their works (see below).

Some of Weckmann's finest music is contained in the 12 surviving sacred settings for voices and instruments (of another 19 only the titles and, in some cases, the scoring are known; see Ilgner, 1939, p.179 for a list). Unlike many composers of the post-Schütz generation, Weckmann did not incorporate traditional chorales or settings of contemporary poetry, but followed his teacher in choosing most of his texts from the scriptures (except for the Latin hymn settings, *Angelicus coeli* and *Rex virtutum*, both 1665). However, rather than treating the successive phrases in madrigalistic segments, he distributed them over extended sections or movements distinct in form, genre and instrumentation, including dense imitative choruses, some resembling instrumental fugues; declamatory settings for one or several voices in the older monodic style or approaching the newer Italian operatic recitative; triple-time arias, several on quasi-ostinato 'lament' basses (two such arias, both preceded by recitative, appear in *Wie liegt die Stadt*); and purely instrumental preludes and interludes (e.g. the *battaglia* in *Weine nicht*).

In character Weckmann's sacred settings range from the grand, such as *Es erhub sich ein Streit*, scored for three choirs (two vocal and one instrumental) and filled with the sounds of battle and triumph, to the intimate: the charming Annunciation dialogue *Gegrüsset seyst du*, with two flutes accompanying Mary and two violins accompanying the archangel. This last work, from the early 1660s, has interesting references to Monteverdi's *Orfeo* as well as to Schütz's *Christmas Oratorio* (Silbiger, 1991). However, among the most memorable of these works are the four preserved in a 1663 autograph, probably written in response to the plague: *Wie liegt die Stadt so wüste*; *Zion spricht*; *Weine nicht*; and *Herr, wenn ich nur dich habe*. It has been proposed that the first three constitute a cycle, moving from the depth of despair in the opening recitative of *Wie liegt* to the celebration of heavenly bliss in the extended 'Amen' chaconne that concludes *Weine nicht*.

Closely rivalling these works in consummate craftsmanship and in range of form and expression are the nine sets of chorale variations for organ. The individual verses present, and often amplify, almost every variation technique practised by Weckmann's predecessors, from

learned canonic cantus firmus settings (in *Es ist das Heil* and *O lux beata trinitas*) to extended echo fantasias (verse 2 of the first setting of *Gelobet seist du*). Their textures range from thick, six-voice imitative polyphony with double pedal (verse 7 of *Es ist das Heil*) to effusive soloistic figurations over sustained, sensuous backgrounds (verse 2 of *Magnificat secundi toni*). *Es ist das Heil* and *O lux beata trinitas* stand apart from the other sets for their monumental conceptions; each takes approximately half an hour to perform and the number of verses indicates that they could not have been intended for the usual liturgical *alternatim* practice. Davidsson (1991, p.14) suggests that they were played at Saturday Vespers, directly after the sermon.

Questions once raised regarding Weckmann's authorship of many of the free keyboard works have largely been resolved, although doubts linger about a few pieces (Silbiger 1985, 1988). Several toccatas are marked by arresting rhetorical gestures, abrupt stops and starts, capricious figurations, startling harmonies and stretched-out sequences, creating the effect, even more than usual with this genre, of spontaneous improvisation. The canzonas follow the old tradition of the variation canzona, although some of their lengthy subjects resemble those of later Baroque fugues. The dances, all in minor keys, are miniatures that present Weckmann at his most intimate and expressive; their fragmented textures recall Froberger, as does the pervasive mood of brooding melancholy. A lighter tone is set by the ensemble sonatas with their colourful instrumentations, witty motivic play and frequent shifts in character; like all Weckmann's works, they are full of surprises and inventive touches. Even the nine simple songs on occasional texts for weddings and other ceremonies frequently depart from the conventional.

3. THE AUTOGRAPHS. The large number of surviving autographs containing Weckmann's own compositions and works by other composers form a particularly interesting set of documents, not only because they transmit unique copies of many pieces in generally accurate texts and show the wide-ranging repertory in which the composer evidently took an interest, but also for the many annotations he added in the scores and the margins. The annotations to works by others comment (in one case rather scathingly) on the piece, point to contrapuntal irregularities, report changes to the original notation or note the publication from which the copy was made. In the annotations to his own works Weckmann drew attention to unusual dissonances (presumably to confirm that these were intended and not mistakes) and occasionally provided performance instructions, as in *Wie liegt die Stadt*, where he asks that the soprano and bass be positioned at some distance from each other, presumably to enhance the dialogue effect.

A list of confirmed and probable autographs is provided by Ortgies (Nov 1993). The copied repertory includes numerous large-scale choral settings by Italian and German composers including Schütz and Monteverdi (*D-Lr* KN206, completed *c*1647; inventory in Silbiger, 1985), secular cantata and opera excerpts by Carissimi and Cesti (KN145, after *c*1661; inventory in Lassell, 1991), organ works by Jacob Praetorius, Scheidemann, and Sweelinck (*D-CZu* Ze1, *c*1637–44; see Ortgies, 1995) and harpsichord pieces by Chambonnières, Froberger, Kerll and other Frenchmen and Germans (*US-NH* 21.H59, *c*1653; in *Matthias Weckmann: Sämtliche Freie Orgel- und Clavierwerke*, ed. S. Rampe, Kassel, 1991). This last collection, usually known as the Hintze manuscript, evidently includes material Weckmann received from Froberger. The important keyboard anthology Lynar A1 (*D-Bsb*) is no longer thought to be in Weckmann's hand, although some still believe he could be the composer of a piece therein, *Lucidor einss hütt der Schaf*, signed 'MW'. Whether he was responsible for the copy of Sweelinck's *Composition Regeln*, formerly attributed to him, remains unsettled (although it does appear to have been in his possession); the copy, regarded as lost since World War II, has been rediscovered, and preliminary examination has cast doubt on the attribution. Another question still to be investigated is whether he might be the author of a number of pieces copied in his hand without attribution, in particular some of the organ settings in the Zellerfeld Tablature Ze 1 (see Ortgies, 1995).

ALEXANDER SILBIGER

Weede [Wiedefeld], **Robert** (*b* Baltimore, 22 Feb 1903; *d* Walnut Creek, CA, 9 July 1972). American singer and actor. He began his stage career at the Radio City Music Hall in 1933 before making his Metropolitan Opera début as Tonio in *Pagliacci* in 1937. He continued to appear on operatic stages, particularly at the Metropolitan and the San Francisco Opera, for four decades. He created the role of the Emperor of Haiti, Jean Jacques Dessalines, in William Grant Still's *Troubled Island* (1949) for the City Center Opera Company (later New York City Opera). He also appeared in concert and recital, and was a soloist on the 'Great Moments in Music' radio programme from 1942 to 1946. It is as Tony, the lead role in Loesser's Broadway musical *The Most Happy Fella* (1956), that Weede is best remembered; he regarded the vocal technique that it required to be equal to that of any opera. He subsequently appeared on Broadway in *Milk and Honey* (1961) and *Cry for Us All* (1970).

One of the finest American baritones of the century, Weede had the ability and flexibility to adapt his voice successfully to both operatic and musical theatre roles without surrendering to the potential trappings of either style and the high standards which he established have been recognized as signposts for succeeding generations of American singers. With a large, well-trained voice, his diction, articulation and pitch were virtually unequalled. Even in his later years, his voice possessed a strength and quality which has earned him the respect of singers ever since.

WILLIAM A. EVERETT, LEE SNOOK

Weedon, Bert (*b* London, 10 May 1921). English electric guitarist. A former dance band musician and featured soloist with both Ted Heath and Mantovani, Weedon was the first Briton to incorporate into his style the innovations of American country and western, boogie-woogie and rock and roll guitarists. In 1943 he accompanied Stephane Grappelli. During the 1950s he played on recording sessions for almost all of the aspirant British rock singers and made a series of influential recordings between 1959 and 1961, including *Guitar Boogie Shuffle*, *Big Beat Boogie* and *Twelfth Street Rag*. Weedon's example was acknowledged by such younger guitarists as Hank Marvin (of the Shadows) and he influenced many amateur musicians with his best-selling books *Play in a Day Guide to Modern Guitar Playing* (London, 1987) and *Play Every Day, the Bert Weedon Way* (London, 1963) which were translated into several languages. Although his approach became outmoded by the blues-inflected innovations of Eric Clapton and Jimi Hendrix, Weedon continued to make albums of guitar pieces, such as *Rockin' at the Roundhouse* (1971) and *22 Golden Guitar Greats* (1976). He also made more than 5000 radio and television broadcasts during his career.

DAVE LAING

Weelkes, Thomas (*b* ?Elsted, Sussex, ? bap. 25 Oct 1576; *d* London, bur. 1 Dec 1623). English composer. He was one of the most gifted of the madrigalists, and a major composer of English church music.

1. Life. 2. Madrigals. 3. Church music. 4. Assessment.

1. Life. Strong circumstantial evidence suggests that Weelkes was the son of John Weeke, rector of Elsted. The earliest known fact concerning Weelkes is the publication of his first volume of madrigals in 1597, the preface of which reveals that he was a very young man at the time of their composition; this seems to confirm that he was born in the middle or later 1570s. By 1597 he had enjoyed the 'undeserved love, and liberall good will' of George Phillpot, who lived at Compton, near Winchester. He also passed some time in the service of the courtier Edward Darcye before being appointed, towards the end of 1598, organist of Winchester College at a salary of 13s. 4d. a

quarter, with board and lodging. He remained at the college for three or four years, and during this period composed his finest madrigals. These appeared in two volumes (1598, 1600), of which the second (works for five and six voices) is one of the most important volumes in the English madrigal tradition. He also contributed a splendid madrigal to the collection *The Triumphes of Oriana* (RISM 1601[16]). Weelkes freely admitted that he had no gifts other than his musical ones and it seems that he felt unsettled at Winchester. At some time between October 1601 and October 1602 he joined the choir of Chichester Cathedral as organist and *informator choristarum*, being also appointed to one of the lucrative lay-clerkships of Bishop Sherborne's foundation.

Weelkes's early years at Chichester were both prosperous and promising. Besides accommodation and other gratuities, he received £15 2s. 4d. per annum. On 13 July 1602 he was awarded the BMus degree from New College, Oxford, and on 20 February 1603 married Elizabeth Sandham, the daughter of a wealthy Chichester merchant, by whom he had at least three children. On the title-page of his fourth and last volume of madrigals (1608) he described himself as a Gentleman of the Chapel Royal, but his name does not appear in the records of the chapel itself, and he can have been at most a Gentleman Extraordinary. It is possible that by this time Weelkes's personal conduct was giving cause for concern. Though he does not at first seem to have been guilty of the more blatant acts of unruliness, indiscipline and neglect of duty for which certain of his colleagues were periodically reproved, he was charged in 1609 with unauthorized absence throughout the whole of the bishop's visitation. Shepherd (1980) has cautioned against assuming too readily that Weelkes's personal decline had begun as early as 1611, when the cathedral's chapter acts appear to indicate that he was not giving full satisfaction as a choirmaster. Nevertheless, in 1613 he was charged with being drunk in public, and by 1616 his drunkenness had become habitual and was a public scandal, for he was reported to the bishop as being 'noted and famed for a comon drunckard and notorious swearer & blasphemer'. The bishop refused to tolerate this behaviour any longer, and on 16 January 1617 Weelkes was dismissed from his post as organist and *informator choristarum*, though he still retained his Sherborne clerkship. Despite this punishment, there was still no improvement in his conduct, for in 1619 it was reported that he would

> dyvers tymes & very often come so disguised eyther from the Taverne or Ale house into the quire as is muche to be lamented, for in these humoures he will bothe curse & sweare most dreadfully, & so profane the service of God ... and though he hath bene often tymes admonished ... to refrayne theis humors and reforme hym selfe, yett he daylye continuse the same, & is rather worse than better therein.

In September 1622 Weelkes's wife died. By this time he was again employed as organist, though the records make it clear that his service to the cathedral was very erratic. It seems that he was spending a good deal of time in London, and it was at the house of a friend, Henry Drinkwater of St Bride's parish, that he made his will on 30 November 1623. This included a substantial legacy of 50s. to Drinkwater for meat, drink and lodging. The next day he was buried at St Bride's.

2. Madrigals. It is known that Weelkes's musical education began in 1586; thus his style was formed while English music was in transition. From the beginning he would have studied the older polyphonic technique, Flemish in origin, which was still used magnificently by Byrd, but he would also have become increasingly familiar with the Italian madrigal, and have witnessed the subsequent adoption of the form by Morley. Yet, despite the fact that Weelkes was obviously indebted to Morley, he did not in his first collection, *Madrigals to 3. 4. 5. & 6. Voyces* (1597), slip into the facile elegance which Morley commanded so easily. The three-voice madrigals are the most interesting works in the collection and reveal an inclination to organic counterpoint which contrasts sharply with Morley's more decorative network of voices. Weelkes often achieved a far greater sense of growth within each paragraph than Morley. He inserted triple-rhythm sections into some duple-time madrigals to clarify the structural divisions; more important still, he was already employing long-range repetitive procedures for musical integration. Besides using literal repetitions in unconventional places, he also employed varied repetitions, relationships between the main thematic points, and the progressive evolution either of thematic points or whole sections. The newness of this volume is displayed most obviously in *Cease sorrowes now*, whose radical pathos and chromaticism introduced a new expressive experience into English composition. The four-voice works come closer to canzonets, though an admirable work like *Three virgin nimphes* displays a contrapuntal strength owing as much to the native English tradition as to imported Italian manners. The canzonet structure emerges explicitly in the sometimes clumsy five-voice madrigals. Cohen has revealed that the texts and musical ideas of these were drawn from Salamone Rossi's *Primo libro delle canzonette a tre voci* (Venice, 1589). The more controlled and varied counterpoint in some of the six-voice works foreshadows the sonorous vigour of the best of Weelkes's later madrigals.

In his second volume, *Balletts and Madrigals to Five Voyces* (1598), Weelkes turned to the other closed madrigalian form that Morley had introduced into England. Weelkes lacked Morley's light touch and capacity for fleet counterpoint; instead he brought to the ballett a more studied brilliance, sharper contrasts, a higher thematic concentration and wider expressive range, shown at its best in *Harke all ye lovely saints above*, one of the most attractive pieces in the English madrigal repertory. The more expansive balletts are generally less successful, for the form's epigrammatic wit was undermined by the substitution of amiable canzonet-like counterpoint for the pithiness of the typical homophonic ballett verse. Weelkes confessed that the volume had been 'not a little hastened', and this is apparent in the variable quality of the balletts. The madrigals are more consistent works in which Weelkes further developed his contrapuntal style, though employing thematic relationships less than in the earlier volume. Instead, an orderly balancing of sections, each clearly defined in manner, was frequently used to shape structures which are more taut than those of the rather sprawling three-voice works of the 1597 volume. One madrigal, *Sweet hart arise*, is founded upon the main thematic points of Byrd's *Laudate pueri*, further evidence of Weelkes's association with the native English tradition in his madrigalian compositions.

The trends of Weelkes's first two volumes find splendid fulfilment in his *Madrigals of 5. and 6. Parts* (1600). Here his counterpoint shows further concentration and

enrichment, and is purged of its more facile imitations of Morley. The peak of contrapuntal concentration is reached in the concluding sections of *Like two proud armies* and *When Thoralis delights to walke* (and also of the 'Oriana' madrigal, *As Vesta was, from Latmos hill descending*), each of which employs a melodic point so constructed that, if deployed at the unison or octave, it produces a point-saturated texture, requiring little or no free melodic material; in addition, in a gigantic augmentation in the bass, the point determines the harmonic structure. Weelkes's recognition of the strongly instrumental idiom of his counterpoint is confessed on his title-page: 'apt for the viols and voices'. His various textural and repetitive devices for structural articulation are now supplemented by embryonic ritornello procedures. Some pieces, notably *Lady the birds right fairely* and *A sparow-hauck proud*, seem to recall an earlier English manner, but others, such as *Like two proud armies*, with its elaborate bass roulades on 'thund'ring' and its monolithic harmonic manner, have an almost Baroque extroversion. Yet the finest madrigals are those in which Weelkes's vivid imagination is fired by a text of contrasting images or feelings. This happens pre-eminently in *O care thou wilt dispatch mee* and *Thule the period of cosmographie.* The former is a kind of tragic ballett where the juxtaposition of sharply contrasting musical material matches the daring combination of opposing imagery in the poems of Weelkes's contemporary, John Donne; the latter madrigal sets a text whose catalogue of wonders reported from the newly discovered parts of the world prompts a kaleidoscopic succession of musical images which are contrasted with the even greater miracle of the poet himself 'whose heart with fear doth freeze, with love doth fry'.

Weelkes's last volume, *Ayeres or Phantasticke Spirites for Three Voices* (1608), is a disappointment. There is little genuine organic counterpoint in it; often two of the three voices move in 3rds or 6ths, and the melodic interest is, as the title 'ayre' suggests, firmly in the top voice. To compensate for the loss of natural growth that counterpoint affords, Weelkes made much use of extended sequences, often on very short melodic fragments. Even so, all these ayres are short, and many are simple binary structures. While the two Italian-texted works and *Aye me alas* (the best piece in the volume) are completely madrigalian, others, like *Strike it up tabor* and *Come sirrah Jacke hoe*, have a strongly English flavour in the sturdy vigour both of their music and their lyrics, which sometimes have clear topical references; indeed, some may have been occasional pieces. Weelkes appended to the volume a fine six-voice elegy on Morley, *Death hath deprived me of my dearest friend*; two other elegies had appeared in his earlier volumes.

3. CHURCH MUSIC. It is impossible to date any of Weelkes's church music precisely, though it seems reasonable to assume that most, if not all of it, was composed after he had moved to Chichester. Apart from two pieces included in Leighton's *Teares or Lamentacions* (RISM 1614[7]), none of it was published in Weelkes's lifetime. One of the Leighton pieces is, in fact, a consort song, and two of Weelkes's full 'anthems', *O Jonathan* and *When David heard*, are really sacred madrigals, the latter ranking among his finest compositions (see illustration). The range of Weelkes's full anthems, both in style and quality, is very wide. The outstanding ones among the

Cantus part of Weelkes's sacred madrigal 'When David heard', for six voices (GB-Lbl Add.29372, f.143r)

more overtly polyphonic are *O Lord, arise* and Weelkes's only setting of a Latin text, *Laboravi in gemitu meo*. In their consistent counterpoint, leisurely unfolding, more archaic approach to dissonance, and absence of internal structural relationships, these contrast sharply with the three anthems that combine an English text with a recurring Latin acclamation, set to identical or related music. Brett has reinforced the point that a number of Weelkes's full 'anthems' were almost certainly composed for extra-liturgical, even secular occasions, and this may well be true of these three. In two, *Gloria in excelsis Deo. Sing, my soul, to God* and *Alleluia. I heard a voice*, this produces a ternary structure, but in the third, *Hosanna to the Son of David*, the acclamation also appears in the middle of the piece, thus recalling the developing ritornello techniques of certain of Weelkes's madrigals of 1600, notably *Like two proud armies*. In these three works he aimed at a special brilliance and forcefulness which achieves maximum cogency in the concentrated paragraphs of *Hosanna*, one of the most sonorous and powerful pieces in the English repertory. *Alleluia* is unique in that it is the only anthem of the time to have survived in both a full and a verse form.

Weelkes appears to have devoted more energies to the verse anthem, perhaps because the form permitted extended composition with smaller and less expert vocal forces than were required for his best full anthems; thus the verse anthem would have suited well the limited

resources of the Chichester Cathedral choir. In general Weelkes's choruses are briefer and simpler than those of either Byrd or Gibbons, and rarely incline, except in some verses for tenor or bass soloists, to the more mobile declamation that Gibbons exploited. His real model was Byrd, and his most tangible debt is heard in the measured tread of most of his solo lines, with their tendency to expand a duple-time opening into a triple-rhythm continuation. Despite the normal expressive restraint of Weelkes's verse anthems, their structural practices are markedly progressive, developing further the integrating techniques already noted in his other music. In addition to using common material in two consecutive sections, and relating the openings of two or more other sections, Weelkes often established particularly strong relationships between his choruses. Sometimes he used variation procedures, as in *Give ear, O Lord*, which is perhaps the most successful exploration in all his anthems of a personal emotional expression; at other times he exploited literal repetition, as in the identical first and last of the three choruses of *Give the king thy judgements, O God*, one of his finest verse anthems. The most wide-ranging in expression of all is *Christ rising*, which owes a material debt to Byrd's setting of the same text, yet paradoxically is the only one that reflects something of the world of the madrigal.

Among the major composers of the time, Weelkes wrote the greatest number of Anglican services. Most are for Evensong, though both of the first two include an offertory, the only services of the time to do so. Six are verse services, the other four are full. Like Weelkes's verse anthems, they are restrained in expression, yet show marked variety both in character and in the deployment of the forces required for each. Most of Weelkes's services relate their separate movements by head-motifs and/or tail-motifs, sometimes making an entire Gloria common to two canticles. In the First Service such identities also occur in the main body of each movement in an intricate network of relationships which makes this the most intensively integrated of all Weelkes's works. The most attractive service is the fourth, 'for Trebles', which uses the Latin acclamation from Weelkes's anthem *Alleluia. I heard a voice* to set the second half of the Gloria of *Nunc dimittis*. Other services also have material relationships with anthems, notably the five-voice Service, which has brief sections in common with *O how amiable* and *All people clap your hands*, and the seven-voice service which shares two passages with *O Lord, grant the king a long life*. This last service is the most expansive of all, and owes a clear debt to Byrd's Great Service, which it emulates in both scale and achievement. The only other service to approach it in size is that 'in medio chori', for which Weelkes composed some three-voice sections for a group of singers placed between the choir stalls in addition to the normal soloists and chorus.

4. Assessment. Weelkes's few instrumental works are of little importance. The consort music is consistently grave in character; the most important pieces are the two In Nomine settings for five viols, one of which is specially notable for its highly dissonant opening imitation.

As a vocal composer Weelkes's main deficiencies were a lack of response to the sound of words themselves, and uneven melodic invention. As a madrigalist he could not match Wilbye's ability for making his individual lines grow around the verbal phrase, and he lacked that composer's sensitive ear for the textural variety which may enhance the poetic shadings of the text; nor did he share Gibbons's mastery of vocal declamation. Weelkes's great strength lay in the vivid inventiveness of his very calculated musical imagery, and the commanding brilliance of a fully developed contrapuntal technique whose roots are more English than Italian. These features were evolved in his madrigals and were extended in the best of the full anthems, even though the more sensational imagery of the madrigals is absent. Despite the more restrained manner of the services and verse anthems, the structural enterprise of his other music is equally evident in them, and there is constant resourcefulness in the way each work is laid out. For imaginative brilliance, sonorous counterpoint applied to majestic utterance, and capacity for broad musical thinking, Weelkes is unsurpassed by any of his English contemporaries.

WORKS

SERVICES

all incomplete

The First Service to the Organs in Gamut (TeD, Jub, Off, Ky, Cr, Mag, Nunc), ?/4vv, org, *GB-Ob*, *Och*, *WB*; Mag, Nunc ed. D. Brown (London, 1974)

DAVID BROWN

Weerbeke [Werbeke, Werbeck], **Gaspar** [Jaspar, Gaspart] **van** (*b* Oudenaarde, *c*1445; *d* after 1516). Franco-Flemish composer. He is one of the main representatives of the Franco-Flemish school associated with Josquin des Prez, although Weerbeke's work clearly shows Italian influence.

1. LIFE. Born out of wedlock in the diocese of Tournai in eastern Flanders, Weerbeke was presumably educated in the Franco-Flemish area, possibly at the *maîtrise* of St Walburga at Oudenaarde. On stylistic grounds it seems likely that he was connected with Du Fay and his circle, especially with Johannes Regis. The Italian career of the 'clerico tornacense' started at the latest in winter 1471–2 when he arrived at the Sforza court at Milan. His name is first mentioned in the court registers on 29 April 1472 when Duke Galeazzo Maria Sforza (1444–76) sent him back to Flanders and Burgundy to recruit singers for his court choir. A second journey for the same purpose is documented in January 1473. The addition of 20 new members doubled the size of the Sforza choir to 40 musicians and made it one of the most important ensembles in Italy. The choir registers of 15 July 1474 show a division into 18 *cantori di camera*, led by Weerbeke as *vice-abbate*, and 22 *cantori di cappella*, led by the *abbate*, Antonio Guinati. Among the singers were Compère and Johannes Martini, who for a few years together with Weerbeke formed something akin to a musical workshop. Holding a position of trust and appreciation, Weerbeke was granted several benefices by the duke, including a pension of 40 ducats on the *prepositura* of S Lorenzo in Lodi (1473).

After the murder of the Duke of Milan on 26 December 1476, musicians started to leave the Sforza court in great numbers, several of them going to Ferrara. Weerbeke, however, stayed on for four years until he moved to Rome in winter 1480–81. For the next eight years he belonged to the papal choir of Sixtus IV (1471–84) and Innocent VIII (1484–92), turning down a tempting proposal to return to Milan in spring 1482. Like many other papal singers Weerbeke joined the Roman Fraternita di Santo Spirito e S Maria in Saxia (19 May 1483). In Rome he was a colleague of Josquin and also Marbriano de Orto, whom he may already have known from his time as a student before leaving for Italy.

In mid-April 1489 Weerbeke left Rome and returned to Milan, to the court of Ludovico Sforza 'il Moro'. Seven months later, on 14 November 1489, he was received with honours in his home town Oudenaarde as 'sanckmeester van den herthoge van melanen'. Another journey in spring 1493 brought him to Florence, possibly again in order to recruit singers for the Milanese court. During this second period at the Sforza court he was awarded benefices in the dioceses of Utrecht and Thérouanne. Up to 1495 Weerbeke's life was dominated by a longstanding connection with the court choir of Philip the Fair, Archduke of Austria and Duke of Burgundy. From 1495 to 1498 he is also recorded as a canon at the collegiate church of St Donatian at Bruges, one of the prebends awarded to singers of the papal chapel. It may have been during this period that he made contact with the French music circle and with Crétin, who mentioned Weerbeke in his *Déploration* on the death of Ockeghem (*d* 1497). However, it seems that his connection with the Sforza court was never completely broken. Towards the end of his service with Philip, Weerbeke once more recruited singers for the Duke of Milan and presumably returned to Milan in autumn 1498. On 28 November 1499, shortly after the conquest of Milan by King Louis XII, Duke Ercole d'Este tried unsuccessfully to engage him for the court chapel at Ferrara.

Weerbeke returned to Rome, where he is documented in the registers as a papal singer from 1500 to 1509. By February 1509 his name was in second place in a list of 17 singers, but after a gap in the registers he is no longer mentioned there. In another document, however, dated 26 December 1514, he is still called 'Cantor Capellae papalis'. At that time he entered the Fraternità del Campo Santo dei Teutonici e Fiamminghi in Rome, perhaps in order to secure himself a burial place in the cemetery next to S Pietro, but since his name is not recorded in the register of deaths of the fraternity he probably died away from Rome. The latest surviving evidence of his life suggests that he may have returned to the north: he was appointed next in succession in the dioceses of Cambrai and Tournai on 1 November 1515 by Pope Leo X, who offered him a benefice of 200 gold ducats a year in reward for his longstanding services as a 'cantor et capellanus' in the papal choir. Two years later, on 1 November 1517, he is mentioned as canonicus of S Maria ad Gradus in Mainz. Weerbeke was probably not the 'Gasparo fiamengo' who was one of the *cantores secreti* of Leo X in 1520–21. If Weerbeke was still alive then, he would have been about 75, surely too old to be accepted for the pope's private choir.

2. WORKS. Sacred music, both liturgical and non-liturgical, is clearly central in Weerbeke's works. Masses

and motets predominate. Of the eight mass Ordinaries and the two Credos which have survived, all but two masses (*Missa brevis* and *Missa 'Princesse d'amourettes'*) were printed by Petrucci, who devoted a whole volume to Weerbeke (*Misse Gaspar*, 1507). For the motet cycles the central sources are the Gaffurius Codices (*I-Mcap*), a group of manuscripts written in Milan at the turn of the 16th century. All his other known motets were printed in collections by Petrucci in Venice between 1502 and 1508. In *Motetti A*, Petrucci's first volume of motets, the compositions of Weerbeke outrank those of all the others, even Josquin, in number. Altogether about two-thirds of his extant works are found in contemporary editions, all from the first decade of the 16th century, demonstrating the high esteem in which he was held in Italy during his lifetime, but also how soon his fame faded.

Among Weerbeke's earliest mass compositions are the *Missa 'Ave regina caelorum'* and the *Missa 'O Venus bant'*. These two masses are similar in layout and may both originate from a time even before his arrival in Milan (Fiedler, 1997). In their structure, disposition of voices and general compositional technique they are reminiscent of the late masses of Du Fay, which may have served as models. But Weerbeke's works lack the symmetry and balance of Du Fay's, and show a stronger tendency to work out the outer voices in detail by sequence and sequential repetition. Especially in sections where the cantus firmus is not in the tenor, imitation is used frequently, mainly between discantus and tenor. Canonic duos occur in sections where the number of parts is reduced, and the mass sections are linked by head-motifs. The *Missa 'O Venus bant'*, based on a Flemish song melody, is mentioned in Gaffurius's theoretical writings; it seems to have been Weerbeke's most popular composition (Wegner, 1940). In the *Missa 'Princesse d'amourettes'* the outer voices make greater use than usual of material from the tenor, based on a chanson that has not survived. Introductory duets replace the head-motifs, and a considerable variety of imitation and a free treatment of the material generally indicate a more modern style. The *Missa 'Et trop penser'* seems to have connections to Florence, especially to Isaac's mass on the same chanson melody. In this composition and again in the *Missa 'Se mieulx ne vient'* Weerbeke used the technique of hybrid cantus firmus parody, in which not only the tenor but also parts of the other voices are taken quite unsystematically from a chanson. The *Missa 'N'as tu pas'* is a much later work than the masses just mentioned and may have been composed in Rome between 1504 and 1508. For this new type of mass composition Weerbeke abandoned the use of the chanson melody as a model for the tenor, taking instead motifs from the chanson setting as a whole. Unusual for him is the four-part texture throughout, but paired imitations are typical. The *Missa octavi toni* and the *Missa brevis* originate presumably from his second stay in Milan. They show a strong relationship to masses by Compère and Gaffurius and are written in a typically 'Italian' style in which sectional structure, alternation between homorhythmic declamation and free polyphony, frequent duos in paired imitation and extensive syllabic texting are characteristic.

The motets use a wide variety of compositional techniques. Croll (1952) classified them in five groups: motet cycles, polyphonic settings, mixed settings, homophonic settings and tenor motets. The motet cycles belong to the early period of Weerbeke's work and are typical of the Milanese repertory. They are designed to replace parts of the Mass and are orientated towards a mixed Ambrosian and Roman liturgy, like many other works written for the Sforza court. These motets are to a large extent composed in loose and simple polyphony. Shorter sections with different numbers of voices follow one another, separated by internal cadences. Paired imitation, the use of two voices moving in parallel, and textural contrast achieved by abrupt changes from polyphony to homophony support the impression of a shortwinded layout. The form in general is clearly organized and based on the structure of the text, which tends to be delivered syllabically. Occasional emphasis of a single word and early signs of attempts to express the meaning of the text in music are typical of this 'Italian motet style' (Finscher, 1964). Strict homophony prevails in the motets for the Elevation of the Host. Within the motet cycles little use has been made of liturgical chant models. Among the polyphonic motets, *Ave mater omnium* is of particular interest; it shows both a tightly woven four-part texture with free counterpoint in each voice and changing combinations of parts with sequences and repetitions of motifs. A fine example of a mixed setting is the motet *Mater digna Dei*, in which specific words, composed in breves, are given emphasis partly by fermatas on each syllable. The homophonic motets are closest to the Italian *laude* tradition in their declamatory style. Two anonymous arrangements of motets by Weerbeke from *Motetti B* in Petrucci's second book of *laudi* (RISM 1508[3]) show how perfectly some of his motets fitted Italian ideals. The Franco-Flemish motet is here blended with the popular sacred music of Italy. In contrast, Weerbeke's two five-voice tenor motets, *Dulcis amica Dei digna/Da pacem Domine* and *Stabat mater dolorosa/Vidi speciosam*, as well as the four-voice motet *Ave regina caelorum* and the *Magnificat*, are firmly in the Franco-Flemish tradition. The two five-voice tenor motets owe something to the model of Regis, and the two four-voice works seem to follow Du Fay directly. *Stabat mater dolorosa/Vidi speciosam* survives only in a Franco-Flemish presentation manuscript, the Chigi Codex (*I-Rvat*); all the other compositions in this group are transmitted in a Roman source (*I-Rvat* C.S.15) dating from 1495–1500.

Identification of all Weerbeke's secular works is hindered by conflicting ascriptions and possible confusion with his contemporary Johannes Japart (from whom only secular music survives). The rondeau *Sans regretz veul entretenir/Allez regretz* is ascribed 'Jaspar' in its only source (*I-Fc* 2439) and could be by either composer. The four-voice songs *Vray Dieu quel paine esse*, *Bon temps/Adieu mes amours* and *Que faict le cocu au bois* appear together in *I-Fc* 2442, all ascribed 'Gaspart'; these are close enough to Weerbeke's four-voice motets to be accepted with a certain confidence, even though *Vray Dieu* has contrary ascriptions to Compère and Pipelare (firmly rejected by Atlas). The three-voice *O Venus bant* has ascriptions to 'Gaspar' and Josquin; the editors of the New Josquin Edition observe details that make it unlikely to be by Josquin and note similarities in *La stangetta*. But *La stangetta* is ascribed 'Uuerbech' only in the first edition of Petrucci's *Odhecaton*, and in any case Petrucci otherwise marked Weerbeke's works with 'Gaspar'; elsewhere it is more plausibly ascribed to Obrecht or Isaac (but see Kämper, 1980).

Weerbeke's special position in the circle of Franco-Flemish composers around Josquin lies in his extraordinary readiness to assimilate the native Italian music. He succeeded in combining the Franco-Flemish polyphonic tradition with the new Italian *laude* style, thus forging a new, individual style that built on the best traits from both strands of its musical heritage.

GERHARD CROLL, ANDREA LINDMAYR-BRANDL

Wegelius, Martin (*b* Helsinki, 10 Nov 1846; *d* Helsinki, 22 March 1906). Finnish educationist and composer. He studied music first in Helsinki with Gabriel Linsén, Emil Zechin and Richard Faltin, then in Vienna (1870–71) with Rudolf Bibl, in Leipzig (1871–3) with Richter, Reinecke and Jadassohn and in Munich (1877–8) with Rheinberger. In the early part of his career he was active in Helsinki as a pianist and critic, and from 1878 to 1879 he was conductor of the Finnish Opera. His chief significance, however, derives from his pioneering role in Finnish music education: he founded a number of important institutions, most notably the Helsinki Music Institute (now the Sibelius Academy) in 1882, which he directed until his death, planning its curriculum, choosing its staff of distinguished teachers (including Busoni) from the whole of Europe and writing many of the theory textbooks (some of which are still used in revised form). He was diligent in keeping abreast with pedagogical developments on the Continent. Among his many pupils were such leading Finnish composers as Sibelius, Melartin, Kuula and Palmgren. Besides orchestral and chamber music he wrote many vocal works in a characteristically lyrical style. He became a member of the Swedish Royal Academy of Music in 1904.

ERIK WAHLSTRÖM

Wegener, Emmy (Frensel) (*b* Amsterdam, 14 June 1901; *d* Laren, 11 Jan 1973). Dutch composer, daughter of Bertha Frensel Wegener-Koopman. She studied the violin with Felice Togni at the Amsterdam Conservatory, graduating in 1925. She then studied composition for three years with Sem Dresden and clarinet with Willem Brohm. She developed multiple sclerosis in the early 1930s, at which point she stopped composing and turned to writing poetry. Both Rosy Wertheim and Anna Mesritz van Velthuysen set her poems to music. She wrote in a dissonant, linearly conceived neo-classical style, and favoured short pieces.

HELEN METZELAAR

Wegkmann, Matthias. *See* WECKMANN, MATTHIAS.

Wegman, Rob C(ornelis) (*b* Emmen, Netherlands, 26 Jan 1961). Dutch musicologist. He studied at the University of Amsterdam with Chris Maas and Frits Noske (1979–86) and the University of Manchester with David Fallows (1988–9). He took the doctorate at the University of Amsterdam in 1993 with a dissertation on the life and masses of Obrecht. He was a research fellow at Oxford University from 1991 to 1995 and became assistant professor at Princeton University in 1995.

Wegman's research focusses on many aspects of 15th-century polyphony. It includes studies on the development of the polyphonic mass, tempo and mensuration, the genesis of sources and the aesthetic opinions of the period, research on the attribution and genesis of works and archive research relating to musicians, compositions and performing practice. His work shows a deep knowledge and understanding of these areas, and an ability to combine them in a fruitful way. His dissertation provides new biographical information, particularly on Obrecht's youth, and describes the chronology and development of his masses.

Wegwanowsky, Paul Joseph. *See* VEJVANOVSKÝ, PAVEL JOSEF.

Wehrli, Werner (*b* Aarau, 8 Jan 1892; *d* Sonnmatt, nr Lucerne, 27 June 1944). Swiss composer, conductor and writer. He studied with Hegar and Kempter at the Zürich Conservatory and in 1913 began studies in musicology and art history at Basle University. In 1914 he won the Mozart Prize for his First String Quartet, and the conditions of acceptance necessitated a two-year course at the Frankfurt Conservatory. There he studied with Sekles and Knorr, and became friendly with Hindemith, a fellow student. Wehrli returned to Basle University in 1916, and in 1918 accepted a post at the Women's Teachers' Training College in Aarau, where he taught until his death and where he conducted the Cäcilienverein (1920–29). His teaching and conducting activities are reflected in his output, which is essentially tonal, though often strongly contrapuntal. The Romanticism of his early works gives way to a more experimental approach influenced by Hindemith and the works of Schoeck of the 1920s; in his settings of Hesse op.23, for example, Wehrli employs polytonality.

Weichenberger [Weichenberg], **Johann Georg** (*b* Graz, bap. 11 Dec 1676; *d* Vienna, inquest 2 Jan 1740). Austrian amateur composer and lutenist. He worked in the book-keeping department of the Austrian exchequer and described himself as registrar and dispatcher (*Expeditor*). He was also a skilled lutenist. Though described as 'officer of the exchequer' in a document of 1712, he is called 'lutenist' in one dated 1708 and 'cavalry officer' in another. He had a wide range of interests and left a considerable collection of paintings (see Koczirz, 63). He wrote a number of pieces for lute solo and concerto-like works for lute and strings. He was a complete master of both polyphonic and chordal writing and in his later music cultivated the French *galant* style. His music enjoyed widespread popularity at the time, and he was highly regarded in Austria and Bohemia in particular, even though he was only an amateur.

WOLFGANG BOETTICHER

Weichlein, Romanus [Andreas Franz] (*b* Linz, 20 Nov 1652; *d* Kleinfrauenheid, Burgenland, 8 Sept 1706). Austrian composer and violinist. He came from a family in which his father and at least one of his brothers, Franz, were also musicians. He entered the monastery at Lambach as a novice and at the profession of his vows on 6 January 1671 received the monastic name of Romanus.

On 30 December 1671 he enrolled at the Benedictine University of Salzburg, gained the bachelor's degree in 1672 and became a doctor of philosophy in 1673. He must then have returned to Lambach. He had doubtless begun his musical education at home. Later the high standard of musical life at the monastery at Lambach, which was certainly comparable with that of the Viennese court, was to offer him ample stimulation. Not least, his student years in Salzburg considerably extended his musical horizons, for it can be assumed that his first meeting with Biber, which took place there, spurred him on to mastery of the violin. Almost every aspect of his musical achievement was influenced by Biber, who gave concerts at Lambach in 1681 before the Emperor Leopold I. When he was chaplain and musical director of the Benedictine convent of Nonnberg in Salzburg, Weichlein could study Biber's work at close range from about 1688 to 1691. In 1688 he achieved success with a performance in Passau Cathedral of a sonata of his own for solo violin.

In 1691, preceded by a good reputation as a musician, Weichlein was appointed chaplain of Nonnberg's daughter house at Sabione, near Bressanone. Here he modernized the practice of *a cappella* singing by introducing instrumental playing into the church, produced plays and, according to the convent's chronicle, succeeded in bringing 'musical perfection' to the inmates through his industry as their composer. In 1705 the election of a new abbot at Lambach resulted in his being transferred to a quite different kind of position, that of parish priest at Kleinfrauenheid, in a border area of eastern Austria that in 1692 had been given by Prince Pál Esterházy to the Benedictines for recultivation; it had been devastated in the Turkish wars and was rife with looters. When famine compelled Weichlein to write to the abbot asking to be relieved of his ministry, his request was refused, and he died of typhus after being there for only about a year.

Weichlein's op.1, dedicated to the Emperor Leopold I, is a set of 12 sonatas for several instruments, stylistically interesting and equally suitable for performance in church or in a secular setting. Unlike Muffat, who modelled himself on Corelli, Weichlein fused the style of Biber's solo sonatas with that of the orchestral canzona, which had been cultivated in Austria since the beginning of the 17th century: his sonatas thus approach the solo concerto in style, an impression reinforced by their themes, cadenza-like passages for the first violin and the fact that they are suited to performance by a chamber orchestra. A striking use of popular melodies also characterizes Weichlein's style, which is truly Austrian and offers intimations of the early Classical style.

Weichlein's brother, Franz (*b* Linz, 4 Oct 1659; *d* Graz, 30 July 1727) was an organist and composer. He attended the Jesuit Gymnasium at Linz from 1668 to 1674. He was organist of the collegiate churches at Zwettl (up to 1681) and Garsten (up to 1688) and of the parish churches of Linz (to 1690) and Graz (until his death). He wrote a certain amount of vocal and instrumental music, all of which is lost. It included music for a Jesuit play performed at Graz in 1701 and *Musico-instrumentalisches Divertissement* for three instruments (Augsburg, 1705).

HELENE WESSELY

Weichmann, Johann (*b* Wolgast, Pomerania, 9 Jan 1620; *d* Königsberg, 24 July 1652). German composer. After musical studies in Wolgast and Hameln, Weichmann spent three years in Danzig, where he was an organist at St Peter in 1639 and 1640. From 1640 to 1643 he studied in Königsberg and then went to Wehlau for his first regular appointment as organist. He returned to Königsberg in 1647 as Kantor and director of music at the Altstadt church, where he remained until his death.

Weichmann was a prolific composer of vocal and instrumental music, both sacred and secular. While a member of the distinguished Königsberg school of song composers that included Albert and Neumark, he composed his most important collection of songs, *Sorgen-Lägerin*, which consists of 65 strophic lieder, sacred and secular; here and elsewhere he set texts by Opitz and Johann Franck among others. His requirements for the performance of his songs are a good voice, clear diction and an instrument capable of chordal realization of the figured bass.

Among his sacred works, most of them now lost, his lost setting of Psalm cxxxiii was a specially impressive cantata for five soloists, four-part choir, trombones or bassoons, clarinos or cornetts, violins and organ, beginning with an orchestral sinfonia followed by sections for various combinations of voices and orchestra. (H. Güttler: *Königsbergs Musikkultur im 18. Jahrhundert*, Königsberg, 1925/*R*)

Mass settings, motets, cantatas and occasional pieces (mostly lost), some in *D-Lm*, *RUS-KA*

JOHN H. BARON

Weichsel [Weichsell], **Charles** [Carl] (*b* Soho, London, 26 Jan 1767; *d* Hammersmith, 3 April 1850). English violinist and composer. The son of Carl Friedrich Weichsell, an oboist from Saxony, and a Vauxhall singer Fredericka, he studied the violin with Wilhelm Cramer and made his début in 1774, with his sister Elizabeth (*see* BILLINGTON, ELIZABETH). He played standing on a stool and was sketched by the artist Rowlandson. He and his sister frequently appeared together, and played in Dublin during the 1780s, after which he travelled to Italy and Germany. On his return to London in 1790 he led the Pantheon concerts; according to Burney he had 'a great hand, [and] sweet tone, but wanted force and personal weight'. He divided his time between London and Dublin, but in 1794

returned to Italy with his sister. By 1801 he was back in London, leading the band at the King's Theatre, Haymarket, and also at Covent Garden and Drury Lane whenever his sister sang. Later he led the Philharmonic concerts for three years, but in 1819 he moved to Venice, returning only in 1828; he led the Philharmonic for the last time in 1837.

Sketches of violin concertos in his hand survive (*GB-Lbl* Add.29295), dating from the 1790s; only the solo line is fully notated, with occasional indications of scoring, but the variation finales in particular suggest a virtuosic performing style. Technical brilliance and clarity of execution seem to have stayed with him throughout his career, to judge by press reports and the published editions of his violin pieces, which include a solo (*c*1795), two sets of violin duets (*c*1805, *c*1830) and other miscellaneous pieces; he also wrote numbers for an adaptation of Gluck's *Orfeo ed Euridice*.

RACHEL E. COWGILL

Weichsel [Weichsell], **Elizabeth.** *See* BILLINGTON, ELIZABETH.

Weichsell [Weichsel], **Frederika** (*b c*1745; *d* London, 5/6 Jan 1786). English soprano. She was a pupil of J.C. Bach. As Miss Weirman she made her début on 18 October 1764 at Covent Garden in *Perseus and Andromeda*, a pantomime with no speaking parts. That season she had a few minor singing roles and in the summer of 1765 she married the German-born Carl Friedrich Weichsell, who since 1757 had been oboist and, more recently, clarinettist at both the King's Theatre and Drury Lane. Mrs Weichsell is remembered as the mother of Mrs Billington and as the singer in Thomas Rowlandson's famous watercolour of Vauxhall Gardens. She sang very little at the playhouses but was outstandingly popular at Vauxhall. In 1766 J.C. Bach wrote a set of English songs for her to sing there, and a year later a similar set for her and Mrs Pinto. By the time she died 'she had performed in the gardens of Vauxhall 22 seasons' (*Gentleman's Magazine*, 1786, p.84). Mrs Weichsell also sang in Handel oratorios at the Gloucester Three Choirs Festival of 1769, but in the seasons that followed Elizabeth and Mary Linley were preferred.

Mrs Weichsell's daughter Elizabeth, later Mrs Billington, was probably born in 1766 or 1767. Years later Lady Morgan suggested in her *Memoirs* (London, 1862) that her own father, the Irish singer Robert Owenson, was in fact also Mrs Billington's father. (*BDA*)

ROGER FISKE/R

Weidberg, Ron (*b* Tel-Aviv, 23 Oct 1953). Israeli composer. After studying composition with Schidlowsky and Sadai at the Rubin Academy at Tel-Aviv University (BM 1979), he studied the piano at Northwestern University (MM 1980). He started teaching at the Open University, Tel-Aviv, in 1979, and the Rubin Academy, Tel-Aviv, in 1994. Weidberg initiated and organized 'Music Now', a series of Israeli music concerts at Tel-Aviv Museum of Art (1988–95), chaired the Israeli Composers' League (1995–7); he became the musical director of Musica Nova Consort in 1997. Influenced by Schidlowsky, Weidberg began his career as an avant-garde composer, but in 1980 he changed his style radically and adopted a witty and richly tonal style, influenced by Poulenc, Weill, Prokofiev and the neo-classical works of Stravinsky, epitomized in his *Variations on a Theme by Mozart* (1991). His gift for orchestration and contrapuntal skills are particularly evident in the concertos for piano (1985) and violin (1994).

Principal publishers: Israel Music Centre, Israel Music Institute

RONIT SETER

Weideman [Weidemann, Weidmann, Wiedeman], **Carl Friedrich** [Charles Frederick] (*b* Germany, ?early 18th century; *d* London, 1782). German flautist and composer. He spent the greater part of his career in England; the date of his arrival is not known, but he was in London by spring 1725 when he took part in a performance of Handel's opera *Tamerlano* at the New Theatre in the Haymarket. This information derives from a handwritten note on Weideman's own copy of a set of trio sonatas ascribed to Handel: 'Tamerlan 1725. which was the first Opera I play'd in . . . C:W:' (see Deutsch, p.174). By the time Quantz visited England in 1727 Weideman was firmly established as one of London's leading flautists. He is also remembered as a co-founder, with Festing and Thomas Vincent, of a charitable 'Fund for the Support of Decayed Musicians and their Families'. This institution, later known as the Royal Society of Musicians of Great Britain, was founded in April 1738 and attracted widespread support from eminent members of the profession, Handel included. Weideman's activities in London musical circles were many and varied: he engaged in fund-raising concerts for the newly formed society, was in frequent demand as an instrumentalist, produced a succession of compositions, and composed minuets for the court balls. In 1778 he was a member of the King's Band of Musicians with an annual income of £100.

Weideman's chamber and orchestral works, though a little unenterprising, are neatly constructed and show a sympathetic understanding of woodwind techniques; stylistically, they reflect his known admiration for Handel's works. The occasional music is in a lighter vein. His songs are charmingly simple, and one at least proved extremely popular with audiences at Vauxhall Gardens. According to G.C. Lichtenberg, Weideman was the flautist depicted by Hogarth in the fourth picture of *Marriage à la mode*.

WORKS
all pubd in London

op.	
1	12 Sonatas or Solos, fl, bc (*c*1737)

PIPPA DRUMMOND

Weidenaar, Reynold (Henry) (*b* East Grand Rapids, MI, 25 Sept 1945). American composer, film maker and video artist. He worked with Moog at the Independent Electronic Music Centre in Trumansburg, New York (1965–9) and studied composition at the Cleveland Institute with Erb (BMus 1973) and at New York University with Fennelly (MA 1980, PhD 1989). His earliest awards include first prize in the Sonavera International Tape Music Competition (New York, 1979). Weidenaar has received widespread recognition in the USA and abroad for his films and videotapes, which integrate variations of texture and colour developed parallel to analogue tape music. His *Love of Line, of Light and Shadow: the Brooklyn Bridge* (1982, for clarinet and stereo and colour video), realized for the centenary of the Brooklyn Bridge, was chosen for inclusion in the Eastman School's International Computer Music Conference (1983) and the second annual New York City Experimental Video and Film Festival. He has received the Special Distinction Award from the Tokyo Video Festival (1987) and a gold from the International Communication Film & Video Festival (1996). He was appointed an assistant professor of film and television at New York University (1986–93) and has been artist-in-residence at the center for computer music at Brooklyn College, CUNY (1983–4). In 1993 he became assistant professor of communication at William Paterson University in Wayne, New Jersey. Most of Weidenaar's work involves magnetic audiotape, film or videotape. *The Tinsel Chicken Coop, for your Usual Magnetic Tape* (1973) and *Wiener, your Usual Magnetic Sequel* (1974) use vast arrays of electronic, vocal, and acoustic resources. The *Wavelines* series (1978–9) integrates electronic tape and 16 mm colour film images as does *Pathways III* (1980). Since 1985, his works have consistently involved the use of videotape, very often in conjunction with solo acoustic instruments, as in *Swing Bridge* (1997) for clarinet and videotape.

STEPHEN RUPPENTHAL/DAVID PATTERSON

Weidinger, Anton (*b* Vienna, 9 June 1766; *d* Vienna, 20 Sept 1852). Austrian trumpeter. Because of his skill and diligence his training period was shortened, and he was pronounced to be well qualified for service at court, or in the army as a field trumpeter. Having served in some regimental bands, he joined the court opera in Vienna in 1792. Here he began to experiment with the keyed trumpet by about 1793.

In 1796 Joseph Haydn wrote his Trumpet Concerto for Weidinger, but it was not performed until 28 March 1800. In 1803 he made a concert tour in Germany, France and England; his playing was praised in Leipzig and London. On New Year's Day 1804 he played Hummel's Trumpet Concerto in E at Eszterháza, a work demonstrating the virtuosity he had achieved. Neukomm wrote a part for him in his requiem for Louis XVII (Congress of Vienna, 21 January 1815). From then on, Weidinger demonstrated his instrument frequently in concerts in Vienna. Although critics admired his playing, by 1820 his instrument was no longer popular.

REINE DAHLQVIST

Weidt, Lucie [Lucy] (*b* Troppau [now Opava], Silesia, 11 May 1876; *d* Vienna, 28 July 1940). Austrian soprano of German birth. She studied with her father, Heinrich Weidt, a minor Kapellmeister and composer, and with Rosa Papier. Most of her career was spent at the Vienna Staatsoper, of which she was a regular member from 1903 to 1926, first in succession to the retiring Sophie Sedlmair, and soon sharing the major Wagner roles with Anna Bahr-Mildenburg. She became a famous Leonore in

Fidelio and was the first Viennese Marschallin in *Der Rosenkavalier*; she was also the first to sing the role of Kundry in Milan. She appeared in Munich between 1908 and 1910, for a few Metropolitan performances as Brünnhilde and Elisabeth in the season of 1910–11, and at Buenos Aires in 1912. Janáček much admired her Kostelnička at the Viennese première of *Jenůfa* in 1918. At the première of Strauss's *Die Frau ohne Schatten* (1919, Vienna) she sang the part of the Nurse. Her recordings show a well-trained and strong voice of marked dramatic intensity.

DESMOND SHAWE-TAYLOR/R

Weigel [Waigel]. German family of engravers and publishers.

(1) **Christoph Weigel (i)** [*der Ältere*] (*b* Marktredwitz, bap. 30 Nov 1654; *d* Nuremberg, 5 Feb 1725). He learnt the craft of copper engraving in Augsburg (1673–81) and worked in Vienna, Frankfurt and Regensburg before settling in Nuremberg, where he married in 1698. He founded an art publishing firm which, through the heirs Tyroff and later Schmidt, existed into the 19th century; in it he also engraved and published music. His *Ständebuch* of 1698 follows very closely in its sections on music Michael Praetorius's *Organographia* of 1618 and Kircher's *Musurgia* of 1650. But it contains interesting details of the instrumental practice of the time, and stresses 'the predominance of the organ among instruments and the leading role of Nuremberg in the construction of wind instruments' (Krautwurst).

(2) **Johann Christoph Weigel** (*b* Marktredwitz, bap. 15 July 1661; *d* Nuremberg, bur. 3 Sept 1726). Brother of (1) Christoph Weigel (i). Like his brother he settled in Nuremberg and worked there as an engraver and art dealer. Notable among the works he published are Pachelbel's *Erster Theil etlicher Chorale* (*c*1700) and above all his own *Musicalisches Theatrum* (*c*1722). The latter is a collection of folio plates illustrating various instruments being played with a conductor, and is closely related to Mattheson's *Das neu-eröffnete Orchestre* (Hamburg, 1713). After Weigel's death his wife continued the business.

(3) **Christoph Weigel (ii)** [*der Jüngere*] (*b* 1703; *d* Nuremberg, bur. 19 June 1777). Son of (2) Johann Christoph Weigel. He took over the business from his mother in 1734. The most important work published by the 'jüngere Weigelsche Handlung' (which survived with A.G. Schneider's bookshop until 1807) was book 2 of Bach's *Clavier-Übung* (1735/*R*).

Weigh House Chapel, Eastcheap. London Presbyterian chapel. *See* LONDON, §I, 7(iii).

Weigl. Austrian family of musicians.

(1) **Joseph (Franz) Weigl (i)** (*b* Bavaria, 19 May 1740; *d* Vienna, 25 Jan 1820). Cellist. On Haydn's recommendation he was appointed a cellist at the Eisenstadt court of Prince Paul Anton Esterházy on 1 June 1761. In 1764 he married the daughter of the household accountant in Eisenstadt, (Anna Maria) Josepha Scheffstoss, who had been a 'choral and chamber singer' at the Esterházy court since 1760. In 1769 Weigl became principal cellist to the Italian opera at the Kärntnertortheater in Vienna. Meanwhile his wife was engaged at the Burgtheater, where she appeared primarily in Gluck's operas. Weigl's expressive cello playing soon won him entry into the highest circles: in 1773 Burney heard Haydn quartets played by Starzer, d'Ordonez, Count von Brühl and Weigl at the home of Lord Stormont, the English ambassador to Vienna. In 1792 Weigl entered the Hofkapelle, and the Kapellmeister Salieri frequently suggested him as a soloist for music at court banquets. He is supposed to have written pieces for the *csakan*, a Hungarian recorder.

(2) **Joseph Weigl (ii)** (*b* Eisenstadt, 28 March 1766; *d* Vienna, 3 Feb 1846). Composer and conductor, son of (1) Joseph Weigl (i). In 1769 he moved to Vienna, where his musical talent was quickly recognized by F.L. Gassmann. He studied singing and thoroughbass in 1775 with the Korneuburg choirmaster and schoolmaster Sebastian Witzig. In 1776 he entered the grammar school and studied music with Albrechtsberger until 1782. He began, but did not complete, courses in medicine and law. At the age of 16 Weigl wrote his first opera *Die unnütze Vorsicht* for a marionette theatre; it met with the approval of Gluck and Salieri, who were responsible for arranging a performance at the Burgtheater in 1783. Every Sunday Baron Gottfried van Swieten invited him to his musical matinées. There Weigl came into contact with Mozart, Salieri, Teyber and Starzer and works by Bach, Handel and Graun were played and studied, with Mozart accompanying at the fortepiano. 'To hear a Mozart playing through the most difficult scores with his unique fluency, and at the same time singing and correcting the mistakes of others', reported Weigl in his autobiography, 'could not but excite the greatest admiration'. Salieri convinced Weigl's father of his son's talent, and himself gave the 19-year-old instruction in composition and introduced him to theatrical life at the court theatre. There Weigl had to accompany and take the singers through their parts. Among the works he rehearsed were Mozart's *Le nozze di Figaro* (1786) and *Don Giovanni* (1788); at later performances of these operas he himself was the conductor. He probably also rehearsed *Così fan tutte*.

By 1790 Weigl was deputy Kapellmeister at the court theatre, and in July 1791 he was made Salieri's successor by Leopold II. His first great success in the theatre came with *La principessa d'Amalfi* in 1794. Haydn (who was his godfather) congratulated him with the words: 'not for a long time have I enjoyed any music as much as I did your *La principessa d'Amalfi* yesterday: it is novel in conception, noble, expressive – in short, a masterpiece'. During the 1790s Weigl composed not only Italian but also German operas (including *Das Petermännchen* and *Das Dorf im Gebirge*). After the creation of a court ballet company in 1791 Weigl began a fruitful collaboration with the dancers Antonio Muzzarelli, Salvatore Viganò and Giuseppe Traffieri. From Peter von Braun, who had taken over the court theatre as a lessee in 1794, Weigl received a special commission to compose an opera and two ballets every year. Among his most successful ballets were *Pigmalione* (33 times, 1794–5), *Riccardo cor di*

Leone (32 times, February–August 1795), *Il ratto d'Elena* (38 times, 1795–6), *L'incendio e la distruzione di Troja* (20 times, 1796), *Alonso e Cora* (73 times, 1796–1800), *Alcina* (66 times, 1798–1801), *Alceste* (32 times, 1800–01), *I spagnoli nell'isola Cristina* (44 times, 1802–3) and *La ballerina d'Athene* (51 times, 1802–4). His first great operatic success abroad was *L'amor marinaro* (1797), which was played in all the larger theatres of Europe. Beethoven made use of the closing section of its terzetto 'Pria ch'io l'impegno' (no.12) as a theme for the variations of his Clarinet Trio in B♭, op.11.

In 1802 Weigl married Elisabeth Bertier, a maid-servant at the court; there were three children of the marriage (Leopold, Theresia and Leopoldine). In 1802 he was summoned to the Stuttgart Opera, but declined on account of his life appointment at the Viennese court. He had a special patroness in the Empress Marie Therese, the second wife of Emperor Franz II; it was for her that he wrote the opera *L'uniforme* (1800) and at its première in the theatre at Schönbrunn Castle she herself sang the principal role. In the 1807–8 season Weigl composed *Cleopatra* and *Il rivale di se stesso* for La Scala. The latter was an enormous success and had 111 performances in three years. He was offered an appointment as director of the Milan Conservatory but turned it down and in July 1808 returned to Vienna. The Singspiel *Das Waisenhaus* (1808) and *Die Schweizerfamilie* (1809) are highpoints in his dramatic output. The former had over 100 Viennese performances within ten years, and *Die Schweizerfamilie* was performed throughout the world during the 19th century. Weigl was one of the chief participants in the musical preparations for the Council of Vienna, where his opera *Die Jugend Peter des Grossen* (1814) was given as a festival performance. In 1815 he was once more called to Milan, where he composed the opera *L'imboscata* (1815) for La Scala and the cantata *Il ritorno d'Astrea* (1815) for the arrival of the Austrian Emperor Franz I. In February 1816 he returned to Vienna, where he finished his second commissioned opera for Milan *Margaritta d'Anjou*. The première, however, did not take place in Milan but in Vienna in 1819. His series of stage works ended in 1823 with *Die eiserne Pforte*, after which he composed principally sacred music. A decree of 22 January 1827 appointed him vice-Kapellmeister at court, and he held this position until 1838. At his retirement in 1839 he was awarded the gold Civil-Ehrenmedaille. Weigl was buried in the cemetery at Währing, but later a memorial was erected at the central cemetery in Vienna. He was an honorary member of the Milan Conservatory (1812) and the Gesellschaft der Musikfreunde in Vienna (1826) as well as several other musical associations; in 1828 he was given the freedom of the city of Vienna. Two manuscript autobiographies (one containing a list of works) are in the Vienna Nationalbibliothek.

Weigl's Italian operas span from 1788 to 1816. Initially modelling his work on Mozart's operas on the one hand and Neapolitan *opera buffa* on the other, Weigl achieved a stylistic blend that eventually developed into a mature style of his own. The *semiseria* genre allowed him to experiment with expanded forms and unusual orchestration. In their rescue opera *L'uniforme* Weigl and Carpani anticipate *Fidelio* not only in subject matter, but also in the active role of the chorus and the predominance of ensembles. In his last two Italian operas, *L'imboscata* and *Margaritta d'Anjou*, Weigl's use of Romantic dramatic language can be seen in the chromaticism, preference for the mediant, large forms, symmetrical disposition of tonalities, interweaving of motifs, instrumental solos and independent part-writing, even for the viola.

Weigl's sacred works belong to the tradition of post-Classical Viennese church music. They show a thorough contrapuntal skill; an essential feature of his fugal writing is the use of sequence, and protracted pedal points do not appear. In his masses the cello is freed from the bass line by being given broken chords and frequent solo passages. Weigl used unison passages to heighten tension, and his choral writing scrupulously observes the limitations of the voices.

(3) Thaddäus Weigl (*b* 8 April 1776; *d* Vienna, 29 Feb 1844). Composer, conductor and publisher, son of (1) Joseph Weigl (i). He studied music theory with Albrechtsberger, who acquainted him with the works of Bach and Handel; (2) Joseph Weigl (ii) introduced him to the music of Haydn and Mozart. From 1795 he worked as an arranger (especially of piano scores) for the court theatre's music publishing house, and in 1796 the firm sent him on a business journey that took him all over Europe. In 1801 he was granted a licence for a publishing firm of his own, which he founded in 1803. From that time he often stood in for his brother as vice-Kapellmeister at the Kärntnertortheater, and in 1806 he was granted the title of composer to the court theatre. Between 1799 and 1805 he had five operettas (including *Idoly* and *Die Marionettenbude*) and 15 ballets (including *Bacchus et Ariane*, *Cyrus und Tomyris* and *Die Vermählung im Keller*) performed. As vice-Kapellmeister of the court theatre he took over the direction of the musical archives and thoroughly reorganized them. Later he resigned from practical music-making to devote himself entirely to his work as a publisher. Apart from works by his brother, he chiefly published works by Viennese contemporaries and operatic arrangements. Several songs by Schubert first appeared under his imprint. In 1832 the firm's inventory and publishing rights were put up for auction and were acquired in part by the firms of Diabelli, Artaria and M.J. Leidersdorf.

RUDOLPH ANGERMÜLLER/TERESA HRDLICKA-REICHENBERGER

Weigl, Johann Baptist (*b* Hahnbach, Bavaria, 26 March 1783; *d* Regensburg, 5 July 1852). German composer. He received his musical and academic education at the monastery of Prüfening (near Regensburg) and (from 1803) Amberg. In 1806 he was ordained priest, taught for a short time at the Gymnasium and later at the lyceum in Amberg; he then taught church history and canonic law at the lyceum in Regensburg, where he was also chancellor, inspector of the seminary of St Paul and leader of the choir. In 1837 he became a member of the cathedral chapter, the cathedral scholar and the inspector of the diocesan school of Regensburg. Weigl was a keen defender of church music with instrumental accompaniment and was opposed to the reform which was beginning in Catholic music around 1840, led by Karl Proske.

AUGUST SCHARNAGL

Weigl, Karl (*b* Vienna, 6 Feb 1881; *d* New York, 11 Aug 1949). Austrian composer, naturalized American. After graduating from the Vienna Music Academy in 1902, he studied composition with Zemlinsky and musicology with Adler at the University of Vienna (where he received the PhD in 1904). He served as a rehearsal conductor for Mahler at the Vienna Hofoper (1904–06) and taught at the Vienna City Conservatory (1918–28), before becoming professor of theory and composition at the University of Vienna in 1930. In 1938, with the annexation of Austria by Hitler, Weigl, who was Jewish, found that his works could no longer be performed. He left Vienna for the USA, where, after considerable difficulty, he obtained teaching positions at the Hartt School of Music (1941–2), Brooklyn College (1943–5), the Boston Conservatory (1946–8) and the Philadelphia Musical Academy (1948–9) among other institutions. He became an American citizen in 1943.

Weigl was a respected composer in both Austria and the USA; his music was admired by Strauss, Mahler, Schoenberg, Walter, and Furtwängler. Representing the best of Viennese tradition in the melodiousness and clarity of design of his works, he was a particularly prolific composer of lieder in the tradition of Wolf and Mahler. The instrumental works combine a Brahmsian emphaticism with a profusion of polyphony. A Karl Weigl Memorial Fund, established for the perpetuation of his music through study, performance and recording, was set up at Mannes College in New York; its administration was transferred to Indiana University in 1979. He was married to the music therapist and composer Vally Weigl.

CHARLOTTE ERWIN/MICHAEL MECKNA

Weigl, Vally [Valerie] (*b* Vienna, 11 Sept 1889; *d* New York, 25 Dec 1982). American music therapist, composer and teacher, of Austrian birth. She studied the piano in Vienna with Richard Robert and, at Vienna University, musicology with Guido Adler and composition with Karl Weigl, whom she later married. She taught for a period as Robert's assistant and also worked with Karl Weigl at the Musicological Institute of Vienna University. In 1938 she and her husband moved to New York, where she continued to compose and perform and took up teaching appointments at the Institute for Avocational Music and the American Theater Wing. After receiving the Master's degree from Columbia University in 1955, she pursued a lifelong interest in music therapy by becoming chief music therapist at the New York Medical College. She contributed many papers to music therapy literature and lectured widely in the USA and abroad. In addition she devoted much of her time to the preservation of the considerable musical legacy of Karl Weigl, a portion of whose output, though well known in Europe, had not yet been introduced to the USA.

In 1964 Weigl became chairperson of the Friends' Arts for World Unity Committee, for which she organized international cultural programmes. She was awarded many grants, including ones by the ACA and by the Mark

Rothko Foundation as well as the 1976 NEA Fellowship grant. Her music has been widely performed and published.

ROSARIO MARCIANO

Weihnachtslied [Weihnachtlied, Weihnachtsgesang] (Ger.: 'Christmas song'). In a general sense, any song for Christmas (similarly, *Weihnachtskonzert* means 'Christmas concerto', *Weihnachtsmusik* 'Christmas music' or 'Christmas piece' etc.). It is often used in the same loose sense as 'Christmas carol' is in English.

The term was applied particularly to the simplest type of 18th-century PASTORELLA: a simple song, often strophic, often for one or two voices accompanied by two violins and continuo (or by the organ alone), sung in central European rural churches at Christmas, often at Midnight Mass. Other more or less equivalent terms, which probably cannot be precisely differentiated, are *aria de Nativitate*; *aria pastoralis* or *aria pastoritia* (possibly translations of *Hirtenlied*, 'shepherd song'); *Krippellied*, *Krippenlied* or *Krippelgesang* ('crib song'); and *Weihnacht Aria* and so on. Some Weihnachtslieder, noted down in 1819 when their popularity had already declined, are in the folksong collection of the Gesellschaft der Musikfreunde in Vienna; an informant from Maria-Taferl gave some details of their use (reproduced in Klier, i, 45–7; Klier also printed many of the songs), though these do not apply to all Weihnachtslieder. Many survive in manuscript in, for example, local parish churches and others were printed as broadsides at Vienna, Steyr, Linz, Innsbruck and elsewhere.

Michael Haydn (*Heiligste Nacht*, 1786) and F.X. Gruber (*Stille Nacht*, 1818) used the term for a type of Christmas song similar in scope and form to the older Weihnachtslied and still set for a small number of voices, but now evocative and romantic rather than unsophisticated, direct and often comic as the songs in the older tradition had been. In the 19th century the meaning of the term was extended: it was used by folksong collectors in a general sense (e.g. Weinhold, Pailler and Klier), and was applied also to art songs with subject matter relating to Christmas (e.g. the *Weihnachtslieder* op.8 by Peter Cornelius).

See also PASTORAL, §§4–5.

GEOFFREY CHEW

Weikert, Ralf (*b* St Florian, 10 Nov 1940). Austrian conductor. He studied the piano and conducting at the Bruckner Konservatorium in Linz, followed by studies with Hans Swarowsky (conducting) and Hanns Jelinek (composition) in Vienna. In 1965 he gained first prize in the Malko Competition in Copenhagen. In 1966 he became first Kapellmeister and two years later chief conductor at the Theater der Stadt Bonn, a post he held until 1977, and from 1977 to 1981 he was deputy General Musikdirector of the Frankfurt Opera. In 1981 Weikert was appointed principal conductor of the Mozarteum Orchestra and musical director of the Salzburg Landestheater, and in 1984 he became musical director of the Zürich Opera, a post he held until 1992. He has also made many guest appearances in leading opera houses, including the Vienna Staatsoper, the San Francisco Opera, the Metropolitan Opera and the Staatsoper in Munich. His recordings include Rossini's *Tancredi* and Zemlinsky's *Kleider machen Leute*.

MARTIN ELSTE

Weikl, Bernd (*b* Vienna, 29 July 1942). Austrian baritone. He studied in Mainz and Hanover, where he made his début in 1968 as Ottokar (*Der Freischütz*). He was engaged at Düsseldorf (1970–73) and sang Melot (*Tristan und Isolde*) at Salzburg in 1971. He first appeared at Bayreuth as Wolfram in 1972, and has subsequently sung there Amfortas, the Herald (*Lohengrin*) and Hans Sachs. He made his Covent Garden début (1975) as Rossini's Figaro and his Metropolitan début (1977) as Wolfram, returning as Orestes (*Elektra*), John the Baptist and Hans Sachs. He sings regularly in Berlin, Hamburg, Munich and Vienna, where he created Ferdinand in von Einem's *Kabale und Liebe* (1976), repeating the part in Florence. Weikl's huge repertory of over 100 roles ranges from Guglielmo, Count Almaviva, Don Giovanni, Belcore, Luna, Posa, Boccanegra and Ford to Onegin, Tomsky, Golaud, Eisenstein and Morone (*Palestrina*). Weikl's powerful voice, warm and resonant, and his dramatic gifts are particularly well displayed in his Wagner and Strauss roles, notably Hans Sachs, the Dutchman, Mandryka, Orestes and John the Baptist. He has recorded many of his operatic roles and such works as *Winterreise* (of which he is a sensitive interpreter), Brahms's *German Requiem* and Schoenberg's *Gurrelieder*.

ELIZABETH FORBES

Weil, Bruno (Kurt) (*b* Hahnstätten, 24 Nov 1949). German conductor. He studied conducting with Hans Swarowsky from 1972 to 1974 and Franco Ferrara (1974) and in 1975 made his début at the Wiesbaden Opernhaus, where he was shortly afterwards appointed Kapellmeister, a post he held until 1977. After a period as Kapellmeister in Brunswick (1977–81) he was Generalmusikdirektor in

Augsburg from 1981 to 1989, during which time he deputized for Karajan at the Salzburg Festival. From 1989 to 1992 he conducted regularly at the Staatsoper in Vienna, and in 1994 he became Generalmusikdirektor of the symphony concerts in Duisburg. Weil also works as guest conductor with leading orchestras around the world and at opera houses such as Bologna and Hamburg. He frequently conducts the Canadian ensemble Tafelmusik on period instruments. In 1992 he made his début at Glyndebourne with *Così fan tutte*. He is music director of the Carmel Bach Festival, California, and artistic director of the Festival Klang und Raum at Irsee, Allgäu. Weil's recordings have been widely admired for their vitality and vivid sense of instrumental colour. They include works by Haydn (*The Creation*, symphonies and masses), Mozart's *Die Entführung aus dem Serail* and Schubert's complete masses.

MARTIN ELSTE

Weiland, Julius Johann (*d* Wolfenbüttel, 2 April 1663). German composer and musician. From the prefaces to his first two collections we learn that he was a pupil at Brunswick Gymnasium in 1642 and also that, for almost five years at the same period or a little later, he belonged to the Brunswick-Wolfenbüttel Hofkapelle. He went to Minden for further training. He published his *Erstlinge* (1654) from nearby Petershagen, signing himself as 'Küchenschreiber to Count Wittgenstein'. At Easter 1655 he returned to the service of Duke August the Younger of Brunswick-Wolfenbüttel and Duchess Sophie Elisabeth. He played a decisive part in the musical life of the court under the direction of Johann Jakob Löwe von Eisenach. In 1660 he was appointed vice-Kapellmeister. He was almost exclusively a composer of church music. His compositions, which include small-scale sacred concertos, are clearly influenced by Schütz. The majority are dedicated to Duke August.

WORKS

Erstlinge musicalischer Andachten, 1–4vv, 2 vn, bc (Bremen, 1654); 1 ed. in NM, xiv (1928); 1 ed. F. Saffe (Kassel, 1933); 1 ed. Längin (Kassel, 1966)

HORST WALTER

Wei Liangfu [given name, Shangquan] (*fl* 1522–72). Chinese composer, singer and theorist. He played a central role in developing the *Kunshan qiang*, a regional singing style of the Kunshan area of Jiangsu province that had first emerged in the middle decades of the 14th century, into a national genre of operatic music known as *Kunqu* that came to dominate the Chinese theatre from the late 16th century and the 17th.

Details of Wei's biography are vague, but available data describe him as a singer of 'northern arias' (*beiqu*) from Jiangxi province who, after moving to Taicang in Jiangsu province, devoted himself to the development of *Kunshan qiang*. Finding the original *Kunshan qiang* bland and lacking in interest, he yet realized its expressive potential, and refined it by incorporating aspects from other contemporary vocal styles. His new version of the *Kunshan qiang* style featured melismatic melodies perfectly matching the linguistic tones of the lyrics, floating around the accompaniment of *qudi* flute, *sheng* mouth organ, *pipa* lute and other instruments; the melismatic melodic style, described as unfolding like smooth waves, is called 'water mill melody' (*shuimo diao*).

The new style soon became widely known, reaching beyond non-theatrical venues to become an integral component of *chuanqi* operas by the late 1560s. Wei's refinement of *Kunshan qiang* benefited from the advice of many contemporary musicians: it is reported that Wei would only finalize a musical expression with the approval of master musician Guo Yunshi. Wei's theories on the singing and composition of *Kunshan qiang* melody are preserved in a short treatise entitled *Qulü* [Principles of arias].

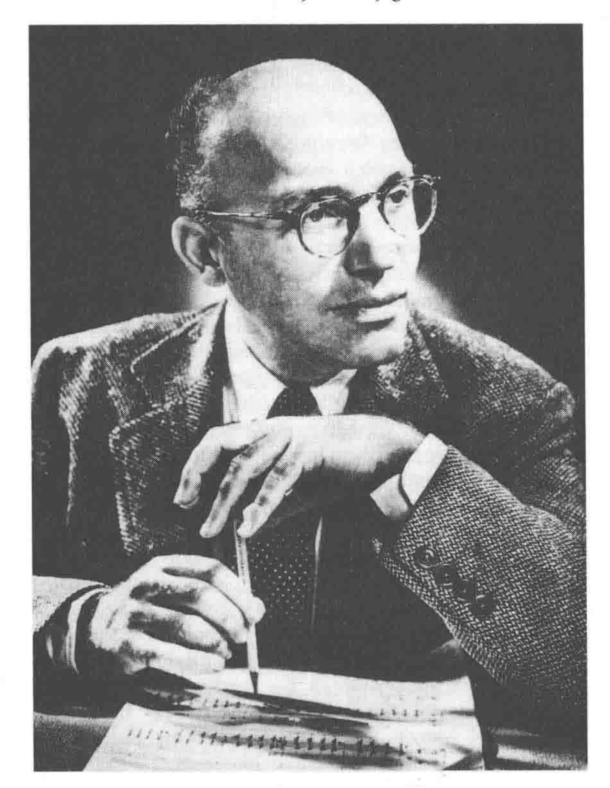
JOSEPH S.C. LAM

Weill, Kurt (Julian) (*b* Dessau, 2 March 1900; *d* New York, 3 April 1950). German composer, American citizen from 1943. He was one of the outstanding composers in the generation that came to maturity after World War I, and a key figure in the development of modern forms of musical theatre. His successful and innovatory work for Broadway during the 1940s was a development in more popular terms of the exploratory stage works that had made him the foremost avant-garde theatre composer of the Weimar Republic.

1. Life. 2. Early works. 3. European maturity. 4. American works. 5. Posthumous reputation. 6. Influence.

1. Life. Weill's father Albert was chief cantor at the synagogue in Dessau from 1899 to 1919 and was himself



a composer, mostly of liturgical music and sacred motets. Kurt was the third of his four children, all of whom were from an early age taught music and taken regularly to the opera. Despite its strong Wagnerian emphasis, the Hoftheater's repertory was broad enough to provide the young Weill with a wide range of music-theatrical experiences which were supplemented by the orchestra's subscription concerts and by much domestic music-making.

Weill began to show an interest in composition as he entered his teens. By 1915 the evidence of a creative bent was such that his father sought the advice of Albert Bing, the assistant conductor at the Hoftheater. Bing was so impressed by Weill's gifts that he undertook to teach him himself. For three years Bing and his wife, a sister of the Expressionist playwright Carl Sternheim, provided Weill with what almost amounted to a second home and introduced him a world of metropolitan sophistication. Later, in 1917, Bing also found him volunteer work as a coach at the opera.

In April 1918, at Bing's suggestion, Weill enrolled at the Berlin Musikhochschule where he studied with Humperdinck (composition), Friedrich Koch (counterpoint) and Rudolf Krasselt (conducting). Although he had won a bursary from the Hochschule for the following year, he found its musical climate stifling and applied to Schoenberg to study privately with him in Vienna. Financial situations intervened, however, and Weill returned in the summer of 1919 to Dessau, where he worked for three months under Knappertsbusch and Bing at the Hoftheater before taking up a post as a conductor of a tiny municipal opera company in Lüdenscheid. He remained with the company until the early summer of 1920, when the announcement that Busoni had been invited to direct a masterclass in composition at the Akademie der Künste, Berlin, encouraged him to apply for membership. The last and youngest of the applicants, Weill was duly accepted for a three-year period, officially beginning in July 1921 but in practice earlier.

Busoni had a special regard for Weill's musical gifts. Recognizing some technical shortcomings, he referred the young man to his disciple Philipp Jarnach for some rigorous training in counterpoint. Weill progressed rapidly, and in the summer of 1922 Busoni and Jarnach encouraged him to provide a score for a ballet-pantomime entitled *Zaubernacht*, which was successfully staged in Berlin in November 1922 and presented three years later in New York. The 1922–3 season also witnessed premières of no fewer than four concert works by Weill, including the *Sinfonia sacra* op.6 and the Divertimento op.5, both by the Berlin PO. At the end of his three years in the masterclass Busoni recommended him wholeheartedly to Universal Edition in Vienna, who were to become Weill's exclusive publishers for the next ten years.

Some weeks before Busoni's death in July 1924 Weill entered an association with the leading Expressionist playwright Georg Kaiser that was to remain close until Weill left Germany nearly ten years later. The première, under Fritz Busch, of the Weill–Kaiser opera *Der Protagonist* in Dresden in 1926 made Weill's name known beyond specialist circles and was hailed by Oskar Bie and others as the first genuine operatic success achieved by a German postwar composer. Largely on the strength of that success, Weill was invited to write a short opera for Hindemith's chamber music festival in Baden-Baden. At

1. *Kurt Weill*

first he vacillated between two classical texts, but having already begun his collaboration with Bertolt Brecht in March 1927, he arranged instead to set the five *Mahagonny-Gesänge* from Brecht's recent verse collection *Die Hauspostille*. The result, the 'Songspiel' *Mahagonny*, was presented in Baden-Baden in July 1927 to great effect, and encouraged the two men to proceed with their full-length opera project *Aufstieg und Fall der Stadt Mahagonny* (1927–9).

Weill and Brecht had thus laid the foundations of a collaboration that, however short-lived, can be numbered among the most fruitful in 20th-century music. It did not undermine the collaboration with Kaiser, however, and in 1928 a one-act *opera buffa* by Weill and Kaiser, *Der Zar lässt sich photographieren*, was launched on its highly successful career. A few months later Weill's and Brecht's *Die Dreigroschenoper* had its historic première in Berlin, with the part of Jenny played and sung by Weill's wife Lotte Lenya, whom he had married in 1926. Other Brecht projects followed in short order: *Das Berliner Requiem* (1928), *Der Lindberghflug* (1929), *Happy End* (1929) and *Der Jasager* (1930), as well as cantatas, workers' choruses and incidental music for *Mann ist Mann* (1931).

The international triumph of *Die Dreigroschenoper* ensured that after years of financial hardship Weill was now free to devote himself entirely to composition. Since 1923 he had been giving private lessons in theory and composition to various young musicians, among them Claudio Arrau, Nikos Skalkottas and Maurice Abravanel; and beginning in 1925 he was also a prolific contributor to the radio weekly *Der deutsche Rundfunk*, providing previews and reviews on a regular basis and occasionally offering essays on larger cultural issues. By the spring of 1929, however, he was able to withdraw from all such

work, and for the remaining 20 years of his life he depended entirely on his earnings as a freelance composer, primarily for the stage.

Weill was now the most successful theatre composer to have emerged in the Weimar Republic. This fact, quite apart from his Jewish ancestry and leftist political associations, ensured that he and his works became exposed targets when the tide turned against the republic in 1929. The riotous première of *Aufstieg und Fall der Stadt Mahagonny* in Leipzig in 1930 was the prelude to a concerted campaign to drive his works from the state-subsidized theatres. By the start of the 1932–3 season this campaign had largely achieved its ends: despite the critical and public acclaim for his opera *Die Bürgschaft* (1930–32), the most ambitious of his pieces for the German stage, the work was shunned by most theatres. The enthusiastic reception given to a concert of his music at the Salle Gaveau in Paris (December 1932) confirmed his feeling that he should do more to promote his works outside Germany.

Although Weill's last work for Germany, the musical play *Der Silbersee* (also with Kaiser), was warmly received at its triple première in Leipzig, Magdeburg and Erfurt in February 1933, the emergency decrees and rigorous censorship that followed upon the Reichstag fire a fortnight later put paid to his further possibilities in Germany. In circumstances of some danger he fled to Paris on 14 March 1933, taking with him only a few belongings and the sketches of his Second Symphony. Soon after his arrival he was commissioned to compose a score for Les Ballets 1933 and reluctantly renewed his collaboration with Brecht, which had ended, none too amicably, almost three years earlier. The resultant work, *Die sieben Todsünden*, choreographed by Balanchine and sung by Lenya, was hardly more than a succès d'estime in Paris and London. By the end of 1933 Weill realized not only that the political situation in Germany was no temporary aberration (as the suspension of his contract with Universal in the summer had already implied), but that it would be very difficult to consolidate his position in France. Shocked by a pro-Nazi demonstration at a concert performance of *Der Silbersee* in Paris, he withdrew to the village of Louveciennes in 1934 and began to focus his attention on the commercial theatres of Paris, London and Zürich.

The first result of this new focus was *Marie galante* (1934), a stage play to which Weill contributed songs and incidental music. Despite the immediate popularity of some of its songs the play itself was poorly received. Hardly more successful was the operetta *Der Kuhhandel*, which reached the stage only in an English adaptation entitled *A Kingdom for a Cow* (1935) and failed utterly in London.

These two disappointments were somewhat alleviated by a major collaboration with Max Reinhardt and Franz Werfel which had begun in the summer of 1934 and occupied much of Weill's attention for the next 18 months. The result, a vast historical spectacle of the Jewish people from Abraham's time until the destruction of Solomon's temple, was originally set to music in German as *Der Weg der Verheissung*, but planned for production in New York in December 1935 as *The Eternal Road*. Weill, accompanied by Lenya, travelled to New York in September of that year as a member of the production team. When the production had to be postponed he chose to remain in the United States, where he had already begun to form new contacts with the theatre scene.

Weill's first work for the American stage came about at the instigation of the Group Theatre, which invited him to collaborate with the playwright Paul Green on an anti-war musical play entitled *Johnny Johnson*. The piece was duly staged in New York in November 1936, only eight weeks before the resuscitated première of *The Eternal Road*. Although the score of *Johnny Johnson* won Weill some important new friends and supporters, and *The Eternal Road* was lauded by press and public alike before succumbing to financial mismanagement, neither work brought the composer the triumph he so desperately needed. Nevertheless, with new prospects in Hollywood and little to tempt him back to Europe, he took the first steps towards American citizenship in May 1937. His material problems were partially solved by *Knickerbocker Holiday*, a political satire composed in 1938 to a book by Maxwell Anderson, the first in an impressive list of American collaborators that was to include Ira Gershwin, Moss Hart, Langston Hughes, Alan Jay Lerner, S.J. Perelmann and Ogden Nash. *Knickerbocker Holiday*, though often unmistakably European in idiom, introduced Weill to a much wider audience and produced, in 'September Song', what was soon to become his first fully-fledged American hit song.

After the demise of the government-sponsored Federal Theatre in July 1939 and the failure of his attempts to find a sponsor for a series of radio operas, Weill now strengthened his links with Broadway, to which, and its Hollywood annexes, he devoted himself for the remaining ten years of his life. During the early 1940s he produced two resounding successes, the formally innovative *Lady in the Dark* (1940) and *One Touch of Venus* (1943). He also contributed patriotic pieces to the war effort, culminating in his first and only musical film, *Where do we go from here?* (1943–4). Less fortunate was *The Firebrand of Florence* (1944), an operetta based on the memoirs of Benvenuto Cellini and his only box-office failure of the 1940s.

Weill's first new venture of the postwar years was a boldly conceived 'American opera' for Broadway based on Elmer Rice's prize-winning drama *Street Scene* (1946). Though only moderately successful at the time, *Street Scene* marked, in Weill's widely publicized view, a culmination in his career as a theatre composer. It was followed by the equally innovatory 'vaudeville' *Love Life* (1947–8) and the less ambitious but politically and socially controversial *Lost in the Stars* (1949), a musical adaptation of Alan Paton's anti-apartheid novel *Cry, the Beloved Country*.

If none of Weill's three postwar musicals could match the success of their predecessors of the early 1940s, the same cannot be said of his sole venture into the non-Broadway musical stage, the college opera *Down in the Valley* (1945–8), which far outstripped his other American works in number of productions and performances. Plans to develop a series of such works, with Alan J. Lerner as his collaborator, occupied Weill during the last weeks of his life. Eventually the strain of his workload proved too great for his constitution, and shortly after he and Maxwell Anderson had started work on a musical adaptation of *Huckleberry Finn* he died of a longstanding heart ailment.

2. EARLY WORKS. In 1983, 14 items of Weill juvenilia resurfaced in the estate of his sister-in-law, and revealed a lack of precocity surprising in a composer whose two previously known early works, the B minor String Quartet (1918) and the Sonata for cello and piano (1919–20), were remarkable precisely for their individuality. In the quartet particularly, the composer's distinctive profile is already discernible. But despite the characteristically unsettling transformation of popular waltz idioms which interrupts the fugal finale, the quartet still belongs to a relatively stable world where the later and lighter Reger is the principal modern influence and Mendelssohn the classical model.

The Cello Sonata is already heading in quite another direction, away from classical ideals and towards the ferment which had begun in pre-war Vienna. Schreker has replaced Reger as the main influence, and there are signs of some fleeting acquaintance with the Schoenberg of opp.7 and 9. After the first movement, key signatures are dispensed with, and the last ties with functional tonality loosened. The surviving fragments of the cantata *Sulamith* (1920) reveal further developments on these same lines, reaching at times an almost Skryabinesque luxuriance.

The remarkable one-movement Symphony of 1921 is, in contrast, clearly transitional. Whereas in the first two sections Weill adapted a basically late Romantic language to new harmonic and motivic purposes, in the third he attempted to check the flow by reverting to a post-Regerian fugal texture, but without the tonal constraints observed in the quartet. For reasons partly technical and partly programmatic, the fuguing soon peters out and the impassioned rhetoric is resumed. Whatever the programmatic justification, the awkwardness reflects the kind of technical shortcomings that necessitated Weill's subsequent studies with Jarnach.

Less than a fully-fledged composition, yet more than a promising student piece, the Symphony is in a sense explained, amplified and corrected by the two major achievements of the following year: the *Chorale-Fantasy* for large string orchestra with horn, trombones and unison male chorus (it became the finale of the Divertimento op.5) and the *Sinfonia sacra*. Already in the *Fantasy*, technical lessons learned from Jarnach are made subservient to a strikingly personal vision. The idea of following a sequence of divertimento-style movements with a massive finale envisaging the Last Judgment is one that could have occurred only to the future composer of *Mahagonny*.

Zaubernacht (1922), a ballet-pantomime for young audiences, clearly offered Weill an opportunity to return to the vein of simple lyricism so winningly uncovered in the B minor Quartet. Several ideas from the quartet are woven into the narrative sections of the score and developed in the set dances. Among the latter are a waltz and a cortège based on a foxtrot that Weill had written while working as house pianist and composer in a Berlin cabaret. Without realizing it, he had laid the foundations for the song style that would make him world famous.

Zaubernacht prepares us for the instrumental song cycle *Frauentanz* (1923) and the alla marcia section of the op.8 String Quartet of the same year. In the latter work Weill tries to resuscitate the final section of his Symphony, but to formally and texturally inappropriate ends. Unlike the two movements which he discarded, the Quartet as it stands adds little to what he had achieved in the earlier orchestral piece. Their true successor is the *Recordare* op.11 (1923), a setting for large mixed chorus and children's voices of verses from the Lamentations of Jeremiah. Modelled on Bach's motets and related to the modern north German choral tradition that leads from Reger to Distler, the *Recordare* has claim to be considered Weill's early masterpiece. The fact that it remained unpublished, whereas op.8 was accepted by Universal on Busoni's recommendation, is attributable only to the technical demands it places on even the most experienced choirs.

The Concerto for violin and wind instruments which Weill composed in the early summer of 1924, shortly before Busoni's death, is the first work in which he consciously declares his independence from his beloved teacher. Despite its elements of harlequinade and its apparent leanings towards an Italianate style, its home is the Expressionist vein of the early Hindemith. The leap from the free-tonal classicism of the *Recordare* to a largely non-tonal harmonic language risks some loss of coherence in the immediate formal context, but acquires justification as a step toward the one-act opera *Der Protagonist* (1924–5).

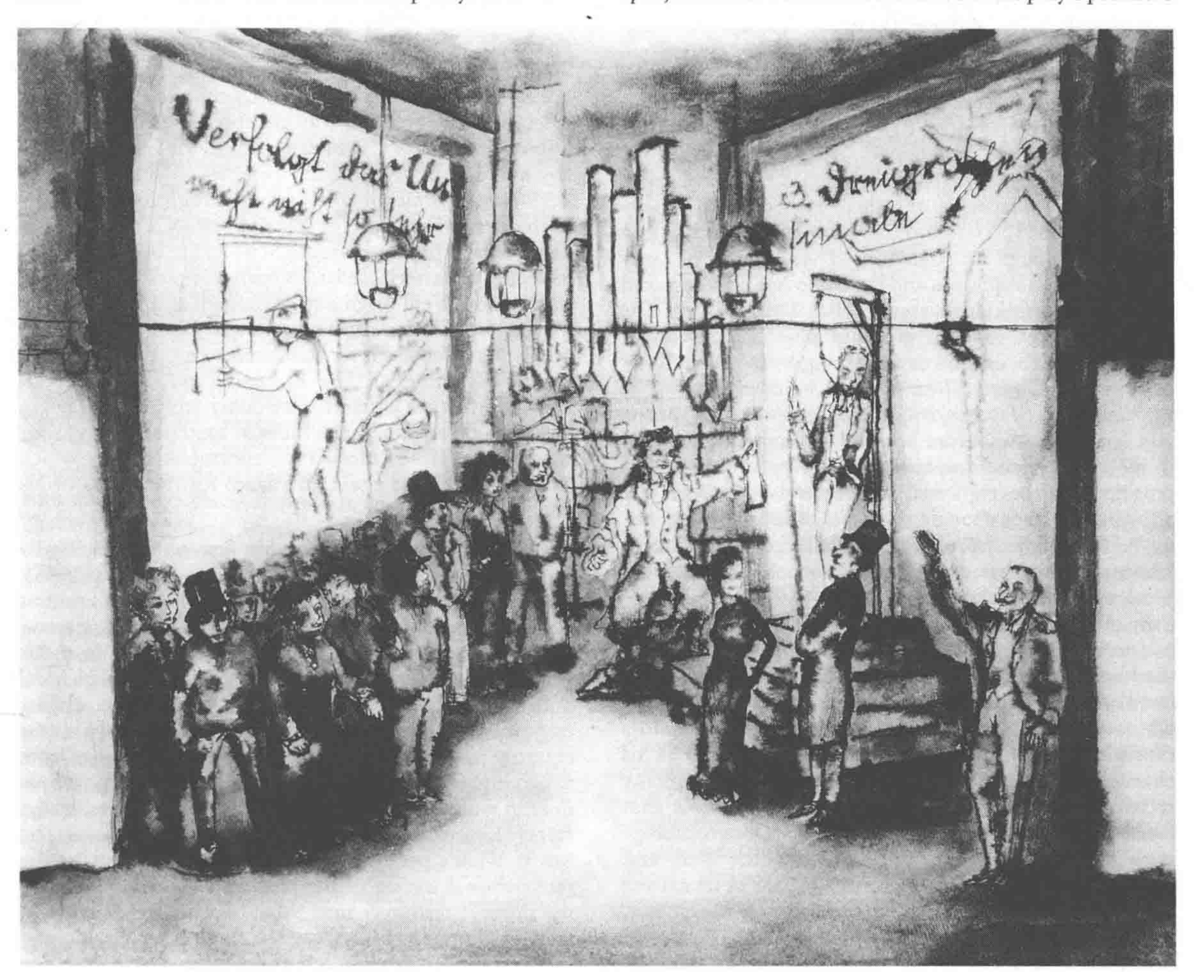
It says much for Weill's powers of self-criticism that the critical and public acclaim of *Der Protagonist* at its prestigious Dresden première in 1926 did not deflect him from the exploratory path he pursued in his next two works, the significantly titled cantata *Der neue Orpheus* (1925) and the one-act ballet-opera *Royal Palace* (1925–6), both to texts by the Expressionist poet Yvan Goll. The excitement and sense of discovery Weill associated with these two works were surely inseparable from his renewed encounter with certain vernacular and tonal elements. Although still attracted by the lonely example of Schoenberg, Weill had realized that his own talents and responsibilities lay elsewhere. Just as the cantata, with its concertante solo violin, can be heard as a critical reply to the hermetic attitudes of the Violin Concerto, so may *Royal Palace* be viewed as a plea for stylistic diversity as opposed to the more uniform compositional fabric of *Der Protagonist*.

The fact that in *Royal Palace* Weill made use of syncopated dance idioms for the first time is less important in itself than in relation to a new concept of style: unity is no longer sought through the dominance of any one idiom, but through a personal view of a multiplicity of idioms, with a particular emphasis on those which are discredited or out of fashion (notably those associated with his early admiration for Schreker). In this work, and in its successor *Der Zar lässt sich photographieren* (1927), Weill also sheds most of his inhibitions regarding popular and jazz materials, although his guide in this matter would seem to be Krenek rather than Milhaud and Stravinsky. Largely unappreciated at its first performance, *Royal Palace* is the work in which Weill's originality as a theatre composer first manifests itself. Its failure influenced the rejection of his next work, a full-length opera provisionally titled *Na und?*, by publishers and opera houses alike. The few sketches of this work to have survived are sufficient to indicate that, in its clearcut number form and range of styles, *Na und?* was the necessary link between *Royal Palace* and the radically pluralist *Mahagonny* opera.

2. Autograph MS of the opening of Act 1 of Weill's 'Aufstieg und Fall der Stadt Mahagonny', composed 1927–9

3. EUROPEAN MATURITY. Stylistically *Mahagonny* has three main musical levels: the neo-classical, the neo-Verdian, and the popular (coloured by cabaret and popular song). Melodically and motivically these are interlinked, as were the analogous levels in *Royal Palace*. But in *Mahagonny* the fundamental integrating factor is the harmony. Whereas in *Royal Palace* and, apparently, in *Na und?* the harmonic terms of reference had changed from level to level – non-tonal, free tonal and tonal – in *Mahagonny* they are constant throughout and merely subject to changes of emphasis (for instance, the submediant emphasis characteristic of the popular level).

It is the new consistency and sharper focus of the harmony, and not the influence of popular music or even of Brecht, that distinguishes Weill's works of 1927–33 from most of his earlier ones up to and including the *Mahagonny* Songspiel. The juxtaposition of tonal songs and non-tonal interludes in the Songspiel had been his last contribution to the formal experiments of the postwar avant garde. In transferring the Songspiel material to the opera, he not only removed most of the non-tonal passages but also clarified the harmony at those points in the songs where elements from the 'free' style had been allowed to intrude. The introductory verses of the 'Alabama-Song', for instance, were divested of their Bartók-like dissonances and recomposed in an ostensibly simpler though actually more personal harmonic idiom.



In the midst of its two-and-a-half-year gestation *Mahagonny* suffered two interruptions – for *Die Dreigroschenoper* and *Das Berliner Requiem* (both 1928) – that left their mark on the opera's third act, which is structurally the weakest of the three and relies on a last-minute borrowing from *Das Berliner Requiem* to shore up its finale. Equally damaging to the opera's unity were the squeamishness of publishers and opera directors towards some of its scenes (especially the Act 2 brothel scene), which had to be revised, cut or replaced accordingly, and the deterioration of Weill's relations with Brecht, which prevented him as late as 1931 from putting the opera into definitive form. Yet however insoluble the problems of its text, this uncomfortable and thought-provoking work continues to maintain an uneasy place in the opera repertory and to deliver its polemical barbs against consumer society and the cultural establishment.

If the *Mahagonny* opera is likely to remain the best-known of Weill's full-length through-composed works from the Weimar period, its historical impact pales beside that of *Die Dreigroschenoper*, the most frequently

performed piece of musical theatre of the 20th century. Here Weill alluded to an astonishing range of musical *objets trouvés*, from broadside ballads and sanctimonious parlour tunes to operatic recitative and ensemble-finales. The 'song' forms, for which the work has become justly famous, are merely one strand in a score which thrives as much on the manifold contrast of stylistic levels as on its carefully controlled mixture of the sentimental and the sardonic. Weill's handling of the band was immediately recognized as definitive for jazz orchestration in art music, and his pseudo-tonal harmonizations came to be identified not only with his own inimitable voice but with the Weimar jazz age as a whole. Yet for all the diversity of its material, the *Dreigroschenoper* score, composed against the clock in one broad sweep of passion and amusement, has the benefit of a few sharply delineated motifs that impart a satisfying if fully intuitive sense of unity to the entire work.

Weill was momentarily taken aback by the acclaim *Die Dreigroschenoper* won in intellectual circles as well as from the general public, and a self-protective withdrawal may be sensed in his two radio cantatas of 1928–9, *Das Berliner Requiem* and *Der Lindberghflug*. Both are austere in mood, and rely for the most part on a radically simplified and concentrated neo-classical idiom partly beholden to Busoni's view of Bach and partly forced on Weill by the primitive radio technology of the time. Although in theory addressed to a mass audience, neither work makes more than an incidental allusion to the *Dreigroschenoper* manner which numerous composers throughout Europe were already trying to emulate, and both take their bearings from the more introspective passages of *Mahagonny*. Not until the second cantata is there a hint of the impression which Stravinsky's *Oedipus Rex* had made on Weill.

Although Weill was rightly proud of *Die Dreigroschenoper* and of his discovery that a 'serious' modern composer could still reach a large audience without sacrifice of originality or contemporaneity, he recognized that the new song style was not, at that stage of its development, a suitable basis for the continuous musical structures which were his main concern. Nevertheless, not wishing to abandon his new audience, he felt called upon to develop and refine the song style, whether by enlarging it into scenas or by diversifying its expression. If the former is apparent in such sections of *Mahagonny* as the 'Anglers' Quartet' (no.8), the latter is the main impetus behind his collaboration on *Happy End* (1929), a 'play with music' to which Brecht supplied apposite song texts. The resultant set of songs and choruses, though they greatly expanded the range of possibilities opened up by *Die Dreigroschenoper*, could not counteract the fiasco of the play's première

3. Design by Caspar Neher for the Act 3 finale of Weill and Brecht's 'Die Dreigroschenoper' in a production at the Stadttheater, Cologne, 1930: pen and ink with watercolour (Institut für Theaterwissenschaft, University of Cologne)

and earned Weill a gentle reprimand from his Viennese publishers to return to the straight path.

In fact Weill had already resolved to do so, as was evident in his next Brecht collaboration, the 'school opera' *Der Jasager* (1930). In this extraordinary work the classical economy practised in the two radio cantatas is applied with extreme, almost self-effacing rigour; and yet the restrictive pressure, related to the stern morality of the libretto no less than to practical exigencies of non-professional performance, serves to intensify the lyricism that had begun to make itself heard in parts of *Mahagonny* and then, more clearly, in the radio cantatas. Although *Der Jasager* was conceived by its librettist as a *Lehrstück* to instruct audiences and performers alike in collective morality, there is some indication that Weill took the work's didactic element in his own special sense, and produced what was in effect a *vade mecum* for young composers aspiring to write modern opera. Adopted for use in the Prussian school system, the work quickly achieved a huge number of performances (exceeding even those of *Die Dreigroschenoper* at the time) and spawned a great many imitations, thereby laying the groundwork for a 'Weill underground tradition' which persisted even during the Third Reich and into the postwar era.

The idea of a dialectical relationship between words and music, and between the ingredients of the music itself, had already been fundamental to the *Mahagonny* Songspiel, and is one of the reasons why at this time Weill favoured texts in which affirmative views are indicated by negative examples. The principle, widely misunderstood or misrepresented by those who castigated the 'immorality' of the *Mahagonny* opera or applauded the 'morality' of *Der Jasager*, and is again fundamental to *Mahagonny*'s successor, the three-act opera *Die Bürgschaft* (1930–31). Here too there is a triple stratification of styles, although the popular level has become less jazzy (there are no saxophones and the banjo has been replaced by two Stravinskian pianos). Like *Der Jasager*, *Die Bürgschaft* is a modern morality play in consciously antiquated garb, and owes something to the example of Stravinsky's *Oedipus Rex* without imitating its music. But unlike *Der Jasager*, it criticizes the prevailing order, and is actively supported both by a commenting chorus in the classic Handelian tradition and by a stage chorus representing the exploited and oppressed masses. By allowing the stage chorus to emerge, at decisive moments, as the drama's true protagonist, Weill created a modern 'chorus opera' that drew historical consequences from Verdi and Musorgsky.

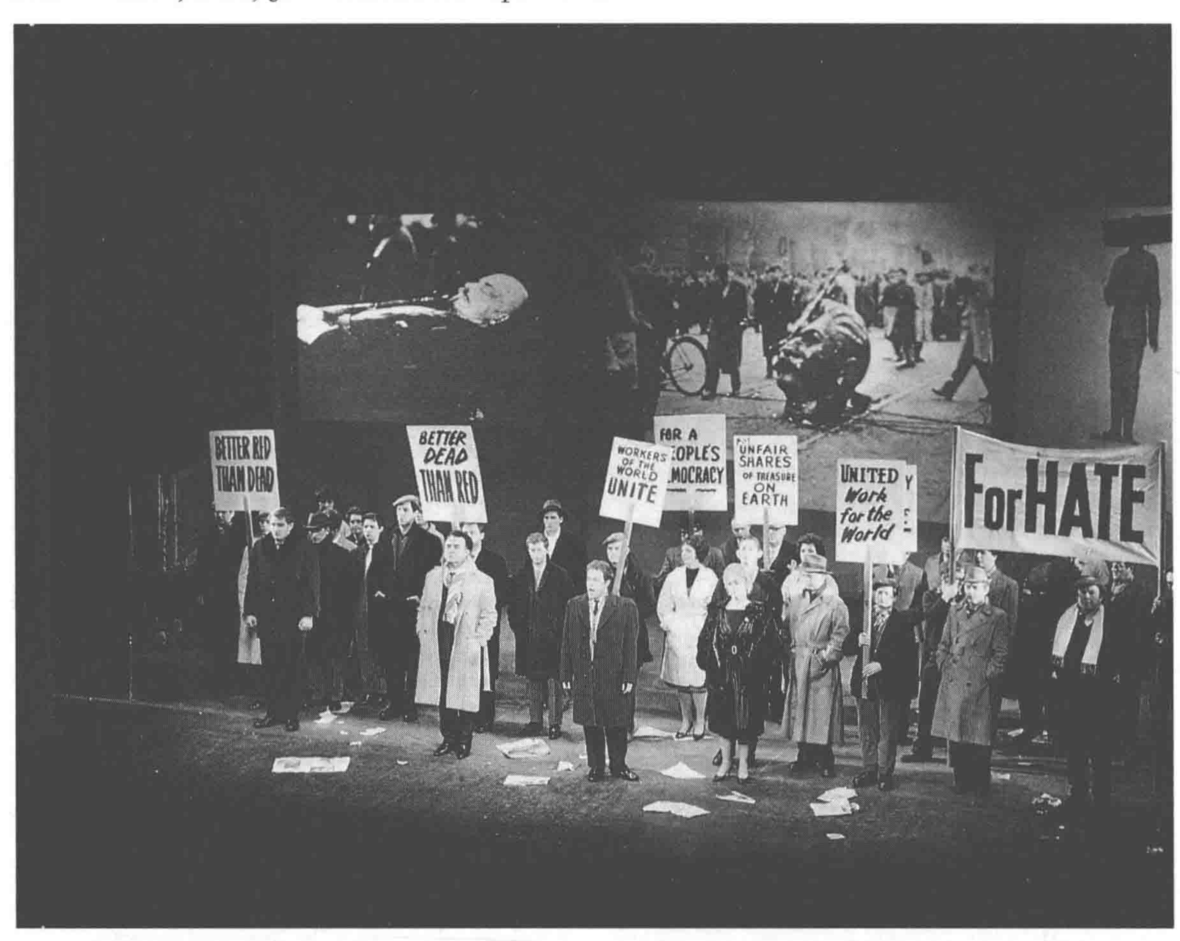
By now it was beyond question that whatever his genius as a writer of songs, Weill's finest inventions depended on the kind of dramatic momentum that could be accumulated only in a continuous musical structure. Weill himself was well aware of this; indeed, it was one of the factors that led eventually to his rupture with Brecht. But as his chances of mounting a full-length opera in Germany receded, he decided to return to the 'play with music' that had been successfully established in *Die Dreigroschenoper*. The 'winter's tale' *Der Silbersee* which Weill and Kaiser wrote in the second half of 1932 is, in its subject matter, an almost direct continuation of *Die Bürgschaft*, being an undisguised response to the political, cultural and economic crisis in the last year of the Weimar Republic. The Weillian seven-piece jazz band of *Die Dreigroschenoper* and *Happy End* has now been replaced by a medium-sized opera orchestra, and the song style has branched out towards both opera and cantata in a manner that aspires to a modern version of 18th- and early 19th-century Singspiel.

Expelled from Germany at the height of his powers, Weill wrote two complementary works in 1933 which have some claim to be considered his European masterpieces: the Second Symphony (begun before his flight to Paris and completed in 1934) and the choral ballet or cantata *Die sieben Todsünden*. While the former, championed and first performed by Bruno Walter, releases the neo-Mendelssohnian symphonic energy latent in the upper levels of *Die Bürgschaft*, the latter accomplishes with the song style something that would not have been feasible at any stage in its evolution before *Der Silbersee*. Thanks in some degree to Brecht's tightly structured text and his new-found understanding of Weill's musical and aesthetic needs, the song style now evolves into a continuous and developing musical structure to produce a unique and unrepeatable mixture of cantata and ballet, half song cycle, half madrigal play.

The symphony and the ballet-cantata were the last pieces Weill wrote for the audience he had left behind in Germany. Although the two main works of 1934–5, the political operetta *Der Kuhhandel* and the biblical drama *Der Weg der Verheissung*, still have the advantage of a text in his native language, they are already the works of an expatriate searching for another audience and therefore anxious to make himself understood. Different as they are in style and aim, both seek to conceal their German origins – the operetta by way of Latin American inflections appropriate to its Caribbean setting, the biblical drama by the use of synagogue melodies – and both are harmonically much milder and more traditional than any of the German works. Yet *Der Kuhhandel*, a light-handed satire on war profiteering, might well have been acclaimed as a minor masterpiece had it been completed and staged in the form Weill originally envisaged; and *Der Weg der Verheissung* promised, in scope and stylistic variety, to be a legitimate successor to *Mahagonny* before it underwent drastic rewriting as *The Eternal Road*. In the event, another 60 years lapsed before either work was heard in its original form, and the musical material amassed for these two failures formed an enormous quarry which Weill was to mine again and again for the works of his American years.

4. American works. For his first work specifically written for the American stage, *Johnny Johnson* (1936), Weill attained a diversity of style that far exceeds that of even the most pluralistic of his earlier works. To a certain extent this resulted from extensive borrowings from his preceding failures (including *Happy End*, *Der Kuhhandel* and *Marie Galante*), but it also reflects an almost encyclopedic urge to capture the musical ethos of his host country: patriotic songs of World War I, torch songs from urban nightclubs, cowboy songs, college glees and a love duet in waltz time redolent of Victor Herbert vie with a starkly Expressionist vein for the scenes of trench warfare. But if Weill's polyglot score is at least justified by the international setting of the plot, and his partitioning of the musical resources into 'islands of music' (Blitzstein, E1936) impressed his colleagues, there is no overlooking the strain he apparently felt at having suddenly to come to terms with a new set of theatrical and musical conventions.

Something of the same strain can be sensed in *Knickerbocker Holiday* (1938), a putative and well-liked successor to Gershwin's political operettas which was in fact an Americanized by-product of *Der Kuhhandel* and, like that work, made use of Weill's new-found talent for light music in the Strauss and Offenbach vein. But the passages in *Knickerbocker Holiday* where Weill attempted to Americanize fundamentally European material by the mechanical application of certain jazz and blues formulae lacked the effortlessness of those emigré art composers who, like Will Grosz or Vernon Duke, were turning out successful popular songs with apparent ease. More convincing, and technically more accomplished, than some of the Americanisms in *Knickerbocker Holiday* is the entire score Weill wrote for the pageant *Railroads on Parade* (1938–9).



Such exertions are nowhere to be found in *Lady in the Dark* (1940), the work that established Weill as a Broadway composer of the first rank. The European harmony and Pucciniesque bridge of 'September Song' have given way, in 'My Ship', to smooth 5th-related chord progressions and an exquisitely gradated melody proceeding from pentatonicism to diatonicism to delicate chromaticism. Equally virtuoso is Weill's handling of Broadway reprise conventions, here convincingly wedded to the dramaturgy in the form of an *idée fixe*. The work's three through-composed dream sequences, in effect one-act operas, gave Weill a renewed opportunity to demonstrate his 'gestic' control of dramatic pacing and momentum. Even the subject-matter, psychoanalysis, was new to American musical comedy. Exemplary yet inimitable, the score resembles a surreal Broadway montage of *Royal Palace* and *Die Dreigroschenoper*, and was fiercely rejected by admirers of the latter (Stravinsky excepted).

In its form and style *Lady in the Dark* inaugurated and set impeccably high standards for Weill's series of six Broadway musicals in which, to quote Virgil Thomson's obituary in the *New York Herald Tribune*, 'every new work was a new model, a new shape, a new solution of dramatic problems'. The wartime entertainment *One Touch of Venus* (1943) might be considered an exception, but even there the incorporation of dance sequences to advance the story was commercially risky, as was the ironic and parodistic treatment of much that other songwriters and show composers took seriously. More challenging, however, were the shows that followed. *The Firebrand of Florence* (1944), a bold attempt to write a full-blooded Broadway operetta, suffered from Weill's own public confession of failure, and has only recently proved successful in revival. Much more successful in its day, and now regarded as one of the central achievements of his American career, was *Street Scene* (1946). A grim tragedy set in a New York tenement district and aptly subtitled 'an American opera', it bears much the same relation to musical comedy as does Weill's admitted exemplar *Porgy and Bess* in its through-composed score, its use of vernacular musical idioms for local colour, and its frequent nods in the direction of the European opera tradition, in this case *verismo*. Equally unusual to Broadway were the highly stylized vaudeville of *Love Life* (1947–8), whose dramatic structure is plainly influenced by the theatre of Thornton Wilder, and the themes of racial prejudice and persecution that inform Weill's last completed work for Broadway, *Lost in the Stars* (1949). But a similar innate urge to innovation is apparent in the non-Broadway works from these years: *Where do we go from here?* (1943–4), written in collaboration with Ira Gershwin, was meant to be a first step leading towards a through-composed film musical, while the one-act college opera *Down in the Valley* (1945–8) clearly aspires to the role of an American *Jasager* in its modest technical requirements and didactic impetus. Both these works attempted to establish genres non-existent in the American musical landscape of their day.

Weill retained from his discarded background two notable advantages over his popular competitors, and was wise enough to exploit them. The first was an aural imagination that freed him from any dependence on the piano and compelled him to make his own orchestral scores, a practice unknown on Broadway at the time and one which vastly increased the amount of work involved in each new production. It is in these scores that his technical mastery in unequalled and his special place in history as a precursor of Bernstein and Sondheim is assured. The second and related advantage was his highly cultivated sense of musical character and theatrical form. This is already apparent in the individual numbers, which are more sharply and variously characterized than even the most skilful Broadway products of the time, and it becomes decisive and unique in the way it determines the distinctive profile of each show. Given the multifariousness of Weill's American stage works, it is hard to trace a line of development within them, just as it is hard to speculate about the course he might have followed had he lived on into the 1950s and 60s, when he would have confronted not only the flowering of the American musical but also, and especially, the renaissance of his own European stage works. For in the end his greatest American success, indeed one of the most successful off-Broadway shows of all times, proved to be a posthumously Americanized version of *Die Dreigroschenoper*.

5. Posthumous reputation. Even during his lifetime Weill's achievement was never less than controversial. If the success of *Die Dreigroschenoper* brought an ill-tempered dismissal from Schoenberg, his abandonment of that very style earned him the disapproval and disrespect of Adorno and the avant-garde critical establishment, while admirers of his Broadway work found his European music, to quote the posthumous assessment of his American publisher, to 'have no present value at all'. The difficulty of assessing Weill's achievement was compounded by the extreme disarray of his European output, which even before his emigration to America he had made little effort to keep intact, and by the two problems he bequeathed to his immediate posterity: the 'Brecht–Weill' problem and the problem of the 'two Weills'.

The former refers to the alleged role of Brecht in the creation of their collaborative works. It was long thought that Brecht contributed some if not all of the melodies in *Die Dreigroschenoper* and the *Mahagonny* Songspiel, a view which Brecht, with his self-confessed broad-mindedness in matters of intellectual property, did nothing to dispel. This view was thought to be confirmed by the discovery, in the early 1980s, of a manuscript containing Brecht's pre-*Dreigroschenoper* melody for 'Seeräuber-Jenny' with several remarkable resemblances to Weill's later setting. A closer inspection of this and other Brecht tunes reveals, however, that even where Weill used them as a pre-compositional framework, he made decisive

4. Scene from Weill's 'Aufstieg und Fall der Stadt Mahagonny' as performed by Sadler's Wells Opera, London, 1963

departures in declamation and melodic shape to lend them a distinctive character, in effect refashioning them into something quite different and entirely his own.

The problem of the 'two Weills' is more fundamental and raises some basic questions in the aesthetics of musical reception. Obviously Weill's European works and his American works spoke to quite different audiences and require different sets of categories for their appraisal. This difference was long thought to be unbridgeable and to stand in need of special biographical or even psychological pleading. But the pre- and post-*Dreigroschenoper* works of his Weimar period likewise addressed different audiences, and Weill's Broadway shows contain a sufficient number of identifying 'fingerprints' and self-borrowings from his European works to make their authorship unmistakable. Similarly, an examination of the sketches for his Broadway musicals reveals that Weill basically used the same working methods at all stages of his career. Nor did he feel that his music required any special pleading: reviewing his career in retrospect in 1950, he rightly pointed out that all his stage works consistently probe a middle ground between musical comedy and opera – between the play with interpolated music and the through-composed operatic score in the European tradition. Moreover, following the decline of Berlin as a theatrical capital in the early 1930s, he was convinced that New York was the only place that offered him the necessary platform, audience and financial substructure to realize his ambitions for the musical stage.

The problem, as Adorno perceptively if pejoratively remarked in his obituary for the *Frankfurter Rundschau* (15 April 1950), has to do with the concept of 'composer' altogether. As a confirmed man of the theatre, Weill was less interested in a sacrosanct work or text than in the reactions of its intended audience. To achieve his ends he frequently made or sanctioned far-reaching changes in his scores, albeit never so as to violate the work's fundamental ethos. But just as the importance of the 'text' recedes in his output, so does the notion of a composer as fashioning an inimitable personal style and expressing a consistent artistic persona.

For Weill each new stage work posed unique problems of style, organization and musical language that had to be confronted and solved afresh. If the scores of *Der Jasager* and *Lady in the Dark* seem incommensurable, so too were their audiences, their executants and their generic traditions. What they shared, apart from Weill's habitually superior craftsmanship, were their mastery of the musico-dramatic problems at hand. In this light, his work is best viewed, and assessed, not in terms of 19th-century *Ausdruckskunst*, but under the categories of stylistic plurality and applied composition, categories that have some right to be regarded as his historical contribution to postmodernism.

Weill himself was aware of the uniqueness of his personal aesthetic. Writing to his publisher in 1929, he exclaimed, with justifiable professional pride:

> For years I have been the only creative musician to work consistently and uncompromisingly, against the resistance of the snobs and aesthetes, to create basic forms [*Urformen*] of a new, simple, popular musical theatre. Even the least of the theatre works I have produced during this period has arisen under the impress of this responsibility and from a constant effort to pursue a line of development which seems, to me, the only one possible.

6. INFLUENCE. Although, unlike his contemporary Hindemith, Weill did not bequeath to posterity a corpus of pedagogical writings or a codifiable musical language, he must be viewed in retrospect as the most influential German composer of his generation. His example is still invoked today by art composers interested in pursuing stylistic pluralism, whether this is taken to mean the adoption of popular idioms, the 'crossover' from art to commercial music, or stylistic contrast as a compositional element in its own right. Equally important was his advocacy of 'gestic music', by which he meant a theatre score that precisely undergirds and pre-defines the pace, timing, character and mood of the drama. *Der Jasager*, a casebook example of gestic music reduced to essentials, left an indelible mark on 20th-century music theatre, whether that of his younger German contemporaries (from Blacher to Orff), his American colleagues (Copland's *The Second Hurricane*, and thus indirectly Britten's *The Little Sweep*) or the minimalist theatre composers of subsequent decades. Another of his influential characteristics, widely attributed to his association with Brecht and the 'alienation effect', was a supposedly ironic detachment of his music from the text or context. Further, just as Brecht advocated a 'separation of elements' in the art of acting, so Weill's Weimar scores lend themselves to the kind of analysis in which the ingredients are seen to conflict dialectically rather than cohering into a unified whole.

In none of these respects would Weill himself have claimed to be the innovator, however aware he was of the influence he exerted on his contemporaries. He deferred in his writings to Mozart as a quintessentially 'gestic' opera composer, and the stylistic plurality he avowed is, of course, as old as Monteverdi. But by presenting these devices forcefully in modern contexts he offered examples which other composers could, and did, usefully follow. The specific 'tone' of Weill's works of the late 1920s is often consciously quoted, particularly his distinctive handling of bitonal harmony, triadic atonality and jazz timbres.

In the Broadway musical Weill's influence has perhaps been less noticeable, partly because of transformations in the genre itself, partly because none of his shows have remotely approached the iconic status accorded to such contemporary productions as *Porgy and Bess*, *Oklahoma!*, *Annie Get Your Gun* or *Guys and Dolls*. Nonetheless, their importance in elevating the genre's subject matter, sharpness of characterization and general craftsmanship is unquestionable. Finally, in the search for new audiences and hybrid forms of music theatre, Weill's name and the protean example of *Die Dreigroschenoper* continue to be invoked by composers as varied as Hans Werner Henze and John Adams in their own attempts to broaden the base for contemporary music.

WORKS

Weill's opus numbering is incomplete and stops at op.23

for full list including incomplete, lost and projected works, see Drew (A1987)

Edition: *The Kurt Weill Edition*, ed. K. Kowalke and others (New York, 1996–)

STAGE

Das hohe Lied (op, 1, after H. Suderman), 1914, lost

Zriny, 1916 (op, after T. Körner), lost

Ninon von Lenclos (op.1, after E. Hardt), 1920, lost

Zaubernacht (children's pantomime, 1, V. Boritch), Berlin, Kurfürstendamm, 18 Nov 1922, fs lost, vs *US-NH*; arr. Weill as orch suite Quodlibet, op.9, 1923

Pantomime, op.14 (ballet, 3, G. Kaiser), 1924, inc.

Der Protagonist (op, 1, G. Kaiser), op.15, Dresden, Staatsoper, 27 March 1926 (Vienna, 1926)

Royal Palace (ballet-op, 1, Y. Goll), op.17, 1925–6, Berlin, Staatsoper, 2 March 1927, fs lost, vs (Vienna, 1926); reorchd version, Nederlands Congresgebouw, The Hague, 25 June 1971

Na und? (op, 2, F. Joachimson), 1926–7, unperf., lost, sketches in *NH*

Mahagonny (Songspiel, 3 pts, B. Brecht), 1927, Baden-Baden, Kurhaus, Grosser Bühnensaal, 17 July 1927 (Vienna, 1964) [inc. Alabama-Song, Benares-Song]

Der Zar lässt sich photographieren (ob, 1, Kaiser), op.21, 1927, Leipzig, Neues, 18 Feb 1928 (Vienna, 1928)

Die Dreigroschenoper (play with music, prol., 3, Brecht and E. Hauptmann, after J. Gay: *The Beggar's Opera*), 1928, Berlin, Schiffbauerdamm, 31 Aug 1928, vs (Vienna, 1928), fs (Vienna, 1972), facs. edn (New York, 1996) [incl. Moritat von Mackie Messer, Seeräuber-Jenny, Kanonen-Song, Barbara-Song, Zuhälter-Ballade, Ballade vom angenehmen Leben, Lied von der Unzulänglichkeit menschlichen Strebens]

Happy End (comedy with music, 3, D. Lane [E. Hauptmann] and Brecht), 1929, Berlin, Schiffbauerdamm, 2 Sept 1929, vs (Vienna, 1958), fs (Vienna, 1981) [incl. Bilbao-Song, Matrosen-Tango, Surabaya-Johnny, Hosianna Rockefeller]

Aufstieg und Fall der Stadt Mahagonny (op, 3, Brecht), 1927–9, Leipzig, Neues, 9 March 1930 (Vienna, 1929) [derived in part from Mahagonny; incl. Alabama-Song, Denn wie man sich bettet, so liegt man]

Der Jasager (Schuloper, 2, Brecht, after Jap. noh play *Taniko*), 1930, Berlin, Zentralinstitut für Erziehung und Unterricht, 23 June 1930 (Vienna, 1930)

Die Bürgschaft (3, C. Neher, after J.G. Herder: *Der afrikanische Rechtspruch*), 1930–31, Berlin, Städtische Oper, 10 March 1932, vs (Vienna, 1932), fs (Vienna, 1977) [incl. Song der beiden Verkäuferinnen, Song von der Krone des Gewinns, Der Bäcker bäckt ums Morgenrot, Ballade von Cäsars Tod, Schlaraffenland-Song]

Der Silbersee: ein Wintermärchen (play with music, 3, Kaiser), 1932–3, simultaneous premières at Leipzig, Altes; Erfurt, Stadt; and Magdeburg, Stadt, 18 Feb 1933 (Vienna, n.d.)

Die sieben Todsünden (ballet chanté, 8 pts, Brecht), 1933, Paris, Champs-Elysées, 7 June 1933, vs (New York, 1955) [transposed version], fs (Mainz, 1968)

Der Kuhhandel (operetta, 2, R. Vambery), 1934, inc., concert perf. Dusseldorf, Tonhalle, 23 March 1990; rev. as A Kingdom for a Cow (musical play, 3, R. Arkell; lyrics D. Carter), London, Savoy, 28 June 1935 (Mainz, 1989)

Der Weg der Verheissung (biblical drama, 4, F. Werfel), 1934–5, Chemnitz, 13 June 1999, autograph lost, copy in Weill–Lenya Research Center, New York; rev. by Weill and L. Lewisohn as The Eternal Road, 1935–6, New York, Manhattan Opera House, 4 Jan 1937, vs (New York, 1937)

Johnny Johnson (musical play, 3, P. Green), 1936, New York, 44th Street, 19 Nov 1936 (New York, 1936) [incl. Johnny's Song, Mon ami, my friend]

The Common Glory (pageant, P. Green), 1937, inc.

Knickerbocker Holiday (musical comedy, 2, M. Anderson), 1938, New York, Ethel Barrymore Theatre, 19 Oct 1938, vs (New York, 1938) [incl. How can you tell an American, It never was you, September Song, There's nowhere to go but up]

Davy Crockett, 1938 (musical play, 2, H.R. Hays), inc., vs *NH*

Railroads on Parade (pageant, E. Hungerford), 1938–9, New York, World's Fair, 30 April 1939

Ulysses Africanus (musical play, 2, Anderson), 1939, inc., vs *NH*

Lady in the Dark (musical play, 2, M. Hart; lyrics I. Gershwin), 1940, Boston, Colonial, 30 Dec 1940, New York, Alvin, 21 Jan 1941, vs, ed. A. Sirmay (New York, 1941), restored fs and vs, ed. D. Loud and J. Mauceri (New York, 1987) [incl. My Ship, One Life to Live, The Saga of Jenny, Tchaikovsky, This is New]
The Pirate (musical, S.N. Behrman, after L. Fulda), 1942, inc.
One Touch of Venus (musical comedy, S.J. Perelman and O. Nash), 1943, New York, Imperial, 7 Oct 1943, vs excerpts (New York, 1984) [incl. Speak Low]
The Firebrand of Florence (operetta, E.J. Mayer; lyrics I. Gershwin), 1944, New York, Alvin, 22 March 1945 [incl. Sing me not a ballad, You're far too near me]
Street Scene (American op, 2, E. Rice; lyrics L. Hughes), 1946, Philadelphia, Shubert, 16 Dec 1946, New York, Adelphi, 9 Jan 1947, vs (New York, 1947), fs (New York, n.d.) [incl. A Boy Like You; Lonely House; Moon-Faced, Starry-Eyed; Wrapped in a ribbon and tied with a bow; What good would the moon be?]
Down in the Valley (folk op, 1, A. Sundgaard), 1945–8, Bloomington, IN, School of Music, 15 July 1948 , vs (New York, 1948)
Love Life (vaudeville, 2 pts, A.J. Lerner), 1947–8, New York, 46th Street, 7 Oct 1948, 8 songs (New York, 1948) [incl. Green-Up Time, Here I'll stay, I remember it well, Love Song]
Lost in the Stars (musical tragedy, Anderson, after A. Paton: *Cry the Beloved Country*), 1949, New York, Music Box, 30 Oct 1949; fs (New York, n.d., 2/1988) [incl. Cry the Beloved Country, The Hills of Ixopo, Lost in the Stars, Thousands of Miles]
Huckleberry Finn (musical, Anderson), 1950, inc., 5 songs (New York, 1954)

FILM SCORES

You and Me (dir. F. Lang), 1937–8
The River is Blue (Milestone), 1937–8, discarded
Where do we go from here? (dir. G. Ratoff), 1943–4, collab. I. Gershwin
Salute to France (dir. J. Renoir and G. Kanin), 1944

RADIO SCORES

Herzog Theodor von Gothland (Grabbe), 1926, lost
Das Berliner Requiem (radio cant., Brecht), T, Bar, male chorus, wind orch, 1928 (Vienna, 1967)
Der Lindberghflug (Brecht), 1929, collab. Hindemith, withdrawn (Mainz, 1982), rev. as concert work
La grande complainte de Fantômas (R. Desnos), 1933, Radio Paris, 3 Nov 1933, lost
The Ballad of Magna Carta (radio cant., M. Anderson), T, B, chorus, orch, 1940, CBS, 4 Feb 1940 (New York, 1940)
Down in the Valley (radio op, A. Sundgaard), 1945, withdrawn, rev. as school opera

INCIDENTAL MUSIC

Die Weber (G. Hauptmann), 1920, part lost
Gustav III (A. Strindberg), 1927
Leben Eduards des Zweiten von England (Brecht and L. Feuchtwanger, after C. Marlowe), 1928, mostly lost
Konjunktur (L. Lania, Gasbarra, Piscator), 1928, part lost, no.1 (Vienna, 1929)
Katalaunische Schlacht (A. Bronnen), 1928, lost
Petroleuminseln (Feuchtwanger), 1928, part lost, no.10 (Vienna, 1929)
Mann ist Mann (Brecht), 1931, lost
Marie Galante (J. Deval), 1934; 7 songs (Paris, 1934), no.14 arr. L. Berio (Vienna, 1970)
High Wind in Jamaica, 1936; 2 songs, *US-Wc*
Madam, will you Walk? (S. Howard), 1939
Two on an Island (E. Rice), 1939, lost
It's Fun to be Free (B. Hecht), 1941, part lost
Your Navy (Anderson), 1942, part lost
We will Never Die (Hecht), 1943, part lost
A Flag is Born (Hecht), 1946, part lost

ORCHESTRAL

Suite, E, 1918–19
Symphonic Poem, after Rilke: Die Weise von Liebe und Tod, 1919, lost
Symphony no.1, 1921
Divertimento, op.5, 1921–2, part lost
Sinfonia sacra, op.6, 1922, fs lost: Fantasia, Passacaglia, Hymnus
Quodlibet, suite, op.9, 1923 [from stage work Zaubernacht]
Concerto, op.12, vn, wind, 1924
Berlin im Licht, military band, 1928
Kleine Dreigroschenmusik, wind, 1928–9 [from Die Dreigroschenoper]
Symphony no.2, 1933–4

CHORAL AND VOCAL ORCHESTRAL

Sulamith, choral fantasy, S, female chorus, orch, 1920, part lost
Psalm viii, 6vv, 1921, part lost
Divertimento, op.5, male chorus, small orch, 1921–2, part lost
Recordare (Bible: *Lamentations*), op.11, SATB, 3-part children's chorus, 1923
Das Stundenbuch (6 songs, Rilke), T/S, orch, 1923–4, part lost
Der neue Orpheus (cant., Y. Goll), op.[16], S, vn, orch, 1925
Der Lindberghflug (cant., Brecht), T, Bar, chorus, orch, 1929 [after radio score]
Zu Potsdam unter den Eichen (Brecht), TTBB, 1929, also version for 1v, pf [arr. from radio cant. Das Berliner Requiem]
Die Legende vom toten Soldaten (Brecht), SATB, 1929
Kiddush, T, SATB, org, 1946

SONGS

for solo voice and piano unless otherwise stated

[5] Schilflieder (N. Lenau), 1919, lost; Die stille Stadt (R. Dehmel), 1919; Die Bekehrte (J.W. von Goethe), 1921; [2] Rilkelieder, 1921; Frauentanz (7 songs, medieval), op.10, S, 5 insts, 1923; Ich sitze da un' esse klops (anon.), T, 2 pic, bn, 1925; Vom Tod im Wald (ballad, Brecht), op.23, B, 10 wind, 1927; Berlin im Licht (Weill), 1928, arr. military band; Der Abschiedsbrief (E. Kästner), 1933; Fantômas (R. Desnos), 1933; Es regnet (J. Cocteau), 1933; Complainte de la Seine (M. Magre), 1934; Je ne t'aime pas (Magre), 1934; The Fräulein and the Little Son of the Rich (R. Graham), song drama, 1936
2 chansons pour 'L'opéra de quat' sous' (Y. Guilbert), 1938, no.1 lost; Nanas Lied (Brecht), 1939; Stopping by Woods on a Snowy Evening (R. Frost), 1939, inc.; Buddy on the Nightshift (O. Hammerstein), 1942; The Good Earth (Hammerstein), 1942; Oh Uncle Samuel! (Anderson), 1942; One Morning in Spring (McKelway), 1942, lost; Russian War Relief (J.P. McEnvoy), 1942; Schickelgruber (H. Dietz), 1942; Song of the Free (A. MacLeish), 1942; Walt Whitman Songs, 1942, orchd Weill with I. Schlein; Song of the Inventory (L. Allan), 1942; Toughen up, buckle down, carry on (D. Fields), 1942; We don't feel like surrendering today (Anderson), 1942; Was bekam des Soldaten Weib? (Brecht), 1943; Wie lange noch? (W. Mehring), 1944; Come up from the fields, father (Whitman), 1947, orchd C. Surinach, 1956

CHAMBER AND SOLO INSTRUMENTAL

String Quartet, b, 1918
Sonata, vc, pf, 1919–20
String Quartet, 1922–3, withdrawn, movts 3–4 incl. in op.8
String Quartet, op.8, 1923
Albumblatt für Erika, pf, 1937 [arr. of no.7 from stage work Der Weg der Verheissung]

JUVENILIA

Mi addir, high v/high vv, ?pf/org, 1913; Es blühen zwei flammende Rosen, 1913, 1v, pf, inc.; Ich weiss wofür (G. von Güllhausen), 4 male vv, 1914 ; Reiterlied (H. Löns), 1v, pf, 1914; Gebet (E. Geibel), SATB, 1915; Sehnsucht (J. von Eichendorff), 1v, pf, 1916, inc.; [5] Ofrah's Lieder (J. Halevi), 1v, pf, 1916; Im Volkston (A. Holz), 1v, pf, 1916; Volkslied (A. Ritter), 1v, pf, 1917; Das schöne Kind, 1v, pf, 1917; Maikaterlied (O. Bierbaum), 2 S, pf, 1917; Abendlied (Bierbaum), 2 S, pf, 1917, arr. S, pf; Intermezzo, pf, 1917

ARRANGEMENTS

C.M. von Weber: Piano Sonata no.2: Andante, orch, 1918
F. Busoni: Divertimento, op.52, fl, orch/pf, 1922

DAVID DREW/J. BRADFORD ROBINSON (1–4), J. BRADFORD ROBINSON (5–6, work-list, bibliography)

Weimar. Town in Thuringia, Germany. From the stature of medieval 'Vimare', with its emphasis on agriculture and craftwork, it is evident that the town church, built about 1400 and later known as the Herderkirche, did not have the status of a cathedral; however, its monastic institutions, founded earlier, probably cultivated liturgical music. The missals and song manuscripts from that period (in *D-WRl*) show that the medieval town, with its *Kalendbrüder* (male-voice and boys' choirs), organists and Kantors (from 1429) was musically active. A musical establishment at the court came into being only after the building of the residence in 1445. Colonies of rural minstrels, common to all Thuringian towns, indicate a lively tradition of folk music, and the court probably enjoyed peasant plays, sword dances and folksong at tournaments and other such events.

The first outstanding musical achievement at Weimar was the development of the Hofkapelle at the principal residence of Torgau in the late 15th century. The Hofkantorei was resident in Weimar for months at a time and played a leading part in the music of the area. Its directors included such distinguished composers as Adam von Fulda (from 1490), Adam Rener (from 1507), Johann

1. Anna Amalia, Duchess of Saxe-Weimar: portrait by Johann Ernst Heinsius, 1770

2. *Weimar Hoftheater after the reconstruction by Nikolaus Friedrich von Thouret, 1798–1800: sketch by Friedrich Gilly, pen and ink, 1798, published in the 'Goethe Jahrbuch' (1912)*

Walter (i), Conrad Rupsch (Luther's musical adviser) and Paul Hofhaimer; the Kantorei benefited from the enlightened patronage of the artistically inclined Duke Frederick the Wise (*d* 1525). Walter's Weimar choirbooks (which have been returned by the Jena University library to the ownership of the church in Weimar), the comprehensive choir inventory and the Weimar Song Manuscript (1537) based on Netherlandish sources, testify to the high standards of music in the town; they include works by Obrecht, Josquin, Isaac and La Rue. In the later 16th century another group of teachers and composers, including Johann Stolle, Nicolaus Rosthius and Melchior Vulpius, contributed to the development of choral music in Weimar; in addition to their own works, those of Lassus, Praetorius, Philips, Regnart, Hassler, the Gabrielis and others were performed. Vulpius taught at the Gymnasium from 1596 to 1615; the school regulations, particularly the 'Kromayerschen Schulordnungen' (from 1614), strictly define the use of music in schools, and reflect the ideas of the Reformation and those of the humanist and rationalist movements (Comenius and Ratichius).

In 1586 the Hofkapelle was transferred to Weimar from the residence at Altenburg, where it continued to provide music until 1602. J.H. Schein was court Kapellmeister in 1615–16. In the 17th century the excellence of the choral music and popular devotional drama also attracted prominent musicians such as Adam Drese, Heinrich Schütz and Georg Neumark to work at the pietistic and puritanical ducal court. The founding of the Fruchtbringenden Gesellschaft des Palmenordens in Weimar was an important part of the literary and cultural movement of the Baroque. Music in Weimar reached a peak in the late 17th century and early 18th through such figures as G.C. Strattner, J.P. von Westhoff and J.G. Walther (town organist, 1707–48). Bach was a violinist in the Hofkapelle in 1703 (8 April – 14 August) and was court organist and chamber musician from 1708 to 1717. This period of his activity is chiefly noted for the composition of organ works (preludes and fugues and the *Orgelbüchlein*) and cantatas, although he also made keyboard transcriptions of concertos, including works by the young prince Johann Ernst (*d* 1715). Bach was succeeded by J.M. Schubart and J.C. Vogler, and Weimar has since maintained a tradition of organ music.

The transitional stages of Rococo and *Sturm und Drang* contributed significantly to the most important period in Weimar's cultural history. Under the protection and encouragement of the Duchess Anna Amalia (reigned 1756–75; fig.1), herself a composer, a social and musical circle came into being at her 'Musenhof' ('court of the muses') at the Wittum Palace, to which all the leading intellectual figures of Weimar belonged. Both there and in the castles at Belvedere, Tiefurt and Ettersburg there was diverse vocal and instrumental music with many new works, including the first performances of *Die Jagd* by Hiller and Weisse (1770), and Anton Schweitzer's *Alceste*, to a libretto by Wieland (1773). The Kapelle that developed under Anna Amalia from 1756 (when Johann Ernst Bach became Kapellmeister) grew to become the

Hof-Theater.

Weimar, Mittwoch den 28. August 1850.

Zur Goethe-Feier:

Prolog

von Franz Dingelstedt, gesprochen von Herrn Jaffé.

Hierauf:

Zum Erstenmale:

Lohengrin.

Romantische Oper in drei Akten,
(letzter Akt in zwei Abtheilungen)
von Richard Wagner.

Heinrich der Finkler, deutscher König .... Herr Höfer.

Anfang um 6 Uhr. Ende gegen 10 Uhr.

Die Billets gelten nur am Tage der Vorstellung, wo sie gelöst worden.

Der Zutritt auf die Bühne, bei den Proben wie bei den Vorstellungen, ist nicht gestattet.

Das Theater wird halb 5 Uhr geöffnet.

Die freien Entréen sind ohne Ausnahme ungiltig.

3. Playbill for the première of Wagner's 'Lohengrin', Hoftheater, Weimar, 28 August 1850; the opera, conducted by Liszt, was preceded by a prologue in memory of Goethe

modern Weimarer Staatskapelle (renamed in 1919). E.W. Wolf, Corona Schröter, K.S. Seckendorff, E.F. Krantz, J.G. Herder, Wieland and Goethe (director of the newly founded Hoftheater from 1791 to 1817) were the outstanding figures of the Classical period in Weimar. Opera, symphony, chamber music, concerto and choral music all flourished, and the Viennese classics soon became popular with the progressive middle classes. Goethe's house on the Frauenplan became a centre of musical and social activity; Hummel was summoned to the house in 1819, while other guests included Zelter, the young Mendelssohn and Carl Eberwein. Among other notable musicians at that time were A.E. Müller (Kapellmeister from 1810 to 1817), A.F. Haeser (choral director from 1817), J.M. Rempt (Kantor from 1788) and J.G. Töpfer (organist from 1830).

The Romantic age in Weimar was ushered in by Hummel (court Kapellmeister from 1819 to 1837), H.-A.-B. Chelard (Kapellmeister 1840–52) and above all by Liszt, in Weimar from 1842 to 1861 though permanent Kapellmeister only after 1848. The leading patron at this time was the Grand Princess and Grand Duchess Maria Paulowna, daughter of the Tsar of Russia and a pupil of Hummel. Liszt described Weimar as the 'magnetic mountain' of the fairy tale, and indeed his presence there made the town the centre of the German avant garde. His home was a mirror of the European musical panorama, and was frequented by such musicians as Wagner, Raff, Brahms, Cornelius, Smetana, Borodin, Glazunov, Rubinstein and Bülow, while students and young virtuosos gathered at his second house, the Hofgärtnerei (now the Liszt Museum). The Hofkapelle became one of Germany's leading ensembles, giving premières of *Lohengrin* (1850; fig.3) and Cornelius's *Der Barbier von Bagdad* (1858), as well as the second production (after Dresden) of *Tannhäuser* (1849) and revivals of notable contemporary works, such as Berlioz's *Benvenuto Cellini* (1852). Saint-Saëns' *Samson et Dalila* received its première there in 1877. In 1872 Carl Müller-Hartung founded the Ducal Orchestral School, the first such institution in Germany. It was renamed the Orchestral and Musicians' School in 1877, received encouragement from Liszt and Bülow and acquired a department of opera in 1885 and a department of drama in 1898. In 1930 it was given the status of a Staatliche Hochschule für Musik, and in 1956 was renamed the Franz Liszt Hochschule. Shortly afterwards it became the venue for international summer courses which still enjoy great prestige. Composers' congresses were also held in the town. Richard Strauss was Kapellmeister from 1889 to 1894, during which time the first performances were given of his *Guntram* (1894) and Humperdinck's *Hänsel und Gretel* (1893). Strauss also conducted the première of his *Don Juan* in 1889. Busoni gave piano masterclasses in the Tempelherren-Haus in the Weimar Park in 1901–2.

After World War I Krenek, Stravinsky, Vogel and Hindemith revitalized Weimar's musical life, with many premières given under the auspices of the Bauhaus festivals. The Staatskapelle (Hofkapelle) conductors Peter Raabe (1907–20), Ernst Praetorius (1924–33), Paul Sixt (1933–45) and Hermann Abendroth (1945–56) maintained the orchestra's fine tradition. After World War II the Hochschule für Musik and the Deutsches Nationaltheater also continued to flourish. The original theatre was built in 1825 under Goethe's supervision; it was rebuilt in neo-classical style in 1926 and destroyed in 1944. In 1948 the company was the first to reopen in postwar Germany. Rebuilding took place in 1975 and 1997–8. The town has become the leading musical and cultural centre of Thuringia, with music congresses, festivals, castle concerts and jubilee celebrations among its musical activities. Many musicians and composers have been active in creative and pedagogic work in Weimar, including Ottmar Gerster (director of the Musikhochschule, 1948–51), Alfred Boeckmann, Johann Cilenšek (director of the Musikhochschule, 1961–72), Herbert Kirmsse and the organist J.-E. Köhler (organist at the Herderkirche, 1934–75, and lecturer at the Musikhochschule, 1934–80). The Ottmar Gerster Music School and the special music school in Belvedere provide a musical education which can lead on to studies at the Hochschule. Church music forms a significant part of the town's musical life. Musical directors at the Nationaltheater have included Hermann Abendroth, Gerhard Pflüger, Lothar Seyfarth, Rolf Reuter, Peter Gülke, Hans-Peter Frank and G.A. Albrecht. Weimar was designated the 1999 cultural capital of Europe in celebration of the 250th anniversary of Goethe's birth, the 240th anniversary of

Schiller's birth and the tenth anniversary of German reunification.

G. KRAFT/DIETER HÄRTWIG

Weimar, Georg Peter (*b* Stotternheim, nr Erfurt, 16 Dec 1734; *d* Erfurt, 19 Dec 1800). German composer. From 1752 he attended the Ratsgymnasium in Erfurt, studying music with J. Adlung; from 1758 he was a court musician (bass singer and violinist) and deputy Kantor in Zerbst, where he continued his study of music under J.F. Fasch, C. Höckh (violin) and occasionally under C.P.E. Bach. He also acted as singing and clavier teacher to the princess. In 1763 he became Kantor at the Kaufmannkirche, Erfurt, a post that he retained until his death. He was also appointed music director at the Ratsgymnasium (1774), music master at the Catholic Gymnasium (1776), took full charge of the city's auxiliary choirs, and organized a great number of sacred concerts, performing large-scale works including Handel oratorios; his 'incomparable' level of activity drew special praise from Gerber. He composed much four-part church music in the homophonic style associated with late 18th-century Protestant *Kantormusik*, notably a two-volume motet and chorale aria collection of 1782–5, and edited a volume of Protestant chorale melodies in J.C. Kittel's settings, posthumously completed by C.M.F. Gerbhard and then published by Weimar's son. Weimar is also the author of an account of musical life in Erfurt which appeared in Cramer's *Magazin der Musik* (ii, 1784/*R*).

WORKS

Die Schadenfreude (children's operetta), vs (Leipzig, 1779); Lieder mit Klavier-Begleitung (Tallinn and Leipzig, 1780); Versuch von kleinen leichten Motetten und Arien für Schul-und Singchöre (Leipzig, 1782–5); Motetten, 4vv (Leipzig, 1785); Versuch kurzer praktischer übungs-Exempel allerley Art für Schüler (Leipzig, 1785); Vollständig rein und unverfälschtes Choral-Melodienbuch . . . grösstenteils mit der harmonischen Begleitung . . . J. Chr. Kittels gefertigt (Erfurt, 1803); 13 cants. and odes, *D-Bsb*; *Dl*, *Kdma*, *LEm*, *PL-GD*; 18 motets and arias, *GB-Lbl*; motet, aria, *D-LÜh*; 3 Trauergesänge, *Kdma*; Rondo auf Dankgelegenheiten von Weimar, *Kdma*; 2 secular lieder, 2 sacred pieces, 4 pieces for wind insts, in contemporary anthologies

Other works, incl. Passion orat, lost, mentioned in Gerber, Kümmerle

NIGEL SPRINGTHORPE

Weinberg, Henry (*b* Philadelphia, 7 June 1931). American composer. He studied at the University of Pennsylvania (BFA 1952) and Princeton University (MFA 1961; PhD 1966), where his composition teachers included Sessions and Babbitt. He also studied with Dallapiccola in Florence. Other influences include Elliott Carter, George Perle, Ralph Shapey and Edgard Varèse. A member of the composition department at Queens College, CUNY, he also served as composer-in-residence at the Koussevitzky Foundation Studio, Tanglewood (1968) and the Marlboro Festival (1968). Other distinctions include the Naumburg Award (1967), a Brandeis Creative Arts Citation (1969), the Prix de Rome (1968–70) and commissions from the Fromm Foundation.

Weinberg is especially interested in rhythmic structure, often varying a steady rhythmic flow through the simultaneous use of three or more metrical cycles. The resultant macro-rhythm is organized around ratios similar to those of the chromatic scale. Multiple cycles, therefore, substitute what Weinberg calls 'rhythmic harmony' for 'rhythmic monody'. Examples of this are evident in the String Quartet No.2 (1960–64) and *Cantus commemorabilis I* (1966). Recent compositions such as the brass work *Fanfare* (1992) and *Three Pieces for Organ* (1993) derive rhythmic sets from the ratios of an all-interval note row and emphasize new possibilities for organizing crescendos, glissandos, accelerandos and other musical details.

WORKS
(*selective list*)

Vocal: Vox in Rama (Bible: *Jeremiah* xxxi), chorus, 1956; 5 Haiku, S, 5 insts, 1958; Song Cycle (G.M. Hopkins, P. Valéry, W. Stevens), S, pf, 1960; L'infinito (G. Leopardi), chorus, 1971; Double Solo (L. Zukofsky), 1v, vn, 1972; Unfinished Rhymes (Rime incompiute), T, Bar, cl, db, 1985

Inst: Sonata, vc, pf, 1955; Str Qt no.1, 1959; Str Qt no.2, 1960–64; Cantus commemorabilis I, 12 players, 1966; Cantus commemorabilis II–VI, chbr orch, 1972–90; Melopoeia, orch, 1972; Fanfare, brass, 1992; 3 Pieces, org, 1993

Principal publishers: Presser, Apogee, MCA

LINDA ARDITO

Weinberg [Vaynberg], **Moisey** [Mieczysław] **Samuilovich** (*b* Warsaw, 8 Dec 1919; *d* Moscow, 2 Feb 1996). Russian composer of Polish origin. He began writing music in early childhood and at the age of 10 played the piano in the theatre where his father worked. Two years later he entered the Warsaw Conservatory where he studied with Jozef Turczinski, who had been a pupil of Osipova in St Petersburg. Weinberg's pianistic talent was noticed by Joseph Hoffman who arranged for the boy to study in America, a plan which was forestalled by the outbreak of World War II. Weinberg then emigrated to the Soviet Union. Although he had written his first two compositions in Poland (the Berceuse for piano and the First String Quartet, of 1935–7), serious study only began in 1939 when he joined Zolotaryov's class at the Minsk Conservatory, graduating in 1941. During the war he settled in Tashkent where he married the daughter of the actor and director of the Jewish Theatre, Solomon Mikhoels. It was then he met Shostakovich whose ideas about music shattered Weinberg's conception of art: 'It was as if I had been born anew . . .. Although I took no lessons from him, Dmitri Shostakovich was the first person to whom I would show each of my new works' [Nikitina]. This friendship lasted until Shostakovich's death.

Along with Myaskovsky, Weinberg bravely refused to 'repent' of modernist leanings during the official attacks on composers of 1948 from the CPSU resolution on Muradeli's *The Great Friendship*. Weinberg, when remarking that 'it was a historical resolution' was cut short by Myaskovsky who retorted 'not historical, but hysterical' [Nikitina]; he now received little official help and made a living writing for the theatre and the circus. On February 6 1953 he was jailed because his wife's uncle – the Kremlin physician Vovsi – had been labelled an enemy of the people, and partly as a result of the continuing attacks from the press. He spent three months in prison and was saved from inevitable death by Shostakovich who wrote a letter in his defence. Despite this, Weinberg was not inclined to regard himself as a political victim: 'I cannot say about myself what others say about themselves – that they were persecuted. I would say that in those years the powers-that-be did nothing to popularize my compositions. What was performed, was performed due to a performer's express desire to do so. . . . Perhaps, some pieces were not performed and some were banned' [ibid.].

During this era Weinberg's works had indeed attracted attention from Russia's renowned instrumentalists including Gilels and Mariya Grinberg, and by late 1950s and early 1960s these pioneers were joined by Rostropovich and the conductors Gauk and Sanderling, who often gave the premières of works soon after their completion. During the last two decades of his life his output increased unabated; the several operas he wrote during these years can be regarded as a synthesis of the techniques he mastered in his symphonic and choral works.

Weinberg's compositional style is influenced by Shostakovich, Prokofiev, Myaskovsky, Bartók and Mahler; his works are often based on a programme, largely autobiographical in nature, and they reflect on the fate of the composer and of humanity in general. The mood is often meditative, especially in his sacred choral works, in which sorrow succeeded by radiant catharsis is a common theme. He regarded his opera *Passazhirka* ('The Passenger') as his most important work, and one which was central to the conception of several others, such as the Symphony no.21 written in commemoration of the burning of the Warsaw ghetto where many of his close relatives died. The imagery of many of his works is connected with his memories of his childhood and of World War II, and consequently themes relating to the destruction of childhood (and, by extension, purity, serenity and stability) are central to his aesthetic and are frequently symbolized by the musical material. Despite this, Weinberg strove for a reflection of a philosophy of universal harmony and unity by means of neo-classical, rationalist clarity and proportion. For all the importance of the word, the programmatical nature of many works and the occasional Slavic and Jewish thematic materials, his music has an absolute – even abstract – quality, with similar themes able to assume varied semantic hues in given environments.

WORKS
(*selective list*)

STAGE

Ops: Passazhirka [The Passenger] (2, Yu. Lukin, A. Medvedev, after Z. Pomysz), op.97, 1967–8; Madonna and the Soldier (3, Medvedev), op.105, 1970; Lyubov' d'Artanyana [D'Artagnan in Love] (comic op, 3, Ye. Galperina, after A. Dumas: *The Three Musketeers*), op.109, 1972; Congratulations (2, Weinberg, after S. Aleichem), op.111, 1975; Lady Magnesia (1, Weinberg, after G.B. Shaw: *Passion, Poison and Petrification, or the Fatal Gazogene*), op.112, 1975; The Portrait (3, Medvedev, after N. Gogol'), op.128, 1980; The Idiot (4, Medvedev, after Dostoyevsky), op.144

Ballets: Give Battle for the Motherland (1), 1942 [lost]; Zolotoy klyuchok [The Golden Key] (6, A. Gayamov, after A. Tolstoy), op.55, 1954–5; Belaya khrizantema [The White Chrysanthemum] (3, I. Romanovich, A. Rumnev), op.64, 1958

Operettas: Comrades in Arms, 1942 [lost]; Clarette's Career (3, Levik), 1942 [lost]; The Golden Dress (2, Yu. Annekov, Ye. Galperina), op.129, 1980

VOCAL

Vocal orch: In my Native Land (Russ. children), cant., A, boys' chorus, orch, op.51, 1952; Love's Diary (S. Wygocki), cant., T, boys' chorus, chbr orch, op.87, 1965; Pyotr Plaskin (J. Tuwim), cant., A, T, chbr orch, op.91, 1965; Rekviyem [Requiem] (M. Dudin, Fukagawa, F. García Lorca, D. Kedrin, S. Teasdale, A. Tvardovsky), S, children's chorus, chorus, orch, op.96, 1965–7; Hiroshima Five-Line Stanzas (M. Fukagawa), cant., chorus, orch, op.92, 1966; Triptikh [Triptych] (L. Staff), B, orch, op.99, 1968; Peace for the People (S. Marshak), suite, chorus, orch, op.149, 1988

Songs (for 1v, pf) after A. Blok, A. Fet, A. Mickiewicz, G. Mistral, G. Nikolayeva, S. Petőfi, A. Prokof'yev, F. Schiller, W. Shakespeare, H. Toumanian, Tuwim, F. Tyutchev, V. Zhukovsky

INSTRUMENTAL

25 syms.: no.1, op.10, 1942; no.2, str, op.30, 1946; no.3, op.45, 1949; no.4, op.61, 1957; no.5, op.76, 1962; no.6 (S. Galkin, L. Kvitko, M. Lukonin), boys' chorus, orch, op.79, 1962–3; no.7, hpd, str, op.81, 1964; no.8 'Tvetï Pol'shi' [The Flowers of Poland] (Tuwim, trans. M. Pavlova), T, chorus, orch, op.83, 1964; no.9 'Lines that have Escaped Destruction' (V. Broniewski, Tuwim), spkr, chorus, orch, op.93, 1940–67; no.10, chbr orch, op.98, 1968; no.11 'Solemn Sym.' (D. Bedny, A. Bogdanov, M. Gor'ky, P. Ediyet), chorus, orch, op.101, 1969; no.12, op.114, 1975–6; no.13, op.115, 1976; no.14, op.117, 1977; no.15 'I Believe in this Earth' (M. Dudin), S, Bar, female chorus, orch, op.119, 1977; no.16, op.131, 1981; no.17 'Memory', after A. Akhmatova, op.137, 1982–4; no.18 'War, there isn't a Crueller Word' (S. Orlov, Tvardovsky), chorus, orch, op.138, 1982–4; no.19 'The Bright May', after Akhmatova, op.142, 1985; Chbr Sym. no.1,

op.145, 1987; Chbr Sym. no.2, op.147, 1987; no.20, op.150, 1988; Chbr Sym. no.3, op.151, 1990; no.21, op.152, 1991; Chbr Sym. no.4, op.153, 1992

LYUDMILLA DMITRIYEVNA NIKITINA

Weinberger, Jaromír (*b* Prague, 8 Jan 1896; *d* St Petersburg, FL, 8 Aug 1967). American composer of Czech birth. After studying composition with Křička, Talich and Karel, he became a pupil of Vítězslav Novák at the Prague Conservatory; he went on to study at the Leipzig Conservatory, where his teachers included Reger. His style, deply rooted in the nationalistic traditions of Smetana and Dvořák, displays a solid contrapuntal technique, an adroit blend of polyphonic textures and colouristic orchestration, and a post-Romantic harmonic language. Works such as *Une cantilene jalouse* (1920), *Colloque sentimental* (1920) and *Scherzo giocoso* (1920) were critically acclaimed.

In 1926 Weinberger completed *Švanda dudák* ('Schwanda, the Bagpiper'), his most successful work. Between 1927 and 1931 the opera received over 2000 performances. Its earthy tunefulness is best illustrated by

Jaromír Weinberger

the 'Polka', which, played on bagpipes by the devil in hell, is a polytonal parody. Other folk-influenced works followed in quick succession; these include *Christmas* (1929), an orchestral work based on traditional Czech carols that was performed before the Christmas address of the Czech president every year until the Nazi occupation. Among his other major works are the Passacaglia for Orchestra and Organ (1931) and the operas *Milovaný hlas* ('Die geliebte Stimme', 1930), *Lidé z Pokerflatu* ('The Outcasts of Poker Flat', 1932) and *Valdštejn* ('Wallenstein', 1937). The latter three of these reveal a movement towards use of realistic spoken dialogue and leitmotivic associations.

By 1938, when Weinberger and his wife emigrated to the USA, the composer's manic depression had grown increasingly problematic and had begun to affect his creative work. A widely divergent group of compositions ensued, among them *Ten Characteristic Solos* for drum and piano (1939), *Mississippi Rhapsody* (1940), *Prelude to the Festival* for symphonic band (1941) and *The Way to Emmaus*, a cantata for high voice and organ (1940). *Prelude and Fugue on a Southern Folktune* (1940), the *Lincoln Symphony* (1941) and *Czech Rhapsody* (1941) reflect his continued interest in nationalistic material. During the late 1940s and 50s several sacred compositions occupied the composer's attention. These included *Ecclesiastes* (1946), *Six Religious Preludes* (1946) and *Préludes réligieux et profanes* (1954).

In 1949 Weinberger settled in St Petersburg, Florida, where he slowly descended into a state of deep depression. After living in relative seclusion for most of his remaining years, he committed suicide. An enigmatic and tragic

figure, he longed for the return of a culture that, after the height of his career, had ceased to exist.

WORKS

Stage: Kocourov (op), 1923–4, Vienna; Švanda dudák [Schwanda, the Bagpiper] (Spl, 2, M. Kareš), 1926, Prague, 27 April 1927 [as Schwanda, der Dudelsack-pfeifer (lib. rev. M. Brod), Breslau, 16 Dec 1928]; Milovaný hlas [Die geliebte Stimme] (op, 3, Weinberger, after R. Michel), 1930, Munich, 28 Feb 1931; Lidé z Pokerflatu [The Outcasts of Poker Flat] (op, 5, Kareš, after B. Harte), 1932, Brno, 19 Nov 1932; Jarní Bouře [Frühlingsstürme] (operetta, G. Beer), 1933, Berlin 1933; Na růžích ustláno [In a Bed of Roses] (operetta, B. Polach and F. Kožík), Brno, 1933; Apropó co dělá Andula? [By the Way, What is Andula Doing?] (operetta, Polach and J. Žalman), Brno, 5 Sept 1934; Císař pán na třesních [The Emperor and Lord of the Cherries] (operetta, Polach and Žalman), Prague, Nov 1936; Valdštejn [Wallenstein] (op, 6 scenes, Kareš, after F. von Schiller), 1937, Vienna, 18 Nov 1937; Saratoga (ballet), 1941

Orch: Lustspiel, ov., 1913; Scherzo giocoso, 1920; Puppenspiel Ouverture (1924); Christmas, 1929; Liebesplauder, Neckerei, small orch, 1929; Ouverture zu einem ritterlichen Spiel (1931); Passacaglia, orch, org, 1931; Chant hébraïque [Neima Ivrit] (1936); Conc., brass, timp, orch (1939); Under the Spreading Chestnut Tree (1939, rev. 1941); The Bird's Opera (1940); Conc., a sax, orch, 1940; Homage to the Pioneers, band, 1940; Legend of Sleepy Hollow (1940); Mississippi Rhapsody, band, 1940; Prelude and Fugue on a Southern Folktune, 1940 [based on Dixie]; Song of the High Seas (1940); Czech Rhapsody (1941); Lincoln Symphony (1941); Prelude to the Festival, band, 1941; Afternoon in the Village, band, 1951; Préludes réligieux et profanes, 1954; Aus Tirol, folkdance and fugue, 1959; A Waltz Overture, 1960

Vocal: Hatikvh, 1v, pf, 1919; e Songs (Czech), 1v, pf, 1924; Psalm cl (solo cant.), high voice, org (1940); The Way to Emmaus (solo cant.), high voice, org, 1940; Ecclesiastes [Kohelet], S, Bar, mixed chorus, org, bells (1946); Of Divine Work, anthem, mixed chorus, 1946 [from Bible: *Ecclesiastes*]; Ave, rhapsody, chorus, orch, 1962; 5 Songs from Des Knaben Wunderhorn, S, pf, 1962 (manuscript)

DAVID Z. KUSHNER

Weinberger, Josef (*b* Lipto St Miklos, Moravia, 6 May 1855; *d* Vienna, 8 Nov 1928). Austrian music publisher. On 1 November 1885 he founded a music publishing firm in Vienna in partnership with Carl Hofbauer. In 1890 Weinberger started to publish music on his own. His earliest significant work was the lavish *Album der Wiener Meister*, issued for the International Music and Theatre Exhibition in Vienna in 1892 and including pieces by Brahms, Bruckner, Goldmark, Johann Strauss (ii), Suppé and others. In 1897 Weinberger was a founder-member of the Gesellschaft der Autoren, Komponisten und Musikverleger (AKM), one of the earliest societies of its kind; for the rest of his life he was either its chairman or its honorary president. Also in 1897 Weinberger began to publish works by Mahler, starting with the *Lieder eines fahrenden Gesellen*; this was followed by the First Symphony (1899), *Des Knaben Wunderhorn* (1900), Third Symphony (1902) and *Das klagende Lied* (1902). Weinberger was a co-founder of Universal Edition (1901), which he allowed to use his premises until it moved into the Musikvereinsgebäude in 1914. He published operas by various composers of the Austrian Empire, such as Kienzl, Goldmark and Brüll, and later issued Franz Schmidt's *Fredigundis* and Korngold's *Die Kathrin* and *The Silent Serenade* (in German translation as *Die stumme Serenade*). He acquired the stage rights for operettas by Suppé, Millöcker, Zeller, Genée and, most importantly, J. Strauss (ii), meanwhile publishing operettas by Eysler, Fall, Straus, Kálmán, Lehár, Robert Stolz and many others. Foreign composers in the catalogue included Smareglia and Wolf-Ferrari (eight operas).

After Weinberger's death the firm was run by Otto Blau (1893–1980). In 1938 it was taken over by the Berlin firm of Sikorski and Weinberger's name was erased from the German trade register for the duration of World War II. After the war it was successfully re-established in Vienna. In the mid-1950s several of Franz Schmidt's works were acquired, including the three quintets written for Paul Wittgenstein and two organ works. The firm remains active and has branches in London (where Malcolm Williamson and Paul Patterson are among the composers represented) and Frankfurt.

ALEXANDER WEINMANN/NIGEL SIMEONE

Weiner, Lazar (*b* Kiev, 24 Oct 1897; *d* New York, 10 Jan 1982). American composer, pianist and conductor of Ukrainian birth, father of YEHUDI WYNER. In 1914 he emigrated to the USA, where he became an accompanist and coach to prominent singers in New York, while studying composition with Frederick Jacobi, Robert Russell Bennett and Joseph Schillinger. He also conducted several choruses, among them the Workmen's Circle Chorus (1930–67). From 1930 to 1975 he was music director of the Central Synagogue, and in that capacity was responsible for first performances of compositions by Ernest Bloch, Darius Milhaud and Joseph Achron, as well as of his own works.

A leading exponent of Jewish music in the USA and an expert on Yiddish art song, Weiner taught seminars at Hebrew Union College, the Jewish Theological Seminary and the 92nd Street Y. He served as music director of the WABC weekly radio programme 'The Message of Israel' for 35 years (from 1934), and composed musical comedies for the Second Avenue Theater, long a centre for Yiddish productions, as well as numerous Yiddish art songs. His opera *The Golem* was produced at the 92nd Street Y in 1981. Weiner's interest in Jewish life and teachings is reflected in his music, through which he sought to convey and preserve the richness and beauty of Yiddish culture.

WORKS

Stage: Hirsch Lekert (ballet), 1943; The Golem (op, R. Smolover), 1956; 4 other ballets, incl. Pantomine

Cants.: Man in the World (A. Nissenson), 1939; To Thee, America (A. Leyeles), 1943; The Legend of Toil (I. Goichberg), 1945; The Last Judgement (S. Rosenbaum, after I.L. Peretz), 1966; Amos (Bible), 1970; 2 others

Liturgical works: Sabbath Morning Service, cantor, SATB, kbd, 1956, rev. 1973; Torah Service, SATB, org, 1958; Friday Evening Service, cantor, chorus, 1973; *c*100 others

Songs (1v, pf, unless otherwise stated): 3 Biblical Songs, 1972; 2 Humoresques (A. Lutzsky), 1973; Song Cycle (A. Heschel), 1974; Merciful God (K. Molodowsky, trans. S. Rosenbaum), 1v, vc, pf, 1980; *c*150 others

Inst: Chanson hébraïque, vc, pf, 1929; Prelude, str, 1936; Str Qt, 1937; 10 Variations, orch, 1937; Trio, ob, cl, bn; other orch and chbr works; pf pieces

6 collections of Jewish art songs: 1948, 1961, 1968, 1973, 1978, 1980

MSS in *US-NYp*

Principal publishers: Belwin-Mills, C. Fischer, J. Fischer, Mercury, Transcontinental, Workmen's Circle

VIVIAN PERLIS

Weiner, Leó (*b* Budapest, 16 April 1885; *d* Budapest, 13 Sept 1960). Hungarian composer and teacher. In 1901 he entered the Buda Music Academy, where until 1906 he was a pupil of Koessler. He won the Liszt stipend (1906), the Volkmann and Erkel prizes for the Serenade op.3, the Haynald Prize for his chorus Agnus Dei, and the Schunda Prize for the *Magyar ábránd* ('Hungarian Fantasy') for tárogató and cimbalom. Weiner worked as répétiteur at the Pest People's Theatre (1907–8), and then the Franz Josef Coronation Prize enabled him to visit Vienna, Munich, Berlin and Paris. In 1908 he was appointed to teach theory at the Buda Academy, serving as professor of composition (1912–22) and of chamber music (1920–57). His work in the latter faculty attracted international notice and helped to establish high standards in Hungarian ensemble playing; his legacy as a teacher left its mark on a generation of musicians that included Dorati and Solti. At the academy he established a conductorless orchestra of advanced students (1928). Among awards made to Weiner later in his career were the Coolidge Prize (1922) for the Second Quartet, the State Prize (1933) for the Suite op.18, and two Kossuth Prizes (1950, 1960). A memorial room has been established at his former home in Budapest.

A composer of highly accomplished technique, Weiner was essentially a Romantic, and he remained opposed to the innovations of Stravinsky and Bartók, while sharing to some extent the nationalist concerns of Bartók and Kodály. Never a folk music collector himself, he was introduced to folksongs by Lajtha; the first compositional fruit was the Suite op.18. But the more fundamental influences on his music were Beethoven, Mendelssohn, Bizet and, occasionally, Brahms; under their influence he developed a style of clarity and balance, with a command of the orchestra that is most evident in the transcriptions. It is possible to distinguish four periods in his output: a pre-World War I phase (1905–13), then a neo-classical phase (1918–24), a period in which Hungarian folk material becomes the main feature of his style (1931–51), and a final period (1952–60) of which the symphonic poem *Toldi* op.43 is the most characteristic example. Notable also are his orchestral transcriptions of Bach, Liszt and Schubert, and of Bartók's *Two Romanian Dances*; many of his transcriptions were made popular internationally by the conductor Fritz Reiner. In the final years of his life Weiner published a complete edition of Beethoven's piano sonatas.

WORKS

STAGE AND ORCHESTRAL

A gondolás [The Gondolier] (op, 3, G. Szini, I. Balla), collab. A. Szirmai, unperf., lost; Csongor és Tünde (incid music, M. Vörösmarty), op.10, 1913, Budapest, 6 Dec 1916; Csongor és Tünde (ballet, 1, L. Màrkus, after Vörösmarty), 1927, Budapest, 8 Nov 1930

Scherzo, op.1, 1905, destroyed; Serenade, op.3, small orch, 1906; Farsang [Carnival], op.5, small orch, 1907; Csongor és az ördögfiak [Csongor and the Devil's Sons], op.10, orch, 1913 [from ballet]; Csongor és Tünde, ballet suite, op.10b (1937); Pf Concertino, op.15, 1923; Katonásdi [Toy Soldiers], op.16a, 1924; Magyar népi táncok [Hungarian Folk Dances], suite, op.18, 1931; Divertimento no.1, op.20, str, 1923; Pastorale, phantaisie et fugue, op.23, str, 1938; Divertimento no.2 (Magyar népi dallamok), op.24, str, 1938 [arr. op.24a]; Divertimento no.3 (Impressioni ungheresi), op.25, 1950

Ballata, op.28, cl, orch, 1949 [arr. op.8]; Romanze, op.29, vc, hp, str, 1949 [arr. op.14]; Változatok egy magyar népdal fölött [Variations on a Hungarian folksong], op.30, 1949; Preludio, notturno e scherzo diabolico, op.31, 1950 [arr. op.7]; Divertimento no.4, op.38, 1951; Divertimento no.5, op.39, 1951; 3 magyar népi tánc [3 Hungarian Folkdances], salon orch (1951); Ünnepi hangok [Festal Sounds], 1951; Toldi, op.43, sym. poem, after J. Arany, 1952; Passacaglia, op.44, 1955 [arr. op.17]; Magyar gyermek- és népdalok [Hungarian Children's Songs and Folksongs], small orch, 1955; Vn Conc. no.2, f♯, op.45 [arr. Vn Sonata no.2], 1957; Vn Conc. no.1, D, op.41, 1958 [arr. op.9]

OTHER WORKS

JOHN S. WEISSMANN/MELINDA BERLÁSZ

Weinert [Veinert, Wainert, Wajnert, Weynert], **Antoni** (*b* Lusdorf, 2 June 1751; *d* Warsaw, 18 June 1850). Polish flautist and composer of Czech origin. He studied music in his native Bohemia, and in 1773 moved to Poland with Prince Lubomirski, remaining at his residence in Opole as a music teacher until 1774. He then moved to Warsaw, where he became a flautist in the theatre orchestra. From 1778 to 1795 he was first flautist in the court orchestra of King Stanisław August, where he played until 1795; he was also its director for many years (until 1795). After the fall of the Polish state he moved to Rogalin (near Poznań) as a musician at the ducal court of the Raczyńskis. In 1803 he returned to Warsaw and until 1839 was first flautist at the National Theatre; he taught singing, the piano and flute, at first privately, and later gave singing lessons at the Warsaw Conservatory until its closure in 1830. He also gave concerts as a flute player in Warsaw. He composed the Singspiele *Skrupuł niepotrzebny* ('Unnecessary Scruple'; Warsaw, 1782), *Donnerwetter* (Warsaw, 17 January 1787) and *Diabeł alchimista* ('Satan, the Alchemist'; Warsaw, 1797), all of which are lost, as well as cantatas, masses, piano works and songs.

Weinert's son Filip (*b* Rogalin, 26 May 1798; *d* Warsaw, 15 Aug 1843) studied singing with Jan Gommert and later Brice at the Warsaw School for Music and Dramatic Art. He made his début at the Warsaw Opera in 1819 and sang there for a number of years. He also gave singing lessons and composed songs, now lost. Another son, Piotr (*b* Rogalin, *c*1800; *d* Warsaw, bur. 10 Nov 1827), studied the organ and composition at the Warsaw Conservatory, and became a piano teacher to the working classes and a composer of piano music. A younger Antoni Weinert, who may also have been a son of the flautist and composer, was an instrument maker who had a shop in Warsaw from about 1805 to 1828. His guitars were noted for their fine modelling and were very popular.

ZOFIA CHECHLIŃSKA

Weingartner, (Paul) Felix, Edler von Münzberg (*b* Zara, Dalmatia [now Zadar, Croatia], 2 June 1863; *d* Winterthur, 7 May 1942). Austrian conductor, composer and author. He studied composition at Graz, under W.A. Rémy. In 1881, on Hanslick's recommendation, he went to Leipzig as a student of philosophy, and soon joined the conservatory. In 1883 Liszt took him under his wing at Weimar; *Sakuntala*, his first opera, was produced there in 1884. Later that year he obtained his first conducting post, at the Königsberg Opera, and after one season moved to Danzig for two. This pattern repeated itself at Hamburg and Mannheim. In 1891 Weingartner became court Kapellmeister of the Berlin Opera and director of the royal orchestral concerts. He resigned from the opera in 1898, but remained in charge of the concerts until 1907. From 1898 to 1903 he directed the Kaim concerts in Munich. In 1908 he succeeded Mahler at the Vienna Hofoper, resigning in 1911 but retaining control of the Vienna Philharmonic concerts until 1927. He was guest conductor at the Hamburg Opera (1912–14), principal conductor at Darmstadt (1914–19), and director of the Vienna Volksoper (1919–24). In 1927 he moved to Basle as director of the Allgemeine Musikgesellschaft concerts and until 1933 was director of the conservatory. From 1935 to 1936 he was again briefly at the head of the Vienna Opera (now the Staatsoper).

The manifold activity in German-speaking countries did not prevent Weingartner from building up an international career on both sides of the Atlantic. In 1898, on the first of numerous visits to London, his 'quiet mastery of the orchestra and his sane readings of the classics' (Colles, *Grove3*) made a deep impression. In 1905 came his first appearance at three successive seasons with the New York Philharmonic Society. In 1912 and 1913 he conducted the Boston Opera Company. His tours with the Vienna PO included visits to Latin America in 1922 and 1923. In Britain he was associated with the Royal Philharmonic Society (whose gold medal he received in 1939), the LSO and the Scottish Orchestra. He was in demand as guest conductor in several major European cities outside Germany and Austria.

Although Weingartner as a young man was profoundly influenced by Wagner and Liszt (and left vivid descriptions of them in his memoirs), his name was scarcely associated with the progressive school that followed them. He is remembered as one of the most eminent classical conductors of his day, outstanding for the clarity and economy of his beat, for the lack of exaggeration in his interpretations, for the precision without rigidity of his tempos. His writings, which include an important essay on conducting,

Felix Weingartner with his third wife, Lucille Marcel

reveal a gift for analysis and exposition applied not only to the symphonic repertory (notably to Beethoven) but to its interpreters (e.g. Bülow). Weingartner was a man of personal distinction, cultivated but quarrelsome, quick to take offence. Evans wrote of his 'sensitiveness to vexations which a stronger man would have ignored'. He was anxious to succeed in opera both as conductor and composer, but in the two most important posts of his career, Berlin and Vienna, opposition led him to resign from the opera long before he gave up the concerts that normally went with it. He was at his finest in the concert hall, but while he may have been born with one skin too few for the rough and tumble of the theatre, the view that his temperament was essentially undramatic was not fully borne out by distinguished performances of *Tannhäuser* and *Parsifal* at Covent Garden in 1939. British admirers who revered him as the authority on Beethoven might have been surprised by his fondness for comic opera, which he was able to indulge in Vienna. Weingartner's operas had some success in their time, *Genesius* (1892) being quite widely performed. Yet the recognition he longed for as a prolific composer of large-scale music continued to elude him.

Weingartner was the first major conductor to leave a representative sampling of his art in recordings. He made acoustic recordings (1910–14 and 1923–5) of symphonies by Beethoven, Brahms and Mozart, all of which he re-recorded after the introduction of electrical recording in 1925. He left complete cycles of Beethoven and Brahms symphonies and a healthy list of works by Bach, Handel, Mozart, Berlioz, Mendelssohn, Liszt and Wagner. Weingartner also appeared on film: in 1913 he conducted for Oskar Messter in Berlin (these silent films are lost), and in 1932 he made a film of the *Freischütz* overture.

As an editor Weingartner was associated with Charles Malherbe in the projected complete edition of Berlioz. He made orchestrations of Beethoven's Piano Sonata op.106, of Weber's *Aufforderung zum Tanz*, and completed the scoring of Schubert's Symphony in E D729. Weingartner was five times married. His third wife was the singer Lucille Marcel (1877–1921). His fifth, Carmen Studer, was one of his conducting pupils.

WORKS
(*selective list*)

Ops (all texts by Weingartner): Sakuntala, op.9 (after Kalidasa), Weimar, 1884; Malawika, op.10 (after Kalidasa), Munich, 1886; Genesius, op.14 (after H. Herrig), Berlin, 1892; Orestes: Agamemnon, Das Totenopfer, Die Erinyen, op.30 (after Aeschylus), Leipzig, 1902; Kain und Abel, op.54, Darmstadt, 1914; Dame Kobold, op.57 (after Calderón), Darmstadt, 1916; Die Dorfschule, op.64 (after Jap. play: *Terakoya*), Vienna, 1920; Meister Andrea, op.66 (after E. Geibel), Vienna, 1920; Der Apostat, op.72, unperf.

Weinlig, Christian Theodor (*b* Dresden, 25 July 1780; *d* Leipzig, 7 March 1842). German Kantor, composer and teacher. He was the nephew of Christian Ehregott Weinlig (*b* Dresden, 30 Sept 1743; *d* Dresden, 14 March 1813), who was an organist in Leipzig (1767–73), a renowned Kantor at the Dresden Kreuzschule from 1785 and a composer of sacred and instrumental music. He first studied and practised law (1797–1803), then took music lessons (especially in composition) with his uncle (1804–6) and with Stanislao Mattei in Bologna (1806). He was

Kantor of the Kreuzschule from 1814 to 1817, and in 1823 moved from Dresden to succeed Schicht as Kantor of the Thomaskirche in Leipzig: Weber's letter of recommendation for this position described him as deeply devoted to his art and gifted with profound insight. In Leipzig Weinlig set himself to maintain the great tradition of the Thomaskirche and raised the standard of performance to a high level. Among others, Mendelssohn praised his activity at the Thomaskirche, where Weinlig remained until his death. A learned and conscientious teacher, he numbered among his pupils Clara Schumann, E.F.E. Richter and Richard Wagner. Though Wagner studied with Weinlig for only about six months (beginning about October 1831), he benefited permanently from the strict course in counterpoint and later from a close imitative study of classical models; Wagner wrote in his autobiography that Weinlig finally dismissed him with the words: 'Probably you will never write fugues or canons, but what you have mastered is independence: you can now stand alone and rely upon having a fine technique at your fingertips, should you want it'. As attested in his autobiography, diary, letters and articles, Wagner remained appreciative of Weinlig's teaching throughout his life. He dedicated his B♭ Piano Sonata (1832) to Weinlig, who arranged for its publication, and his *Liebesmahl der Apostel* (1843) was dedicated to Weinlig's widow. Weinlig's compositions, most of them sacred choral works, include a German *Magnificat*; he also wrote an important treatise on fugue entitled *Theoretisch-praktische Anleitung zur Fuge für den Selbstunterricht* (Dresden, 1845, 2/1852).

JOHN WARRACK/JAMES DEAVILLE

Weinmann, Alexander (*b* Vienna, 20 Feb 1901; *d* Vienna, 3 Oct 1987). Austrian musicologist. He studied the flute at the Vienna Academy and musicology at Vienna University under Adler and at Innsbruck University under Wilhelm Fischer. Being a professional musician and Kapellmeister from 1922 to 1962, he did not take the doctorate at Innsbruck until 1955 (with a dissertation on the complete Artaria catalogue). His 24 volumes on Viennese publishers of the late 18th century and early 19th (which contain the opus numbers and date of issue of each work published) brought him international recognition; in addition he compiled catalogues on many lesser-known composers (including Vanhal, Druschetzky and Kauer) and thematic catalogues of the music in Melk. Many of his writings appeared in the two monograph series, Beiträge zur Geschichte des Alt-Wiener Musik Verlags and Wiener Archivstudien, which he founded. He was a leading member of the Austrian division of RISM, co-editor of the sixth edition of the Köchel catalogue, and author of numerous articles, including many for the *Österreichische Musikzeitschrift*. His arrangements for small ensembles of light music by Viennese composers such as the Strauss family and Lanner have been used worldwide. His important collection of manuscripts and prints is divided among the Österreichische Nationalbibliothek, the Gesellschaft der Musikfreunde and Duke University.

His brother Ignaz Weinmann (*b* Vienna, 20 Sept 1897; *d* Vienna, 16 Oct 1976) was a leading expert on Schubert and his time and an adviser to the Neue Schubert Ausgabe.

RUDOLF KLEIN/PAUL R. BRYAN

Weinmann, Johann (*b* Nuremberg, *c*1477; *d* Wittenberg, late Nov 1542). German organist and composer. From 1492 he studied at Leipzig University before spending the years 1496–8 as organist at the Heilig-Geist-Kirche in Nuremberg. He then went to Erfurt University. In 1506 he succeeded Adam von Fulda as organist at the Schlosskirche at Wittenberg, and from 1509 he resumed his studies at Wittenberg University, where he was also rector and *magister*, and where he obtained the doctorate. In 1519 he was appointed organist at the town church, Wittenberg. He apparently converted to Protestantism in 1520 or 1521 while retaining his posts in Wittenberg. When he died Weinmann was praised by the university for his outstanding knowledge of history as well as his superior musical artistry. His only extant work is a four-voice setting of Luther's *Vater unser im Himmelreich* (RISM 1544[21], ed. in DDT, xxxiv, 1908, 2/1958). Weinmann was the oldest composer in the anthology, but his composition is rather forward-looking in placing the cantus firmus in the top voice instead of in the tenor.

VICTOR H. MATTFELD

Weinmann, Karl (*b* Vohenstrauss, 22 Dec 1873; *d* Pielenhofen, 26 Sept 1929). German musicologist. He studied with Haberl and Haller at the Regensburg Kirchenmusikschule, in Berlin and at Innsbruck, where he was *magister choralis* of the theological convent; he was ordained priest in 1899 and took the doctorate under Peter Wagner at Freiburg University in 1905 with a dissertation on the *Hymnarium Parisiense*. Subsequently he was Kapellmeister of the collegiate church and taught music history and aesthetics at the Regensburg Kirchenmusikschule, where he was also vicar of the cathedral (1908), director of the Proske Library (1909) and Haberl's successor as director of the Kirchenmusikschule (1910), taking the doctorate in theology in 1917. In 1926 he became president of the Allgemeiner Cäcilienverein and editor of its journal; he also edited the *Kirchenmusikalisches Jahrbuch* (1909–11), *Musica sacra* (from 1911) and a number of liturgical collections. His major work is a history of church music, and his writings include books on individual parts of the Mass and several articles on Palestrina.

□

Weinrauch, Ernestus [Faustinus] (*b* Donauwörth, bap. 17 Oct 1730; *d* Zwiefalten, 9 April 1793). German composer. He entered the Benedictine monastery at Zwiefalten in 1748 and served it for more than 30 years as organist and *regens chori* and also at times as subprior. He composed primarily liturgical music for his monastery, but also stage music for a Schwäbisch Gmünd passion play *Die Geisslung* as well as one oratorio *Kain und Abel* (both in *D-Tl* and the Stadtarchiv, Schwäbisch Gmünd). Although he did not have his works printed, many were disseminated through copies. Several of his manuscripts survive (in *D-Bsb*, *HR*, *OB* and the two above-named libraries). Weinrauch was also a respected teacher, counting among his pupils the composers Konrad Back in Ottobeuren, Conradin Kreutzer and probably also J.L. Schubaur.

ADOLF LAYER

Weinrich, Carl (*b* Paterson, NJ, 2 July 1904; *d* Princeton, NJ, 13 May 1991). American organist. A graduate of New York University (1927) and of the Curtis Institute of Music in Philadelphia (1930), he studied with Mark Andrews, Marcel Dupré and Lynnwood Farnam. At the time of Farnam's illness and untimely death (1930), Weinrich completed his projected season of recitals and succeeded Farnam at the Church of the Holy Communion, New York. His Bach recitals drew special critical acclaim and large audiences. He toured extensively as a recitalist

from 1934, but it was as a scholarly performer and teacher that he was most distinguished. His great technical gifts (rivalling those of Virgil Fox) and his broad grasp of music history (comparable with that of E. Power Biggs) were always at the service of the art. He taught at Westminster Choir College in Princeton (1934–40), at Wellesley College, Massachusetts (1936–46) and at Columbia University (1942–52), and served as director of music at Princeton University Chapel (1943–73). In 1950–51 he was Lamb Visiting Lecturer at Harvard University. His early recordings (especially on the 'Praetorius' organ) at Westminster Choir College were a landmark, and subsequent recordings furthered interest in and knowledge of the 20th-century revival in organ design and building. He edited Schoenberg's Variations on a Recitative op.40 (New York, 1947) and performed many new organ works and much little-known old music. He wrote 'Albert Schweitzer's Contribution to Organ-Building' (*The Albert Schweitzer Jubilee Book*, Cambridge, MA, 1945, p.215). (C.T. Russell and C. Krigbaum: 'In Memoriam Carl Weinrich 1905–1991', *The Diapason*, lxxxii/9 (1991), 11 only)

VERNON GOTWALS

Weinstock, Herbert (*b* Milwaukee, 16 Nov 1905; *d* New York, 21 Oct 1971). American writer on music. After initial studies in Milwaukee he attended the University of Chicago. He worked for the firm of book publishers Alfred A. Knopf, New York (1943–59 and 1963–71), notably as music editor; he was a fluent and prolific writer especially on operatic subjects. From 1966 he was New York correspondent for the British journal *Opera*. He was also active as a translator: his interest in Carlos Chávez led to his translation *Toward a New Music: Music and Electricity* (New York, 1937), and he also translated Edmond Michotte's *Souvenirs personnels* as *Richard Wagner's Visit to Rossini (Paris 1860) and An Evening at Rossini's in Beau-Sejour (Passy 1858)* (Chicago, 1968).

PAULA MORGAN

Weintraub, Eugene (*b* Stal'noye, Ukraine, 10 March 1904). American music publisher. An accomplished musician, he started publishing music in 1940 in New York. He was director of the Am-Rus Music Corp., in charge of Soviet music distribution in the USA, and in this capacity arranged the first American performances of works by Prokofiev, Shostakovich, Kabalevsky and Myaskovsky. He obtained the highest ever hire fee ($10,000) in 1944 for the first American performance of Shostakovich's Symphony no.8. From 1944 to 1950 he was head of the department of Soviet music at Leeds Music Corporation. In 1950 he established the Weintraub Music Company, which specialized in works by American composers, including George Antheil, Virgil Thomson, Robert Kurka, Howard Swanson and Benjamin Lees, issuing about ten new titles each year. Music Sales Corporation acquired the Weintraub firm in 1987, although Weintraub continued as music editor for a time.

W. THOMAS MARROCCO, MARK JACOBS

Weinzweig, John (Jacob) (*b* Toronto, 11 March 1913). Canadian composer. He was one of the first Canadians to employ and champion 20th-century compositional techniques. His piano piece *Spasmodia* (1938) represents the first use of a 12-note series by a Canadian composer. Born to Polish-Jewish immigrants with little musical background, Weinzweig received instruction on the mandolin at the Workman's Circle Peretz School before beginning piano lessons. At the age of 17 he joined the school orchestra at Harbord Collegiate Institute playing the mandolin, tenor saxophone, sousaphone, tuba, double bass and piano. He also worked as a freelance musician. He pursued his musical interest further at the local library where he engaged in score study, particularly of the works of Wagner.

In 1934 Weinzweig entered the music faculty at the University of Toronto where he studied counterpoint and fugue with Healey Willan, orchestration with Ernest MacMillan and harmony with Leo Smith. He studied conducting privately with Reginald Stewart. In December 1934 he founded the University of Toronto SO which he conducted over the next three years. Upon his graduation with the MB he enrolled at the Eastman School where for the first time, as a student of Bernard Rogers, he received instruction in composition. During this period he became acquainted with Stravinsky's *Rite of Spring*, Berg's *Lyric Suite* and the music of Schoenberg, all of which affected him deeply. His four orchestral tone poems (1937–8) impressed Howard Hanson so much that he chose Weinzweig's Suite for Orchestra for broadcast on the NBC radio network in 1938.

After receiving the MMus Weinzweig returned to Toronto where he gained a post at the Toronto Conservatory teaching ear training, theory, orchestration and composition. In 1941 the CBC commissioned him to write original music for radio dramas. He produced *c*100 scores in this capacity for programmes based on the true stories of people who fled persecution in Europe by coming to Canada to those on Canadian literature and geography. His scores often combine folktunes or ethnic musics appropriate to the background of the persons and stories concerned, with 12-note compositional techniques. Weinzweig learned quickly that concision, distinctive rhythms and sparse textures were most effective for the medium. While commentators remarked on the effectiveness of his writing, Canadian radio listeners were introduced to modern music.

As a military band instructor during World War II Weinzweig began composing Divertimento no.1, the first in a series of divertimentos. In these pieces he develops a musical dialogue between a featured timbre and a larger ensemble. The Divertimento no.1 (1946) for flute and strings won the highest medal given for chamber music at the 1948 Olympiad. Eleven more divertimentos were completed by 1998. The first six utilize a serial technique that emphasizes the lyricism of motivic development by exposing the complete set one note at a time. Each new pitch is added only after a complete presentation of

previously introduced pitch material. The fast–slow–fast arrangement of movements in the first five Divertimentos exhibits a neo-classical influence. This is no longer the case in Divertimentos no.6 (1972), 7 (1979), 10 (1988), 11 (1990) and 12 (1998) which incorporate jazz-like improvisational cadenzas into multi-sectional movements. The influence of New Orleans jazz and Swing imbues these works with changing time signatures, irregular groupings and offbeat accents. In each divertimento the timbre of the featured instrument is fully explored, often in new and experimental ways. In Divertimento no.9 (1982) for orchestra and no.10 for piano and strings, timbral explorations are applied to all of the participating instruments.

In 1951 Weinzweig was appointed to the Faculty of Music, University of Toronto, where he was an important influence until his retirement in 1978. During the 1950s Weinzweig increased his efforts to improve opportunities for the performance and publication of contemporary Canadian concert music. With several students and colleagues Weinzweig formed the Canadian League of Composers in 1951. His extensive contacts across the country in addition to his leadership qualities resulted in an organization that effectively voiced the needs and concerns of Canadian composers. As the League's president Weinzweig was instrumental in the planning of the Canadian Music Centre, an important resource library for performers and researchers. He was also associated with the National Advisory Committee of the Canadian Conference of the Arts, the Canadian Music Council and the Composers, Authors and Publishers Association of Canada, of which he became chair in 1973.

Although his administrative responsibilities reduced his time for composition, the Violin Concerto (1951–4) and *Wine of Peace* (1957), dedicated to the United Nations, are among his most moving scores. His works of the 1960s increasingly incorporated ritualistic gestures borrowed from North American vernacular musics to articulate formal sections. The Harp Concerto (1967) continues to demonstrate an interest in timbral exploration. In the 1970s he introduced elements of theatre and no longer used serial procedures in an explicit manner. In addition to short pieces for solo instruments he wrote works for the voice, using his own frequently witty texts.

Throughout his life, Weinzweig has received many tributes and honours. These include appointment as an Officer of the Order of Canada (1974), the Canadian Music Council Medal (1978), and membership in the Order of Ontario (1988). He was the first composer to be awarded both the prestigious Molson Prize for outstanding cultural achievement (1981), and the Roy Thomson Hall Award (1991). In 1978 the CBC issued five records of his music to initiate the series Anthology of Canadian Music. He is the subject of the 1989 Rhombus International documentary *The Radical Romantic*.

RICHARD HENNINGER/ELAINE KEILLOR

Weir, Dame **Gillian (Constance)** (*b* Martinborough, NZ, 17 Jan 1941). British organist and teacher. Her early training was as a pianist. She studied the piano with Cyril Smith and the organ with Ralph Downes at the RCM. Additional studies were with Anton Heiller, Marie-Claire Alain and Nadia Boulanger. She won the St Albans International Organ Festival Competition in 1964 with a performance of Messiaen's *Combat de la mort et de la vie*. Engagements followed when she was still a student at the RCM, and she made her début recital at the Royal Festival Hall in 1965; three months later she was the soloist in a televised performance of Poulenc's *Organ Concerto* on the opening night of the Proms. She has received many awards and honours, and was the first woman to be elected to the Council of the Royal College of Organists (1977), the first musician to receive the Turnovsky Foundation award for an outstanding contribution to the arts (1985), and the first woman president

of the Royal College of Organists (1994). She received an honorary DMus from the Victoria University of Wellington, and was created a CBE in 1989, the year in which she was elected an honorary member of the RAM. She was made a DBE in 1996.

Weir's organ repertory is comprehensive. She has revived many forgotten works and given premières of organ concertos by Robin Holloway (1967), Peter Racine Fricker (1979), William Mathias (1984), Michael Berkeley (1987) and others. She has specialized in the organ music of Messiaen, performing the complete works for BBC Radio 3 and for a CD set issued in 1994, and contributing an article to *The Messiaen Companion* (London, 1995). A tireless campaigner for standards in the organ world, Weir also has a deep interest in philosophy, religion and contemporary issues. As a performer she combines a formidable technical accomplishment with a rare capacity to entertain. The 1989 television series 'The King of Instruments', which she presented, was a breakthrough in creating a mass audience for the organ.

IAN CARSON

Weir, Judith (*b* Cambridge, 11 May 1954). British composer. While at North London Collegiate School she took private composition lessons with Tavener and was an oboist in the National Youth Orchestra of Great Britain. She went on to King's College, Cambridge (BA 1976), studying composition there with Holloway; in 1975 she was awarded a Koussevitzky Fellowship to study with Schuller at Tanglewood and was composer-in-residence at the Southern Arts Association, during 1976–9. She then held a Cramb Fellowship at Glasgow University (1979–82) and was a creative arts fellow at Trinity College, Cambridge (1983–5). She was Guinness composer-in-residence at the Royal Scottish Academy of Music and Drama, Glasgow (1988–91), and Fairbairn Composer in Association with the CBSO (1995–8). Weir was made a CBE in 1995, and in the same year she received an honorary DMus from the University of Aberdeen; she was artistic director of the Spitalfields Festival in London from 1995 to 2000. She received first prize at the international Opera Screen Festival in Helsinki (1991) for *Heaven Ablaze in His Breast*, a dance-opera collaboration with the dance company Second Stride based on E.T.A. Hoffmann's *Der Sandmann*. She was Hambro Visiting Professor in Opera Studies at Oxford University (1999) and became an Honorary Fellow of St Hilda's College, Oxford, in 2000.

Weir's compositional style was achieved through rejection of the structures and materials of the avant garde and an early adoption of alternative sources. Perhaps the most profound, philosophically as well as musically, has been the influence of folk musics from different traditions. Their directness of expression and identification of a sense of community has reinforced her own belief in the importance of a composer's role in society, one part of which is reflected in a particular sensitivity to communicate with performers and audience, another by her educational work and by her artistic responsibilities to London's Spitalfields Festival. Technically, the study of folk music materials was something of a personal *cours de composition* in melodic writing and structural thinking. Particularly important was the discovery of the Scottish *piobaireachd*, a prime model of extended variation form structures generated from a limited interval set. First explored in the *Sketches from a Bagpiper's Album* (1984), this compositional principle marks much of her subsequent instrumental music. Weir's references to folk music are never merely imitative, but an imaginative spur resonating with complementary elements of her own musical personality. For example, the declamatory aspects of Chinese theatre and the sonorities of its music gave Weir the means to invent a style for the opera *A Night at the Chinese Opera* (1987) that avoided *chinoiserie*. She has also responded creatively to very different compositional models from Western art music, for example Perotinus in *Sederunt principes*, Mozart's *Il sogno di Scipione* in *Scipio's Dream* and Schubert's 'Trout' Quintet; which she referred to in her own piano quintet *I Broke off a Golden Branch*.

All Weir's music, whatever its medium, is characterized by a narrative quality and an element of storytelling. This is explicit where texts feature, but the carefully chosen, descriptive titles of the instrumental pieces often also suggest a scene or action. The orchestral *The Ride over Lake Constance*, for example, is based on a melodramatic ballad by Gustav Schwab; *Heroic Strokes of the Bow* refers punningly to a painting by Klee; and *Music, untangled* describes the compositional process of reduction to a concluding monody. Of her chamber pieces with similarly graphic titles, *Distance and Enchantment* is based on two folksongs about disappearance and *Musicians Wrestle Everywhere* is a celebration of music's omnipresence and stylistic pluralism, the subject of Emily Dickinson's eponymous poem.

Weir frequently exploits music's ability to paint a scene or to function as an illustrative backdrop. In an onomatopoeic sense this is deftly achieved in the engaging *The Consolations of Scholarship* (which was later incorporated, as a play-within-a-play device, in *A Night at the Chinese Opera*). At a deeper level Act 2 of *Blond Eckbert*, in a strategy that follows the example of Janáček and Britten's *Peter Grimes*, the orchestra's own commentary plays a crucial role in the intensification of the psychological drama. Weir has also composed music for the theatre, including the Royal Shakespeare Company's *The Gift of the Gorgon* and the Royal National Theatre's production of Sophocles' *Oedipus* plays, directed by Sir Peter Hall.

Although Weir's idiom is rooted in a form of expanded tonality, the individuality of her ear is revealed in textures and harmonies which are far from conformist. Heterophonic techniques and jump-cutting between sections (often characterized by ostinato patterns) are typical. The melodic focus of the music often results in treble-dominated textures that evoke a sense of weightlessness, as in the openings of the Piano Concerto, *Isti mirant stella* and *I Broke off a Golden Branch*. Operatically too, Weir reaches personal solutions to achieve longer term dramatic effect.In *The Vanishing Bridegroom*, the overall textual delicacy emphasizes the effect of the carefully paced gestures. The interior, fateful, world of *Blond Eckbert* is all the more powerfully drawn by the understatement of Act 1 throwing into relief the development and densely obsessive dénouement of Act 2. In this opera, Weir has characterized in her own terms the Stravinskian example of *Oedipus rex*.

WORKS

OPERAS

Night at the Chinese Opera (op, 3, Weir, after Chi Chun-hsiang: *The Chao Family Orphan*, and other texts), 1987, Cheltenham, Everyman, 8 July 1987

The Vanishing Bridegroom (op, 3, Weir, after *Popular Tales of the West Highlands*), 1990, Glasgow, Theatre Royal, 17 Oct 1990

Blond Eckbert (op, 2, Weir, after J.L. Tieck), 1993, London, Coliseum, 20 April 1994

OTHER DRAMATIC

Hans the Hedgehog (Weir, after J.L. and W.C. Grimm), 1978

King Harald's Saga ('grand opera in 3 acts', after Snorri Sturluson: *Heimskringla*), 1979

Thread! (Weir), Stirling, MacRobert Centre, 2 March 1981

The Black Spider (children's op, 3, Weir, after J. Gotthelf), 1984, Canterbury, Cathedral Crypt, 6 March 1985

The Consolations of Scholarship (music drama, 2, Weir, after Chi Chun-hsiang and others), 1985

Heaven Ablaze in His Breast (dance-op, Weir, after E.T.A. Hoffmann: *Der Sandmann*, choreog. I. Spink), 1989

Scipio's Dream (film score, Weir, after P. Metastasio, dir. M. Williams), 1991, BBC2 TV, 24 Nov 1991 [after W.A. Mozart: *Il sogno di Scipione*]

Combattimento II (music theatre, A. Vehstedt, after T. Tasso), 1992, Antwerp, 1993 [after Monteverdi]

The Gift of the Gorgon (incid music, P. Shaffer, dir. P. Hall), London, Barbican, 16 Dec 1992

The Small Moments in Life (happening, collab. M. Duncan), 1992

The Skriker (incid music, C. Churchill), 1993, London, Royal National Theatre, 1994

Hello Dolly, Goodbye Mummy (film score, dir. M. Williams), 1996

Oedipus the King and Oedipus at Colonus (incid music, Sophocles, dir. Hall), London, Olivier, 1996

DAVID C.H. WRIGHT

Weis, (Carl) Flemming (*b* Copenhagen, 15 April 1898; *d* Hellerup, 30 Sept 1981). Danish composer and organist. He studied the organ and theory with Gustav Helsted at the Copenhagen Conservatory (1916–20) and then went to Leipzig, where he studied with Straube (organ) and Graener (theory and composition), graduating from the Hochschule für Musik in 1923. After his return to Denmark he was organist at the Annakirke in Copenhagen (1929–68) and also worked as a music critic (for *Dagens nyheder*, 1953–61, and *Politiken* from 1964). He also served in a great number of honorary administrative offices, contributing significantly to Danish musical life: for example, he was a board member, assistant chairman and then chairman (1942–56) of Det Unge Tonekunstner-selskab, a member of the Musikråd (until 1971), chairman of the Dansk Komponistforening (1967–71) and chairman for the Samfund til Udgivelse af Dansk Musik.

Although Weis's first compositions were marked by his stay in Leipzig, he soon freed himself from that derivative late Romantic style, retaining his respect for Bach's polyphony and combining it with his admiration for Nielsen's diatonic and linear modernism. This is clear in his vocal music (choral arrangements as well as songs) and chamber works, which, especially those of the 1930s and 1940s, are characterized by interwar Danish neo-classicism (as in the Serenade 'Uden reelle hensigter'). His two symphonies reveal his ability to compose on a large scale, with a starting-point in Nielsen's experimental symphonic writings from the 1920s. He also contributed to the development of a serially influenced Danish modernism (as in the *Femdelt Form* series).

NIELS MARTIN JENSEN/DANIEL GRIMLEY

Weis [Weiss], **Friedrich Wilhelm** (*b* Göttingen, 3 May 1744; *d* Rotenburg an der Fulda, 26 July 1826). German physician and composer. He took his medical degree at Göttingen, where he established a practice and also lectured in botany at the university. Bürger and the members of the Göttinger Hainbund admired his musical talents and often asked him to set their poetry to music. He published three collections of *Lieder mit Melodien* (Lübeck and Leipzig, 1775–9), a further 16 lieder in the *Göttinger Musenalmanach* (1773–85), 11 in Voss's *Musenalmanach* (1776–8) and others in various anthologies. Strophic form predominates in these works, and several have attractive melodies, though there are frequent inept progressions in the accompaniments. Weis also published two volumes of *Charakteristische englische Tänze* (Lübeck, 1777–8). In 1786 he was appointed privy councillor and physician in ordinary to the Count of Hessen-Rotenburg, after which his interest in music seems to have ceased.

DAVID OSSENKOP

Weis [Weiss], **Karel** (*b* Prague, 13 Feb 1862; *d* Prague, 4 April 1944). Czech composer and folksong collector. He studied in Prague at the conservatory (1873–8) and the organ school (1878–81) and privately with Fibich. He was organist of St Štěpán and choirmaster at the main synagogue of Prague (1881–2), a teacher at the music school of the Moravan choral society in Kroměříž (1882–3), a violinist in the National Theatre orchestra, Prague (1883–6) and conductor of the Švanda Theatre Company in Prague and Brno (1886–7). Subsequently he edited the monthly *Hudební květy* (1895–9), conducted the Academic Orchestra (1898) and worked as an accompanist (1896–1904), mainly for the violinist František Ondříček. From 1896 to the end of his life he gave most of his attention to collecting and arranging folksongs, particularly those of the Chodsko region, south Bohemia. Weis's large and varied output was influenced mostly by Smetana and Dvořák and included three operas in Czech, two in German and six German operettas. His only work to have stood the test of time, however was the 15-volume collection *Český jih a Šumava v písni* ('South Bohemia and Šumava in song').

OLDŘICH PUKL/R

Weisbeck [Weissbeck], **Nicolaus** (*b* Gebesee, Thuringia, *c*1575; *d c*1640). German composer, schoolmaster and clergyman. He may have known, or been taught by, Friedrich Weissensee, who became Rektor of the Lateinschule at Gebesee in 1590. He registered at Erfurt University in 1591 and at Jena University in 1599. In 1614 he still described himself as a student of theology and music, but he had meanwhile become a musician, probably an organist, at the parish church at Gebesee and then, in 1612, Kantor at the Marienkirche at Mühlhausen and a teacher at the Gymnasium there. Between 1613 and 1621 he was several times in trouble with the authorities, for neglect of his duties, drunkenness and impertinence towards the superintendent. In 1621 he was nevertheless able to begin a new career, as a clergyman at Bockelnhagen and Zwinge, near Leinefelde, Thuringia, and he presumably remained there until his death. His three surviving compositions, which show that he was a composer of only average craftsmanship, all date from his years at Mühlhausen. The most interesting is *Der Drescher*, in which he turned the techniques of motet composition to programmatic ends illustrating the various activities of peasants at work. At Easter 1617 he presented to the Mühlhausen town council a copy of a textbook on music for schools that he had had printed. This was probably the first edition of his *Brevis et perspicua introductio in artem musicam*, the publication details of which are unknown; nor does the second edition (1639) now survive.

WORKS

Der Drescher, das ist Eine feine liebliche Harmonia, von dem löblichen . . . Ackerwerk, 4vv (Erfurt, 1613); transcr. in Hagebruch

Vom heiligen Ehestand: ein christliches Colloquium und gottseliges Bedenken, 4vv (Erfurt, 1614) [for wedding of Otto Christoph von Kerstlingeroda and Berta von Hopfgarten]

Votiva aeolica acclamatio dem . . . Herrn Johann Georgen, Hertzogen zu Sachsen . . . den 1. Martii 1620 . . . (Machet die Tore weit), 6vv (Erfurt, 1620)

THEORETICAL WORKS

Brevis et perspicua introductio in artem musicam pro pueris et puellis . . . ut brevis tempore cantum discere possint, cum brevibus exemplis pro solmisandi exercitio, item etiam et tractatu de protonatione psalmorum majorum et minorem per omnes tonos, das ist . . . Anleitung zu der Singekunst . . . neben . . . Exempeln, 2–4vv (?1617, Hildesheim, 2/1639), lost

KARL-ERNST BERGUNDER

Weisberg, Julia Lazarevna. *See* VEYSBERG, YULIYA LAZAREVNA.

Weise. A term in German metrics, synonymous with *Ton*. *See* TON (i).

Weise, Christian (*b* Zittau, 30 April 1642; *d* Zittau, 17 Oct 1708). German poet, dramatist and educationist. He received his early education from his father, who taught at the Zittau Gymnasium. In 1660 he enrolled at Leipzig University, where he studied theology, philosophy and history and received a bachelor's degree in 1661 and a master's in 1663. Failing in an attempt to become a professor there, he went to Halle in 1668 as secretary to Count Simon Philipp of Leiningen. In 1670 he worked as a tutor at Amfurt, near Magdeburg, and on 9 August of the same year was appointed teacher of poetry, eloquence and politics at the Weissenfels Gymnasium. In 1678 he returned to Zittau as Rektor of the Gymnasium, where his father was still teaching, and he held this position until shortly before his death.

Weise's significance lies in his prodigious output of several hundred dramas, novels and collections of poetry, as well as instruction books, disputations and orations. He wrote most of his dramatic works for his Gymnasium. Although he was firmly opposed to opera on literary grounds, he regularly included incidental music and songs in these school plays. During the early part of his career in Zittau this music was composed by Moritz Edelmann. Edelmann was succeeded by Johann Krieger, who settled at Zittau in 1682 and published in the third part of his *Neue musicalische Ergetzligkeit* (1684) incidental music for the following plays by Weise: *Der verfolgte David* and *Die sicilianische Argenis* (both 1683) and *Nebucadnezar*, *Der schwedische König Regnerus* and *Der politische Quacksalber* (all 1684). The texts of the 64 sacred and secular songs in the first two parts of this collection are also by Weise. Weise published several books of poetry. J.C. Pezel took 24 love poems from *Der grünenden Jugend überflüssigen Gedancken* (1688) for his *Schöne, lustige und anmuthige neue Arien* (1672). The first stanza of a five-stanza ode, *Der weinende Petrus*, published in Weise's *Der grünenden Jugend nothwendigen Gedancken* (1675), was used by J.S. Bach for the tenor aria 'Ach, mein Sinn' in the *St John Passion*. Weise's comedy *Die triumphirende Keuschheit* (1668) was probably the basis of the libretto of the opera *Floretto* by N.A. Strungk (1683, Hamburg). Weise had a marked influence on early 18th-century German literary developments, including the lied. His uncomplicated, humorous, satirical style, with its elements of folk language and overt banality, was in distinct

contrast to the elevated, bombastic poetry of the preceding generations of German poets such as D.C. von Lohenstein and the Second Silesian School. Very few of Weise's dramatic works are extant; for details see Eggert.

GEORGE J. BUELOW

Weisgall, Hugo (David) (*b* Ivançice, nr Brno, 13 Oct 1912; *d* Long Island, NY, 11 March 1997). American composer of Czech birth. One of America's most important composers of operas and large-scale song cycles, the literary merit of his works, their original vocal style, and their serious attention to musical and dramatic detail mark a significant contribution to these genres.

1. Life. At least four generations of cantors and composers were present in Weisgall's family's background. His father was his earliest and strongest musical influence; Adolph Joseph Weisgal, a composer of synagogue music (*b* Scheps, nr Płock, Poland, 13 Dec 1885; d Baltimore, 15 Nov 1981), had sung opera professionally before entering the cantorate. From an early age, Hugo Weisgall absorbed both central-European Jewish musical traditions and the standard opera and song repertory. His family emigrated to the USA in 1920, settling in Baltimore; Weisgall became a naturalized American citizen in 1926. Completely American-educated, he studied the piano, harmony and composition at the Peabody Conservatory (1927–32) while organizing and conducting amateur choirs and orchestras. From 1932 to 1941 he studied composition intermittently with Sessions. Studies with Fritz Reiner and Rosario Scalero at the Curtis Institute earned him diplomas in conducting (1938) and composition (1939). In 1940 Johns Hopkins University awarded him the PhD for his dissertation on primitivism in 17th-century German poetry.

In military service from 1941, Weisgall's fluency in European languages gained him sensitive diplomatic responsibilities. While assistant military attaché in London (1945–6) and cultural attaché in Prague (1946–7), he won major successes as a composer and conductor. As guest conductor of leading orchestras he featured American works and as a delegate to the ISCM vigorously promoted American music. After his return to the USA in 1947, Weisgall became active as an administrator and teacher, as well as a composer, conductor and singer. He founded and conducted the Chamber Society of Baltimore (1948) and the Hilltop Opera Company (1952), directed the Baltimore Institute of Musical Arts (1949–51), served as chair of the faculty of the Cantors' Institute of the Jewish Theological Seminary, New York (1952–96), and taught at Johns Hopkins University (1951–7), the Juilliard School of Music (1957–70) and Queens College, CUNY (1961–83). He also served as president of the AMC (1963–73), composer-in-residence at the American Academy in Rome (1966) and director of the composer-in-residence programme at Lyric Opera of Chicago (1988–97). His numerous honours included three Guggenheim fellowships, membership in the National Institute of Arts and Letters (1975), a Lifetime Achievement Award from Opera America, a Gold Medal from the American Academy and Institute of Arts and Letters, Columbia University's William Schuman Prize (1995) and the first arts award from the Foundation for Jewish Culture.

2. Works. Weisgall's first significant compositions date from the war years. The Overture in F (1942–3) owes much to American neo-classicism but reveals the composer's own forceful rhythmic drive and fondness for irregular rhythmic units. *Soldier Songs* (1944–6, rev. 1965) for baritone and orchestra employs a many-faceted style mirroring the irony of the texts.

After early works in the genre, Weisgall's career as an opera composer began in earnest with *The Tenor* (1948–50), whose libretto is derived from Frank Wedekind. The librettos of his subsequent operas are based on August Strindberg, Luigi Pirandello, W.B. Yeats, Jean Racine, Yukio Mishima, William Shakespeare and the Bible, and deal with crucial philosophical, social and moral dilemmas of the 20th century. Stylistically, his music evolved gradually and logically, with each work assuming its own dramatic treatment and musical structure. In *The Tenor*, large symphonic structures alternate with arias, while in *The Stronger* (1952) smaller musical segments follow the single character's volatile shifts of mood. *Six Characters in Search of an Author* (1953–6) fuses these two procedures as well as using transformed recapitulations and epigrammatic musical ideas to punctuate events or sections. Perhaps Weisgall's most theatrically successful full-length opera, *The Stronger*, only 25 minutes long, is his best-known work. An orchestra of eight players sets the scene, a bar, with pseudo-cocktail music, then fades in and out of focus following the singer's deepening psychological crisis; all stage directions are inherent in the coloratura vocal line. The pitch materials of these three operas range from rich polychords to dissonant atonal structures, the application of each depending on dramatic exigencies.

The one-act *Purgatory* (1958) breaks with previous formal techniques in employing continuous vocal arioso. This work is also the first by Weisgall to employ 12-note procedures and to be consistently atonal. *Athaliah* (1960–63) contains rigorously dodecaphonic sections, monumental set-pieces and a skilful use of the chorus that harks back to 17th-century *tragédie lyrique*. *Nine Rivers from Jordan* (1964–8) is a huge, cinematographic work in three acts about moral dilemmas raised by World War II. Real events merge with imaginary ones, emphasizing one of Weisgall's favourite themes, illusion versus reality. Many languages, subtle quoting, parody and expansive orchestral music suggest the confusion of the war years.

Jenny, or The Hundred Nights (1975–6) is an elaborate one-act work that transfers Mishima's modern noh play to 19th-century London; through Weisgall's sumptuous but veiled orchestral tapestry and the highly stylized poetic language of the librettist John Hollander, the mystery play unfolds as through a scrim. *The Gardens of Adonis* (1959, rev. 1977–81), a full-length opera, is more transparent orchestrally; the work employs recitatives, arias and ensembles, and combines free atonality with jaunty, neo-classical rhythmic features. The one-act comedy *Will You Marry Me?* (1989) completes the chamber trilogy begun with *The Stronger* and *Purgatory*.

Esther (1990–93), Weisgall's last opera, most resembles *Athaliah* in its uncompromising atonality, form and use of biblical sources.

Of the composer's three orchestral song cycles, *Soldier Songs*, *A Garden Eastward* (1952) and *Love's Wounded* (1986) vary in form. The first sets ten poems depicting youth wasted by war's blind brutality, the second is a three-movement symphony for voice and orchestra to 12th-century mystical texts translated from the Hebrew, and the third takes the form of two extended symphonic pieces. In 1970 Weisgall wrote the chamber cycle *Fancies and Inventions*, which treats the voice as a virtuoso instrument. More straightforward vocally, *Translations* (1971–2), which charts the progress of womanhood, is a kind of present-day *Frauenliebe und -Leben*. *End of Summer* (1973–4), a chamber cycle, includes extensive instrumental interludes between vocal sections, also an important feature of the *Liebeslieder* for high voice and piano (1979). In *The Golden Peacock* (1960, rev. 1976), elaborate piano settings brilliantly set off well-known Yiddish folksongs, integrating their diatonicism with Weisgall's own chromatic idiom. Both the poetry and music of the atonal *Lyrical Interval* (1983–4) refer to Schubert, while Weisgall's final work, *Evening Liturgies* (1986–96) realizes his lifelong desire to set the Jewish service.

Weisgall's earlier style fused non-tonal neo-classicism with Bergian rubato and opulence. His later music is closest in style to the Second Viennese School, though rarely completely atonal. Melodically and harmonically it revolves within small groups of pitches, often saving certain notes for contrast later on. Even in serial passages, the 12 pitches are introduced gradually so that the listener apprehends a high degree of pitch sensitivity. Weisgall's unique vocal lines help to delineate character and form the core of the musical fabric. His fluid prosody follows the rhythms of American speech in written-out rubato, while always retaining strong melodic direction.

WORKS

OPERAS

Night (1, after S. Asch), 1932

Lillith (1, after L. Elman), 1934

The Tenor (1, K. Shapiro and E. Lert, after F. Wedekind: *Der Kammersänger*), 1948–50, Baltimore, 11 Feb 1952

BRUCE SAYLOR

Weismann, Julius (*b* Freiburg, 26 Dec 1879; *d* Singen am Hohentweil, Lake Constance, 22 Dec 1950). German composer, pianist and conductor. He was a composition pupil of Rheinberger in Munich in 1892, Herzogenberg in Berlin in 1898 and Thuille in Munich (1899–1902). From 1902 to 1906 he lived as a freelance composer in Munich, and then returned to Freiburg, where he also performed as a conductor, pianist and lieder accompanist. From 1930 he taught harmony and was director of the piano masterclass at the Freiburg Musikseminar which he founded with Doflein; he retired in 1939 to devote himself to composition.

Weismann's large output embraces all musical genres with the exception of church music. In general he followed the late Romantic styles of Strauss, Humperdinck and Schillings, but also incorporated elements of Impressionist harmony, as well as a polyphonic severity related to Reger. Although technically accomplished, his music

lacked sufficiently distinctive touches to establish a really strong identity, and with the exception of the charming Horn Concertino (1935), it is almost completely neglected nowadays. During his lifetime, however, his work enjoyed considerable currency, especially during the 1920s and 30s. He was particularly interested in setting established works of literature for the musical stage, and his three operas *Schwanenweiss* (1919–20), *Ein Traumspiel* (1922–4) and *Die Gespenstersonate* (1929–30), based on Strindberg's plays, attracted much critical attention at the time of their premières. Later, Weismann became a supporter of the Third Reich, accepting a commission from Rosenberg's National Socialist Kulturgemeinde in 1934 to compose an overture and incidental music to replace Mendelssohn's *A Midsummer Night's Dream*. During this period he received numerous awards including the Leipzig Bach Prize (1939) and the Freiburg Ehrenbürgerecht (1939) and was given the title of professor by the German government in 1936. His final opera, *Die pfiffige Magd* (1937–8), had an auspicious première in Leipzig in 1939, and was performed more than 150 times in German theatres over the following five years.

ERIK LEVI

Weismann, Wilhelm (*b* Alfdorf, Württemberg, 20 Sept 1900; *d* Leipzig, 14 May 1980). German composer and editor. He studied at the Stuttgart Conservatory (1919–21) with Heinrich Schlegel and Heinrich Lang, among others, and at the Leipzig Conservatory (1921–3) where his teachers included Max Ludwig and Sigfrid Karg-Elert; he also studied musicology with Hermann Abert. As an editor, he held positions at the *Zeitschrift für Musik*,

Leipzig (1924–8) and Peters, Leipzig (1929–65, chief editor 1959–65). He taught theory and composition at the Leipzig Musikhochschule (1946–55, 1961–72, professor 1948). In 1969 he became a corresponding member of the Berlin Akademie der Künste.

Weismann was particularly highly regarded for his collected editions of Gesualdo's madrigals (1956–63) and his critical editions of 18th-century works. As a composer, he wrote primarily vocal music. His works for voice and piano comprise: simple strophic folk-like songs, usually with variations; ballad-like compositions; and declamatory settings with piano accompaniment. His early impressions of Italian 16th- and 17th-century madrigals, particularly those of Monteverdi and Gesualdo, left their mark on his extensive body of choral writing. While the early madrigal cycles show a close connection with their historical models, later cycles exhibit greater freedom.

WORKS
(*selective list*)

CHORAL

Unacc.: 4 italienische Madrigale (Dante, Petrarch, T. Tasso), 5–6vv, 1925; Justorum animae, men's vv, 1928; Ps xiii, 1929; Deutscher Minnesang (O. von Wolkenstein, K. von Würzberg, W. von der Vogelweide and others), 10 Lieder and madrigals, 1934; Das Wessobrunner Gebet, Bar, 7vv, 1936; 3 Madrigals (old Ger.), 4–6vv, 1948; 2 Motets (J.W. von Goethe, R. Billinger), 1949 [also with org]; 30 geistliche Lieder, Choräle und Hymnen, 1950 [also with org]; Ps xxiii, S, A, 5vv, 1954; Ps cxxi, Bar, 6vv, 1955; 6 Frauenchöre, 1956; Stufen (H. Hesse), 1959; 4 Liebeslieder (12th-century), 1961; 3 Madrigals (F. Hölderlin), 1963; 5 plattdeutsche Chorlieder, 1967; Ps cxxvi, 8vv, 1968; Hodie cantamus, motet, 4–6vv, 1969; Jahreszeiten (B. Brecht, G. Britting, Goethe, Hölderlin), madrigal cycle, 5–8vv, 1970; Canticum canticorum (Bible: *Song of Solomon*), 5–6vv, 1972

Acc.: Ps cxxvi, S, SATB, orch, 1928; Tagelied des Wolfram von Eschenbach, S, Bar, SATB, orch, 1936; Du bist als Stern uns aufgegangen (J. Klepper), SATB, vn, org, 1952; Conc. (P. Neruda, H. Rusch), solo vv, SATB, org, 1957; Die Auferstehung Christi, chorus, org, 1960; Wilhelm-Busch-Zyklus, S, Bar, SATB, pf, 1968; Sulamith (Bible: *Song of Solomon*), S, SATB, orch, 1975

OTHER WORKS

Vocal: 5 geistliche Lieder, 1v, hpd/pf, 1933; 6 Lieder (trad.), high v, pf, 1943; Der Jahreskreis (old calendar sayings), 14 songs, high v, pf, 1949; 2 hymnische Gesänge (Hölderlin), Mez, chbr orch, 1951; 12 Lieder und Balladen (*Des Knaben Wunderhorn*), medium v, pf, 1958; 3 Gesänge (Hölderlin), Bar, pf, 1960; Das ferne Lied (M. Hausmann, Brecht and others), 6 songs, medium v, 1962; Buch der Liebe (Goethe), 11 songs, medium v, 1967; Hymne an die Göttin Eos (ancient Gk. poets), S, A, pf, 1967; Ode an das Leben (P. Neruda), Bar, orch, 1968; 8 Gesänge (contemporary poets), high v, pf, 1969; 6 Lieder (old Ger. poetry), low v, pf, 1974; 5 Gesänge (various), low v, pf, 1977; 6 Gesänge ernsten Charakters, 1v, pf, 1979

Kbd: Partita über Es ist ei Rose entsprungen, hpd/pf, 1951; Sonata (Tanzvariationen), pf, 1956; Suite, pf, 1960; 24 kleine Präludien, Tänze und Stücke, pf, 1970

VERA GRÜTZNER

Weiss. German family of lutenists.

(1) Johann Jacob Weiss (*b c*1662; *d* Mannheim, 30 Jan 1754). He was in Breslau from at least 1686, and about 1708 became a court lutenist in the Palatine chapel in Düsseldorf. When the court moved to Heidelberg (1718) and later Mannheim (1720), Weiss moved with it. He was still at Mannheim at the time of his death, but was not active in the chapel for the last two decades. No compositions by him are known to survive.

(2) Silvius [Sylvius] **Leopold Weiss** (*b* Breslau [now Wrocław], ?12 Oct 1686; *d* Dresden, 16 Oct 1750). A son of (1) Johann Jacob Weiss, he was trained by his father and in his seventh year he performed for Emperor Leopold I. By 1706 he was in the service of Count Carl Philipp of the Palatinate, who was then resident in Breslau. His earliest datable sonata, no.7 (1706), was written while he was on a visit to the court of the count's brother in Düsseldorf. He spent 1710–14 in Italy with the Polish Prince Alexander Sobiesky. The prince lived in Rome with his mother Queen Maria Casimira, who engaged first Alessandro and later (1709) Domenico Scarlatti as her music director. Thus Weiss doubtless worked with the Scarlattis, and probably was exposed to the music of Corelli and other composers in Rome. After the prince's death in late 1714 Weiss returned to the North. He reentered the service of Carl Philipp, now Imperial Governor of the Tyrol, perhaps as early as 1715. By 1717 he was listed as a member of the chapel at the Saxon court in Dresden. He was formally appointed to the chapel in August 1718 with a high salary, and by 1744, he was the highest-paid instrumentalist at the court. Weiss's activity as a performer nearly came to a premature end when in 1722 he was attacked by a French violinist named Petit who attempted to bite off the top joint of his right thumb. Handwritten notes by Weiss found in continuo parts to operas by J.A. Hasse which were performed at court between 1731 and 1749, suggest that Weiss was regularly involved in ensemble performance (see Burris); this activity may have been as important as his duties as a solo performer.

Weiss's travels took him to many other courts for short visits. He was in Prague in 1717 (and again in 1719); in September 1718 he was sent in the company of the Saxon Crown Prince Frederick Augustus with eleven of the court's best musicians to Vienna where again he played for the Emperor. In 1722 he performed at the Bavarian court in Munich with the flautist P.G. Buffardin. Together with Quantz and C.H. Graun, Weiss went to Prague in 1723 to play in the orchestra in Fux's opera *Costanza e fortezza* celebrating the coronation of Charles VI. In 1728, along with Pisendel, Quantz and Buffardin, he accompanied Elector August to Berlin, where he made a profound impression on the future King Frederick the Great and his sister Wilhelmine, herself an accomplished lutenist, to whom Weiss gave lessons. Weiss was much in demand throughout his career as a teacher of both amateurs and professionals. He taught Prince Philipp Hyacinth Lobkowitz and his wife in Bohemia and Vienna

and in Dresden he trained several distinguished professional lutenists, including Adam Falckenhagen and Johann Kropfgans. With Kropfgans he visited J.S. Bach in Leipzig in 1739; this was likely not their first meeting nor their last since Bach came numerous times to Dresden to see his son Wilhelm Friedemann and to hear the court musicians. Despite his high salary, Weiss's material circumstances may not have been particularly comfortable. He married Maria Elizabeth (*c*1700–59) about the time of his appointment in Dresden and together they had 11 children. At his death seven of them were still living and his impoverished widow appealed to the Elector for aid.

Both as virtuoso performer and as composer Weiss can be regarded as the greatest lutenist of the late Baroque and a peer of keyboard players such as J.S. Bach and Domenico Scarlatti. He left the largest corpus of music for lute of any composer in the history of the instrument. Most of the hundreds of pieces which survive are grouped into six-movement sonatas with the sequence allemande, courante, bourrée, sarabande, minuet and gigue (or allegro). The structure of these sonatas, called *Suonaten* or *Partien*, remained remarkably unchanged from the earliest to the latest period, although substitutions for one or more of the movements are common. Some begin with an unbarred prelude or a fantasia; Weiss's practice was probably to improvise the prelude and most were never written down. The style of Weiss's music is, like Bach's, a German fusion of French and Italian influences. It is not as densely contrapuntal or chromatic as Bach's – the baroque lute (particularly the diatonic arrangement of the basses) does not permit it – but Weiss's harmonic usage is highly sophisticated and involves modulations to remote keys, particularly in the later works, by means of diminished seventh chords and enharmonic changes. His allemandes and sarabandes are often serious or melancholy while the fast movements are exhilarating, displaying a virtuosity which, like Corelli's, serves the forward drive of the music rather than the desire to dazzle. In his own day he was famous for his 'Weissian method' of playing (Baron), which probably refers to his masterly fingerings and idiomatic legato style. In the course of his career Weiss wrote increasingly extended movements and began to coordinate thematic motifs with the harmonic structure in a manner strikingly similar to Classical sonata form.

Bach clearly had great respect for Weiss's sonatas since he arranged no.47 as a duo for harpsichord and violin (BWV1025), composing new material for the violin part and constructing an introductory fantasia using lutenistic motifs that may stem from Weiss. As well as solo sonatas, Weiss is known (from Breitkopf's and other catalogues) to have composed several concertos and much chamber music for the lute and a number of lute duets; unfortunately none of these concerted pieces has survived in complete form. Occasionally a single tablature lute part has been discovered; in such cases only speculative reconstruction is possible.

For illustration *see* TABLATURE, fig.7.

(3) Johann Sigismund Weiss (*b* ?Breslau [now Wrocław], after 1690; *d* Mannheim, 12 April 1737). Brother of (2) Silvius Leopold Weiss. He was described by Baron as not only a lutenist 'but also an excellent gambist and violinist and composer'. Probably he too was trained by his father. In 1708, with his father, he was appointed lutenist at the court of the Elector Palatine in Düsseldorf; he remained at the Palatine court (which subsequently moved to Heidelberg and finally Mannheim) until his death. After Elector Johann Wilhelm died in 1716 the court music positions became unstable. In 1718 a lutenist, 'Mr Weys', gave weekly chamber concerts in London for several months and played for the king, possibly seeking a position at Court. This was probably Sigismund rather than his elder brother. By 1732 he had been promoted to director of instrumental music, and in a personnel list of 1734 is cited as both Konzertmeister and theorbo player. He married in 1726, and remarried two years after his first wife's death in 1732. His compositions have received little attention. According to Neemann, his chamber works and concertos rank him as a significant predecessor of Johann Stamitz at the Mannheim court.

WORKS

Sonatas: 3, b, D, G, fl, bc, *B-Bc*, 2 ed. R. Kubik (Neuhausen, 1982); D, fl, bc, *D-KA*; e, fl, bc, *ROu*; g, ob, bc, *B-Bc*, ed. R. Kubik (Neuhausen, 1987); D, 2 fl, bc, formerly *D-Ds*
Concs.: c, lute, str, bc, *D-Dl*, no.55 in *Silvius Leopold Weiss, Sämtliche Werke*, ed. T. Crawford (Kassel, 2000); B♭, lute, fl, *GB-Lbl* (inc.), no.8 in *Silvius Leopold Weiss, Sämtliche Werke*, ed. D.A. Smith (Frankfurt, 1983–90); a, lute, vn, b, formerly Königsberg; B♭, vn, ob, bc, formerly *D-Ds*; d, ob, str, bc, formerly *D-Ds*
Other: Partie, lute, *A-Sst*; 2 partien, lute, formerly Königsberg [possibly by J.A.F. Weiss]; Sarabande, lute, *F-Pn*; Qt, C, fl, 2 vn, bc, ?*D-PA*

(4) Johann Adolf Faustinus Weiss (*b* Dresden, 15 April 1741; *d* Dresden, 21 Jan 1814). Son of (2) Silvius Leopold Weiss. Since he was born only nine years before his father's death, he could have benefited from the latter's instruction only to a limited degree. From 1750 to about 1757 he lived at Königsberg in the home of Count Kayserlingk. In 1763 he was appointed chamber lutenist at the Dresden court, and remained in that position, with a meagre salary of 200 thalers (his father's had been 1400), for the rest of his life. In 1772–3 he visited Italy, the Netherlands and England; Frederick the Great heard him in Berlin in 1775; and in 1789 he played before the court of Duke Frederick of Mecklenburg-Schwerin at Ludwigslust. He made a favourable impression on the duke's wife, Princess Luise Friederike of Württemberg, and arranged for her a manuscript collection of lute pieces.

Although, according to Neemann some of his compositions (most of which have been lost since World War II) reflect the style of his father's suites, which he is reported to have played very well, Faustinus lived at a time when the popularity of the lute in Germany had been almost entirely superseded by the guitar and when the *galant* style had replaced the Baroque. These changes are reflected in the pleasant but undistinguished character of the few pieces that survive.

WORKS

6 Duos faciles, 2 gui (Leipzig and Berlin, 1814); ed. W. Götze (Mainz, 1959)
10 Partien, lute [some doubtful authenticity]; [29] Pièces choisies pour le lut [incl. 3 Partien]; 23 pieces, lute; Trio, D, lute, vn, vc; 6 arrs. of Ger. songs: all *D-ROu*
5 Partien, lute [some doubtful authenticity]; 38 partien, lute; 6 arrs. of Ger. songs; 4 It. canzonettas, gui: all formerly Königsberg

EDWARD R. REILLY, DOUGLAS ALTON SMITH, TIM CRAWFORD

Weiss, Adolph (*b* Baltimore, MD, 12 Sept 1891; *d* Van Nuys, CA, 21 Feb 1971). American composer and bassoonist. He studied wind instruments with his father, a professional orchestral player. In 1907, upon becoming first bassoonist of the Russian SO, he left high school for a world tour, and he then joined the New York PO (1909) and the New York SO (1910). While in New York he studied theory with C.C. Mueller, Abraham Lilienthal, Frank Edwin Ward and Cornelius Rybner. He joined the Chicago SO in 1916 and the Eastman Theatre Orchestra, Rochester, in 1921. Weiss was the first American to study with Schoenberg (1926, in Berlin), and thereafter he used 12-tone serial techniques in his own compositions. Back in New York he became secretary of the Pan American Association of Composers (1928–32), but he continued to play the bassoon in the Conductorless Orchestra and others. His later performing career included engagements with the San Francisco Opera and SO (1936), MGM Studios (from 1938), the American Wind Quintet (South American tour 1941), the Los Angeles PO (from 1951) and the Santa Barbara and Ventura orchestras. He also taught at the Los Angeles Conservatory. He was one of the first to introduce 12-tone serial techniques in the USA; among his pupils was Cage (1933). His awards included a Guggenheim Fellowship (1931) and an award from the National Institute of Arts and Letters (1955).

WORKS

Stage: David (op, D.H. Lawrence), speakers, orch, inc.; The Libation Bearers (choreog cant., Aeschylus), solo vv, chorus, orch, 1930; Protest (dance music), 2 pf, 1945

ROBERT STEVENSON

Weiss, Edward (George) (*b* New York, 6 Sept 1892; *d* New York, 28 Sept 1984). American pianist. Born into a musical German-Nordic family, he grew up in Europe and studied in Berlin with Alexander Rihm and Xaver Scharwenka, through whom he was introduced to Busoni. He began to study with Busoni in 1914, following him to the USA in 1915 and returning with him to Europe, first to Zürich and then back to Berlin at the end of World War I. In 1921 he made his début with the Berlin PO under Busoni's baton. During his time in Berlin, in addition to giving masterclasses at the Klindworth-Scharwenka Conservatory, Weiss performed a large repertory, including the 32 Beethoven sonatas; the scale of his programmes, such as the complete études and preludes of Chopin or the entire *Années de pèlerinage* of Liszt in a single evening, reflected the monumental style of his mentor. He subsequently returned to New York, where he taught and performed for many years. In 1972 he made a tour of Britain, performing the two-piano version of Busoni's *Fantasia contrappuntistica* with Ronald Stevenson.

The essence of Weiss's playing lay in his cantilena, developed from Busoni's teaching and closely linked with an inventive use of the pedals, which may be heard to particular effect in his recordings of Busoni's music. Weiss was also a noted exponent of the music of Reger, Gottschalk and, especially, Sibelius, who considered him to be the most complete interpreter of his piano music.

CHARLES HOPKINS

Weiss, Friedrich Wilhelm. *See* WEIS, FRIEDRICH WILHELM.

Weiss, Karel. *See* WEIS, KAREL.

Weiss, Manfred (*b* Niesky, Upper Lusatia, 12 Feb 1935). German composer. He studied at the Staatliche Musikhochschule, Halle (1952–5), and the Hochschule für Musik Hanns Eisler, Berlin (1955–7), where his teachers included Rudolf Wagner-Régeny, Ruth Zechlin and Jürgen Wilbrandt. Unable to train as a university lecturer for political reasons, he was accepted into Wagner-Régeny's masterclasses at the DDR Akademie der Künste (1957–9). In 1959 he began teaching at the Dresden Musikhochschule, where he became a lecturer in 1970 and professor in 1983. Later, as vice-chancellor, he was responsible for the

Musikhochschule's substantial reorganization (1991–7). His honours include the Hanns Eisler radio prize (1977), the Dresden arts prize (1977) and the DDR arts prize (1985).

Weiss's early works, influenced by Hindemith and Bartók, are largely cheerful in nature. With *Präludium, Meditation und Hymnus* (1965), an orchestral work in which polyphonic complexes of sound, clearly distinct from each other thematically, unfold through a process of thesis, antithesis and synthesis, he developed a more individual style; the inclusion of chorale quotations in subsequent works projects a confessional character. After 1973, Weiss increasingly turned to large-scale instrumental works that explore the tension between avant-garde sound materials and classical structure. His later symphonies show a heightened emotionality; a greater transparency among polyphonic strata give these works a homogeneity that emphasizes tendencies towards catharsis and apotheosis.

WORKS
(selective list)

Orch: Fröhliche Ouvertüre, 1964; Präludium, Meditation und Hymnus, 1965; Toccata, 1966; Suite, 1968; Pf Conc., 1970–71; 5 Stücke, str, 1973; Music for 12 Brass and Timp, 1974; Sinfonische Fantasie, 1974; Conc., org, str, perc, 1975–6; Vn Conc., 1976–7; Fantasie, 14 str, 1977; Sym. no.3, 1980; Signale, 1981; Vc Conc., 1984; Metamorphosen, orch, org, 1985 [based on H. CHRISTOPH SRAMEK

Weiss, Piero (*b* Trieste, 26 Jan 1928). Italian musicologist and pianist. He started piano lessons as a child in Trieste, Lausanne and London. After moving to New York in 1940, he continued his piano studies with Isabelle Vengerova and Rudolf Serkin, and studied theory and composition with Karl Weigl and chamber music with Adolf Busch. By the time he took the BA at Columbia University in 1950, he was active as a concert pianist and spent the next 12 years performing in the USA and Europe. He meanwhile entered the graduate programme in musicology at Columbia, taking the PhD in 1970 with a dissertation on Goldoni as librettist. He taught at Columbia (1964–85), and was then called to head the music history department at the Peabody Conservatory of the Johns Hopkins University, Baltimore.

In his writings, Weiss has concentrated on the interaction of music and drama in operatic history, with particular emphasis on dramatic theory from the 17th to the 19th centuries. He writes and has published in both English and Italian, and has drawn on his linguistic skills and broader cultural interests in translating and editing collections of documents, among which the textbook *Music in the Western World* with Richard Taruskin (1984) has gained wide circulation.

ELLEN ROSAND

Weiss, Raphael (*b* Wangen, Allgau, 10 March 1713; *d* Ottobeuren, 28 Oct 1779). German composer. He entered the Benedictine monastery at Ottobeuren in 1730; from 1738 to 1766 he was a music teacher, organist, choir leader and music copyist there, then he became a father

confessor in the pilgrims' church, Maria Eldern. In 1753 he studied composition with Meinrad Spiess at the Irsee monastery and became the official composer for the monastery. Among his compositions are music for the dedication of the new basilica (1766), masses, vespers, litanies and other sacred works for use at Ottobeuren (some of which are in *D-OB*) as well as a cantata and music for several Singspiele.

ADOLF LAYER/R

Weissbeck, Johann Michael (*b* Unterlaimbach, Swabia, 10 May 1756; *d* Nuremberg, 1 May 1808). German writer on music, choir director, organist and jurisconsult. He began his professional career as a lawyer at Erlangen but moved to Nuremberg in 1776 as he became increasingly involved with music. After a period at Marktbreit as a deputy choir director, he returned to Nuremberg as organist and Kantor at various churches, including the Marienkirche. He wrote a series of brief monographs on theorists and organists, the most important being the *Protestationsschrift* (1783–4) in which he attacked the pan-tonal implications of the dualistic theories promulgated by Abbé Vogler. In many of his other works, Weissbeck's preoccupation with numerology is evident, such as the use of the number 43 in his monograph on Handel (1805). As a composer Weissbeck set 120 extremely 'enharmonic' (chromatic) basses to 30 chorale melodies; several of these appeared in the *Anthologie zur musikalischen Realzeitung für 1790*, i (Speyer).

SHELLEY DAVIS

Weissbeck, Nicolaus. *See* WEISBECK, NICOLAUS.

Weissberg, Daniel (*b* Basle, 2 Feb 1954). Swiss composer and pianist. After attending the Basle Conservatory, where he studied the piano with Klaus Linder (1973–7) and composition with Jacques Wildberger, he continued his composition studies with Kagel at the Cologne Musikhochschule (1978–81), and was Kagel's assistant between 1979 and 1981. Besides his activities as a freelance composer, he teaches the piano and electronic music at the Musikakademie of Basle.

Weissberg's works are the product of an extremely wide-ranging concept of music which makes use of both the environmental factors of music-making and media beyond the field of music itself. A considerable number of his compositions can be classified as 'instrumental theatre' in Kagel's sense, and the visual aspects of sound production also play an important part in his works of absolute music, for instance in using additional instruments or unusual performance methods. His interest in modern music drama and the scenic elements of music has led, among other things, to several works produced in collaboration with the video artist Franz Schnyder. Besides electro-acoustic works, he has written several compositions for radio, often in collaboration with the producer and conductor Manfred Reichert. He received the 1995 Prix Italia for the radio play *Sind Töne Töne oder sind Töne Webern?*, and in 1997 was awarded the Kunstpreis of the canton of Solothurn.

PATRICK MÜLLER

Weissberg, Julia Lazarevna. *See* VEYSBERG, YULIYA LAZAREVNA.

Weisse, Christian Felix (*b* Annaberg, Erzgebirge, 28 Jan 1726; *d* Leipzig, 16 Dec 1804). German poet, dramatist and librettist. He went to Leipzig in 1745 to study philology and theology at the university and settled there permanently, earning his living from 1750 in the service of a local count, first as steward and from 1762 as collector of taxes. In the 1750s he established his reputation as a dramatist, lyric poet, translator and critic; he edited the review *Bibliothek der schönen Wissenschaften* from 1759. He also prepared German versions of two popular English ballad operas, *The Devil to Pay* and *The Merry Cobbler*, both set by J.C. Standfuss. During the Seven Years War Weisse travelled with the count to Paris, where he remained from 1759 to 1760, meeting Rousseau and being much struck by the naive and popular charm of C.-S. Favart's comic operas. When he began writing German librettos again for the Koch company at Leipzig in 1763, Weisse at first reworked his two early texts but then turned to French models.

In the settings by J.A. Hiller, Weisse's dramas of idealized rustic simplicity and virtue found immediate favour and unprecedented box-office success throughout Germany, although he never took them seriously as dramas. After 1773, irked by professional criticism, he ceased writing librettos for public performance. From 1776 to 1782 he edited a periodical for children, *Der Kinderfreund*, to which he contributed several didactic one-act comic operas, set by Hiller, Georg Benda and Michael Haydn.

Although Weisse sought to moderate the earthy tone of his English models, his first two operas remain farces tinged with sentimental touches. They were favourites throughout the century. His subsequent French-inspired librettos all turn on the familiar opposition of rustic innocence and the corrupt insincerity of the court or city. The musical texts are largely decorative strophic songs that stand apart from any dramatic involvement; on occasion they were simply omitted and the libretto was presented with success as a spoken drama. *Die Jagd* (1770) forms the summit of Weisse's collaboration with Hiller, both epitomizing and perfecting the features common to all their comic operas: the simple if static joys of country life, a preoccupation with sympathetic characters including a benevolent and fatherly ruler, a tearful reunion scene as the dramatic climax and lyric emphasis on the female partner of each of its three couples. It has remained popular in Germany into the present century. Weisse's lyric poetry prompted settings by many composers, including J.A. Scheibe, Hiller, Johann André, Haydn, Mozart and Beethoven; the *Scherzhafte Lieder* and the *Kleine Lieder für Kinder*, in particular, match the liveliness and variety of his operatic song texts.

WRITINGS

LIBRETTOS

Edition: *Komische Opern von C.F. Weisse* (Leipzig, 1768–71, 2/1777–8)

komische Opern unless otherwise stated

Die verwandelten Weiber, oder Der Teufel ist los, erster Theil, J.C. Standfuss and J.A. Hiller, 1766; *Der lustige Schuster, oder Der Teufel ist los, zweyter Theil*, Standfuss and Hiller, 1766; *Lottchen am Hofe*, Hiller, 1767; *Die Liebe auf dem Lande*, Hiller, 1768; *Die Jagd*, Hiller, 1770 (J.B. Schenk, 1799); *Der Ärndtekranz*, Hiller, 1771; *Der Dorfbalbier*, Hiller and Neefe, 1771; *Der Krieg* (with C.F. Ramler), Hiller, 1772; *Die Jubelhochzeit*, Hiller, 1773; *Die Schadenfreude* (kleines Lustspiel für Kinder mit Liederchen), G.P. Weimar, 1776 (André, 1778); *Das Findelkind, oder Unverhofft kömmt oft* (children's operetta), G. Benda, unperf.; *Die kleine Ährenleserinn* (Lustspiel für Kinder), Hiller, 1778, unperf.; *Die Friedensfeyer, oder Die unvermuthete Wiederkunft* (children's play), Hiller, unperf.; *Das Denkmal in Arkadien* (ländliches Schauspiel für die Jugend mit untermischten Gesängen), Hiller, unperf.

Richard III, *Romeo und Julia* (both after W. Shakespeare), incid music by J.W. Hertel, 1767

POEMS

Scherzhafte Lieder (Leipzig, 1758)

Amazonenlieder (Leipzig, 1760)

Kleine Lieder für Kinder … mit Melodien, i (Flensburg, 1766) [with music by J.A. Scheibe], ii (Flensburg, 1767); rev. enlarged 1769 as *Lieder für Kinder* [with new music by Hiller]

Kleine lyrische Gedichte (Leipzig, 1772)

ANNA AMALIE ABERT, THOMAS BAUMAN

Weissenberg, Alexis (Sigismond) (*b* Sofia, 26 July 1929). French pianist of Bulgarian birth. At the age of three he began musical studies under Pancho Vladiguerov. In 1945 he went as a refugee to Israel, where he gave his first performance with an orchestra. He entered the Juilliard School of Music in 1946 as a pupil of Olga Samaroff; the following year, having won the Leventritt International Competition, he made his New York début under Szell, and an international career commenced, which he interrupted in 1956 with a ten-year period of retirement, for study and teaching. In November 1966 he played again in Paris, and since then has fashioned a wide-ranging second career. His Royal Festival Hall début was in June 1974, and the same year he recorded the complete Beethoven piano concertos with von Karajan. He is an occasional member of international piano competition juries. A pianist of virtuoso technique, with wide repertory but a particular interest in the Romantic period (especially the music of Chopin and Schumann), he can give in live performance the impression of a forceful flamboyance of style in which sensitivity is sometimes swept aside.

MAX LOPPERT/JESSICA DUCHEN

Weissenborn, (Christian) Julius (*b* Friedrichs-Tanneck, Thuringia, 13 April 1837; *d* Leipzig, 21 April 1888). German bassoonist and teacher. He was leading bassoonist in the Leipzig Gewandhaus orchestra from 1857 to 1887. From 1882 until his death he was professor at the Leipzig Conservatory, the first teacher of bassoon to be appointed. Though he composed orchestral and choral works, he is remembered for the excellent teaching material, still in print and widely used, that he wrote for the bassoon. This comprises a tutor for the improved Heckel model bassoon of 1885 (*Praktische Fagott-Schule*, Leipzig, 1887), two books of studies, some shorter pieces for bassoon and piano, and a set of trios for three bassoons; these were originally intended to form part of one single comprehensive work.

WILLIAM WATERHOUSE

Weissenburg, Johann Heinrich von. *See* ALBICASTRO, HENRICUS.

Weissenfels. Town in Saxon-Anhalt, Germany. It had particular musical importance in the Baroque period, but church music activities can be traced back to the 13th century. Heinrich Schütz's father Christoph was mayor and owned the inn Zum Schützen, where Heinrich spent his youth. In 1651 he bought a house close to his father's former inn and lived there for many of his last years, when not serving the Dresden court. Weissenfels became the site of the court of the dukes of Sachsen-Weissenfels, a royal line created by Prince Johann Georg I of Saxony in 1657 and first headed by Duke August. A vigorous cultivation of the musical arts began under his son Johann Adolf I (1680–97); a Hofkapelle was established in 1680 in the Neu-Augustusburg palace and an opera theatre was opened there in 1685. Music continued to flourish under successive dukes, first under Johann Adolf's son Johann Georg (1697–1712) and then under his brother Christian (1712–36). Another brother, Johann Adolf II,

the last of the line (1736–46), gradually reduced the musical forces at court. Until then the Hofkapelle (see Werner) had grown steadily in size. Around 1726 it included 30 musicians in addition to the director Johann Gotthilf Krieger, whose father J.P. Krieger had been its director, 1680–1725. The Hofoper was especially important under the direction of the latter. Famous in its day, it performed German opera in Weissenfels almost every year from 1684 to 1730; the company also toured to cites such as Weimar. Besides Krieger's works and those of his pupil J.A. Kobelius, Hofoper composer from 1715 to 1729, operas were often imported from neighbouring Leipzig and performed in part by university students, including works by N.A. Strungk, Keiser, Heinichen and Telemann.

Directors of the court orchestra included Johann Beer (1686–1700), Pantaleon Hebenstreit (*c*1698–1707) and Johann Georg Linike (1711–21). Other significant musicians active in Weissenfels at this time were Christian Edelmann (court organist, 1685–91), Wilhelm C. Schieferdecker (town organist, 1701–11) and Johann C. Schieferdecker (court Kantor, 1720–40). J.S. Bach held the largely honorary title of 'Fürstlich sächsisch-weissenfelsischer Capellmeister, "von Haus aus"', and composed the so-called 'Jagdkantate' BWV208 for the birthday of Duke Christian (probably in 1713). The young Handel visited the town with his father on many occasions.

The flowering of German opera at Weissenfels ended in 1746, when the ducal line died out, and in the second half of the 18th century the significance of music in the town declined. During the 19th century there was strong support for educational musical activities, and an organ workshop was set up in 1846 by Friedrich Ladegast, who built organs in Leipzig (Nikolaikirche), Merseburg and Schwerin, as well as for the Stadtkirche in Weissenfels. A municipal symphony orchestra was founded about 1890. In the 20th century Weissenfels became part of the industrial region of Halle and of its musical life. To mark the 400th anniversary of Schütz's birth in 1985, his house at 13 Nikolaistrasse was converted into a museum and research centre.

HORST SEEGER/R

Weissensee, Friedrich (*b* Schwerstedt, Thuringia, *c*1560; *d* Altenweddingen, nr Magdeburg, 1622). German composer, schoolmaster and clergyman. From 1590 he was Rektor of the grammar school at Gebesee, near Erfurt. In about 1596 he succeeded Leonhard Schroeter (who retired in 1595) as Kantor of the notable grammar school at Magdeburg, an important appointment in which two of his recent predecessors had been Martin Agricola and Gallus Dressler. One of his most noteworthy pupils there was Daniel Friderici. In 1602 he became a clergyman at Altenweddingen. He ranks beside such men as Christoph Demantius, Michael Praetorius and Melchior Vulpius as one of the leading German composers of Protestant church music of his day. His principal publication is the *Opus melicum* (1602), which contains 72 Latin and German motets for four to 12 voices with instruments (one of the Latin motets is by Marenzio). These works show that he was one of the best German exponents of the massive Venetian choral style of Willaert and the Gabrielis. His volumes of 1595 and 1599 are also important contributions to the German motet literature. The part he played in the transformation of the Italian style is also recognizable in his eight-part pieces in Bodenschatz's *Florilegium portense* (1603[1], 1621[2]), which are among the most impressive works in this anthology.

WORKS

all except anthologies published in Magdeburg unless otherwise stated

Evangelische Sprüche auf die vornehmsten Fest-Tage, 5vv (1595)
Hochzeit-Lied aus den Sprüchwörtern Salomonis am 31. Capitel … dem … Peters Rathmann, 6vv (1599)
Hochzeitlicher Ehren Dantz, auff das adelige Beylager des … Wolffgang Spitznasen zu Magdeburgk Domherrn, 6vv (1600)
Opus melicum methodicum et plane novum, singulis diebus … et festis accomodatas, 4–10, 12vv (1602)
Geistliche Braut und Hochzeit Gesang, zu Ehren … Georgio Schultzen, 6vv (1611)
Sponsis novellis, 8vv (1619)
Geistlich Braut und Hochzeitliedt, ex Cant. Cantic. Cap. 5 und 7 ad 9, 6vv (print without title-page)
4 works, 1618[1], 1621[2]

Motets, hymns and other vocal works, *D-Bhm, Dl, LEm, Z, PL-WRu*, formerly Legnica, Ritterakademie-Bibliothek, now ?*PL-WRu*

DIETER HÄRTWIG

Weisshaar, Hans (*b* Wildberg, Germany, 25 Aug 1913; *d* Los Angeles, 24 June 1991). American violin maker and restorer of German origin. He was born of musical parents, and as a young man studied violin making at the school in Mittenwald, Bavaria. After further experience in Switzerland, the Netherlands and Germany, he emigrated to the USA in 1936, working as a restorer first with Emil Herrmann in New York, then with Lewis & Son in Chicago, and again with Herrmann until his workshop closed in 1945. During his time with Herrmann he worked under Fernando Sacconi. In 1947 he established his own business in Hollywood, California. After his death, the shop was continued by his assistant Margaret Shipman (*b* Denver, 7 Oct 1946) who had joined the workshop in 1969. His son Michael (*b* Chicago, 4 Nov 1942) and daughter-in-law Rena (*b* Berlin, 8 Feb 1940) also worked in the shop. They opened their own business in Costa Mesa, California, in 1975.

The excellence of his restorations brought him an international reputation. In 1952, for instance, a high tide in southern California swept the Red Diamond Stradivari violin out of its owner's hands and into the sea. It was recovered the following day on a beach about three miles away, still in its case but drenched with salt water, and

rushed to Weisshaar. His speedy response and painstaking work ensured that the violin was eventually none the worse, in any respect, for an accident which might well have destroyed it completely.

Weisshaar was also an important teacher of restoration. He co-wrote the book *Violin Restoration: a Manual for Violin Makers* (Los Angeles, 1988) with Margaret Shipman.

CHARLES BEARE/PHILIP J. KASS

Weisshaus, Imre. *See* ARMA, PAUL.

Weissheimer, Wendelin (*b* Osthofen, 26 Feb 1838; *d* Nuremberg, 16 June 1910). German conductor and composer. After initial studies in Worms, he attended the Leipzig Conservatory in 1856 and later became a pupil of Liszt in Weimar. He served as Kapellmeister in many cities, among them Mainz (1858, 1861 and later), Würzburg (1866–8), Zürich (1871–2), Strasbourg (1873–8), Baden-Baden and Milan. About 1893 he moved to Freiburg; he settled in Nuremberg in 1900. From 1858 for some years he was a close friend of Wagner, whose music he regularly performed at La Scala and elsewhere. He conducted the Würzburg première of *Rienzi* in 1866. Their friendship cooled noticeably after 1868, however, following Wagner's refusal to lend his support to the staging of the première of Weissheimer's own opera *Theodor Körner* at the Munich Hofoper. Weissheimer's compositions include another opera, *Meister Martin und seine Gesellen* (Karlsruhe, 1879), a symphony and several vocal works. He published *Erlebnisse mit Richard Wagner, Franz Liszt und vielen anderen Zeitgenossen nebst deren Briefen* (Stuttgart and Leipzig, 1898). (*MGG1*, H.P. Schilly)

ALEXANDER HEINZEL

Weissmann, Adolf (*b* Rosenberg, 15 Aug 1873; *d* Haifa, 23 April 1929). German critic and writer on music. He studied music and philology at the universities of Breslau, Innsbruck, Florence and Berne, where he took the doctorate. After working briefly as a gymnasium professor, he moved to Berlin in 1900 and began writing for the *Berliner Tageblatt* (1900–5), *Roland von Berlin* (1904–10), the *Deutsche Montagszeitung* (from 1904) and the *BZ am Mittag* (from 1916); he also contributed articles to the *Vossische Zeitung*, *Anbruch* and *Die Musik*. He was the editor of the *Sang und Klang Almanach* (1920–29) and a founding member of the International Society for Contemporary Music. He also presented a weekly radio programme of contemporary music.

Along with Paul Bekker, Weissmann was the most widely read and influential critic in German-speaking Europe. A highly cultured, urbane figure, he was renowned for his elegant prose and incisive observations about the present state of music. Despite his ties with the ISCM, Weissmann was highly ambivalent about contemporary music. He was deeply critical of Strauss, Schreker, Debussy, Puccini and Schoenberg, but supportive of neoclassically orientated composers such as Hindemith and Krenek. His ideas are summed up in the principal critical studies *Die Musik in der Weltkrise* (1922), *Die Musik der Sinne* (1925) and *Die Entgötterung den Musik* (1928).

MICHAEL VON DER LINN

Weissmann, Frieder (*b* Langen, 23 Jan 1893; *d* 4 Jan 1984). German conductor. After university studies in law and music, he studied composition, counterpoint and the piano at the Hochschule in Mannheim, and conducting under Max von Schillings in Berlin. Like many other German conductors, he rose through the ranks of the opera house system, working as a répétiteur, chorus master or Kapellmeister at Frankfurt (1915–16), Stettin (now Szczecin, 1916–17), Berlin (1920–24), Münster (1924–5) and Königsberg (now Kaliningrad, 1926–7). From 1926 he increased his activities as a symphonic conductor, giving concerts with the Dresden PO (1926–30), the Berlin SO (1931), the Concertgebouw Orchestra (1931–3), the Berlin PO (1932–3) and others. He left Germany in 1933, moving to South America, where he conducted at the Teatro Colón (1934–7) and later to the USA. After making his début there with the Cincinnati SO in 1937, he worked with several minor North American orchestras and, from 1950, with the Havana PO. While Weissman's work as a conductor of concerts and opera is significant, he is best known for his recordings, notably with the Berlin Staatskapelle (with whom he recorded a wide repertory, including Haydn, Mozart and Beethoven symphonies) and the orchestra of the Berlin Staatsoper. He also recorded as an accompanist to leading vocal and instrumental soloists, including Lotte Lehmann, Richard Tauber, Meta Seinemeyer (whom he married on her deathbed in 1929), Lauritz Melchior, William Primrose and Moriz Rosenthal.

RAYMOND HOLDEN

Weist-Hill, Thomas Henry (*b* London, 3 Jan 1828; *d* London, 25 Dec 1891). English violinist, conductor and teacher. He studied with Sainton at the RAM and was elected King's Scholar (1845). After making a name as an orchestral and solo violinist, he visited the USA, giving the first public performance of Mendelssohn's Concerto there. He also toured Europe, then joined Michael Costa's Royal Italian Opera orchestra (1849), and subsequently accepted engagements at Drury Lane, Her Majesty's Theatre and elsewhere. When the Alexandra Palace opened in 1873 he was appointed musical director, with an orchestra of 42 players and a choir of 300 voices; his programmes included revivals of Handel's *Esther* and *Susanna*, and he ran a symphony competition for British composers. During the season of 1878–9 he was conductor of Mme Jenny Viard-Louis' orchestral concerts, at which works by Bizet, Massenet and Goetz were introduced. In

1880 he became the first principal of the GSM, and held this post until his death.

ALEXIS CHITTY/E.D. MACKERNESS

Weitzmann, Carl Friedrich (*b* Berlin, 10 Aug 1808; *d* Berlin, 7 Nov 1880). German music theorist. He studied violin and composition with Carl Henning and Bernhard Klein in Berlin in the mid 1820s, and composition and theory with Spohr and Moritz Hauptmann in Kassel (1827–32). In Riga, he composed for a Liedertafel that he founded with Heinrich Dorn (1832); appointed music director in Reval (now Tallin) in 1834, he composed three operas, all unsuccessful. His later return to Berlin brought with it a second period of compositional activity, but all his works are of purely historical interest. In 1836 he began a ten-year career in court orchestras in St Petersburg, where he seems also to have begun the collection of rare musical books and folk material that was essential to his later scholarly activities. On retirement, with a substantial pension, he set off on a concert tour of Lapland and Finland (where he also collected folk music), followed by brief orchestral engagements in Paris and London. In 1848 he returned to Berlin, where he engaged in historical and theoretical research. He published articles on his folk music research in the early 1850s and in 1855 a monograph on Ancient Greek music. In 1853 he began his career as a theorist of 'Music of the Future' with a monograph on the augmented triad, which he sent to Liszt, together with a request that he accept the dedication of a work on the diminished seventh chord already in press. Liszt acceded to his request, and analysis of his *Faust-Symphonie* (1854–7) suggests that ideas from *Der übermässige Dreiklang* found their way into the work. Weitzmann took up a teaching appointment at the Stern Conservatory in 1857. In 1860 his *Harmoniesystem* won a contest run by Brendel's *Neue Zeitschrift für Musik*. The most developed form of his theory, *Harmoniesystem*, became the focus of critical attack that Weitzmann sought to fend off with *Die neue Harmonielehre im Streit mit der alten*.

Weitzmann's originality and importance as a theorist are evident in his treatment of the 'dualist' account of minor, the compositional resources of equal temperament, and the principles of progression and voice-leading of increasingly chromatic music. The seminal notion of his early work, that a minor triad may be thought of as the 'inversion' of major, and that both may be generated from a common fundamental 'by addition of a major third and perfect fifth upwards and downwards' (*Der übermässige Dreiklang*, 16), had been a mere aside for Hauptmann; for Weitzmann it serves as a way to relate a single augmented triad (the two major thirds around the fundamental) to both major and minor triads and, by extension, to major and minor keys. Later, Weitzmann extended the dualist explanation to scales: conceiving of the minor scale in descent, starting from the fifth degree, yields an intervallic succession that is the mirror inversion of an ascending major scale (*Der verminderte Septimenakkord*, 27; *Harmoniesystem*, 10). He even sketches a dualist theory of chord progression (*Der verminderte Septimenakkord*, 26), proposing the order-inversion of stock cadential patterns in minor (I–V–IV–I, instead of I–IV–V–I etc.). His dualist ideas were later pursued by Arthur von Oettingen and the young Hugo Riemann.

The most important issue on which Weitzmann differs from most theorists is that of tuning and temperament. Though many accepted temperament as a necessary compromise (while espousing an acoustically based harmonic theory), Weitzmann was perhaps the first to view it positively. This led him to examine the equal divisions of the octave that are indigenous to 12-note equal temperament (presuming full acceptance of enharmonic equivalence) as fundamental structural devices. The titles of his first two theoretical works are clear indications: he is primarily interested in the resolution possibilities of the 'dissonant' chords, in all inversions and enharmonic guises. From these issue the dynamism and direction of 'progression', which must consist of a dissonant chord moving to a consonant chord (or to a dissonant one: 'deceptive resolution'). The preparation of dissonant chords and successions of consonant chords are more freely treated. He thus de-emphasized those stricter rules of progression that derive from the acoustic model and moved towards 'any chord can follow another chord' – the statement often attributed to Liszt, but reliably to Reger. In voice-leading Weitzmann criticized, with less success, the traditional prohibition of parallels. His positive contribution, however, was a systematic investigation of conjunct displacement of one or more notes of augmented triads and diminished seventh chords (what Cohn has called 'parsimonious' voice-leading). This view led him to revise the traditional notion of tonal relations and to view voice-leading parsimony as the primary criterion of chord relatedness (A minor and E minor are closer to C major than is G major, for example); this, combined with full enharmonic equivalence, led in turn to radically new tonal relations in *Der übermässige Dreiklang* (p.18). Here Weitzmann arranges the major and minor triads into four families each of six, based on the relationship of each dualist pair to a single (enharmonically reinterpreted) augmented triad; e.g. C major/Fminor, E major/A minor and A♭ major/C♯ minor are all derivable from the augmented triad C-E-G♯ by half-step displacement of one tone. This is described by Cohn as 'Weitzmann's Regions and Cycles' (see Cohn, 2000).

Weiwanowsky, Paul Joseph. *See* VEJVANOVSKÝ, PAVEL JOSEF.

Wei Zhongle [Wei Chongfu] (*b* Shanghai, 12 March 1908 or 21 Feb 1909; *d* 1998). Chinese *pipa* (plucked lute) and *qin* (seven-string zither) player. Wei Zhongle was an early member of the influential Datong Ensemble, a group of Chinese musicians who met in Shanghai to improve their own performance skills and to develop from traditional and Western elements a new repertory of 'national music' (*guoyue*). Other than *pipa* and *qin*, Wei also learnt several instruments. From the 1930s onwards Wei held a succession of music teaching and performing posts at universities and colleges in Shanghai, one of the most notable of which was his founding of a traditional instruments department at the Shanghai Conservatory of Music in the early 1950s.

JONATHAN P.J. STOCK

Welch, Elisabeth (*b* New York, 27 Feb 1904). American singer and actress. Although she found greater personal and artistic freedom in Paris and London than in her native United States, she was relentlessly stereotyped as a black singer. The titles of her shows *Black Birds of 1928* (Paris and New York) and *Dark Doings* (London, 1933) typified the restrictions of the time. Encouraged by Paul Robeson (with whom she appeared in the films *Songs of Freedom* and *Big Fella*) to stand up for her race, she somewhat acerbically pointed out that her father was part Native American and part Negro while her mother was a Scot with an Irish background, so the issue was not a simple one. Cole Porter recognized her abilities and gave her a major success with the sultry song 'Solomon' in *Nymph Errant* (London, 1933), and Ivor Novello included her in *Glamorous Night* (London, 1935), writing a role for her that had nothing to do with the plot, but provided a showcase for her talent particularly with the song 'Shantytown'. She also appeared in Novello's *Arc de Triomphe* (1943), introducing 'Dark Music'.

After the war Welch appeared in various of Laurie Lister's shows (*Tuppence Coloured*, *Oranges and Lemons*, *Penny Plain*) and appeared as Sweet Ginger in *The Crooked Mile* (1959), a musical set among the bohemian life of Soho, in which she sang 'If I Ever Fall in Love Again'. She also appeared in cabaret in London and New York. She was brought to a new audience with her performance of *Stormy Weather* in Derek Jarman's film *The Tempest* (1979), and in 1987, at 78, she appeared in her one-woman show at the Almeida Theatre, London.

PAUL WEBB

Welcher, Dan (Edward) (*b* Rochester, NY, 2 March 1948). American composer and conductor. After training as a pianist and bassoonist, he studied composition with Warren Benson and Samuel Adler at the Eastman School of Music (BM 1969) and with Ludmila Ulehla at the Manhattan School of Music (MM 1972). From 1972 to 1978 he served as principal bassoonist of the Louisville Orchestra, while teaching theory and composition at the University of Louisville. In 1978 he joined the composition faculty of the University of Texas, where he created the New Music Ensemble. During his time as composer-in-residence with the Honolulu SO (1990–92), he wrote his Symphony no.1 and *Haleakalā: How Maui Snared the Sun*, a vibrantly scored piece for orchestra and narrator based on Hawaiian legends. Among his many awards and prizes are a Guggenheim Fellowship (1997) and grants from the National Endowment for the Arts, the Rockefeller Foundation, the MacDowell Colony and the American Music Center.

Welcher's work has been performed by the BBC SO, the Chicago SO, the St Louis SO, the St Paul Chamber Orchestra and the Dallas SO, among others. He has also served as assistant conductor of the Austin SO and the Honolulu SO, and appeared frequently as a guest conductor with other ensembles. Rhythmically exuberant and graced by a lyrical undercurrent, Welcher's music encompasses occasional strains of jazz and rock within a highly structured context. His work is particularly distinguished by its masterful orchestration: a vivid sense of instrumental colour infuses both his many chamber works and orchestral scores such as *The Visions of Merlin* (1980) and the Clarinet Concerto (1989).

JOSHUA KOSMAN

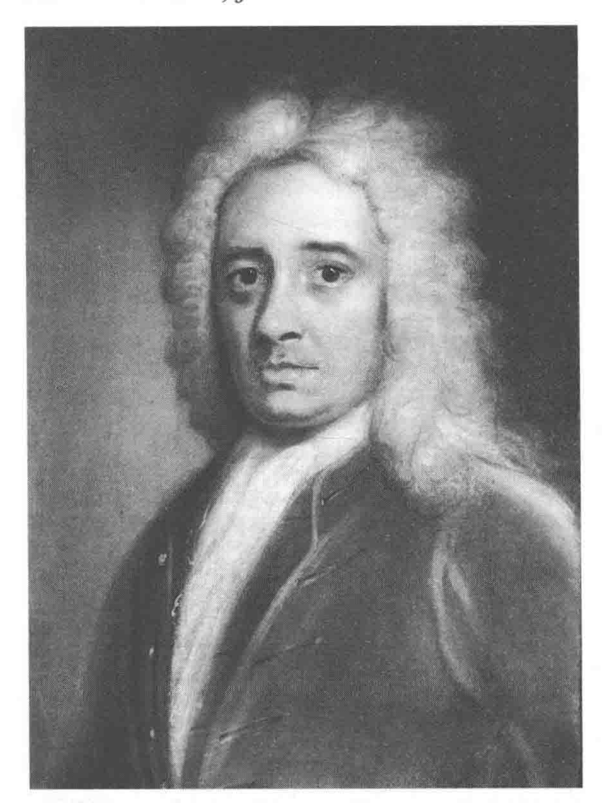
Title-page of J.C. Bach's 'A Third Sett of Six Concertos' op.13 (London: John Welcker, 1777)

Welcker. English family of music publishers, printers and music sellers, established in London. The business was founded in or before 1762 by Peter Welcker (*d* London, 1775), who published many important works, including much of J.C. Bach's instrumental music, works of the Mannheim school (using plates from Hummel of Amsterdam) and several of the early volumes of Thomas Warren's *Collection of Catches, Canons and Glees*. At his death the business was continued by his widow Mary Welcker (*d* London, early 1778), probably with her son-in-law James Blundell as manager. Her executors carried on the business for a few months after her death, but by July 1778 Blundell had taken over the business, and in the following year ROBERT BREMNER purchased some of her plates and music.

John Welcker (*fl* 1775–*c*1785), the son of Mary and Peter Welcker, set up his own business as a music seller and publisher in 1775 (see illustration), but in 1780 he became bankrupt. His premises were taken over by Blundell, and the trade stock was offered for sale in July 1780. Welcker started business again in August of that year, and continued for about five years. He issued the opera dances and ballets performed at the Haymarket Theatre and continued to publish the sort of music which his parents had issued. About 1778 he reissued the three volumes of *Clio and Euterpe* which had been engraved and first published by HENRY ROBERTS, with an added fourth volume. (*KidsonBMP*; *Humphries-SmithMP*)

FRANK KIDSON/WILLIAM C. SMITH/PETER WARD JONES

Welden, Friedrich. Pseudonym of WILHELM DILTHEY.



Welder, Philip (de). *See* VAN WILDER, PHILIP.

Weldon, John (*b* Chichester, 19 Jan 1676; *d* London, 7 May 1736). English composer and organist. He was a chorister at Eton College and received his early musical training under the organist, John Walter. He was a pupil of Purcell's for a year from about March 1693. The next year he was appointed organist at New College, Oxford. In March 1700 four prizes were offered for the best settings of Congreve's masque, *The Judgment of Paris*; Weldon's setting, first performed on 6 May 1701, won the first prize, the others being awarded to John Eccles, Daniel Purcell and Gottfried Finger respectively. On 6 June 1701 Weldon was appointed a Gentleman Extraordinary of the Chapel Royal, presumably as an organist. Early in 1702 he supervised a performance of *The Judgment of Paris* given in Lincoln's Inn Fields Theatre at the Duke of Bedford's expense; the receipted bills for the chorus, soloists and dressers are among the Bedford family papers. Weldon was presumably resident in London by then, for during 1702 he resigned his Oxford post and in June became organist of St Bride's, Fleet Street. During the next few years he composed vocal music for Motteux's musical interlude *Britain's Happiness* (1704) and numerous songs, mostly for subscription concerts.

On Blow's death on 1 October 1708 Weldon was appointed second organist and additional composer of the Chapel Royal, the latter a newly created post. After this his interest in secular music seems to have declined, though he set *A Dialogue between Honour, Faction and Peace* (now lost) in 1713, and on 30 July 1716 a performance of *The Tempest* was advertised with 'all the musick compos'd by Mr Weldon and perform'd compleat, as at the revival of the play'. This was obviously not the first performance of Weldon's music, which may well have dated from about 1712. No score of music for *The Tempest* bearing his name is now known, but that usually attributed to Purcell may be Weldon's (see Laurie). On 2 February 1714 he was appointed organist of St Martin-in-the-Fields. In fact, apart from his Service in D, almost certainly written in 1716, nearly all Weldon's known sacred works date from before 1715. Even his collection of anthems, *Divine Harmony*, though published in 1716, was written at least two years earlier. Four anthems listed in the 1724 Chapel Royal wordbook but not preserved in contemporary sources may, however, date from the period *c*1715–22 when the extant Chapel Royal partbooks were not being used.

In February 1727 St Martin's appointed an assistant organist to share Weldon's duties instead of doubling his salary as had at first been proposed; after William Croft's death in August 1727, Weldon was not made first organist and composer of the Chapel Royal as was usual, Maurice Greene being appointed instead. For some time before his death he was so ill that his duties as organist and composer were undertaken jointly by Jonathan Martin and William Boyce. He was buried in St Paul's, Covent Garden. There is a portrait of him in the Faculty of Music at Oxford (see illustration).

Weldon was a composer of considerable talent who never quite fulfilled his early promise. His melodic range was wide, from gay tunes like *From grave lessons* to intense declamation as in *O Lord rebuke me not*. His word-setting was often sensitive and rhythmically subtle, though he over-indulged in lengthy roulades and certain

John Weldon: portrait by an unknown artist, c1725 (Faculty of Music, Oxford)

favourite turns of phrase. He could make effective use of chromatic passages and Purcellian plunges into the minor for expressive purposes, but his normal harmonic idiom was rather conventional and his range of modulation restricted.

Italian influence is apparent to some extent in Weldon's textures and figuration, but he avoided all standardization of structure, comparatively rarely using accepted forms such as binary, ground or da capo and often, especially in *The Judgment of Paris*, constructing unusual designs through varied repetition and recapitulation of material. He did not, however, always have the skill and imagination necessary to sustain his freedom of approach and was apt to rely excessively on sequential and repetitive patterns. Thus his work is uneven, at times dull and tautologous, but at its best showing both charm and sincerity of feeling.

WORKS

all printed works published in London

STAGE WORKS

The Judgment of Paris (masque, 1, W. Congreve), London, Dorset Garden, 6 May 1701, *US-Ws*, 2 songs in Wit and Mirth, iii (2/1707), single sheet edns (1702, *c*1710)

Britain's Happiness (musical entertainment, P. Motteux), London, Drury Lane, 22 Feb 1704, 1 duet in Monthly Mask of Vocal Music (1705)

The Tempest, or The Enchanted Island (semi-op, W. Davenant, J. Dryden and ? T. Shadwell, after W. Shakespeare), London, Drury Lane, ? 7 Jan 1712; music possibly extant as Purcell's The Tempest in *The Works of Henry Purcell*, The Purcell Society, xix (London, 1912), 111–87

Orpheus and Euridice (masque), ?Besselsleigh School, Besselsleigh, Oxon., Oct 1697, 1 song in Mercurius Musicus (1701) and single sheet edns (*c*1701, *c*1705)

MARGARET LAURIE

Welin, Karl-Erik (*b* Genarp, 31 May 1934; *d* Bunyola, Mallorca, 30 May 1992). Swedish composer, pianist and organist. He studied composition with Bucht and Lidholm, the piano with Brandel and Tudor, and the organ with Linder. After passing the highest organ examination at the Stockholm Musikhögskolan (1961) he took appointments as organist of the Johanneskyrka, Stockholm, and as a music producer for Swedish radio. Internationally known as a performer of avant-garde music, he displayed an unusual dramatic talent in theatrical works, as well as considerable ability in the realization of graphic scores. He also made a reputation for unconventional performances of Baroque music, particularly Bach; and he extended the possibilities of both the piano and the organ.

The compass of Welin's compositional work is broad. A subdued, dream-like quality is represented by the *Kinesiska dikter*, *Renovationes*, with its shimmering orchestration and soprano vocalises, and *Warum nicht?*, which displays a characteristic preference for the low register of the flute. In protest against escapist and lazy listening habits, he has emphasized the romantic and traditional aspect of his music in such works as *Aver la forza di . . .*, clearly attempting to create 'pleasing melody', and *Glazba* ('Music'), in which the intensity of feeling is very marked. The strongly dramatic side of Welin's work is to be found mostly in the pieces of the early 1960s: *Manzit*, for example, has such directions as 'with hysterical force' and 'all sorts of craziness'; *Esservecchia*

is performed with violent fist blows on the keys and strings of the piano. Later he concentrated on music of great simplicity, sometimes to the point of naivety, and he maintained the strong romantic and lyrical side of his gifts in music of some fragility, expressive of loneliness and alienation, as demonstrated in *Ett svenskt rekviem* (1976).

Welin created a sensation at what had been advertised as his last piano concert (Stockholm, 1964) when he played *Rendez-vous 1963* by Theodore E. Libér (alias Knut Wiggen), so injuring himself in the destruction of the piano required by the piece that he had to be taken to hospital. For his own *L'essai du pianiste* he staged, without playing a note, a satirical 'state funeral' of the grand piano, which he described as that 'most foul item of furniture'.

ROLF HAGLUND

Welitsch [Veličkova], **Ljuba** (*b* Borissovo, 10 July 1913; *d* Vienna, 31 Aug 1996). Austrian soprano of Bulgarian birth. After studying in Vienna with Theodor Lierhammer she made her début at the Sofia Opera in 1936. She appeared at Graz (1937–40), Hamburg (1941–3) and Munich (1943–6), and then joined the Vienna Staatsoper. She first sang in England in autumn 1947 during the

Ljuba Welitsch in the title role of Richard Strauss's 'Salome'

Staatsoper visit, dazzling London audiences with the passion, vocal purity and compelling force of her Salome – her most famous role (which she first sang under Strauss in 1944 and also at her Metropolitan début in 1949). She was a renowned Tosca, Aida and Musetta, and enjoyed great success in other such widely differing roles as Donna Anna, Jenůfa, Minnie (*La fanciulla del West*), Nadja (Salmhofer's *Iwan Tarassenko*) and Rosalinde (*Fledermaus*). Her rise to international fame was meteoric but, sadly, ill-health and insufficient care of her voice denied her continued success in her grandest roles, although she still appeared in a number of character parts in Vienna.

Welitsch's was one of the most exciting voices to appear in the years immediately after World War II. Impressive in dramatic utterance and in soft, sustained lyrical passages, she displayed a total dedication to and absorption in every aspect of her roles. Her few recordings, including versions of the closing scene from *Salome*, reveal her remarkable vocal qualities.

PETER BRANSCOMBE

Welker, Hartmut (*b* Velbert, 27 Oct 1941). German bass-baritone. He studied initially for a technical career, but took up singing in 1972. After making his début at Aachen in 1974, he was a member of the ensemble there until 1980, followed by three years at Karlsruhe. Welker made his début at La Scala, Milan, in 1982 as Telramund, at Covent Garden in 1986 as Pizarro and at the Metropolitan Opera in 1990, also as Pizarro. The dark, cutting timbre of his voice, allied to a strong stage presence, has made him an equally demonic Alberich and Caspar (*Der Freischütz*). His recordings include Pizarro, Telramund and lesser-known works such as Schubert's *Fierrabras*, Schmidt's *Notre Dame* and Korngold's *Wunder der Heliane*.

ANDREW CLARK

Welker, Lorenz (*b* Munich, 23 Feb 1953). German musicologist. After completing a degree in medicine at Munich he studied musicology at the universities of Basle (with Arlt and Oesch) and Zürich (with Lichtenhahn and Lütolf), 1972–9. After working for two years at the Max Planck Institute of Psychiatry, he was an assistant teacher at the Schola Cantorum of Basle (1982–8) and at the University of Basle (1988–90) while completing the doctorate in medicine at Zürich (1988). In 1990 he joined the department of musicology at Heidelberg and took the doctorate in musicology at Basle in 1992, with a dissertation on Renaissance performing practice, and the *Habilitation* in 1993 with the study *Musik am Oberrhein im späten Mittelalter*. He was appointed professor at the University of Erlangen in 1994 and became professor at Munich University in 1996. His main areas of expertise are the musical tradition of the late Middle Ages, performing practice during the Renaissance and the instrumental music of the Baroque period. He was awarded the Henry E. Sigerist prize in 1988 and the Dent Medal in 1994.

CHRISTIAN BERGER

Wellek, Albert (*b* Vienna, 16 Oct 1904; *d* Mainz, 27 Aug 1972). German psychologist and musicologist of Austrian descent. He attended a Czech Gymnasium in Prague (to 1922) and then studied composition and conducting at the Prague Conservatory, graduating with distinction in 1926. He also studied music history, literature and philosophy in Prague and later in Vienna, where he was a pupil of Adler, Lach, Ficker and Wellesz, and where he took the doctorate in 1928 under Lach with a dissertation on dual sensation and programme music. After his first meeting with the eminent psychologist Karl Bühler (1929) he began to study psychology in Vienna. In 1932 he obtained a research fellowship and moved to the Leipzig University institute of psychology (directed by Felix Krueger), where he became an assistant lecturer and lecturer (1938), having completed his *Habilitation* with a study of musical ability among Germans. Subsequently he was acting professor of psychology at Halle University (1942) and was offered the chair of psychology and educational science in Breslau (1943); he set up the institute of psychology at Mainz University (1946) and directed it until his death.

Wellek, who was profoundly influenced by Felix Krueger, was regarded as a representative of the Leipzig school of *Ganzheits- und Gestalt- psychologie* and the leading music psychologist of his time. He became well known particularly for his work on types and development of character, and developed a model which was able to accommodate widely varied topics. He made his reputation as a music psychologist with his theory of hearing which, starting from the two-component theory of Révész, distinguishes between polar hearing responsive to tone quality and linear hearing responsive to brightness; he extended this theory to apply to musical ability in general. He also examined the psychology of perception and various aesthetic and sociological questions, and wrote numerous papers on the subject of synaesthesia. His theory of 'the multiplicity of consonance' connects mathematical, physical and psychological aspects of the topic and presents a synthesis of divergent attitudes. In addition to his many publications on music psychology, he contributed numerous articles to the first edition of *Die Musik in Geschichte und Gegenwart*.

HELGA DE LA MOTTE-HABER

Weller. *See* BLAND & WELLER.

Weller, Walter (*b* Vienna, 30 Nov 1939). Austrian conductor and violinist. After early violin studies with Ernst Moravec and Franz Samohyl at the Vienna Music Academy, Weller began to conduct as assistant to Böhm and Horst Stein, and was then coached by Szell and Krips. He joined the Vienna PO in 1956 and from 1961 to 1969 was the orchestra's leader. He also played in the Vienna Konzerthaus and Weller quartets (1958–71), toured widely and taught at the Vienna Music Academy from 1964 to 1966. Weller made his conducting début with the Vienna PO in 1966, and first appeared in 1969 with the Vienna Volksoper. In 1971 he was appointed Generalmusikdirektor in Duisburg, and from 1975 to 1978 was music director of the Tonkünstlerorchester of Vienna. He served as principal conductor of the Royal Liverpool PO from 1977 to 1980, the Royal Philharmonic from 1980 to 1986 and the Royal Scottish National Orchestra from 1991 to 1996, and was appointed conductor of the Basle SO in 1994. Weller has recorded the complete symphonies of Beethoven (including the first recording of the realized sketches of Symphony no.10), Mendelssohn, Prokofiev and Rachmaninoff, and works by Brahms, Dvořák, Smetana and other composers.

CHARLES BARBER

Wellesley, Viscount. *See* MORNINGTON, GARRET WESLEY.

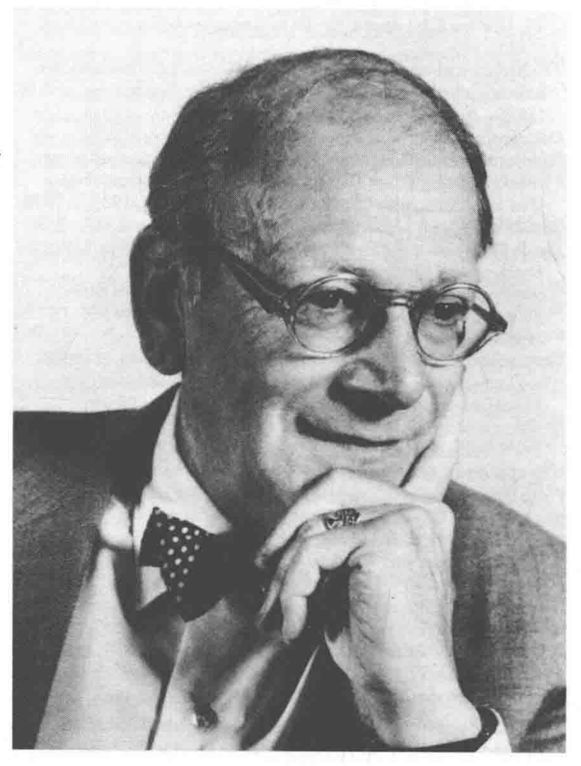
Wellesz, Egon (Joseph) (*b* Vienna, 21 Oct 1885; *d* Oxford, 9 Nov 1974). Austrian composer, musicologist and teacher. His importance as a composer rests chiefly on his stage works and symphonies. While his creative career was divided between Vienna and Oxford, his musical style was unpredictable, showing his affection for beautiful melody often with wide leaps and angular in profile. As a musicologist, he did pioneer work on Byzantine chant.

1. VIENNA, 1885–1938. Wellesz was born into comfortable circumstances in the Schottengasse. His father Samú Wellesz was in the textile business; his mother Ilona Lovenyi met and married her husband in Vienna after they had each come from the Hungarian part of the empire. Wellesz inherited his musical inclinations from his mother, who had once studied the piano with Carl Frühling, to whom she sent her son. Even so, his parents had expected him to study law and follow in his father's business; however, on his 13th birthday he heard Mahler conduct *Der Freischütz* at the Hofoper, and his decision to become a composer was galvanized.

In 1905 he registered for instruction in harmony and counterpoint under Schoenberg at Eugenie Schwarzwald's school, which became an important focus for him in his young years. He conducted a small choir there and gained acquaintance with a progressive circle that included Rilke, Adolf Loos, Kokoschka (who painted the 1911 portrait of him) and Emmy Stross, a student whom he married in 1908. Rigorous training in the fundamentals of music took place at Schoenberg's Liechtensteinstrasse apartment and left him with a lifetime of respect for his master's teaching ability. His compositional heritage was so

grounded in Viennese tonality that only on occasion did he adopt 12-note technique, principally in his later symphonies. But his *Drei Skizzen* for piano (1911) strikingly reflect the atonality of Schoenberg's *Drei Klavierstücke*, and he was an active member of Schoenberg's Verein für Musikalische Privataufführungen after World War I. He also wrote enthusiastically about Schoenberg, and devoted himself in the summer of 1920 to the first Schoenberg biography.

He left off private study with Schoenberg after beginning serious work with Guido Adler at the University of Vienna. With Giuseppe Bonno the subject of his dissertation, he made Baroque opera the centre of his earliest musicological studies; he earned his degree *summa cum laude* in 1908, and his dissertation was published the next year. He also edited Fux's opera *Costanza e fortezza* for Adler's *Denkmäler der Tonkunst in Österreich*. Fux was to him the epitome of the Austrian Baroque, and thus a forerunner of Viennese Classicism; he published a Fux monograph in English in 1965. Meanwhile, in 1913, he was appointed lecturer in music history at the university.



His interests now turned to the common elements in Eastern and Western chant. In part he was reacting against the tradition in Western music history of ignoring the Eastern church, but he was prompted to do so by the presence in Imperial Vienna of Armenians and other ethnic groups, and by his wife's study of art history at the university under Josef Strzygowski, whose lectures identified Syria as a source for both Eastern and Western culture and were keenly debated by young Viennese scholars. There was, however, the problem of deciphering Byzantine notation. With encouragement from his Cambridge colleague H.J.W. Tillyard, who had worked out the melodies, he began tackling Byzantine rhythm in 1913, and by 1918 had made his solution public. The lengthy process of collecting photographs of Byzantine manuscripts and transcribing them eventually became the work of the Monumenta Musicae Byzantinae, founded in Copenhagen under the auspices of the Royal Danish Academy in 1932 by Tillyard, Wellesz and Carster Høeg. The same year Wellesz established the Byzantine Research Institute at the Austrian National Library and began training students.

From Wellesz's youth onwards there was an international breadth to his thinking, despite the strength of his Viennese background. In the summer of 1906 he had made a trip to Cambridge to study 18th-century English culture and renew his friendship with Edward J. Dent, a friendship begun when both had attended Mahler's performances of Mozart operas. After World War I he and Dent joined Rudolf Réti to found the ISCM, and through Wellesz's efforts Vaughan Williams, Bliss, Holst and other English composers were heard for the first time on the Continent. His friendship with Dorothy Moulton led to her singing much English music for the Viennese, and later she sang Wellesz's songs in England. He was, too, a leader in the musical cross-pollination with France. He encouraged performances of Milhaud, Poulenc and Ravel in Vienna and led the applause for the 1921 performance of *Pierrot lunaire* in Milhaud's French version. He also wrote numerous articles for *Der Merker* and the *Musikblätter des Anbruch* between 1911 and 1935 on Ravel and Dukas, as well as on composers closer to Vienna: Bartók, Mahler, Schoenberg and Strauss. Paris and Vienna were, he felt, the 'birthplaces of this "Ars Nova" of our time'. Many French and English musicians were guests at his and Emmy's Kaasgraben home in the 1920s.

As a composer he had begun chiefly with songs and piano music. His first publication was *Der Abend*, a set of four piano pieces crucially influenced by the music of Debussy, which a friend had brought from Paris, and issued in 1911, thanks to Bartók's introduction, by Rózsavölgyi. He then went on to write five operas and four ballets in Vienna, and these enjoyed great success in Weimar Germany. The conservatism of his home city, and his reputation there as a university scholar, however, kept his work from the Viennese stage until 1931, when *Die Bakchantinnen* was produced at the Staatsoper, conducted by Clemens Krauss after 60 rehearsals with the chorus and 20 with the orchestra.

Important to these works was not only Wellesz's admiration of Greek myth but also his study of Baroque opera, his love of Gluck and his collaboration with Hugo von Hofmannsthal, who sketched the beginning of the *Alkestis* libretto. Hofmannsthal based his work on his 1909 version of the Euripides and left the composer to complete the text. *Alkestis* is an energetic, powerful score, marked by long melodic lines, pantonality, extensive choral passages that are often in unison, solo timpani, and dance as an essential element of the drama. After its 1924 Mannheim première, *Alkestis* was produced by eight other German theatres by 1930. *Die Bakchantinnen*, for which Wellesz wrote his own libretto after discussions with Hofmannsthal, is a complicated piece that requires a large chorus and features a crazed, ritualistic dance scene.

The arrival of the Nazis, and the subsequent closing of Germany's stage to Wellesz's work, roughly coincided

Egon Wellesz

with a spiritual change. Though part Jewish by birth and Protestant by upbringing, he converted to Catholicism, influenced by his friendship with Father Thomas Michels in Salzburg and by his readings in the mystics. An outward reflection came in the cantata *Mitte des Lebens* (1931), which he dedicated to Oxford University in thanks for the honorary doctorate he received in May 1932: Oxford was celebrating the bicentenary of a previous honorary doctor, Haydn, and wanted to acclaim another Austrian composer; Wellesz was gratified to be singled out for his creative work, which frequently got ignored in favour of his scholarly achievements.

His major work after this was *Prosperos Beschwörungen* (1934–6), a Straussian set of five motivically unified pieces descriptive of characters from *The Tempest*, which he had originally intended to make into an opera. The score became one of his favourites, thanks in part to the role it played in his life. He was in Amsterdam to hear Bruno Walter conduct a performance – a late substitution – in March 1938, just when Hitler was annexing Austria. English friends warned him by telegram not to return to Vienna, and he proceeded immediately to England. A decade was to pass before he set foot on Austrian soil again.

2. Oxford, 1938–74. With help from his English friends he settled into life in Oxford, where he became a fellow of Lincoln College in 1939, a university lecturer in 1943 and Reader in Byzantine Music – a post created for him – in 1947. He was a revered teacher. His pupils in Byzantine studies included Dimitrije Stefanović, while Wilfrid Mellers in 1945 was among those who first sought him out for composition lessons.

Separation from Austria, though, was far from easy. He had to endure several months of internment on the Isle of Man before Vaughan Williams succeeded in bringing about his release in the autumn of 1940. More alarming still was his inability to compose, even if this made possible the concentration on Byzantine research that resulted in his *Eastern Elements in Western Chant* and *A History of Byzantine Chant and Hymnography*, completed in spring 1942 and August 1946 respectively. By the time of the latter book he had broken his creative silence with his important Fifth Quartet (1943–4), and in 1944 a new era had opened with his setting of Gerard Manley Hopkins's *The Leaden Echo and the Golden Echo*, one of the loveliest and most often performed of his English compositions, remarkable not only for its fine handling of a complex text but also as a metaphor for the struggles of the composer's bifurcated career.

The seal was set on this new period with his First Symphony (1945), which continues the Austrian tradition of Schubert, Bruckner and Mahler, and which had its first performance by the Berlin PO under Sergiu Celibidache in 1948. Wellesz's nine symphonies earned him the compliment he most cherished, that of being Bruckner's heir, and it may be that in exile his sense of his musical heritage was intensified. The symphonies, along with the symphonic *Prosperos Beschwörungen*, have been well received in Austria, Germany and England, though ignored in the USA. The first four are principally diatonic; the others include both tonal and atonal elements. Important too among Wellesz's English works are the Octet – a divertimento-style companion piece to Schubert's – and his last opera, *Incognita*, which he wrote for the Oxford University Opera Club with the Oxford poet Elizabeth Mackenzie, and which was his second comic essay, after *Scherz, List und Rache* (1927).

Besides his other activities, he also wrote for the BBC, served the New Oxford History of Music as editorial board member and contributor, helped revive the IMS, and took part in symposia and research projects at Dumbarton Oaks in Washington DC. Though grateful to England, he remained loyal to his home country, and in 1962 began a warm relationship with the Viennese publishing house of Doblinger. He had officially retired from his Oxford readership in 1956, but did not stop composing until after the stroke he suffered in 1972. He was buried in the Zentralfriedhof in Vienna, and his widow returned to the city; she died in 1987.

WORKS

OPERAS

op.	
27	Die Prinzessin Girnara (Weltspiel und Legende, 2, J. Wassermann), 1919–20, Hanover, 15 May 1921, vs (Vienna and Leipzig, 1921), rev. version, Mannheim, 2 Sept 1928
35	Alkestis (Drama, 1, H. von Hofmannsthal, Wellesz, after Euripides), 1922–3 Mannheim, National, 20 March 1924 (Vienna and New York, 1924)
40	Die Opferung des Gefangenen (kultisches Drama, 1, E. Stucken, after Aztec legend), 1924–5, Cologne, Neues, April 1926, vs (Vienna and New York, 1925)
41	Scherz, List und Rache (Spl, 1, after J.W. von Goethe), 1927, Stuttgart, 1 March 1928, vs (Vienna and Leipzig, 1927)
44	Die Bakchantinnen (2, Wellesz, after Euripides), 1929–30, Vienna, Staatsoper, 20 June 1931, vs (Berlin, 1930)
69	Incognita (E. Mackenzie, after W. Congreve), 1950, Oxford, 5 Dec 1951

BALLETS

18	Das Wunder der Diana (1, B. Balász), 1914–17, Mannheim, 20 March 1924
30	Persisches Ballett (1, E. Tels), 1920, Donaueschingen, 1924
33	Achilles auf Skyros (1, Hofmannsthal), 1921, Stuttgart, 4 March 1926
37	Die Nächtlichen (Tanzsymphonie, 1, M. Terpis), 1923, Berlin, 20 Nov 1924

ORCHESTRAL

Sinfonischer Prolog, op.2, 1905, unpubd; Vorfrühling, op.12, 1912; Suite, op.16, 1914, unpubd; Satz, chbr orch, 1920; Festlicher Marsch, 1929, unpubd [arr. of pf work]; Suite, vn, chbr orch, op.38, 1924; Pf Conc., op.49, 1931; Prosperos Beschwörungen, op.53, 1934–6; Sym. no.1, op.62, 1945; Sym. no.2, op.65, 1947; Sym. no.3, op.68, 1949–50, unpubd; Sym. no.4 (Symphonia austriaca), op.70, 1952; Sym. no.5, op.75, 1956; Vn Conc., op.84, 1961; Musik für Streichorchester, op.91, 1964; Sym. no.6, op.95, 1965; Sym. no.7, 'Contra torrentem', op.102, 1967–8; Divertimento, chbr orch, op.107, 1969; Symphonischer Epilogue, op.108, 1969; Sym. no.8, op.110, 1970; Sym. no.9, op.111, 1971

CHORAL

With orch: Gebet der Mädchen zu Maria (R.M. Rilke), op.5, S, female vv, orch, 1910; Mitte des Lebens (medieval, R.A. Schröder, Angelus Silesius, Pss), op.45, S, vv, orch, 1931; Duineser Elegie (Rilke), op.90, S, vv, orch, 1963; Mirabile mysterium (cant., Sophronius of Jerusalem), op.101, 5 solo vv, vv, orch, 1967; Canticum sapientiae (Vulgate), op.104, Bar, vv, orch, 1968

With kbd: Mass, f, op.51, 4 solo vv, vv, org, 1934; Proprium missae 'Laetare', op.71, vv, org, 1953, unpubd; Kleine Messe, G, op.80a, female vv, pf, 1958; Festliches Praeludium, op.100, chorus, org, 1966 [after Byzantine Magnificat]

Unacc.: 3 Chöre (Angelus Silesius), op.43, 1930; 5 kleine Männerchöre (L. Derleth), op.46, 1932; 3 geistliche Männerchöre (Schröder), op.47, 1932; Quant' è bella giovinezza (frottola, L. de'Medici), female vv, op.59, 1937; I Sing of a Maiden (Eng. carol), female vv, 1944; Laus noctuna, op.88, 1962; Missa brevis, op.89, 1963; In ascensione Domini (gradual, offertory), 1965, unpubd; To Sleep (J. Keats), op.94, 1965

SOLO VOCAL

Solo vv, small orch: Schönbuheler Messe, C, op.58, 1937, unpubd

1v, orch/ens: 3 Lieder der Mädchen (Rilke), op.7, 1911, unpubd; Geistliches Lied (F. Jammes), op.23, 1v, vn, va, pf, 1919; Amor timido (P. Metastasio), op.50, S, chbr orch, 1933; Sonnette der Elisabeth Barrett-Browning (trans. Rilke), op.52, S, str qt, 1934; Lied der Welt (Hofmannsthal), op.54, S, orch, 1936–8, unpubd; Leben, Traum und Tod (Hofmannsthal), op.55, A, orch, 1936; The Leaden Echo and the Golden Echo (G.M. Hopkins), op.61, S, cl, pf trio, 1944; 4 Songs of Return (Mackenzie), op.85, S, fl, cl, hp, pf, str qt, 1961; Ode an die Musik (Pindar), op.92, A/Bar, chbr orch, 1965; Vision (G. Trakl), op.99, S, orch, 1966

1v, pf: Lieder, op.1, *c*1905, unpubd; Wie ein Bild (P. Altenberg), op.3, 1909; Kirschblütenlieder (H. Bethge, after Jap.), op.8, 1911; Lieder aus der Fremde (Bethge, after Chin.), op.15, 1913; Deutches Lied (R. Dehmel), 1915; Ein österreichisches Reiterlied (H. Zuckermann), 1915; 6 Lieder (S. George), op.22, 1917; 3 Lieder (E. Stadler), op.24, 1917, unpubd; Aurora, op.32, 1921; Erinna (George), 1924; 2 Lieder (Schröder), op.48, 1932, unpubd; On Time (J. Dryden, Mackenzie, J. Milton), op.63, 1946–50; Lieder aus Wien (H.C. Artmann), op.82, 1959

Unacc.: Alleluia, S/T, op.80b, 1958

CHAMBER AND SOLO INSTRUMENTAL

For 5–8 insts: Pastorale, fl, ob, bar sax, 2 vn, vc, db, perc, before 1935; Octet, cl, bn, hn, str qt, db, op.67, 1948–9; Suite, wind qnt, op.73, 1954; Cl Qnt, op.81, 1959; Pf Qnt, 1969–70, unpubd; 4 Stücke, str qnt, op.109, 1970

Str qt: Str Qt no.1, op.14, 1911–12; no.2, op.20, 1915–16; no.3, op.25, 1918, unpubd; no.4, op.28, 1920; no.5, op.60, 1943–4; no.6, op.64, 1947; no.7, op.66, 1949; no.8, op.79, 1957; no.9, op.97, 1966; 4 Stücke, op.103, 1968

Str trio: Str Trio, op.86, 1962; 4 Stücke, op.105, 1969

Solo str: Sonata, op.31, vc, 1920; Sonata, op.36, vn, 1923; Suite, op.39, vc, 1924; Suite, op.56, vn, pf, 1937, unpubd; Sonata, op.72, vn, 1953; Rhapsodie, op.87, va, 1959, rev. 1962; 5 Miniaturen, op.93, vn, pf, 1965; Präludium, op.112, va, 1971

Solo wind: 2 Stücke, op.34, a cl, pf, 1922; Suite, op.57, fl, 1937; Suite, op.74, cl, 1954; Suite, op.76, ob, 1956; Suite, op.77, bn, 1957; Fanfares, op.78, hn, 1957

KEYBOARD

Pf: Der Abend, op.4, 1909–10; 3 Skizzen, op.6, 1911; 3 Klavierstücke, op.9, 1911; 3 Tänze, op.10, 1912, unpubd; Eklogen, op.11, 1912; 3 Studien, op.13, 1912–13, unpubd; Epigramme, op.17, 1914; Idyllen, op.21, 1917; 6 Klavierstücke, op.26, 1917–20, nos.3–6 unpubd;. Festlicher Marsch, 1919; 2 Studien, op.29, 1921; 5 Tanzstücke, op.42, 1927; 5 Klavierstücke, op.83, 1960; Triptychon, op.98, 1966; Studien in Grau, op.106, 1969

Org: Partita in honorem J.S. Bach, op.96, 1965

CAROLINE CEPIN BENSER

Wellington. Capital city of New Zealand. It was chosen as the seat of government in 1865 on account of its central location. During the early years of settlement, which began in 1840, musical activity was dominated by military bands, which provided music for balls, public events and outdoor promenade concerts. Home music-making was a favourite pastime, and newspaper advertisements for music teachers and music shops appeared regularly from around 1850. Amateur organizations were quickly established, but all, apart from the Wellington Choral Society (founded 1860), proved shortlived. The first professional opera performance, of *La sonnambula*, was given by a touring troupe in 1863, and from the 1870s onwards travelling professional soloists and ensembles began visiting regularly.

Resident musical activity remained largely amateur until well into the 20th century. As the imperial regiments were withdrawn, military bands gradually gave way to amateur brass ensembles, such as the still flourishing Onslow Brass Band, originally formed as the Wellington Municipal Tramways Band in 1905. An amateur Operatic Society was formed in 1888 and the Choral Society, renamed the Royal Wellington Choral Union in 1904, was joined by new choirs including an all-male Liedertafel (1891) and the Wellington Harmonic Society (1914). The Wellington Orchestral Society, established in 1879 to support choral activities, soon began presenting concerts under a succession of professional conductors, most notably Alfred Hill (director 1892–6). Other amateur orchestras emerged in the early years of the new century, but all struggled for survival. With the emergence of radio, a small professional orchestra was formed to service the local 2YA station in 1928, and the city was also home to the orchestra formed for New Zealand's Centennial Music Festival in 1940.

An upsurge of interest in the arts after World War II paved the way for the creation of a permanent orchestra in 1946. Now known as the New Zealand SO, this is one of many national institutions based in the capital. The Alex Lindsay String Orchestra, founded in 1948, became the city's own professional ensemble. Disbanded in 1973, it was immediately reconstituted as the Wellington Regional Orchestra, later renamed the Wellington Sinfonia. Professional chamber music began with the establishment in 1945 of the Wellington Chamber Music Society, which still promotes concerts and was the catalyst for the formation of a national body, CHAMBER MUSIC NEW ZEALAND. The city became a centre for professional opera during the existence of the New Zealand Opera Company (1954–71). After a period of mainly semi-professional activity, another fully professional company, Wellington City Opera, was founded in 1984. Other important ensembles based in the capital are the New Zealand Chamber Orchestra and the New Zealand String Quartet, both formed in 1987. Annual subscription seasons are given by all these national and local ensembles, and there are numerous other concerts, including regular lunch-time recitals at a city church, St Andrew's-on-the-Terrace, and at the university. Music features prominently at the New Zealand International Festival of the Arts, which has taken place biennially in Wellington since 1986.

The abundance of professional activity is matched by a high level of amateur music-making, particularly in the choral field. A specialist small choir, the Schola Cantorum, flourished from 1932 to 1950 and was subsequently reborn as the Phoenix Choir. The Orpheus Choir concentrates on large-scale works and often performs with the New Zealand SO. Also of note are the Bach Choir (1968), the Festival Singers (1976), the semi-professional Bel Canto (1988) and two specialist early music choirs: Cantoris (1971) and the Tudor Consort (1986). Opera Technique (established 1954), the Wellington Chamber Orchestra (1972) and the Wellington Youth Orchestra (1979) are three other important amateur organizations.

Major performance venues include the 1600-seat St James' Theatre (1912), the State Insurance Opera House (opened in 1914 as the Grand Opera House), the 2500-seat auditorium of the Michael Fowler Centre (1977) and the Wellington Town Hall (1904), with its main auditorium (cap. 2000) and smaller adjacent Ilott Concert Chamber. The Town Hall's Norman & Beard organ, installed in 1906 and restored in 1985, is a fine example of an English symphonic-style concert instrument of the Edwardian era. Equally notable is the Wellington War Memorial Carillon, dedicated in 1932. Its original complement of bells, cast by Gillett & Johnston, has been augmented three times and now totals 74, making it the third largest concert carillon in the world.

The city has two tertiary music institutions. The School of Music at Victoria University of Wellington was founded in 1946, teaches composition, performance, musicology and ethnomusicology, and is home to the Waiteata Music Press. The Wellington Polytechnic Conservatorium (1975) is noted for jazz and vocal studies. Two national research collections – the Alexander Turnbull Library's Archive of New Zealand Music and the Sound and Music Centre of the National Library of New Zealand – are major resources for musical scholarship and jointly house the Brian Salkeld Collection of sound recordings and playing machines, which comprises over 15,000 items.

One of New Zealand's main recording companies, Kiwi-Pacific International, is located in the city. Founded in 1959 as a branch of a publishing house, it became independent in 1978 and is noted for its recordings of New Zealand compositions and Polynesian music. The Arts Council of New Zealand/Toi Aotearoa (originally founded as the Queen Elizabeth II Arts Council in 1963) has its headquarters in Wellington, as do the country's music radio network Concert FM (1963), the Composers' Association of New Zealand (1974) and the New Zealand Music Centre (1991).

ADRIENNE SIMPSON

Wells, Jinky (Jingy) [William Nathan] (*b* Bampton, Oxon., 1868; *d* after 1949). English country fiddler, melodeon player, dancer and Morris fool. The son of a footman, he earned his living as a hawker around the neighbouring villages of Bampton. In 1887, he began to play the part of the fool for the Bampton Morris team and gradually became the driving force behind its organization. He first played the fiddle for them two years later. In 1926, after some disagreement, Wells played fiddle for a set of newly trained dancers while Bertie Clark played for the established team. Wells's last official performance was in 1949.

In 1909, folksong and dance collector, CECIL SHARP met Jinky Wells and the Bampton Morris in Stow-on-the-Wold, Gloucestershire, later publishing some of the tunes he noted down from them. In 1913, Mary Neal invited Wells and the Bampton Morris to take part in May Day revels at the Globe Theatre, London; and in 1930 they appeared at the English Folk Dance Society's festival in the Royal Albert Hall in London.

Jinky Wells is renowned as an essentially English traditional fiddle player. He often hummed along in unison with his fiddling, and he could dance a solo morris jig (with its energetic capers) and play at the same time.

REG HALL

Wells, Junior [Blackmore, Amos, jr; Wells, Amos, jr] (*b* West Memphis, AR, 9 Dec 1934; *d* ?Chicago, 15 Jan 1998). American blues harmonica player and singer. He was the son of farmers in Marion, Arkansas, and his grandmother sang gospel music. By the age of nine he was singing and playing the harmonica in the streets of West Memphis with a friend, Junior Parker. He moved to Chicago in 1946 and within two years he, David and Louis Myers, and Fred Below had formed a group known variously as the Little Boys, Three Deuces and Four Aces. They backed the guitarist and kazoo player Tampa Red, among others. Wells replaced Little Walter in Muddy Waters's group in late 1952. Around this time he began recording for small Chicago blues labels such as States, Chief and Chess. His vocal and instrumental style was influenced by Sonny Boy Williamson (i) and by Little Walter. He made his best recordings in the mid-1950s for States; they included *Eagle Rock* (1953), *Hoodoo Man* (1953), *Lawdy, lawdy* (1954) and *So all alone* (1954). Beginning in the late 1960s Wells recorded and performed with Buddy Guy. Their performances have increasingly shown the influence of rhythm-and-blues and soul with Wells's playing and singing becoming mannered in a style that resembles that of James Brown.

DAVE MARSH

Well-tempered clavier. A term used in particular by Bach ('Das wohltemperirte Clavier') to signify a tuning system suitable for all 24 keys. The fame of Bach's 48 preludes and fugues, two in each of the 12 major and 12 minor keys (in fact only the first book, 1722, bore the title) has led to the mistaken assumption that *wohltemperirt* was a standard technical term in Bach's day to designate a particular tuning; and on the basis of this assumption a difference of opinion has arisen as to whether it was equal temperament. Bach's choice of title disallows any form of regular mean-tone temperament (which would have a wolf 5th) and calls for a tuning well adapted to all 24 keys; but equal temperament was not the only such scheme employed at that time. Moreover, while many theorists, including Meckenheuser (1727), Sorge (1748) and Marpurg (1756), referred to equal temperament as a good tuning or even as the best of the good tunings, other influential theorists from Werckmeister in the 1680s to Bach's former pupil Kirnberger in 1776 held that a good temperament 'makes a pleasing variety' (Werckmeister, 1697) or does not 'injure the variegation of the keys' (Kirnberger, 1776–9).

There is no proof that Bach explicitly endorsed the latter view, but there is clear evidence that had he done so he would still have rejected the tunings advocated by his former pupil Kirnberger: they contain a pure major 3rd between C and E, whereas Bach had evidently taught Kirnberger to temper all the major 3rds larger than pure (see Marpurg, 1776, p.213). Thus not even the scheme referred to by scholars as 'Kirnberger III', in which the four 5ths C–G–D–A–E are each tempered by $\frac{1}{4}$ comma, would have conformed to Bach's practice, and the tuning primarily advocated by Kirnberger is an even more unlikely candidate as it obliges the two 5ths G–D–A to be diminished by the excessive amount of $\frac{1}{2}$ comma each.

A selection of 18th-century temperaments which Bach would more probably have considered 'good' is shown in fig.1, which shows how much the various triadic concords are tempered according to each scheme, and how large the semitones are. Each hexachord diagram represents a spiral in which F, A and C♯ are to the right of B♭, D and F♯; the unit of measure employed is the one most often used by 18th-century German theorists: $\frac{1}{12}$ of the Pythagorean comma, or the amount by which each 5th is diminished in equal temperament (approximately 2 cents). To the right of each diagram the semitones are given in cents, and each row covers half the octave: by reading the numbers zig-zag between the two rows, one can see how the semitones vary according to their relation to the circle of 5ths. (In fig.1*b*, for example, the leading notes to C, G, D and A are 110, 106, 102 and 98 cents beneath them respectively.) Fig.1*c* is a theoretical model; Werckmeister suggested that in practice he might leave C–G–D–A as in $\frac{1}{4}$-comma mean-tone temperament (tempered $2\frac{3}{4}$; units instead of 3). Fig.1*e* is a modern, approximate reconstruction to exemplify a style of tuning, not a specific theoretical model.

Bach would undoubtedly have been grateful to find any of these tunings (except perhaps the last one) on the organ. A hint of his more subtle preferences may be found in the remarks of his one-time pupil Lorenz Mizler (1737), his very well-informed friend G.A. Sorge (1748) and his son-in-law J.C. Altnickol (1753) to the effect that Johann

1. Some well-tempered keyboard tunings: (a) equal temperament; (b) Vallotti's system; (c) Werckmeister's favoured system for the 'chromatic genus'; (d) one of Neidhardt's most preferred systems; (e) an approximation of French 18th-century 'tempérament ordinaire' without a wolf 5th

Georg Neidhardt was a better theorist of tuning than Werckmeister. It is doubtful whether Bach had any one secret mathematical formula of his own; he was not so mathematically inclined in matters of theory (see Barbour, 1947). Werckmeister, Neidhardt and Sorge all pointed out that circumstances such as the social ambience, the presence or absence of transposing instruments, the use of Cammerton *versus* Chorton, or the chromaticism of the music could have a bearing upon the exact nuance of temperament to be preferred, and Bach was probably no less exacting; according to his son C.P.E. Bach, no one else could tune a keyboard instrument to his satisfaction. C.P.E. Bach's own tuning advice allows for a few 5ths to be left untempered (implying a slightly unequal temperament), and he endorsed the mathematically vague instructions of Barthold Fritz (1757), which were ostensibly intended to render all keys 'equally pure', but actually tend to favour the diatonic 3rds.

Table 1 shows by what fraction of a comma the 5ths are tuned smaller than pure according to various theoretical well-tempered systems. Several of them distribute $\frac{1}{4}$ of the Pythagorean comma among the three 5ths C–G–D–A; $\frac{1}{6}$ among E♭–B♭–F–C and $\frac{1}{3}$ among A–E–B–F♯–C♯–G♯. As fig.1 shows, the tempering of any 3rd or 6th will vary inversely with the sum of the tempering among the 5ths or 4ths that it comprises in the chain. (If the sum of tempering among them is an entire syntonic comma (11 units) the 3rd or 6th will be pure; if they are all pure, the 3rd or 6th will be tempered by an entire syntonic comma; etc.) Of Werckmeister's schemes, only the one singled out by Christiaan Huygens, Sorge and Marpurg in their discussions of Werckmeister is included in Table 1. The systems of Kellner and Barnes are modern proposals for the music of Bach, and share with Werckmeister's scheme a musically unfelicitous mixing of tempered and untempered 5ths among the diatonic notes. (Werckmeister, 1697, p.32, did this in order to convert from $\frac{1}{4}$-comma mean-tone temperament by returning only some of the notes and yet make C–E larger than pure.) Lambert's $\frac{1}{7}$-comma arrangement might be regarded as a kind of synthesis of the four schemes preceding it in Table 1. The remaining systems are more elaborate in that they provide for more than one size of tempered 5th. Of Neidhardt's schemes, those which he recommended for a large or small town have been included, and Bach probably favoured something along these lines. The first volume of *Das wohltemperirte Clavier* was composed before the publication of any of these schemes, however, and may rather have been inspired by a non-mathematical book on the musical significance of unequal temperament published by Johann Mattheson in 1720; Bach visited Hamburg at the end of the same year, and probably met Mattheson.

For the 3rds involving a sharp or flat, an averaging of the rigidly mathematical theoretical schemes of 'good' unequal temperament that Bach might have known about would be better suited to the subtle demands of his music than would any one of those schemes on its own. This is because the unit of measurement used by even the most meticulous of the German theorists of the day, $\frac{1}{12}$ Pythagorean comma, is not fine enough to represent the nuances as subtly as a good tuner can control them by ear. The theoretical problem could have been overcome by dividing the unit, but none of the theorists did that.

One point which emerges from a comprehensive study of Bach's organ music, however, is that the most heavily tempered major 3rd was the one above C♯/D♭. Bach would, for instance, more readily treat F♯ minor as transposed Phrygian than transposed Dorian, and so would characteristically use F♯–A♯ in a more straightforward way than C♯–E♯ as a vertical sonority. This can be observed in such chorale settings as *Aus tiefer Not*

TABLE 1: Distribution of the Pythagorean comma in 12 'good' temperaments

																										pure 5ths
Werckmeister (1681)	A♭	0	E♭	0	B♭	0	F	0	C	$\frac{1}{4}$	G	$\frac{1}{4}$	D	$\frac{1}{4}$	A	0	E	0	B	$\frac{1}{4}$	F♯	0	C♯	0	G♯	8

* systems originally formulated in terms of the syntonic comma

(BWV687), *Erbarm dich* (BWV721) and *Herzlich tut mich* (BWV727). On the other hand, the 'St Anne' Prelude (BWV 552) shows that the nuances of tempering on at least some organs available to Bach were subtle enough that he could compose virile, allegro organ music in E♭ major. The climactic (albeit inverted) D♭ triad towards the end of the Passacaglia in C minor (BWV582) occurs at such a stressful moment that some harshness in the intonation is, in this particular context, expressively apt. In a quieter way the tender effect of the relatively low intonation, in a 'good' temperament, of D♭ (and, though to a lesser extent, of A♭) when used as the 7th in a dominant 7th chord is tellingly exploited in such well-known chorale-preludes as *O Mensch bewein'* (BWV622) and *Schmücke dich* (BWV654). To tune really well for Bach, one should think in such terms and test with some characteristic examples of his fine use of the various notes of the chromatic scale.

The modern schemes included in Table 1 are only two of several neo-Baroque keyboard temperaments invented since the mid-1970s. These have often been improved upon after being tried out for a while. For instance, The Frobenius organ at the Queen's College, Oxford, was tuned in the 1980s to the scheme shown in fig.2*a*. In 1992 the tuning was improved by raising slightly the chromatic notes and F, thereby letting D–F♯ be tempered more than F–A, preventing E♭–G from being tempered distincly more than B–D♯, and likewise gaining a better balance between the temperings of A♭–C and E–G♯. The result is shown in fig.2*b*.

For additional discussion of the musical characteristics and historical importance of well-tempered tunings, *see*

TEMPERAMENTS, §§7–8 and 10. Instructions for tuning some of them have been published by Lindley (1977), Jorgenson (1977, pp.304, 323) and Blood (1979), and some have been reduced by Barbour to tables showing the distance (in cents) of the 11 notes of the chromatic scale above C.

For bibliography *see* TEMPERAMENTS.

MARK LINDLEY

Welser. German family of merchants and bankers. Like their Augsburg neighbours the Fuggers, they were able through their wealth to obtain noble status, marry into the highest ranks of the nobility and to exert a broad impact on the transmission, reception and performance of 16th- and early 17th-century music in central Europe, especially southern Germany.

During the first half of the 16th century the family maintained close ties with the humanist circle of Conrad Peutinger, who in 1498 married Margaretha (1481–1552), sister of Bartholomäus Welser, head of the family trading company in Augsburg. The musically literate Peutinger corresponded with many composers, theorists and music publishers including Ludwig Senfl, Othmar Luscinius, Petrus Tritonius and Erhard Oeglin. He also wrote a foreword to Senfl's *Liber selectarum cantionum* (Augsburg, 1520), compiled in commemoration of the Emperor Maximilian I; one of the printers, Sigmund Grimm, was married to Magdalena Welser (*c*1490–*c*1568).

In the second half of the 16th century Marcus (i) Welser (1524–96), head of the family trading company in Antwerp, seems to have cultivated ties with Franco-Flemish composers residing in Augsburg or at the court of Rudolph II in Prague; he owned a set of chanson partbooks now in Munich (*D-Mbs* Mus.ms.1502). His Augsburg relatives Hans (1530–96) and Matthäus (ii) (1553–1633) founded a school at St Anna in 1580 and hired Adam Gumpelzhaimer as Kantor.

The most influential Welser for both artistic and musical patronage was Matthäus's brother Marcus (ii) (1558–1614), mayor and renowned historian of Augsburg. Under his intellectual and financial influence, many famous musicians joined the city pipers and choir, including Hans Leo Hassler, Jacob Baumann, Christian Erbach and Philipp Zindelin. The dedicatee of two music anthologies, Marcus also wrote the words for Gregor Aichinger's *Lacrumae D. Virginis et Ioannis* (Augsburg, 1604). He owned an elaborately decorated set of partbooks containing motets by Rore and madrigals by Lassus (*D-As* Mus.406–10).

Two sons of Philippine Welser (1527–80), wife of the emperor's son Ferdinand II of Tirol, were also avid music patrons: Cardinal Andreas Welser (1558–1600), bishop of Konstanz, hired Jean Lefebre to head his chapel; Margrave Karl von Burgau (1560–1618) employed Philipp Bruneau, son of the imperial *Kapellmeister* Wilhelm Bruneau. Philippine's brother Karl (1528–87), overseer of his nephew the margrave's estate at Günzburg, funded the building of the organ there and hired the celebrated organist Servatius Rorif to play it; a few years earlier he had recruited Rorif into employment at Ferdinand II's residence in Innsbruck.

The remains of the Welsers' libraries are mostly in public collections in Augsburg and Munich. Few music books survive, but these are of particular interest. In addition to the two manuscripts mentioned above as

belonging to Marcus (i) and (ii), an important collection of early 16th-century lieder (*D-Mu* 8° 328–31) was owned by Hieronymus Welser. The family still preserves the so-called 'Welser-Codex' (in *NNFw*), which belonged to the Nuremberg branch of the family and includes a 24-voice wedding mass composed by Leonhard Lechner in 1582 for the marriage of Sebald Welser (1557–89).

AMY T. BROSIUS

Welser-Möst, Franz (*b* Linz, 22 April 1960). Austrian conductor. A chorister in his youth, he came to music early, studying the violin and, later, the piano. In 1974 he was enrolled at the Linz Musikgymnasium, where, at the age of 16, he began conducting the school orchestra and chorus. A serious car accident in 1978 ended his hopes of an instrumental career, but upon recovery he began serious conducting studies with the composer Balduin Sulzer. His public début occurred in 1977, when he conducted his school orchestra. In 1979 he advanced to the finals of the Herbert von Karajan Competition in Berlin. From 1980 to 1984 he studied at the Musikhochschule in Munich, but he failed to graduate. His professional conducting début, with the Vienna Chamber Orchestra, was in 1983. From 1986 he served for five years as music director of the Norrköping SO in Sweden. Earlier that year, replacing Jesús López-Cobos in an all-Mozart programme, he began a relationship with the LPO that culminated in his being named the orchestra's music director in 1990. His six-year tenure proved controversial and ended acrimoniously. In November 1995 he became music director of the Zürich Opera and in 1999 he was appointed music director of the Cleveland Orchestra. He has been well received in North America, regularly conducting the Cleveland Orchestra, the Philadelphia Orchestra and the Los Angeles PO. An imaginative interpreter of the classics (as can be heard in his eloquent recordings of Bruckner's Fifth Symphony and Mahler's Fourth Symphony), Welser-Möst can employ unorthodox tempos in concert. On record he has devoted considerable attention to modern scores, including works by H.K. Gruber, Giya Kancheli and Arvo Pärt.

DAVID MERMELSTEIN

Welsh, Moray (*b* Haddington, 1 March 1947). Scottish cellist. He studied with Eleanor Gregorson and Joan Dickson in Edinburgh, and with Rostropovich at the Moscow Conservatory. He made his orchestral début with the BBC Northern SO in Manchester (1968), and gave his London début recital in 1972. Subsequently he has appeared as soloist at the Proms in London and toured internationally with the BBC Scottish SO, the Philharmonia and the RPO; he has also performed two complete cycles of Beethoven's works for cello and piano at the Wigmore Hall (1978 and 1982). Welsh has given the premières of several works, including David Blake's *Scenes* (1972) and his Cello Concerto (1993), both of which are dedicated to him; he also gave the first performances of concertos by Lennox Berkeley (1983), George Nicholson (1991) and Ronald Stevenson (1995). He has played in various chamber music groups, including the Arienski Ensemble (1987–94), and in duos with the pianists Anthony Goldstone and Roger Vignoles. From 1975 to 1993 he taught at the RNCM, and in 1992 was appointed principal cellist of the LPO. Of his recordings, those of Hugh Wood's Cello Concerto and Howells's Fantasia have received particular acclaim. Welsh plays a Matteo Gofriller cello dated 1705. (H. Wallace: 'League of Eloquence', *The Strad*, cii (1991), 222–6)

MARGARET CAMPBELL

Welsh [Walsh, Welch], **Thomas** (*b* Wells, *c*1780; *d* Brighton, 24 Jan 1848). English bass and composer, a grandson of the elder Thomas Linley. At the age of six he became a chorister in Wells Cathedral and made such rapid progress that Wells soon became the resort of music lovers attracted by the beauty of 'Master Walsh's' voice and the excellence of his singing. He appeared in 1792 at the Bath concerts, in the concerts given in London at the King's Theatre during the rebuilding of Drury Lane, and also on the stage in Attwood's *The Prisoner*, written to display his talent. In 1795 he performed at Drury Lane in Attwood's *The Adopted Child*, Storace's *Lodoiska* and other pieces. John Kemble thought highly of his acting ability and taught him the role of Prince Arthur in Shakespeare's *King John*.

After his voice broke, Welsh pursued his studies under C.F. Horn, John Cramer and Baumgarten. In 1802, his voice having become a deep and powerful bass, he was admitted a Gentleman of the Chapel Royal. Between 1810 and 1816 he wrote music for several theatrical productions, but his greatest reputation was gained as a singing teacher and instructor of pupils for the stage. Foremost among his students were John Sinclair, C.E. Horn, Catherine Stephens and Mary Ann Wilson. An original member of the Regent's (later Royal) Harmonic Institution in 1818, he was by spring 1823 the principal shareholder with William Hawes; from mid-1827 to 1833 he ran the company on his own account. On 9 June 1827 Welsh had married Mary Ann Wilson (1802–67), who in the year after her highly successful début (Drury Lane, 18 January 1821) earned an unprecedented £10,000 on the stage, though she soon ruined her voice from overexertion. Their only child married the cellist Alfredo Piatti.

WORKS

stage works first performed in London; librettos in US-SM

Twenty Years Ago! (musical play, 2, I. Pocock), Lyceum, 21 July 1810
The Green-Eyed Monster, or How to Get your Money (operatic farce, Pocock), Lyceum, 14 Oct 1811
Kamtchatka, or The Slave's Tribute (musical play, C. Kemble, after A. von Kotzebue), CG, 16 Oct 1811
Up to Town (comic op, T.J. Dibdin), CG, 6 Nov 1811, collab. Reeve, Condell, Whitaker
Selima and Azor (2, G. Collier), CG, 5 Oct 1813, collab. Bishop and T. Cooke
For England, Ho! (melodramatic op, 2, Pocock), CG, 15 Dec 1813, air (London, 1815); collab. Bishop
Is he Jealous? (operetta, 1, S. Beazley), English Opera House (Lyceum), 2 July 1816
Song(?s) attrib. Master Walsh in A Collection of New and Favorite Songs (Philadelphia, 1797–9)
A few separate songs and glees
Vocal Instructor, or The Art of Singing Exemplified in 15 Lessons Leading to 40 Progressive Exercises (London, 1825)

Welte. German family of instrument makers, notable for developing various types of MECHANICAL INSTRUMENT. The firm, which began by making ORCHESTRION organs, was founded in 1832 at Vörenbach and later moved to Freiburg. In 1904 M. Welte & Söhne introduced the first reproducing PLAYER PIANO under the name of 'Welte-Mignon' (*see also* REPRODUCING PIANO, fig.1). Originally in the form of a separate player mechanism placed in front of the keyboard of a normal piano, it was later built into specially constructed grands and uprights by such prominent makers as Steinway and Gaveau. Shortly afterwards Welte adapted this mechanism to player pipe organs of considerable complexity, some to specifications by Max Reger; these were sold under the trade name 'Welte-Philharmonie'. Around 1933 Edwin Welte (1876–1957) designed the Lichtton-Orgel (an electronic organ), also known as the Welte organ. The firm suffered as interest in mechanical pianos and organs declined and it was liquidated shortly after the Freiburg premises were destroyed in 1944.

Wemba, Papa [(Jules) Shungu Wembadio] (*b* Lubefu, Kasai Occidental Province, Belgian Congo [Democratic Republic of the Congo], 14 June 1949). Congolese singer and songwriter. Wemba's career began in 1970 in the group Zaïko Langa Langa. Zaïko was the most prominent of *groupes des jeunes*, youth bands that emerged in the late 1960s and early 70s as an alternative to older Congolese rumba bands. Personnel splits took Wemba to new groups, Lokole Isifi (1974), Yoka Lokole (1976) and his own Viva La Musica (1977).

Papa Wemba

Wemba sings in a strong, clear tenor voice, sometimes ascending to falsetto. His *Mère Supérieure* won best song honours in a 1977 poll of Kinshasa writers; *Analengo* (1981) and *Evénement* (1982) also earned acclaim. A 1986 album, *L'Esclave* (the slave), departed from the usual musings on love and relationships to attack the exploitation of Africa. Wemba starred in *La vie est belle* (1987), a film based on Kinshasa life. His penchant for sartorial splendour helped produce the phenomenon of *la sape*, a fad for designer fashion among Congo youth in the 1980s.

In 1987 Wemba dissolved Viva la Musica to embark on a solo career. *Papa Wemba* (1988), *Le Voyageur* (1991) and *Emotion* (1995), all solo albums, produced a more international sound not recognizable as Congolese rumba. To appeal to fans of his Congolese music, Wemba resurrected Viva La Musica for the albums *Foridoles* (1994) and *Pôle Position* (1995).

GARY STEWART

Wenck [Wenk], **August Heinrich** (*b* Brüheim, nr Gotha; *d* Amsterdam, *c*1814). German composer and glass harmonica player. According to Gerber, he studied the violin with Hataš and the harpsichord and composition with Georg Benda. He went to Paris with the latter in 1778 and stayed there until at least 1792 as an arranger of popular overtures and airs. On his return to Gotha he became honorary ducal secretary, lived on his small estate, made pianos that were much sought after, and worked at perfecting the glass harmonica, with which he toured as a virtuoso. In 1788 he launched a periodical music collection

which was intended to appear quarterly but which seems never to have got beyond its first issue: *Variétés musicales pour le piano-forte ou clavecin avec accompagnements . . . mêlées de chant avec paroles italiennes et françaises*. In addition he published overtures and airs from favourite operas, mostly for piano or harpsichord with violin accompaniment but in one case for string quartet. He also published a set of *Six petites sonates* op. 1 (n.d.) and another of *Sonates et pièces* op.2 (four of each) for keyboard with violin ad libitum, as well as a *1er simphonie* op.3 for the same combination. These last two were advertised in 1783; the *simphonie*, in the style of a piano reduction of orchestral textures, was to have been the first of six. In addition, Gerber reported three violin trios and a bassoon concerto in manuscript. In 1798 Wenck made improvements to the metronome of Sauveur and Duclos, which he described in *Beschreibung eines Chronometers* (Magdeburg, 1798) and which he sold in quantity. In 1806 he moved to Holland, settling in Amsterdam, where he was still living in 1810.

DAVID FULLER

Wenckel, Johann Friedrich Wilhelm. *See* WENKEL, JOHANN FRIEDRICH WILHELM.

Wendelstein, Johannes. *See* COCHLAEUS, JOHANNES.

Wender, Johann Friedrich (*b* Dörna, nr Mühlhausen, bap. 6 Dec 1655; *d* Mühlhausen, 13 June 1729). German organ builder. He rebuilt the organ at Divi-Blasii-Kirche, Mühlhausen, in 1687–91 (to a plan by J.G. Ahle); he built an organ at Seligenstadt Abbey, 1695; one at the Neue Kirche, Arnstadt, 1701–3 (tested and played by Bach), and he enlarged the organ at Divi-Blasii, Mühlhausen, in 1708 (to a plan by Bach). He also built an organ at the Maria Magdalen-Kirche, Mühlhausen, in 1702 (today preserved in Dörna), and at the Severikirche, Erfurt, in 1714 (the case survives); enlarged one at Merseburg Cathedral in 1714–16 and built one at the Kaufmannskirche, Erfurt, in 1728–9. His work was much in demand; among those who had a high opinion of it were Bach, Kuhnau and Mattheson (who ranked him with Gottfried Silbermann).

In his Principal choruses Wender aimed at the classical arrangement (8′, 4′, 2⅔′, 2′, Mixtur, Zimbel, on the *Hauptwerk*; 4′, 2′, 1⅓′, Sesquialtera, Zimbel, on the Positive – even his Pedal upperwork normally included a Mixtur). He also included other flute stops of various kinds (16′, 8′, 4′ on the *Hauptwerk*; 8′, 4′, 2′ on the Positive); reeds were restricted to 8′ Trompete on the Great, with 16′ Posaune and 8′ Trompete on the Pedal, where he often added (in the older style) higher stops, such as 2′ Cornett and 1′ Rohrflöte.

One of Wender's pupils was Johann Christian Dauphin, who later moved to Kleinheubach am Main, and another may have been his son-in-law Johann Nikolaus Becker, who later became court organ builder to the Prince of Kassel. Wender's son, Christian Friedrich Wender (whose dates are unknown) restored the organ at the Marienkirche, Mühlhausen (1735–9). His reputation did not equal his father's.

HANS KLOTZ/FELIX FRIEDRICH

Wendius [Wend, Wendin, Wendt], **Johannes** (*b* Moringen, nr Göttingen, last third of the 16th century; *d* after 1608). German composer. Judging from the prefaces to both parts of his *Newe teutsche geistliche Lieder* (Hamburg, 1597) he studied theology about this time. Later he became rector of the school at Moringen, and from 1606 he was pastor at Volpriehausen. His songs of 1597 are for three high voices. He took as his formal model for them the villanellas of Jacob Regnart, although the partly polyphonic movement conforms more to older practice. The texts are mostly contrafacta. A collection by Wendius mentioned by Georg Draudius (in his *Bibliotheca librorum germanicorum classica*, 1625) – *Etliche Hochzeit-Lieder*, for four and eight voices (Kassel, 1608) – has not come to light. (J.G. Domeier: *Die Geschichte der Stadt Moringen*, Göttingen, 1753)

HANS-CHRISTIAN MÜLLER

Wendling. German family of musicians of Alsatian descent, active at the courts of Zweibrücken, Mannheim and Munich.

(1) **Johann Baptist Wendling** (bap. Rappoltsweiler [now Ribeauvillé], 17 June 1723; *d* Munich, 27 Nov 1797). Flautist and composer. His forebears originated from a region of Alsace with a strong musical tradition of fife playing and both his father and grandfather were musicians. From about 1745 to 1752 Wendling was the flute teacher of Duke Christian IV of Zweibrücken (ruled 1735–75), with whom he travelled to various European centres, achieving international fame; he performed successfully before King Frederick the Great in Berlin in 1749 and at the Concert Spirituel in Paris in 1751. On 9 January 1752 he married the soprano Dorothea Spurni (see (3) Dorothea Wendling (i)), and the couple performed together at the Concert Spirituel on 27 March. In the same year Wendling succeeded M.F. Cannabich as flute teacher to Elector Carl Theodor of the Palatinate; throughout his career at Mannheim he was one of the most highly paid members of the court orchestra, on a salary of 1000 florins by 1776. From April 1771 to May 1772 he was in London, not only performing as a soloist but also collaborating with J.C. Bach in chamber music concerts and in the presentation of Bach's serenata *Endimione*. He continued to visit Paris and also visited The Hague (1775), Vienna (1776, 1779), Italy and Prague. The extent of Wendling's influence in musical circles is revealed in the Mozart correspondence of 1777–8. He organized the commission from Ferdinand Dejean which resulted in Mozart's Mannheim flute works K285, K285*a*, K313–15/285*c*–*e* and possibly KAnh. 171/285*b* and that from the Duke of Guines for the Concerto K299/297*c*, and in 1777 Mozart orchestrated one of his flute concertos K284*e*. According to Mozart, he was to have played in a performance of the lost Sinfonia concertante KAnh.9/297*b*. He became a founding member of the new Masonic lodge in Mannheim at the time of

Mozart's visit (1778). Wendling accompanied the Mannheim court in its removal to Munich in 1778 and was first flautist at least until 1790. In his latter years he revisited Mannheim to perform at the Concerts de Mrs les Amateurs.

One of the most celebrated flautists of his day, Wendling was praised especially for his accurate intonation and his full and incisive tone throughout the range of his one-keyed flute; Leopold Mozart described his playing as 'bewunderungswürdig'. His influence as a performer can be found in music by J.C. Bach and Mozart as well as his Mannheim colleagues; his impact as a teacher was felt in both Germany and Paris.

Wendling composed a significant body of flute music, but earlier assessments of it have been distorted by the misattribution to him of six flute quartets by F.H. Graf (Berlin and Amsterdam, *c*1775). His published works of the 1760s pioneered a new style of idiomatic flute writing, extending its virtuosity and expressive capabilities, while in his three quartets op.10 (1781) and six trios op.11 (1785) he combined this with a concertante style supported by string figuration in the style of the mature Mannheim School.

(2) Franz Anton Wendling (bap. Rappoltsweiler, 24 Oct 1733; *d* Munich, 16 May 1786). Violinist, brother of (1) Johann Baptist Wendling. He joined the Mannheim orchestra in 1755 and by 1756 was a first violinist. In 1760 Elector Carl Theodor granted him study leave in Italy, and he spent time in Turin, where G.B. Somis was active. He returned with the soprano Elisabeth Augusta Sarselli (see (4) Elisabeth Augusta Wendling (i)), whom he married on 21 November 1764. In 1778 he moved with the court to Munich, where he also occasionally directed the ballet orchestra. In 1784 he accompanied his daughter (7) Dorothea (ii) to Paris. After his death his valuable old Cremona violin was sold at auction. According to his contemporaries he was universally admired as a violinist.

(3) (Maria) Dorothea Wendling (i) [née Spurni] (bap. Stuttgart, 21 March 1736; *d* Munich, 20 Aug 1811). Singer, wife of (1) Johann Baptist Wendling. She was the daughter of two Stuttgart court musicians, the horn player Franz Spurni and Maria Dorothea (née St Pierre), a lutenist. After her Paris début with her husband in 1752, she was appointed a singer at the Mannheim court; her first role was on 17 January 1753 as Hermione in Galuppi's *Antigona*. With her first full-length prima donna role, as Beroe in Holzbauer's *Nitteti* (1758), she was established as the leading soprano of the Mannheim stage. J.C. Bach wrote for her the role of Junia in *Lucio Silla* (1775), which features an extended aria with obbligato flute accompaniment. By 1776 her salary had reached 1500 florins. Mozart admired her singing and in 1778 composed for her a concert aria, K486*a*/295*a*. After the court's removal to Munich in 1778, she continued to work in both Mannheim and Munich; she sang the title role in Holzbauer's melodrama *La morte di Didone* at the newly founded Nationaltheater in Mannheim (1779) and created the role of Ilia in Mozart's *Idomeneo* (Munich, 1781). She performed again with her husband in Paris (1780) and later in the Concerts de Mrs les Amateurs in Mannheim, but by 1790 she had retired to become a teacher; her daughter (6) Elisabeth Augusta (ii) and niece (7) Dorothea (ii) were among her pupils. She was acknowledged as one of the most expressive singers of her day, and was praised by Heinse as 'the German Melpomone of the golden age of Mannheim'. Wieland (in a letter to Sophie La Roche, 1777) commented, 'Her singing excels everything I have ever heard, even from the famous Mara'.

(4) Elisabeth [Lisl] **Augusta Wendling (i)** [née Sarselli] (bap. Mannheim, 20 Feb 1746; *d* Munich, 10 Jan 1786). Singer, wife of (2) Franz Anton Wendling. The daughter of two Italian singers at the Mannheim court, Pietro Sarselli and Carolina (née Valvasori), she spent some time in Italy, 1760–61, and was appointed as a singer on her return to Mannheim. She usually sang seconda donna to her sister-in-law (3) Dorothea Wendling (i), making her début in 1762 as Cirene in Traetta's *Sofonisba*. Later she occasionally took prima donna roles, notably as Anna in a revival of Holzbauer's *Günther von Schwarzburg* (1777). In 1778 she accompanied the court to Munich, where she created the role of Electra in Mozart's *Idomeneo* (1781). She was to have sung Zelmira in Alessio Prati's *Armida abbandonata* (1785), but ill-health forced her to give up the part to her niece (6) Elisabeth Augusta Wendling (ii).

(5) (Johann) Carl Wendling (*b* Zweibrücken, 30 March 1750; *d* Mannheim, 10 Nov 1834). Violinist and conductor, nephew of (1) Johann Baptist Wendling. He was the son of Johann Carl, a chef at Zweibrücken, and is frequently confused with his cousin Carl Theodor (*b* 6 Oct 1753), a son of (1) J.B. Wendling. He joined the Mannheim orchestra in 1765–6 as an apprentice. When the court moved to Munich in 1778, he remained in Mannheim, where he played in the orchestra of the newly founded Nationaltheater and from 1782–3 also conducted it; he became joint director with Heinrich Ritter in 1793, and in 1802 was listed as a 'conducting first violinist'.

(6) Elisabeth Augusta [Gustl] **Wendling (ii)** (bap. Mannheim, 4 Oct 1752; *d* Munich, 18 Feb 1794). Singer, daughter of (1) Johann Baptist and (3) Dorothea Wendling (i). She first performed on the Mannheim stage at the age of 11 in a non-speaking role in Traetta's *Sofonisba*, and for the elector's nameday celebrations in 1769 she sang Cecchina in Piccini's *La buona figliuola*. She also sang in

Zweibrücken in Duni's *Les deux chasseurs et la laitière*. In 1772 J.C. Bach had hoped to marry her but by then she had already been the elector's mistress. In 1777 Mozart praised both her beauty and her singing, and he composed for her the two *ariettes* (K307/284*a* and K308/295*b*). After a period in Vienna, 1782–3, she made her Munich début, to great acclaim, as Juliet in Georg Benda's *Romeo und Julie* (1784). She later performed with her mother in the Concerts de Mrs les Amateurs in Mannheim. It was her singular physical beauty as much as her voice that impressed her contemporaries; she was described by Schubart as 'the first beauty of the orchestra' and was also admired by Wieland and Heinse.

(7) **(Katharina) Dorothea Wendling (ii)** (bap. Mannheim, 27 Jan 1767; *d* Munich, 19 May 1839). Singer, daughter of (2) Franz Anton and (4) Elisabeth Augusta Wendling (i). She was a pupil of her aunt (3) Dorothea Wendling (i) and of Anton Raaff. In 1784 she went to Paris to emulate her aunt's successes at the Concert Spirituel; she was praised in the *Mercure de France* (18 December 1784) for the 'sweetness, lightness and facility' of her voice. She and her father were subsequently involved in a dispute with Legros over payment for this engagement. In 1788 her appointment as 'virtuosa di camera of the opera seria' in Munich was announced by Bossler, who described her as 'Mara and Todi united'. She married the doctor J.M. Güthe (1753–1812) in 1789 and then spent some years in Mannheim; after his death she returned to Munich and succeeded her late aunt as the most highly respected singing teacher there.

EMILY GUNSON

Wendt, Johann. *See* WENT, JOHANN.

Wenick, Georges-Henri (*b* Visé, Belgium, *c*1718; *d* Monte Cassino, *c*1760). Belgian composer. Son of Joseph Wenick, a burgher of Visé, and Antoinette de Tiège, he seems to have studied music in the collegiate church of St Paul in Liège, under his uncles on his mother's side, Corneil and Nicolas-Henri de Tiège, who were respectively choirmaster and organist there. Later he was probably organist in Aachen before being appointed choirmaster in the collegiate church of St Denis in Liège, on 27 April 1740. On 25 February 1741 he was ordained priest. On 31 October 1742 the canons of St Denis expressed their satisfaction to him on account of a mass he had composed for the chapter. However, Wenick became rather too familiar with some of its younger members, often getting drunk in their company, and incurred the displeasure of his seniors. In 1750 he was sent to Rome, where his name is found on the registers of the Liège College (Darchis foundation) between 1751 and 1755. But Wenick remained deaf to instructions recalling him to the chapter of St Denis; nor was this all, for creditors in Liège, anxious about his prolonged absence, were clamouring for their dues. On 13 March 1753 he was relieved of his post as succentor and was replaced, on 22 December 1753, by his former pupil, Charles-François Jalheau (1730–95). The liquidation of Wenick's assets, which took place in Liège on 10 May 1754 under the instructions of P. Collinet, produced 164 florins. According to Hamal, Wenick became organist in Monte Cassino and died there about 1760.

The three dated works suggest that Wenick was inspired by the best Italian models, in particular by Alessandro Scarlatti. He makes full use of expressive harmony, with chromatic basses and Neapolitan 6ths. His orchestration is very thin and his melodic ideas are rather short, but their inner life is brought out by interesting ornaments, leaps of a 6th and diminished 7th, and unusual details of rhythm (Lombardic rhythms, syncopation, triplets and sextuplets).

JOSÉ QUITIN

Wenk, August Heinrich. *See* WENCK, AUGUST HEINRICH.

Wenkel [Wenckel], **Johann Friedrich Wilhelm** (*b* Niedergebra, nr Nordhausen, 25 Nov 1734; *d* Uelzen, ?1792). German keyboard player, music director and composer. He first studied music with his father and grandfather, then with C.G. Schröter in Nordhausen and later with the organist Carl Wilhelm Müller at Halberstadt. In 1756 C.P.E. Bach, J.P. Kirnberger and F.W. Marpurg helped him to obtain a position as a singing teacher at the Realschule in Berlin. In 1761 he was appointed music director for the churches at Stendal in the Altmark, and in 1768 moved to Uelzen as second master and organist. Wenkel's compositions, published during the 1760s and 1770s, are for solo keyboard, voice with keyboard, and sonatas and duets for flute or violin. Their style is typical of works composed by musicians working in and around Berlin at this period. He also contributed to the controversy surrounding a preface added to a collection of C.H. Graun's *Oden* (1761), siding with Marpurg against Quantz in his pamphlet: *Schreiben an die Herren Tonkünstler in Berlin, über die dem Vorberichte der ersten Graunischen Odensammlung von einem Ungenannten entgegengesetzte Anmerkungen* (Berlin, 1761).

HOWARD SERWER

Wennerberg, Gunnar (*b* Lidköping, 2 Oct 1817; *d* Läckö, 22 Aug 1901). Swedish composer, poet and politician. He began his humanistic studies in 1837 at the University of Uppsala, taking the doctorate in 1845. A year later he was appointed university lecturer in aesthetics. In 1849 he became a teacher at the cathedral school of Skara, where he had himself been a pupil. From 1861 he involved himself more and more in administrative and political matters. He was twice a member of the Swedish government as Minister for Ecclesiastical and Cultural Affairs (1870–75 and 1888–91); between these two periods he was governor in Växjö. From 1876 to his death he was a member of the first chamber of the Swedish parliament. In 1850 he was elected to the Swedish Royal Academy of Music and in 1867 to the Swedish Academy.

Wennerberg was a good amateur singer and pianist and entirely self-taught as a composer. In about 1840 he had begun to write solo songs, which were sung in the musical homes he used to visit in Uppsala. His patriotic songs for the male-voice Uppsala University Choral Union which he conducted for six months in 1846, were more important; 11 were published in the collection *Odinslund och Lundagård* (1849–62). Although their texts (mainly Wennerberg's) are now out of date, several are still sung and *Hör oss, Svea!* (1853) has been regarded almost as a national anthem. The tendency towards individualized, sometimes imitative part-writing which characterizes these songs is probably a result of Wennerberg's deep interest in old sacred music. He shared this interest with his close friend J.A. Josephson (1818–80), leader of the so-called Lilla Sällskap (1841–3), where Wennerberg and some other friends sang works including Handel's oratorios. He is said to have written some motets in an older style for this group. When Josephson left Uppsala in 1843, Wennerberg joined the Juvenalerna, a sort of glee club, for whom he wrote, among other pieces, a series of male voice duets with piano accompaniment, *Gluntarne*, describing in words and music the student life of Uppsala. *Gluntarne* (published 1849–51) soon became very popular throughout Scandinavia. The songs appeared in many later editions, as have also his settings of 55 of the *Psalms* for solo voice(s) and chorus with piano (first published 1861–86). Although Wennerberg had little time to devote to music he also wrote some large-scale works including a *Stabat mater*. He planned a series of oratorios on the life of Jesus, only two of which were completed, *Jesu födelse* and *Jesu dom*.

FOLKE BOHLIN

Wennerberg-Reuter, Sara (Margareta Eugenia Euphrosyne) (*b* Otterstad, Skaraborgs län, 11 Feb 1875; *d* Stockholm, 29 March 1959). Swedish composer, niece of GUNNAR WENNERBERG. She studied the organ and harmony with Andrée in Göteborg and then took examinations in organ playing and choral church music at the Stockholm Conservatory (1893–5). She was a pupil of Jadassohn and Reinecke at the Leipzig Conservatory (1896–8), and studied counterpoint with Bruch at the Berlin Hochschule für Musik (1901–2). Awarded the Litteris et Artibus in 1931, from the 1930s until her death she was the only woman in the Swedish composer society, Föreningen Svenska Tonsättare. She composed more than a hundred works. The most popular were the cantatas – among them those for the consecration in 1906 of St Sofia, Stockholm (where she was organist from 1918 to 1945), and for the quincentenary of the town of Lidköping (1946) – and also the melodious and lively male-voice quartets and songs.

ROLF HAGLUND

Wenrich, Percy (*b* Joplin, MO, 23 Jan 1887; *d* New York, 17 March 1952). American songwriter, singer and pianist. He was influenced by the black ragtime pianists in his hometown of Joplin and began composing while in his teens, publishing several early rags including *Noodles* (1906) and *The Smiler* (1907). He earned the nickname 'The Joplin Kid' from his birthplace. He then studied the piano at the Chicago Musical College, and subsequently became a song plugger and saloon pianist in Chicago and Milwaukee. After moving to New York he performed in vaudeville with his wife, Dolly Connolly, for about 15 years. Through promoting his own songs on the stage and visiting retail agents on his tours around the country, Wenrich earned a reputation as the ideal Tin Pan Alley songwriter. He wrote four shows for New York between 1914 and 1930, but is best known for his pre-war popular songs, such as *Put on your old grey bonnet* (1909), *Moonlight Bay* (1912), and *The Tulip and the Rose* ('When you wore a tulip') (1914), which are still favourites of barbershop quartets and American community singing. Many of Wenrich's manuscripts and other papers are in the Harry S. Truman Library at Independence and in the State Fair Community College Library at Sedalia, Missouri.

WORKS

(*selective list*)

Stage: (musical comedies unless otherwise stated; all first performed in New York): The Crinoline Girl (O. Harbach; lyrics, J. Eltinge), 16 March 1914 [incl. That Tempting Tango]; The Right Girl (R. Peck), 15 March 1921; Castles in the Air (Peck), 6 Sept 1926 [incl. Lantern of Love]; Who Cares? (revue, H. Clarke), 8 July 1930

Songs: Rainbow (A. Bryan) (1908); Under a Tropical Moon (C.R. McDonald) (1908); Up in a Balloon (R. Shields) (1908); Put on your old grey bonnet (S. Murphy) (1909); Moonlight Bay (E. Madden) (1912); The Tulip and the Rose (J. Mahoney) (1914); Where do we go from here? (H. Johnson) (1917); Sail along, silv'ry moon (H. Tobias) (1937)

Piano: (all rags; published in Chicago unless otherwise stated): Ashy Africa (1902); Peaches and Cream (New York, 1905); Dixie Blossoms (New York, 1906); Noodles (1906); Dixie Darlings (1907); The Smiler (1907); Sweet Meats (1907); Crab Apples (Erie, PA, 1908); Persian Lamb Rag (Boston, 1908); Cotton Babes (New York, 1909); Egyptian Rag (New York, 1910); Hula Hula (New York, 1911); Whipped Cream (New York, 1913)

Principal publishers: Arnett-Delonais, McKinley, Remick

DEANE L. ROOT

Wenssler, Michael (*b* Strasbourg; *fl* 1472–99). Alsatian printer, active at Basle. He established his printing shop in 1472, working with the first printer at Basle, Berthold Ruppel, and with Bernhard Richel. His name appears with Jacob von Kilchen's ('impensis spectatissimorum virorum MW et JK') on a spectacular series of printed music books of 1488: a gradual, two antiphonals, missals, and agendas. Another gradual of about 1486 has been attributed to him and a *Missale sarumburiense* was shipped to England in 1489 at the expense of Wenssler, Kilchen and Hans Wiler. In 1490 financial disaster forced Wenssler to sell his shop; he fled Basle and spent the next decade printing for others in Speyer and Basle and on his own in Cluny, Macon and Lyons. He was allowed to return in 1499. Several missals, vigils and psalters with printed music are attributed to him, but ownership of his types after 1490 is unclear.

Three music types were used in Wenssler's books and in books printed for Peter Drach in Speyer and others: a very large gothic chant type for the choirbooks and two missals for Worms (1486, 1488, 1489–90); a large gothic type chant for quarto vigils, agendas, psalters and folio missals (1490–1501 and later); and a roman chant type for the Sarum missal (1489). The use of black mensural type for the mensural chant of Glorias and Credos in the graduals is the second known use of mensural music type, after the 1480 Niger *Grammatica* printed at Venice by Theodor Franck of Würzburg. It is striking that the first printed music attributed to Wenssler is a reprint of that title in Basle, dated about 1485, with music printed from woodcuts.

M.K. DUGGAN

Went [Vent, Wend, Wendt], **Johann** [Jan] (**Nepomuk**) (*b* Divice, 27 June 1745; *d* Vienna, 3 July 1801). Bohemian oboist, english horn player and composer. He married twice, and had ten children, at least two of whom became professional musicians (Wilhelm, an oboist, and Joseph, an opera singer). His eldest daughter Maximiliane married the oboist and Kapellmeister Josef Triebensee. He was first employed as an oboist by Count Pachta in Prague, in the mid-1770s became first english horn player in the Harmonie of Prince Schwarzenberg at Wittingau (now Třeboň) and Vienna, and in 1777 accepted the additional post of second oboist in the Nationaltheater orchestra in Vienna. In 1782 he resigned his position with Prince Schwarzenberg to become second oboist to Georg Triebensee in the newly formed Kaiserlich-Königliche Harmonie. He retained this post until his death, along with those in the Nationaltheater and Hofkapelle, with a combined income of 900 gulden a year (100 more than Mozart's imperial salary) and additional fees for copying and composition.

Went is best remembered for his transcriptions of over 50 opera and ballet scores for Harmonie, and is regarded as a pioneer in this work. For almost 20 years he was largely responsible for the repertory of the emperor's Harmonie and, under special contract, the Schwarzenberg Harmonie, sometimes making two fundamentally different arrangements of a work to accommodate the english horns of the latter. There is little doubt that he also transcribed five Mozart operas for both ensembles including *Die Entführung aus dem Serail*. Went's only published works are three string quartets op.1 (Offenbach, 1791) and 23 *Pièces en harmonie* (Paris, *c*1790–95). Several transcriptions and other wind compositions were sold in manuscript editions by Lorenz Lausch and others, and the Traeg catalogue (1799) lists a symphony, 11 quartets, 5 flute duos, 6 quintets for oboe, bassoon and string trio, and 11 pieces of Harmoniemusik. Over 80 original works for Harmonie survive (mostly in *A-Wn* and *CZ-K*); several manuscripts are unsigned or lost.

ROGER HELLYER

Wenthin, Joachim Friedrich (*b* Otterstedt, nr Bremen, 10 Aug 1746; *d* 27 May 1805). German organ builder, also active in the Netherlands. His largest organ, a two-manual, 40-stop instrument (destroyed in World War II) was completed for the Grosse Kirche St Cosmas und Damian, Emden, in 1779. Other important organs were built at Backemoor (1783), Zweins (1785), Nieuwolda (1787; his best preserved instrument), Reepsholt (1789), Wolthusen (1790), Westerende (1793), Groothusen (1798), and Weener (1779–82), to which he added a Brustwerk and the last freestanding pedal towers in northern Germany, and rebuilt the cae in Rococo style. Wenthin introduced Rococo-style organ cases to East Friesland, along with 'modern' southern stops including the Viola di Gamba, Salicional, the labial Cornet, a wooden Traversflöte, Unda Maris and Vox Angelica. He also employed equal temperament. Knock called Joachim Friedrich 'a famous artisan'.

His son Joachim Wenthin (*b* 12 Dec 1778; *d c*1850) continued the workshop after his father's death and followed his style, working on organs in Emden, Uithuizen (1816; now Niehove) and in Westphalia at Lotte (1807), Halverde (1817) and Tecklenburg (1838). He moved to Tecklenburg in about 1820 and entered into a partnership with W. Meese in 1840. It is thought that he also built domestic organs.

ADRI DE GROOT

Wentzely, Mikuláš František Xaver [Vencelius; Wentzel, Nikolaus Franz Xaver] (*b c*1643; *d* Prague, 19 Oct 1722). Bohemian composer. Wentzely's origins and early training are obscure. He is first recorded, some time after 1678, at Kroměříž where he applied for a position in the service of the Prince-Archbishop of Olomouc, Karl Lichtenstein-Castelcorno. In 1684 he became organist and choirmaster of the Loreto Church in Prague, and in 1688 he went to Prague Cathedral in the same capacity. This was the most influential musical appointment in the Czech ecclesiastical hierarchy. Either then or slightly later he became Chancery Clerk to the Cathedral Consistory, a position he seems to have retained even after resigning his musical appointment in 1705. The records note that he was then in his 63rd year.

Wentzely's surviving compositions are surprisingly few considering his important position. There is one printed collection and a solitary motet in the Kroměříž archives. Several works are preserved in the music collection of the Knights of the Cross in Prague, and certainly his actual output was much greater, as is shown by the many works listed in other contemporary castle and monastery archives, but now lost. All his works are for the church. They employ the concertato style pioneered in the Czech lands by Michna, with florid solo lines and clearly differentiated homophonic sections.

ADRIENNE SIMPSON/JIŘÍ SEHNAL

Wenzinger, August (*b* Basle, 14 Nov 1905; *d* Basle, 25 Dec 1996). Swiss cellist and viol player. From 1915 to 1927, while still at school, he studied the cello at the Basle Conservatory with Treichler and Beyer-Hané; from 1927 to 1929 he studied in Cologne with Grümmer and Jarnach. He was first cellist in the Bremen Philharmonische Gesellschaft (1929–34), and in the Basle Orchester Gesellschaft (1936–70). From 1933 to 1947 he was also cellist in the Basle String Quartet; when this was dissolved he played in various ensembles in the Basle Gesellschaft für Kammermusik until 1968. In 1933 Wenzinger was one of the founders of the Schola Cantorum Basiliensis, and taught the viola da gamba, ensemble playing and ornamentation there. He directed the school viol quartet (founded in 1933–4), which became known particularly from 1947 for its confidently stylish performances, many of them recorded. At Herrenhausen (Hanover) from 1958 to 1966 he directed performances of Baroque operas, and from 1954 to 1958 the Capella Coloniensis, an orchestra for early music at WDR in Cologne. In 1955 he conducted the first-ever LP recording of Monteverdi's *Orfeo*. As early as 1936–43 he directed a chamber group, with the flautist Gustav Scheck. In 1968 he founded the viola da gamba trio of the Schola Cantorum Basiliensis, for which a series of works was composed, among them Kelterborn's Inventions and Intermezzi (1969–70), Beck's Dialogue (1969–70), and Loeb's Fantasia and Two Scherzi (1970) and Solo Sonata (1972). In 1960 Basle conferred on him an honorary doctorate.

Wenzinger was known as a first-class viola da gamba player, highly accomplished both stylistically and technically. He wrote many articles and a two-volume tutor for the viola da gamba, and also edited early music. In 1953, as the H.A. Lamb Visiting Lecturer, he lectured at Harvard University on performing practice and viola da gamba playing, and in 1954 he taught at Brandeis University. His interests also included modern music: he gave the first performances of Martin's Ballade for cello and of Othmar Schoeck's Cello Concerto.

JÜRG STENZL/R

Werba, Erik (*b* Baden, nr Vienna, 23 May 1918; *d* Hinterbrühl, nr Vienna, 9 April 1992). Austrian piano accompanist, teacher and writer on music. From 1936 to 1940 he studied at the University of Vienna, and at the same time attended courses in composition with Joseph Marx and piano with Oskar Dachs at the Music Academy. From 1949 he became known as one of the leading accompanists in Europe. He worked with such singers as Irmgard Seefried, Christa Ludwig, Walter Berry, Peter Schreier and Nicolai Gedda. In 1949 he was appointed professor of song and oratorio at the Vienna Music Academy; he gave courses in these subjects in many European countries, often with his wife, Ady, a singing teacher. His interest in Viennese operetta brought about the collaboration with the Viennese soubrette Elfriede Ott, which led to the rediscovery for the concert hall of *Komödienlieder* of the Biedermeier period. Werba also worked as a music critic for daily papers (1945–65) and in 1952 joined the staff of the *Österreichische Musikzeitschrift*, publishing numerous articles. His main interests were Wolf and Mozart.

Werbeck [Werbeke], **Gaspar van.** *See* WEERBEKE, GASPAR VAN.

Werckmeister, Andreas (*b* Benneckenstein, Thuringia, 30 Nov 1645; *d* Halberstadt, 26 Oct 1706). German theorist, organist, organ examiner and composer. His numerous treatises provide important documentation regarding organs and their tuning and musical thought in Germany in the 17th century.

1. LIFE. The known facts of Werckmeister's life derive from Götzen (a funeral oration). He spent his whole life in the relatively confined area of Thuringia on the north-eastern slopes of the Harz Mountains. His parents quickly recognized his musical gifts and sent him to an uncle, Christian Werckmeister, organist at Bennungen, near Sangerhausen, to study the organ and begin his general education. In 1660 he enrolled in the Gymnasium at Nordhausen and two years later moved to the Gymnasium at Quedlinburg, where another uncle, Victor Werckmeister, was Kantor. On 24 December 1664 he became organist at Hasselfelde, near Blankenburg, and remained there for ten years. He then served briefly as organist and notary at nearby Elbingerode and in 1675 returned to Quedlinburg, where through his uncle's recommendation he obtained the positions of organist at the collegiate church of St Servatius and at the court of Anna Sophia I, abbess and Countess Palatine; from 1677 he was also organist at St Wiperti. He took up his last post, as organist of St Martini, Halberstadt, in 1696.

2. WORKS. Though not educated at a university, Werckmeister was widely read in classical as well as contemporary literature on theology, mathematics, philosophy and music. He frequently referred in his writings to a number of German theorists, including Baryphonus, Calvisius, Gibelius, Kuhnau, Lippius and Printz, and felt specially indebted to Michael Praetorius, whose unpublished manuscripts were (according to his *Organum Gruningense redivivum*) in his possession. He also knew treatises by Glarean and by such important Italian authors as Artusi, Galilei and Zarlino. He published six major treatises as well as a number of briefer studies; another work, *Musicalische Paradoxal-Discourse*, appeared posthumously. From these writings he emerges as a profoundly religious thinker and as an ideal example of a musician frequently encountered in 17th-century Germany – the Protestant organist and theorist who worked in a number of small towns. Although he spent his life in a narrow geographical area, his influence was widespread in Germany in the 18th century: his treatises were often cited and discussed by such writers as Adlung, Mattheson and Walther. Walther went to Halberstadt in 1704 especially to visit him, and this led to an instructive correspondence and obviously influenced Walther's own treatise *Praecepta der musicalischen Composition* (1708).

Werckmeister was as celebrated an organ examiner as he was an organist. His *Orgel-Probe* provides a vivid picture of the methods he used in testing new or renovated instruments and together with his report on the organ built in 1596 at the castle at Gröningen, near Halberstadt, has significantly furthered the success of modern efforts to revive interest in the building of organs suitable for the performance of Baroque music. He is well known for his innovations in the tuning of keyboard instruments, though he has been incorrectly credited with the introduction of equal temperament, which he never described accurately. For the perfect 5ths, G–D, D–A, A–E and B–F♯ he used a tuning slightly tempered by a quarter of a comma, while the eight other 5ths remained pure. In his system the 3rds varied from those a quarter of a comma too large to others equalling Pythagorean tuning. His method did, however, enable organists and harpsichordists to move through the 12 keys of the chromatic scale with satisfactory musical results. Although it stopped short of equal temperament, in which all semitone steps are equal, his contribution was the penultimate step in that direction.

Werckmeister is also important for other reasons, particularly his richly documented testimony of what music meant to a Protestant church organist and theorist about 1700. His views are scattered through his several treatises, which, incidentally, are written in difficult German (even Mizler found the language 'somewhat unordered and un-German'). These works have not yet been studied in the detail they deserve, though Dammann (1954) provided a valuable survey. Werckmeister was essentially unaffected by the innovations of Italian Baroque music. His musical surroundings were nourished by traditions whose roots lay in medieval thought. The study of music was thus for him a speculative science related to theology and mathematics. In his treatises he subjected every aspect of music to two criteria: how it contributed to an expression of the spirit of God, and, as a corollary, how that expression was the result of an order of mathematical principles emanating from God. 'Music is a great gift and miracle from God, an art above all arts because it is prescribed by God himself for his service' (*Hypomnemata musica*). 'Music is a mathematical science, which shows us through number the correct differences and ratios of sounds from which we can compose a suitable and natural harmony' (*Musicae mathematicae Hodegus curiosus*). Musical harmony, he believed, actually reflected the harmony of Creation, and, inspired by the writings of Johannes Kepler, he thought that the heavenly constellations emitted their own musical harmonies, created by God to influence humankind. He took up a middle-of-the-road position in the ancient argument as to whether Ratio (reason) or Sensus (the senses) should rule music and preferred to believe in a rational interplay of the two forces, but in many of his views he remained a mystic and decidedly medieval. No other writer of the period regarded music so unequivocally as the end result of God's work, and his invaluable interpretations of the symbolic reality of God in number as expressed by musical notes supports the conclusions of scholars who have found number symbolism as theological abstractions in the music of Bach. For example, he not only saw the triad as a musical symbol and actual presence of the Trinity but described the three tones of the triad as symbolizing 1 = the Lord, 2 = Christ and 3 = the Holy Ghost.

Werckmeister's musical compositions include *Musicalische Privatlust* (Quedlinburg, 1689) for violin and continuo, as well as a number of organ and other works in manuscript (in the Stadt - und Universitätsbibliothek, Göttingen Germany). Although he was remote from the world of Italian opera, which stood for much that was modern in the music of his day, Werckmeister was

progressive to the extent that his concept of composition was based largely on harmonic rather than contrapuntal principles; this attitude also informs his important manual (1698) for the learning of thoroughbass both as a practical means for accompanying and as the foundation of composition. He also opposed the older German tradition among organists of composing music in tablature, and he strongly advocated abandoning solmization in the teaching of singing. The single-mindedness of his view of music within the framework of his musical and spiritual world did not, of course, embrace the Germany of the large secular courts or the major northern cities, where music was frequently an amalgam of the French and Italian styles. Yet the culture of his more circumscribed world of central Germany formed, in its last and greatest expression, one aspect of the more universal genius of Bach.

THEORETICAL WORKS

Orgel-Probe, oder Kurtze Beschreibung, wie und welcher Gestalt man die Orgel-Wercke von den Orgelmachern annehmen, probiren, untersuchen und den Kirchen liefern könne und solle (Frankfurt and Leipzig, 1681, 2/1698/*R* as *Erweiterte und verbesserte Orgel-Probe*, 5/1783; Eng. trans., 1976)

Musicae mathematicae Hodegus curiosus, oder Richtiger musicalischer Weg-Weiser (Frankfurt and Leipzig, 1686, 2/1687/*R*)

Musicalische Temperatur, oder Deutlicher und warer mathematischer Unterricht, wie man durch Anweisung des Monochordi ein Clavier, sonderlich die Orgel-Wercke, Positive, Regale, Spinetten und dergleichen wol temperirt stimmen könne (Frankfurt and Leipzig, ?1686–7[lost], 2/1691/*R*)

Der edlen Music-Kunst Würde, Gebrauch und Missbrauch, so wohl aus der heiligen Schrift als auch aus etlich alten und neubewährten reinen Kirchen-Lehrern (Frankfurt and Leipzig, 1691)

Hypomnemata musica, oder Musicalisches Memorial, welches bestehet in kurtzer Erinnerung dessen, so bisshero unter guten Freunden discurs-weise, insonderheit von der Composition und Temperatur möchte vorgangen seyn (Quedlinburg, 1697/*R*)

Nucleus musicus (MS, ?1697), lost

Die nothwendigsten Anmerckungen und Regeln, wie der Bassus continuus oder General-Bass wol könne tractiret werden (Aschersleben, 1698/*R*, 2/1715)

Cribrum musicum, oder Musicalisches Sieb (Quedlinburg and Leipzig, 1700/*R*, 2/1783)

Musicalisches Send-Schreiben (Quedlinburg and Aschersleben, 1700) [trans., with commentary, of A. Steffani: *Quanta certezza habbia da suoi principii la musica* (Amsterdam, 1695)]

Harmonologia musica, oder Kurtze Anleitung zur musicalischen Composition (Frankfurt and Leipzig, 1702/*R*)

Organum Gruningense redivivum, oder Kurtze Beschreibung des in der Grüningischen Schlos-Kirchen berühmten Orgel-Wercks (Quedlinburg and Aschersleben, 1705); ed. P. Smets (Mainz, 1932)

Musicalische Paradoxal-Discourse, oder Ungemeine Vorstellungen, wie die Musica einen hohen und göttlichen Uhrsprung habe (Quedlinburg, 1707/*R*)

GEORGE J. BUELOW

Werder, Felix (*b* Berlin, 22 Feb 1922). Australian composer of German origin. He received his early musical training from his father Boaz Bischofs Werder, a composer and conductor at a Berlin synagogue, and the Schoenbergian Arno Nadel. Following the rise of anti-Semitism in Germany, the family moved in 1934 to London, where Werder completed a patchwork education embracing music and architecture. In 1941 father and son were deported to Australia as voyagers on the notorious refugee ship 'Dunera'; while interned at Tartura, Werder was able to work as a composer and arranger (the First Symphony would appear to stem from this period). After military service, he was active as a carpenter, music arranger, teacher in schools, and then lecturer for the council of adult education in Melbourne. As the most interdisciplinary literate of his generation, he became a lively and provocative force in public education and criticism. In 1958 he co-founded the Camerata society to foster the works of Australian composers and joined the music staff of *The Age*, of which he was appointed principal music critic on the death of Le Gallienne in 1963. Werder had shown notable creative gifts and technical facility from his adolescence, but public recognition and performance were at first hesitant; the orchestral *Balletomania* (1940) had to wait eight years for its first performance. After 1948, however, commissions increased, and his many subsequent awards from 1968 on, both from Australia (including the Don Banks Fellowship in 1986) and Germany, attest not only to his compositional variety, but also to his provocative writing and broadcasting, and his contribution to the dissemination of Australian music (notably through the Australian Felix Ensemble which he formed).

In his extensive output of more than 300 works, Werder's musical vocabulary has drawn on Jewish folk tradition and synagogue cantillation, evident in pieces with Hebrew or biblical titles (e.g. *Koheleth* for soprano and chamber ensemble, *Bne Brith* for orchestra, *Kabbalah* for solo viola and *Chaldean Scenes* for clarinet, viola and piano), as well as in other works of a more abstract character, such as *Monostrophe* or the First Symphony. But throughout his career Werder has also shown a readiness to confront and adapt many of the major new currents that have appeared since 1920, including neo-romanticism (e.g. *Actomos* for strings), Hindemithian counterpoint (Symphony no.1), dodecaphony, post-war serialism and pointillism as practised by Nono and Stockhausen, clusters in the manner of Ligeti and Penderecki, elements of Xenakis and Cage, aleatory means and the use of space. His creative exploration of these trends has been, as a rule, ahead of other Australian composers – an almost breathless searching process similar to that of Krenek.

According to Werder, his 12 string quartets chart the evolution of his style most evidently. One of the happiest features of his eclecticism has been the absorption of the

formal, rhythmic and instrumental resources of middle and late Bartók, first heralded in the opening of the Fourth Quartet (1955) and developed more emphatically in the Fifth (1956) and Sixth (1962). With the Seventh Quartet (1965) a tauter, more individual style emerged, displaying a new clarity and depth of texture, and a more relaxed feeling. The Ninth (1968) introduced a freer technique using clusters. His music for mixed chamber ensembles has also enabled him to explore *musikantisch* and *spielerisch* elements of lyricism and contrast, in a style less pungent but more richly coloured than the quartets.

In his orchestral music, Werder initially incorporated both Jewish elements and 20th-century styles and concepts, but the symphonic genre has also been a means of reflecting on theoretical and aesthetic ideas from the literary and visual arts. Thus the Third Symphony ('Laocoon', 1965) and *Dramaturgie* (1966) confront the ideas of Gotthold Ephraim Lessing's two similarly named treatises, for which Werder's knowledge of the theories of C.P.E. Bach afforded the point of departure, while the Seventh Symphony ('Pique Dame', 1992) embraces Pushkin's ideas about dramatic time and place, character and psychology. Werder's prolific activity in this area led to a search for alternative abstract titles, resulting, in particular, in the *Strophe* series. Musically speaking, he has sought to explore not only the resources and character of solo instruments and groups, but also spatio-temporal applications. His *Abstract '67* attractively incorporates antiphonal elements in the use of three separate orchestral units, and the *Concert Music* (1971) suggests an orchestral counterpart to the works for mixed chamber ensemble, with the interplay of free passages between flute and pitched percussion in the second movement. Other resources have included chance and improvisation, and the use of shimmering sound blocks, as in *Sound Canvas* (1969).

While Werder has set an international range of authors in his solo vocal and choral music, in his stage works he has, for the most part, acted as his own adapter-librettist or worked with Australian writers. *Agamemnon* (1967, rev. 1977) and *Medea* (1985) attempt to recall earlier incantatory styles; other scores, including *The General*, *The Affair* and *Private*, with their often acidic social commentaries, also employ Sprechgesang and highly angular vocal and instrumental lines, linking them to the mainstream of German post-expressionist music theatre from Krenek to Klebe.

WORKS
(*selective list*)

OPERAS AND MUSIC THEATRE

Kisses for a Quid, op.39 (1, A. Marshall), 1960, Melbourne, Q Theatre, 23 March 1961
The General, op.69 (1, L. Radic), 1965, unperf.
The Agamemnon of Aeschylus (mime-chant op, 1, Werder, after Aeschylus), 1967, broadcast, ABC, 1967, rev. as Agamemnon, op.76, 1977, Melbourne, Grant Street, 1 June 1977
The Affair, op.99 (1, Radic), 1969, Sydney, Opera House, 14 March 1974
Private, op.103 (TV op, P. Rorke), Brussels, 1970, ABC, 7 Nov 1971
The Vicious Square, op.121 (op-masque, 2, Rorke), 1971, unperf.
The Conversion, op.138 (1, Werder, after F. Wedekind), unperf.
Bellyful, op.161 (1, Radic, after Bible), 1975, ?lost
The Director, op.190 (1, Werder), U. of Melbourne, 7 June 1980
Medea, op.222 (1, Werder, after Euripides), Melbourne College of Advanced Education, 17 Sept 1985
Belsazar, op.260 (1, Werder, after H. Heine), Dortmund, Gymnasium, 5 Oct 1988
Business Day, op.264 (Werder), 1989
The Last Tree, op.316 (favola in musica, Werder), 1994–5

BALLETS

En passon, op.61, 1964; La belle dame sans merci, op.130, 1973; Quantum, op.133, 1973; Bacchai Music Theatre Dance, op.289, 1991

VOCAL

Koheleth, S, chbr ens, 1951; Shir hashirim, cant, Mez, str, 1953; Radic's Piece, op.82, cant, 1967; Francis Bacon's Essays, op.119, orat, 1971; Jessaja, chorus (1994); settings of Hebrew texts, W. Blake, Catullus, G. Chaucer, J. Donne, A. Gryphius, F. Hölderlin, F. Nietzsche, R.M. Rilke, F. Villon, W. Whitman, W. von der Vogelweide

ORCHESTRAL

Syms.: no.1, op.6, 1943, rev. 1952; no.2, op.24, 1957; no.3 'Laocoon', op.67, 1965; no.4, op.107, 1970; no.5, op.119, 1971, rev. 1989; no.6, op.183, 1979; no.7 'Pique Dame', op.292, 1992; Wind Sym., op.279, 1990

ANDREW D. McCREDIE

Werdier, Pierre. *See* VERDIER, PIERRE.

Werf, Hendrik van der (*b* Hennaard, 1926). Dutch musicologist. He studied musicology at Nijmegen University with Smijers and choral conducting at the Utrecht Conservatory. After emigrating to the USA, he was employed by San Diego State University to teach music history and conduct choirs. In 1961 he began studying for the PhD at Columbia University, which he gained in 1964 with a dissertation on trouvères chansons. He was appointed to the faculty of the Eastman School of Music of Rochester University, New York, where he remained until his retirement in 1996. His research has focussed on music before 1300.

PAULA MORGAN

Werfel, Franz (Viktor) (*b* Prague, 10 Sept 1890; *d* Beverly Hills, CA, 26 Aug 1945). Austrian writer and poet. Like Schopenhauer, Werfel perceived music as a mystic primary experience and the most immediate expression of human beings freed from their material existence; he described it as 'God's remembrance of the word before the Fall of Man' ('Die Erschaffung der Musik', 1913). Singing, the 'most holy symbol of the lonely dialogue between God and men', represented for him the highest form of art, with its ultimate fulfilment being opera. This genre features prominently in his writings, both as scene setting and aesthetic object. Embedded in a critique of modernism, Werfel's dialectic conception of music history saw melody and the human voice 'dethroned' during the 19th century by symphonic instrumental music, a process he identified above all with Wagner. This explains Werfel's endeavour to reinstate Italian opera in German culture, especially the works of Verdi, whose music he had loved since attending as a youth Angelo Neumann's Italian seasons in Prague. His fictional *Verdi: Roman der Oper* (Berlin, 1924/*R*, rev. 2/1930; Eng. trans., 1925), planned since 1911 and drawing on original research, centres on the antithesis of Wagner and Verdi, of German and Italian music, and praises Verdi as an artistic and human paradigm free from Wagner's corrupting influence. In 1926 Werfel edited with Paul Stefan the first German collection of Verdi letters (*Das Bildnis Giuseppe Verdis*, Vienna, 1926; Eng. trans., enlarged, 1942, as *Verdi: the Man in his Letters*) and prefaced it with a lengthy biographical sketch. The first production of his freely translated and revised edition of Verdi's *La forza del destino*, which was performed in the same year under Fritz Busch in Dresden, was highly significant for the burgeoning 'Verdi Renaissance' in Germany. Although not the first 20th-century German revival of this opera, Werfel's adaptation was subsequently seen in all major German-language theatres and was also performed abroad. Translations of *Simon Boccanegra* (1930, Vienna) and *Don Carlos* (with Lothar Wallerstein; 1932, Vienna) followed. In numerous articles, Werfel defended his enthusiasm for Verdi against a mixed critical reception (many of these writings, including 'Die Erschaffung der Musik', are reprinted in *Zwischen Oben und Unten*, Stockholm, 1946, 2/1975/*R*). Resident in Vienna after the end of World War I, he and his wife, Alma Mahler-Werfel, emigrated to France in 1938 and settled in the USA two years later.

As well as leaving a few compositional drafts, Werfel collaborated with Ernst Krenek on the libretto for the scenic cantata *Zwingburg* (1924, Berlin) and wrote the text for Kurt Weill's biblical drama *Der Weg der Verheissung* (1934–5; rev. as *The Eternal Road*, 1937, New York). His writings have inspired various composers, including Carl Orff (early cantatas and songs), Darius Milhaud (*Maximilien*, 1932, Paris), Lodovico Rocca (*Monte Ivnor*, 1939, Rome), Giselher Klebe (*Jacobowsky und der Oberst*, 1965, Hamburg) and Aribert Reimann (*Troades*, 1986, Munich).

GUNDULA KREUZER

Werfel, Wenzel Wilhelm. *See* WÜRFEL, VÁCLAV VILÉM.

Werkprinzip (Ger.: 'department principle'). A term coined probably by the *Orgelbewegung* of the 1920s to describe the system for building organs in which each 'department' or *Werk* (i.e. a keyboard with its chest or chests and pipes) has its own separate structure. For convenience the keyboards (manual or pedal) are brought together at one console, but the earliest examples of the CHAIR ORGAN (Utrecht, *c*1390) may also have had their keyboard separate, behind the organist. Structurally separate but acoustically an entity, an organ could be built up of several discrete divisions depending on requirements. A likely order of size is:

Hw
Hw + dep. pedal
Hw + Bw + dep. pedal
Hw + Rp + dep. pedal
Hw + Rp + independent pedal
Hw + Bw + pedal towers
Hw + Rp + pedal towers
Hw + Bw + Rp + dep. pedal
Hw + Bw + Rp + pedal towers
Hw + Ow + Bw + Rp + pedal towers

(Hw = *Hauptwerk*; dep. pedal = pedal pulldowns; Bw = *Brustwerk*; Rp = *Rückpositiv*; Ow = *Oberwerk*; pedal towers = 1 or 2 chests in tall boxes to right and left.)

Usually, each department is built up on a Diapason rank (16′ pedal, 8′ Hw, etc.), hence the wrong explanation of the term as denoting '*Werke* based on a *Prinzipal*'. Almost all organs before *c*1700 were built according to one or other of the plans; exceptions were those French, south-east European, Spanish and English organs in which subsidiary chests were placed within the main case (*cadireta interior*, Echo, solo Cornet, etc.). The system's reputed advantages are that separate cases ensure maximum resonance and dispersal, departments can be added (at Lüdingworth, Hw/Bw of 1598, Rp/towers 1682) and such departments have different function and sound; but non-*Werkprinzip* organs also allow for this, and the strongest reason for building *Werkprinzip* organs today is that the organ music of 1500–1720 was written for this type.

PETER WILLIAMS

Werle, Lars Johan (*b* Gävle, 23 June 1926). Swedish composer. During his school years he taught himself to play the piano and led a jazz band. He studied musicology with Moberg at Uppsala University (1948–51), also singing in the Bel Canto choir and taking lessons in counterpoint with Bäck. In 1958 he was appointed a music producer for Swedish radio. With the advice of Lidholm he wrote his first work, *Pentagram* for string quartet, a rigorously serial composition; it won two Gaudeamus Foundation prizes in 1960. In his next piece, the *Sinfonia da camera*, he broke away from serialism, and he went on to complete his first opera, *Drömmen om Thérèse* ('Dream about Thérèse'). By seating the audience around an arena stage, with the small orchestra in groups behind it, Werle was able to generate a great sense of public involvement; and the opera was dramatically innovatory in its use of recorded material, making it possible for realistic action to be combined with interior monologues. The piece has been successfully performed many times in Sweden and abroad (it reached the Edinburgh Festival in 1974), and it gained for Werle the Nordic Council Music Prize in 1970. Werle continued to use flashback techniques, the use of collages and widely varying types of music in his next opera *Resan* ('The Journey'), commissioned by the Hamburg Staatsoper, in which the journey is one through mental hell. *Tintomara*, his third opera, is a lyrical mystery play around the murder of Gustavus III; the première of this sensitive, subtly shaded work was given on the bicentenary of the Stockholm Opera House. The subject of the chamber opera *Medusan och djävulen* ('Medusa and the Devil') is the power of breakdowns and paralysis. Werle uses his art in the struggle against warfare and pollution, as is exemplified in his later operas, such as the fables *Flower Power* and *Animalen* ('The Animal Congress') and *Gudars skymning* ('Twilight of the Gods'), a burlesque on modern secularization, and *Äppelkriget* ('The Apple War'); this is also true of the cantata *Ännu sjunger valarna* ('Still the Whales Are Singing') and the orchestral *Vaggsång för jorden* ('Lullaby for the Earth'). In *En midsommarnattsdröm*('A Midsummer Night's Dream'), which lies somewhere between opera and musical, Werle alternates between a traditional operatic style and jazz and rock. Leonardo da Vinci's life is depicted in *Lionardo*, in which the artist is confronted by horrors awakened by his pioneering weapon designs. In *Tavlan* ('The Painting'), one of Velazquez's most famous pictures, *Las meninas*, is brought to life on stage. The colourful, expressive style of the operas is matched in Werle's orchestral and vocal works. His *Canzone 126 di Francesco Petrarca* is in a spontaneous modern manner, but with Monteverdian madrigal qualities; in *Nautical Preludes*, against a backcloth of ocean, ports and maritime life, he created a rich fantasy, culminating in a violent storm.

WORKS
(*selective list*)

Operas: Drömmen om Thérèse [Dream about Thérèse] (2, L. Runsten, after E. Zola: *Pour une nuit d'amour*), 1960–64; Resan [The Journey] (2, Runsten, after P.C. Jersild: *Till varmare länder*), completed 1969; Tintomara (3, L. Söderström, after C.J.L. Almqvist), completed 1973; Medusan och djävulen [Medusa and the Devil] (lyrical mystery play, E. Grave), 1973; Flower Power (T. Danielsson), 1974; Animalen (musical, Danielsson), 1979; En midsommarnattsdröm (2, W. Shakespeare), 1984; Gudars skymning [Twilight of the Gods] (cabaret, 1, Werle), 1985; Kvinnogräl [Women's Quarrels] (1, K. Forsmark, after F. Schiller: *Maria Stuart*), 1986; Lionardo (3, C. Fellbom), 1985–8; Väntarna [The Ones who Wait] (chbr op, I. Bergkwist, after W. Aspenström), 1989, rev. 1991; Tavlan: en eftermiddag på Prado [The Painting: an Afternoon at the Prado] (chbr op, Bergkwist), 1991, rev. 1993; Hercules (opera-comedy, Bergkwist, after G. Stiernhielm), 1993; Äppelkriget (2, Bergkwist, after H. Alfredson and Danielsson), 1995-6; Pandora (2, Bergkwist), 1998

Orch: Sinfonia da camera, 1961; Summer Music 1965, str, pf, 1965; Zodiak, ballet, 1966; Vaggsång för jorden [Lullaby for the Earth], 1977; Födelse [Birth], sym. wind, 1992; incid music, film scores incl. Persona, Vargtimmen, both dir. Bergman

Vocal: Canzone 126 di Francesco Petrarca, chorus, 1967; Sound of M4 b, children's vv, 4 rec, pf, perc; Nautical Preludes (Werle), 1970; Now all the fingers of this tree (e.e. cummings) S, a fl, pf, perc, db, 1971; Chants for Dark Hours (D. Parker), Mez, fl, gui, perc, 1972; Lyriska sånger (Grave, M. Rying, L. Englund), 1v, pf, 1973–5; Fabel (Danielsson), 5vv, 1974; A Song of Songs (G. Fröding, trans. P.B. Austin), Bar, pf, 1975; Smultronvisa [Song of Wild Strawberries] (Werle, after G. Brusewitz), 1v, fl, str orch, 1976, rev. 1978; Sonetto di Petrarca 292, SATB, 1979; Är gryningen redan här [Is the dawn already here?] (ballet, E. Taube, after Provençale poems), 6 vv, chbr ens, 1980; Trees, 4 Poems (Cummings), Bar, 2 S, 2 A, 2 T, 2 B, chorus, 1982; Uti Tolosa (trans. Taube), Bar, pf, 1983; 2 trubadurdikter (P. Vidal), 1v acc., 1983; Sonetto trentacinque (F. Petrarch), S, A, T, B, SATB, 1989; Svanstankar [Tail Thoughts] (Danielsson), male choir, pf, db, 1989; Orpheus (Shakespeare), SATB, 1989; En sorgsen sonett i april (Danielsson), male choir, 1989; Sweet Sixties (S. Åkesson), S,

A, T, B, kbd, 1990; Krusbär och åkerbär [Gooseberries and Brambles] (Almqvist), A amp., SATB, tuba, 1992; Ännu sjunger valarna [Still the Whales Are Singing] (Bergkwist), S, Mez, T, B-Bar, str qt, db, perc, 1992; Har den äran lille Matti: en födelsedagsfest [Happy Birthday, Little Matti] (K. Lundgren), solo vv, org, wind orch, tape, dance, 1992; Sonetto 292 (Petrarch), S, SATB, 1993

Inst and tape: Pentagram, str qt, 1959–60; Attitudes, pf, 1965; Variété, str qt, 1971; Det himmelska djuret (Rying), tape, 1975; Två miniatyrer, fl, mar, 1988, rev. 1989

ROLF HAGLUND

Werlin, Johannes (i) (*b* Landsberg am Lech, Bavaria, 1588; *d* Seeon, Bavaria, 29 May 1666). German music anthologist, composer and poet. He studied at the monasteries of Diessen and Andechs in Bavaria. In 1609 he became a novice at the Benedictine monastery at Seeon. In 1625 he was appointed prior there and in 1634 choirmaster. The 17th century was a period of particularly rich musical activity in Bavarian monasteries, and Werlin was one of many monks appointed to compose and compile music for use in individual cloisters. To this end, along with antiphonaries and catalogues, he produced his main work, the six-volume *Rhithmorum varietas: typi, exempla & modulationes rhythmorum opera & studia* (MS, *D-Mbs*, 1646). It contains 2946 melodies, from simple folktunes to more sophisticated 16th- and 17th-century art songs (*Gesellschaftslieder*), all with thoroughbass accompaniment and systematically ordered for instruction in prosody and melodic writing. It is the most comprehensive collection of melodies of the Baroque era and important for its poems too.

WALTER SALMEN

Werlin [Werlinus], **Johannes (ii)** (*b* Oettingen, nr Nördlingen; *d* ?Lindau, Lake Constance, *c*1680). German composer. He himself stated that he came from Oettingen. In 1636 he went to Lindau, where he taught at the grammar school for 40 years. He was highly active there in the field of church music: Riesch reported that Werlin gave almost 1200 pieces of music to the school and the church in 1665. His surviving output is typical of the period of transition from the age of the motet to the age of the sacred concerto. The pieces in *Melismata sacra* belong more to the realm of the sacred madrigal, whereas those in *Psalmodiae novae* can be regarded as sacred concertos. There are 22 of the latter, based on well-known Lutheran hymns, and in ten of them the cantus firmus appears in an old-fashioned manner in long note values in the tenor. But it can also be left out, for the pieces can be performed with smaller or larger forces depending on the circumstances. The music obviously originated in Werlin's school activities, since he stated that it was 'to be sung on weekdays'. *Irenodiae* consists of litanies which owe their existence to the 'still very dangerous times' of the Thirty Years War: they are scored for all possible combinations of two to four voices, including equal voices. The source of the texts, which are all German, is unknown, as is that of the Latin *Melismata sacra*; the latter seem to derive from the widespread mystical devotional literature of the early 17th century.

WALTER BLANKENBURG/DOROTHEA SCHRÖDER

Werner, Christoph (*b* Gottleuba, Saxony, 1617–18; *d* Danzig [now Gdańsk], bur. 9 Nov 1650). German composer. In some sources he is called Christian Werner but this, as Rauschning pointed out, is the result of confusion with Christian Meyer, Kantor at the Marienkirche, Danzig, during the period 1650–78. Nothing is known about his early musical education. He was substitute Kantor in 1646 and then Kantor from 1646 to 1650 at St Catherine's, Danzig. When the elder Kaspar Förster became ill he deputized for him as Kapellmeister of the Marienkirche, Danzig, and later applied for the position himself. In 1650, however, he was summoned to become vice-Kapellmeister of the Saxon electoral court in Dresden but died at the age of 32 before assuming the post. He was succeeded in Danzig by Crato Bütner. In the well-known dispute between Marco Scacchi and Paul Siefert he is represented by a letter contained in the former's *Judicium cribri musici* (*c*1649; lost, but manuscript transcript in *I-Bc* E50, ed. in Katz) in which he sided with Scacchi, who had addressed a long letter on the subject to him in about 1648 (*D-Hs*, ed. in Katz, 83). In the preface to his *Musicalische Arien* (1649) Werner further underlined his opposition to Siefert.

Werner's significance as a composer lies in the role he played in developing the German sacred ensemble song; during his brief career in Danzig his position was similar to that of Heinrich Albert in solo song composition in

Königsberg. Parallel to the efforts of Johannes Maukisch and Thomas Strutz at Holy Trinity, Danzig, he worked with Michael Albinus at St Catherine's to produce folk-like sacred songs, which above all served the needs of school and home (it was through the activity of Pastor Albinus, along with that of Georg Weber (ii), that the cultivation of sacred songs was brought into close association with Danzig poetic circles such as the one around Martin Opitz). Werner's *Praemessa musicalia* (1646) consists of 15 small sacred concertos based on biblical and lyrical texts in both Latin and German. His most important work, *Musicalische Arien*, which was emulated in Strutz's *Hertzens-Andacht* (1656), has texts by Pastor Albinus, reflecting the aim 'that young people might be more practised and improved'. It contains 17 four-part sacred songs with simple, singable melodies; in the preface Werner stated that they might also be sung as solo songs. Such pieces played a part in the early development of the solo cantata.

Christoph's brother Friedrich Werner (*b* Gottleuba, 3 October 1621; *d* Dresden, 4 April 1667) was trained by Heinrich Schütz in Dresden, and spent the years 1633–5 in Denmark with him. He was employed in the Kapelle of the Electoral Prince Johann Georg of Saxony as a boy instrumentalist in 1637, and as a cornett player and alto singer in 1639. He was with Schütz in Denmark again between 1642 and 1647, and during the period 1647–8 he studied in Vienna with the imperial cornett player Giovanni Samsoni. When the prince succeeded as Elector Johann George II, Friedrich was appointed to the electoral Kapelle and became a principal instrumentalist in 1663. He obviously acted as go-between, both in obtaining Schütz's opinion in the dispute between Scacchi and Siefert, and in getting his brother Christoph appointed electoral vice-Kapellmeister. In the 1650s he provided the musical education of the younger Christoph Werner, who was a civic musician in Danzig in the years 1671–1701.

WORKS

JERROLD C. BAAB/KLAUS-PETER KOCH

Werner, Eric (*b* Vienna, 1 Aug 1901; *d* New York, 28 July 1988). American musicologist of Austrian birth. He attended the Berlin Hochschule für Musik (graduated 1924) and the universities of Berlin, Graz, Göttingen, Prague and Vienna, simultaneously studying composition (with Busoni, Reitsch and Schreker), musicology (with Adler, Fischer, Lach, Ludwig, Sachs, Schünemann and Wolf) and Judaic studies. He took the doctorate in musicology (Strasbourg, 1928), with Théodore Gérold. Werner taught at Saarbrücken Conservatory (1926–33) and the Jewish Theological Seminary in Breslau (1935–8).

In 1938 he fled the Nazi regime, emigrating to the USA where in 1939 he joined the faculty at Hebrew Union College (Cincinnati) as A.Z. Idelsohn's successor. There he drew upon the magnificent Eduard Birnbaum collection for his early research on Jewish music. At Cincinnati he conceived the idea for a school of sacred music in New York to be linked with the Jewish Institute of Religion (founded in 1922), which was ultimately realized in 1950. He taught there until his retirement in 1967 as professor emeritus of liturgical music. He served as chairman (1967–72) of the new Department of Music at Tel-Aviv University.

Werner's pioneering research into Jewish music, culminating in *The Sacred Bridge*, encompassed such diverse subjects as comparative Jewish and Christian chant, synagogue liturgy and chant, the Dead Sea Scrolls, medieval Jewish music and the traditional music of Ashkenazi Jewry; many of his views however have attracted scholarly debate. He also produced a comprehensive biography of Mendelssohn and prepared editions of music by Salamone Rossi (New York, 1956) and Salomon Sulzer (DTÖ, cxxxiv, 1983). His knowledge of mathematics, philosophy and musical aesthetics are apparent in his writings. He felt that new synagogue music should reflect current musical trends but at the same time preserve its unity with the spirit of tradition; this is reflected in the liturgical musical settings among his compositions.

ISRAEL J. KATZ

Werner, Fritz (Eugen Heinrich) (*b* Berlin, 15 Dec 1898; *d* Heidelberg, 22 Dec 1977). German conductor, organist and composer. Born into a family of musicians, he studied the piano, the organ and music history with, among others, Wolfgang Reimann and Fritz Heitmann in Berlin. From 1932 to 1935 he studied composition with Georg Schumann at the Akademie der Künste and received the Mendelssohn Award in 1935. Between 1936 and 1940 he was director of music at the Nikolaikirche, Potsdam. During the German occupation he acted as musical director of French broadcasting in Paris. After the war Werner moved to Heilbronn, where he became organist and founded the Heinrich-Schütz-Chor in 1947. He made over 50 recordings with the choir, including pioneering recordings of many Bach cantatas which are still widely admired for their strength and directness. His compositions are firmly rooted in the tonal tradition and include orchestral, chamber and choral music.

MARTIN ELSTE

Werner, Gregor Joseph (*b* Ybbs an der Donau, 28 Jan 1693; *d* Eisenstadt, Burgenland, 3 March 1766). Austrian

composer. From 1715 to 1716 (or possibly 1721) he was organist at Melk Abbey. He married in Vienna (where he may have been a pupil of J.J. Fux) on 27 January 1727, and moved from Vienna to Eisenstadt to take up an appointment as Kapellmeister at the Esterházy court on 10 May 1728. As successor to the post of Wenzel Zivilhofer he received a salary of 400 gulden in addition to 28 gulden lodging money per year, increased in 1738 and, on his son's joining the establishment as alto singer, in 1740. Werner also taught some musicians in Eisenstadt, including Johann Novotný and S.T. Kolbel.

According to a decree issued by 1 May 1761, Haydn took over the princely musical establishment which Werner had brought to a high standard. However, Werner remained as Oberhofkapellmeister and was entrusted with the sacred music, which had always been of primary interest to him. Predictably, strained relations arose between Werner and the much younger Haydn. In a petition of October 1765 to Prince Nikolaus von Esterházy, Werner complained of negligence in the castle Kapelle and the decayed state of the once strong musical establishment, blaming this on Haydn's indolence; Werner made known that because of his great age he was unable to take matters into his own hands but had to rely on the intervention of others. He also pleaded for additional supplies of wood to enable him to survive the winter. Clearly he thought his death was imminent, and in fact he died at the end of that winter. This bitter letter shows the depth of his resentment towards Haydn, whom he is said to have called a *Gsanglmacher* ('little song-maker'). Haydn was called to order by the princely administrator; the accusations of laziness caused him to keep his own thematic catalogue from then on. In his old age Haydn left a memorial to his former Oberhofkapellmeister with his edition (1804) of six introductions and fugues for string quartet, taken from Werner's oratorios.

Werner's music reflects several different tendencies. In church music, which occupied him until his last years, he composed *a cappella* masses in a strict contrapuntal style but also works with string and wind accompaniments markedly influenced by the Neapolitan tradition. He was, however, a capable contrapuntist and a composer who thought naturally in contrapuntal terms. Although his melodic style was sometimes angular, in a manner reminiscent of Zelenka's, he could also produce, as in his secular cantatas and his Christmas pieces (which include pastorals for organ with strings and oboes), themes of a simple, folksong-like character. His symphonies and trio sonatas follow the conventional three- and four-movement patterns of his time; but he also composed works, notably the *Musicalischer Instrumental-Calender*, using representational effects.

WORKS

ORATORIOS

performed in Eisenstadt

Fasciculus myrrhae dilectus, oder das geliebte Mhyrrenbüschel, 1729, *A-Wgm*; Die betrübte Tochter Zion, oder die unter dem Kreuz nach Ruhe verlangende Seele, 1732, *Wgm*; Mater dolorum, das ist Die schmerzhafte Mutter, 1733, *Wgm*; Der so eyffrig in sein Schäflein verliebte ... gute Hirt, 28 March 1739, *H-Bn*; Die von dem stoltzen Holoferne bis zum Todt gebreste ... Stadt Bethulia, 1742, *Bn*; Der so treu- als heyllos wider seinen sanfftmüthigen Vatter David rebellierende Sohn Absolon, 13 April 1743, *Bn*; Der keusche Joseph, 1744, *A-Wgm*; Die allgemeine Auferstehung, 16 April 1745, *H-Bn*; Die glück-seeligst vermählte und bis zum höchsten Gipfel der ehren erhobene Durchläuchtige Braut Esther, 8 April 1746, *Bn*

HUBERT UNVERRICHT

Werner, Sven Erik (*b* Copenhagen, 21 Feb 1937). Danish composer and teacher. After completing studies in Danish

and music at Copenhagen University in 1964, he worked until 1970 as programme secretary at Danish Radio. As a composer he was a late starter and essentially self-taught: he had one of his first compositions, the wind quintet *Jubilus*, accepted for performance at the 1968 Palermo festival. He was principal of the Fyn Conservatory in Odense between 1974 and 1989, during which period he founded the organization Funen Young Musicians (1982), and briefly, together with Poul Nielsen, edited the *Dansk Musiktidsskrift* (1972–4). He also served as a member of the National Music Council (1983–91), and from 1992 as chairman of the state-sponsored record company DaCapo.

Werner's extensive involvement in administration and in Danish cultural and musical debate has limited the volume of his production. His output nonetheless contains many substantial and personal works. While the most prominent influences on his music are those of Stockhausen and the Polish avant garde, Lutosławski especially, his works incorporate a variety of stylistic elements, and cover a wide range of genres. He has written works for both television (*Cancer*, 1970, and *Formynderne*, 1973–80) and the stage (*Den Hellige Kommunion*, 1972–3), as well as a number of educational works, such as the *Twelve Tango Studies* (1991–3) for accordion. Elements of Messiaen's compositional techniques are found in *Tie-Break* (1984) for accordion ensemble and the choral work *Hommage à Bruckner* (1984), while *Dramma giocoso* (1982) pays homage to Mozart's *Don Giovanni*.

'Mellem Auschwitz og Venedig: Hommage à Witold Lutosławski (1913–94)', *DMt*, lxix (1994–5), 74–83

ERIK H.A. JAKOBSEN

Wernick, Richard (*b* Boston, 16 Jan 1934). American composer. He studied at Brandeis University, where his composition teachers included Irving Fine, Harold Shapero and Arthur Berger, at Mills College (MA 1957) with Leon Kirchner, among others, and at Tanglewood with Ernst Toch, Boris Blacher and Aaron Copland. He also studied conducting with Leonard Bernstein and Seymour Lipkin. During the 1950s he worked as an incidental, film and television music composer. He went on to teach at SUNY, Buffalo, the University of Chicago and the University of Pennsylvania (1968–96). As musical director of the Penn Contemporary Players and other ensembles, he has directed numerous performances of new music, including many world premières. He has also served as contemporary music consultant for the Philadelphia Orchestra (1983–9) and as special consultant to music director Riccardo Muti. His honours include the Pulitzer Prize (1977), two Kennedy Center Friedheim first prizes, awards from the Ford, Guggenheim and Naumburg foundations, and commissions from Rostropovich and the Philadelphia Chamber Music Society.

Wernick's formative years were dominated by the pluralistic attitude of the 1960s. He has remarked, 'I occasionally find 12-tone rows that have interesting characteristics and I work out all their permutations', but has defined his general attitude as chordal-harmonic. His extensive output is dominated by large-scale works that reflect the influence of late Romantic forms and textures. His six string quartets adopt intensive quasi-Baroque contrapuntal devices, including cantus firmus techniques (String Quartet no.1, 1963) and elaborate fugatos (String Quartet no.5, second movement, 1996). His choice of texts for vocal and programmatic works has been guided by ideological messages. The *Kaddish Requiem* (1971), in memory of the victims of the Vietnam War, combines traditional mourning texts of Jewish and Christian services. *Visions of Terror and Wonder* (1978) alternates between verses from the Hebrew Bible, the Qu'ran and the New Testament, all of which call for peace. In the Viola Concerto (1986), Dylan Thomas's verse *Do not go gentle into that good night* leads a rhythmically energetic concerto grosso texture into an ethereal slow movement that ends with an allusion to the children's rhyme *This old man*.

Wernick's style has been described as tonally referential, but based on fixed intervallic cells; a frequent reiteration of motivic-harmonic gestures is characteristic in works such as the Violin Concerto (1981–2) and the Second Symphony (1995). The piano sonata *Reflections of a Dark Light* (1982) is based on a limited harmonic vocabulary initially presented as a set of four chords built of minor 6ths and minor 3rds. His frequent cooperation with performers such as Jan de Gaetani, Lambert Orkis and Gregory Fulkerson has led to highly idiomatic compositions for the voice, piano and violin.

WORKS
(*selective list*)

Vocal: A Prayer for Jerusalem, Mez, perc, 1971; Kaddish Requeim (trad.), Mez, fl + pic, cl + b cl, vn, vc + sitar, 2 perc, pf, tape, 1971; Contemplations of the Tenth Muse, I–II, S (1977–9); Visions of Terror and Wonder (Bible, Qu'ran), Mez, orch, 1978; A Poison Tree (W. Blake), S, fl, cl, vn, vc, (1980); The Oracle of Shimon Bar Yochai (Gates of Prayer), S, vc, pf, 1983; Oracle no.2 (The Rabbi of Kotzk) (quoted in C. Potok: *The Promise*), S, ob, pf, 1985; … and a time for peace, Mez, orch, 1994–5; Sym. no.2, S, orch, 1995; Str Qt no.5 (H. Senesh), S, str qt, 1996
